About this document

This manual contains information needed to install and use version 20.2 of the Integrated Outpatient Code Editor (OCE) software in a Microsoft® Windows® environment on a personal computer. This integrated version of the OCE software is for use in processing both OPPS and non-OPPS hospital claims. The software edits hospital outpatient medical records for possible errors in coding; assigns APCs for Medicare's outpatient prospective payment system (OPPS).

The manual includes an index to help you find specific information in addition to the Contents where general topics are listed. Appendix D summarizes the changes in this release.

Chapter 1: Introduction to the Integrated OCE software

The Integrated Outpatient Code Editor (OCE) program edits patient data to help identify possible errors in coding, and assigns Ambulatory Payment Classification numbers based on Healthcare Common Procedure Coding System (HCPCS) codes for payment under the mandated outpatient prospective payment system (OPPS).

The Integrated OCE program also edits claims for hospitals not subject to OPPS.

Product background

The OPPS OCE (formerly called the Outpatient Code Editor with Ambulatory Payment Classification - OCE/APC) and the Non-OPPS OCE (formerly called the Outpatient Code Editor - OCE) were combined into a single program, the Integrated Outpatient Code Editor (IOCE) effective 7/1/07.

The OPPS functionality of the Integrated Outpatient Code Editor (IOCE) software was developed for the implementation of the Medicare outpatient prospective payment system mandated by the 1997 Balanced Budget Act. CMS released the proposed OPPS rules using the Ambulatory Payment Classification (APC) system in the September 8, 1998 Federal Register. Final regulations were published in the April 7, 2000 Federal Register and the system became effective for Medicare on August 1, 2000.

The APC-based OPPS developed by CMS is the outpatient equivalent of the inpatient, DRG-based PPS. The APC system establishes groups of covered services so that the services within each group are comparable clinically and with respect to the use of resources.

Hospitals are required to use HCPCS when billing for outpatient services. HCPCS incorporates the following types of codes:

- Level I - The American Medical Association's Physicians' Current Procedural Terminology (CPT®)
- Level II - National codes developed by the Centers for Medicare & Medicaid Services (CMS)

Like the inpatient system based on Diagnosis Related Groups (DRGs), each APC has a pre-established prospective payment amount associated with it. However, unlike the inpatient system that assigns a patient to a single DRG, multiple APCs can be assigned to one outpatient record. If a patient has multiple outpatient services during a single visit, the total payment for the visit is computed as the sum of the individual payments for each service.

Certain services (e.g., physical therapy, diagnostic clinical laboratory) are excluded from Medicare's prospective payment system for hospital outpatient departments. These services are exceptions paid under fee schedules and other prospectively determined rates.

Versions of the program

The following table lists the versions and date ranges of the program contained in the current release of IOCE software for OPPTS processing. The third level in the version number (represented by an 'x' in the table) denotes the number of revisions created since the original OPPTS release. For example, 7.1.7 would be the seventh revision of the released version 7.1 product.

Note: Separately installed versions of the non-OPPTS OCE must be maintained for as long as necessary to process claims for all hospital outpatient services provided prior to August 1, 2000 when OPPTS was implemented; and non-OPPTS hospital outpatient services prior to July 1, 2007 when the non-OPPTS program was integrated into the OPPTS program.

Table 1. Program versions

Version	Effective date range
20.2.0	07/01/2019–07/01/2029 ^a
20.1.x	04/01/2019–06/30/2019
20.0.x	01/01/2019–03/31/2019
19.3.x	10/01/2018–12/31/2018
19.2.x	07/01/2018–09/30/2018
19.1.x	04/01/2018–06/30/2018
19.0.x	01/01/2018–03/31/2018
18.3.x	10/01/2017–12/31/2017
18.2.x	07/01/2017–09/30/2017
18.1.x	04/01/2017–06/30/2017
18.0.x	01/01/2017–03/31/2017
17.3.x	10/01/2016–12/31/2016
17.2.x	07/01/2016–09/30/2016
17.1.x	04/01/2016–06/30/2016
17.0.x	01/01/2016–03/31/2016
16.3.x	10/01/2015–12/31/2015

Version	Effective date range
16.2.x	07/01/2015–09/30/2015
16.1.x	04/01/2015–06/30/2015
16.0.x	01/01/2015–03/31/2015
15.3.x	10/01/2014–12/31/2014
15.2.x	07/01/2014–09/30/2014
15.1.x	04/01/2014–06/30/2014
15.0.x	01/01/2014–03/31/2014
14.3.x	10/01/2013–12/31/2013
14.2.x	07/01/2013–09/30/2013
14.1.x	04/01/2013–06/30/2013
14.0.x	01/01/2013–03/31/2013
13.3.x	10/01/2012–12/31/2012

a. The ending date of the current version will be modified to the actual ending date with the next release.

Included versions

To maintain a reasonable size for the program and data files, the IOCE will include only seven years of programs and files in each update. The earliest supported version in the current release is 13.3.x (effective 10/01/12); subsequent updates will drop the version corresponding to the earliest quarter as each new quarter is added. The program version table (page [12](#)) will be updated to reflect the versions of the program contained in the current release.

Purpose of the OPPS functionality

The IOCE software combines editing logic with the new APC assignment program designed to meet the mandated OPPS implementation. The software performs the following functions when processing a claim:

- Edits a claim for accuracy of submitted data
- Assigns APCs
- Assigns CMS-designated status indicators (page [20](#))

- Assigns payment indicators
- Computes discounts, if applicable
- Determines a claim disposition based on generated edits
- Determines if packaging is applicable
- Determines payment adjustment, if applicable

Purpose of the non-OPPS functionality

The IOCE program edits non-OPPS claims primarily for accuracy of submitted data.

Appendix A (page [403](#)) contains lists of codes associated with program edits for both OPPS and non-OPPS processing.

Changes since OPPS

Prior to OPPS, the program focused solely on editing claims without specifying any action to take when an edit occurred. It also did not compute any information for payment purposes.

While the program has maintained the editing function of previous versions, assignment of APC numbers for services has been added to meet Medicare's mandated OPPS implementation. The revised program indicates what actions to take when an edit occurs, and the reason(s) why the actions are necessary. For example, an edit can cause a line item to be denied payment while still allowing the claim to be processed for payment. In this case, the line item cannot be resubmitted but can be appealed (page [44](#)).

A major change is the processing of claims with service dates that span more than one day. Each claim is represented by a collection of data, consisting of all necessary demographic (header) data, plus all services provided (line items).

Note: It is the user's responsibility to organize all applicable services into a single claim record and pass them as a unit to the software.

The IOCE only functions on a single claim and does not have any cross claim capabilities. The software will process up to 99 line items per claim interactively, and up to 450 line items per claim in batch.

Coding for Outpatient services

Diagnoses are coded in ICD-9-CM or ICD-10-CM classification; procedures are coded in HCPCS classification.

Program input

The data elements shown in the following table are entered into the program for claim processing. You are not required to have every element entered for every claim.

Table 2. Data elements

Data element	UB-04 form locator
Type of bill	4
Period covered by statement, From, and Through dates	6
Birth date	10
Sex	11
Patient status	17
Condition codes	18-28
Occurrence codes	31-34
HCPCS/CPT procedure code(s) and modifier(s)	44
Service date	45
Revenue code	42
Service units	46
Charge	47
National provider identifier	56
OSCAR Medicare provider number	57
ICD-10-CM or ICD-9-CM diagnosis code(s) (principal dx/secondary dx)	67 (PDX) 67A-Q (SDX)
ICD-10-CM or ICD-9-CM diagnosis code (patient's RVDX1, RVDX2, and RVDX3)	70A-C (patient's RVDX)

Dispositions

Occurrence of an edit can result in one of six dispositions that act at either the line or the claim level. For example, an edit can cause a line item rejection or return the claim to the provider (RTP). A single claim can have one or more edits across all types of edit dispositions. Edit

dispositions are described in more detail in OPPS data output (page [36](#)) and Non-OPPS data output. (page [103](#))

In addition to individual dispositions, there is a claim disposition to summarize the overall status of the claim. For example, a claim can be paid with a line item denied or rejected, or the entire claim can be denied payment. Claim dispositions are also described in more detail in OPPS data output (page [36](#)) and Non-OPPS data output (page [103](#)).

Multiple day claims

The span of time represented by a claim is determined by the From and Through dates on the UB-04 form. The software subdivides the claim into separate days in order to determine discounting and multiple visits on the same calendar day.

For emergency room and observation claims, all services spanning more than one day are processed as separate days according to the dates of the entered line items.

If the From and Through dates span the effective date ranges for two program versions, the From date will determine which version is used for processing.

Edits

The extensive edits in the software, which are applied to claims as well as individual diagnoses and procedures, are described in more detail in OPPS program edits (page [51](#)) and Non-OPPS program edits (page [111](#)).

Information on APCs for OPPS

To better understand the IOCE product, this section provides general information on the APC system.

- Each HCPCS code that represents a service paid under OPPS is assigned to an APC. Other services are identified by a status indicator representing the method of payment.
- APCs are applied in the full range of ambulatory settings, including same day surgery, hospital ER, and outpatient clinics.
- Types of APCs are:
 - Significant procedure - In general, surgical APCs are specified by the T or J1 status indicator; the status indicator for non-surgical significant procedures is S.
 - Drug/Biological pass-through - The status indicator for drug/biological pass-throughs is G.

- Device pass-through - The status indicator for device pass-throughs is H.
- Brachytherapy sources - The status indicator for brachytherapy sources is U.
- Medical visit - HCPCS codes used to assign medical APCs are specified by (SI = V or J2).
- Ancillary service - HCPCS codes used in assigning ancillary APCs are specified by the X status indicator.

Note: SI of X is deactivated as of 1/1/2015 (v16.0).

- Non-pass-through drug or non-implantable biologicals - The status indicator for drug or biological non-pass-throughs, including therapeutic radiopharmaceuticals, is K.
- Blood and blood products - The status indicator for blood and blood products is R.
- Partial hospitalization - The status indicator for partial hospitalization services is P.

Appendix D (page [571](#)) contains a complete list of current APCs with their status indicators and descriptions.

Payment information

APC assignment involves codes being examined together as a group, providing payers and providers with a common language and allowing meaningful comparative analyses. The IOCE software facilitates the classification of the coding input. The system used for payment is defined separately.

Figure 1: Logic flow for APC assignment and reimbursement

After APC group assignment, APC reimbursement is calculated using APC weights, a base rate, and payment policies. The APC weights represent the relative effort required to perform the specific procedure. The base rate is a dollar value that converts the relative weight to a reimbursement amount.

To help understand the way OPPS reimbursement is calculated, this section will explain some of the basic rules and policies mandated for OPPS using APCs.

Packaging

Ancillary packaging is the inclusion of certain ancillary services performed as part of a visit into the APC payment rate for a significant procedure or medical visit. APCs include some packaging; in some instances, the payment for services integral to the delivery of the procedure or medical visit will be packaged into the payment for the procedure or medical visit.

In addition to facility charges, other services, such as anesthesia and minor incidental services, are always packaged into the payment. Except in special circumstances (page [66](#)), a facility will not receive additional reimbursement for packaged services.

Packaged services are specified by the N status indicator. However, OPPS logic sometimes requires packaging of services with a status indicator other than N. In these instances, a specific packaging flag may be used to indicate the packaged status or the SI may be changed to N. For more information, refer to the R record layout (page [133](#)).

Discounting

When multiple significant procedures are performed, or when the same service is performed multiple times, a discount may be applied. Multiple procedures done during the same operative session that will be discounted unless certain modifiers are present, are specified by the T status indicator.

The full payment amount is paid for the surgical procedure with the highest weight, and 50% of the payment amount is paid for other surgical procedures performed during the same visit. A T procedure terminated prior to anesthesia (modifier 52 or 73) is reimbursed at a discounted rate. All line items with SI other than T are subject to terminated procedure discounting when modifier 52 or 73 is present. The terminated procedure discount is 50%.

If the status indicator of a code changes during claim processing, the newly assigned indicator is used to compute the discount formula.

NCCI

The IOCE generates NCCI edits for OPPS and Non OPPS Facilities. All applicable NCCI edits are incorporated into the IOCE. Modifiers and coding pairs in the IOCE may differ from those in the NCCI because of differences between facility and professional services.

Effective January 1, 2006, NCCI edits apply to ALL services billed under bill types 12x, 13x, 14x, 22x, 23x, 34x, 72x, 74x, 75x, 76x, and 85x by the following providers: Skilled Nursing Facilities (SNFs), ESRD facilities (ESRDs), Community Mental Health Clinics (CMHCs), Outpatient Physical Therapy and Speech-Language Pathology Providers (ORFs), CORFs, Home Health Agencies (HHAs), and Critical Access Hospitals (CAHs).

The NCCI edits are applied to services submitted on a single claim, and on lines with the same date of service. NCCI edits address unacceptable code combinations based on coding rules, standards of medical practice, two services being mutually exclusive, or a variety of other reasons. In some cases, the edit is set to pay the higher-priced service, in other cases the lesser-priced service.

In some instances, both codes in a NCCI code pair may be allowed if an appropriate modifier is used that describes the circumstances when both services may be allowed. The code pairs that may be allowed with a modifier are identified with a modifier indicator of "1"; code pairs that

are never allowed, whether or not a modifier is present, are identified with a modifier indicator of "0". Modifiers that are recognized/used to describe allowable circumstances are: 24, 25, 27, 57, 58, 59, 78, 79, and 91, E1-E4, F1-F9, FA, LC, LD, LM, LT, RI, RC, RT, T1-T9, TA, XE, XP, XS, and XU.

All institutional outpatient claims, regardless of facility type, process through the Integrated Outpatient Code Editor (IOCE); however, not all edits are performed for all sites of service or types of claim. Please see the Edits by Bill Type (OPPS=1) table, which contains IOCE edits that apply for each bill type under OPPS processing; please see the Edits by Bill Type (Non-OPPS=2) table, which contains OCE edits that apply to claims from hospitals not subject to OPPS.

Critical Access Hospitals (bill type 85x) submitting claims containing both facility services and professional services that are reported with revenue codes (096x, 097x, 098x), do not have NCCI editing applied across facility and professional services appearing on the same day; NCCI editing is applied for the professional services separately from facility services.

Add-on code editing

Effective April 1, 2018 (v19.1), claims with certain bill-types are subject to add-on code edits if the primary procedure for the add-on code is not on the same day or day before. Add-on codes describe procedures or services that are always provided "in addition to" other, related services or procedures. These add-on procedure codes cannot be reported stand alone as separately reportable services. One add-on code may have multiple primary procedures with which it can be reported. In addition, there may be circumstances where reporting multiple add-on procedure codes are necessary, and in this instance the primary procedure for both add-ons must be present on the claim. There are three different types of add-on codes defined by CMS for which the IOCE returns an edit(s) if the conditions to satisfy the edit(s) are not met.

1. Type I add-on codes have a defined list of primary procedure codes. If one or multiple Type I add-on codes are reported without their primary procedure edit 106 is returned on the add-on procedure line(s) and line item denied (LID).
2. Type II add-on codes do not have a defined list of primary procedures; individual contractors must define the list of primary procedure codes for Type II add-on codes. Type II add-on code editing in the IOCE is applied only to Critical Access Hospitals (bill type 85x) reporting professional services revenue codes (96x, 97x or 98x). Edit 107 is returned on all Type II add-on procedure line(s) for contractor review (LID).
3. Type III add-on codes have defined primary procedures but there may be additional contractor defined primary procedures. Type III add-on codes act the same as Type I in how the edit is applied, with edit 108 (LID).

Critical Access Hospitals (bill type 85x) submitting claims containing both facility services and professional services that are reported with revenue codes (096x, 097x, 098x), do not have add-on code editing applied across facility and professional services; add on code editing is applied for the professional services separately from facility services.

Fee schedule

Certain services currently paid for are not assigned to an APC, but continue to be paid according to a fee schedule. Services paid by fee schedule include, but are not limited to, ambulance, diagnostic clinical laboratory, and occupational therapy.

Status indicators

Medicare has assigned each HCPCS/CPT code a letter that signifies whether they will reimburse the service, how it will be reimbursed, and to whom the claim should be submitted, e.g., MAC (Medicare Administrative Contractor), Carrier, DMERC (durable medical equipment regional carrier), etc. This indicator also helps in determining whether policy rules, such as packaging and discounting, apply.

Modifiers

The significance of modifiers increases in coding under OPps. Modifiers add clarification and specificity to procedures and are edited in the software. Failure to use them or use of an incorrect modifier may adversely affect the payment decision for some outpatient services.

Same day medical and procedure APC

Significant procedure visits and medical visits will not usually occur on the same day. However, if a medical visit identified by an E&M (status indicator V) code with modifier 25 occurs on the same date as a significant procedure, an additional payment will be made. Modifier 25 indicates that the medical visit was significant and separately identifiable from the procedure performed. When the E&M code does not have a modifier of 25, the claim will be returned to provider.

Contractor (MAC) actions impacting IOCE processing

The Medicare Administrative Contractor may on occasion require an override or bypass of IOCE grouping or editing results, to apply payment adjustment outside of the IOCE process or for reprocessing OPps/ Non-OPps adjusted claims. This may be accomplished by the following actions, which may only be applied by the MAC; these actions are not meant to be input by an end-user or provider.

- **Line Item Action Flag.** A value passed as input to the IOCE to override a line item denial or rejection or to allow the MAC to indicate the line item should be denied or rejected, even if no IOCE edits are present.

Note: If a line item action flag is present on any line item that also contains a contractor bypass, the line item action flag logic takes precedence and no contractor bypass is applied.

- Contractor Bypass. Values passed as input to bypass IOCE edits and any payment value which may need adjusted by the MAC for payment determination. The presence of an IOCE edit in the Contractor Bypass edit field allows the bypass to execute as defined by the contractor.

Note: A line level edit bypass for an OPPS claim requires all contractor bypass fields to be provided on input while a claim level edit bypass requires only the contractor bypass edit field to be populated. A NonOPPS claim with either a line level or claim level edit only require the edit to be populated in the contractor bypass edit field. Any line item with a contractor bypass applied returns a payment method flag of Z to indicate that the line(s) payment is set by the Contractor.

Chapter 2: Installing the software

The Integrated Outpatient Code Editor (IOCE) software is self-installable and is provided as a downloaded executable from a server or on one CD-ROM. You must have administrative privileges on your system in order to do the installation.

Minimum system requirements

Component	Requirement
CPU	Pentium with 1 MB cache
Operating system	Microsoft® Windows® 7
RAM	1 GB
Available disk space	1 GB
Monitor	Super VGA color (1024 x 768 resolution)
Monitor Adapter	Super VGA supports 1024 x 768 resolution
Drive	CD-ROM
Mouse	Microsoft mouse or compatible (See chapter 10 for system requirements for accessibility features).

Other supported platforms

The platforms listed below are supported for IOCE.

- Microsoft Windows 7
- Microsoft Windows 8.1
- Microsoft Windows 10

Pre-installation notes

The PC version of IOCE, formerly written in Microsoft Visual Basic®, was re-written using the Java™ language in the July 2010 release. If you currently have a version of IOCE software on your system that was released prior to July 2010, you must uninstall that version before you can proceed with the installation of IOCE version 20.2.

To accommodate added fields, the minimum screen resolution has changed from 800 x 600 to 1024 x 768. The recommended screen resolution is 1280 x 1024. Reset your screen resolution before proceeding with the installation, if necessary. For systems using Microsoft Windows 7, verify that your Display setting has been set to "Smaller - 100%."

Installation and update procedure

To install IOCE software, follow the steps in this section. The installation automatically checks for the appropriate operating system, screen resolution, and free disk space. If any requirement is not met, you will see messages stating the nature of the problem during the installation.

Starting with the October 2010 release, you will not see any upgrade message box. When you run the current install, it will replace all the install files in the default product directory. User created files will not be deleted.

[For instructions to uninstall IOCE \(page 26\)](#), see "[Uninstalling the software](#)" on page [26](#)

1. Close all unnecessary applications running on your computer.
2. Use one of the following options to launch the install program:

Option 1 - Installation from downloaded executable:

- ◆ Download the IOCE PC zip file to your desktop or a local drive.
- ◆ Unzip the file that was downloaded.
- ◆ Select the IOCE PC folder from the unzipped file.
- ◆ Double-click on IOCEInstaller.exe to start the software installation.

The installation process begins and you see the Introduction screen.

Option 2 - Installation from CD:

- ◆ Insert the product CD into the CD-ROM drive.

If the Auto-run feature is enabled on your system, it will start the software installation automatically, within a few seconds.

If the Auto-run feature is disabled on your system, it may instead open a window showing all the files and folders listed on the CD in your CD-ROM drive. In this case you will need to double-click on **IOCEInstaller.exe** to start the software installation. You may also manually start the software by following the steps below:

- ♦ From the Start menu, select Run.
- ♦ Type **Z:\IOCEInstaller.exe** (where Z = the CD-ROM drive).

The installation process begins and you see the Introduction screen.

Note: PCs with Windows 7 and Windows 10 may display an “unidentified publisher” warning when the install launches. Click Yes on this warning to continue with the install.

3. Click Next.

The License Agreement screen displays. You won’t be able to complete the installation if you do not accept the License Agreement.

4. Select the option to accept the license agreement, then click Next.

A README file displays. This file includes a brief software release notice and describes the hardware requirements for the IOCE Software.

5. Click Next.

The Choose Install Folder screen displays for you to specify an installation destination directory. We recommend accepting the default: C:\Program Files\IOCE Software.

6. Click Next to accept the default location

— or —

Click Browse to select a different location.

The Pre-Installation Summary screen displays so you can review the installation details before proceeding.

7. Click Install.

The installation begins. The Install Complete screen displays after the installation finishes.

8. Click Done.

9. Close the Install window.

Note: Some PCs may display a Program Incompatibility Assistant screen to verify if the program installed correctly, you may close this screen.

Uninstalling the software

To uninstall the software, you have two options.

Option 1

1. From the Start menu, select Settings > Control Panel.

The Control Panel window displays.

2. Select Add/Remove Programs.

The Add/Remove dialog displays a list of programs installed on your PC.

3. Select Integrated Outpatient Code Editor.

4. Click Change/Remove.

A dialog confirms your choice to uninstall the software, and to completely remove the selected application and all of its components.

5. Click Uninstall.

— or —

Click Cancel to exit.

Assuming you have clicked Yes during the procedure, you will see an Uninstall Complete window.

6. Click Done.

The Control Panel window displays again.

7. Close the Control Panel window.

Option 2

1. Click Windows Explore and browse to C:\Program Files\IOCE Software.

2. Double-click on Uninstall.exe.

3. A dialog confirms your choice to uninstall the software, and to completely remove the selected application and all of its components.

4. Click Uninstall.

5. — or —

6. Click Cancel to exit.

7. Assuming you have clicked Yes during the procedure, you will see an Uninstall Complete window.

8. Click Done.

Chapter 3: OPPS data entry

This chapter describes how to interactively enter data into the Integrated Outpatient Code Editor (IOCE) software. See chapter 10 for instructions on using the data entry accessibility features of this software.

The chapter contains the following information for OPPS data processing: complete definitions for fields, explanations of menus and command buttons, and a list of error messages that can occur.

Note: IOCE software uses one graphical user interface for interactively processing claims from both OPPS and non-OPPS hospitals. Consequently, three new fields that were added specifically for non-OPPS data entry will be grayed-out on the OPPS data entry screen.

To access the interactive interface of IOCE software

1. On the Start menu, point to Programs, Integrated Outpatient Code Editor, and select Interactive.

The splash screen appears, followed by the Integrated Outpatient Code Editor Software window.

2. Enter claim data on the Integrated Outpatient Code Editor Software window.

Refer to the following data entry (input) window. The CPT copyright date is represented by xxxx in the figure; the actual date in your software will be current with the latest release of the product.

For help with data entry:

- Use the OPPS data entry fields table (page [29](#)) for data entry field information.
- Use the OPPS menu items table (page [33](#)) when entering diagnosis and/or procedure codes.
- If you get an error message, refer to the OPPS error messages table (page [35](#)).

OPPS data entry fields

OPPS fields on the input window are described in the following table. Refer to the Data elements table for Uniform Billing (UB) locator information for fields.

Note: Grayed-out names indicate fields that have a pre-set value or are not available for data entry.

Figure 2: OPPS input window

Table 3. OPPS Data entry fields

Field name	Length	Description
Patient name	31	Name of the patient.
Medical record number	17	Patient's medical record number.
Date of service: From	10	Required. Beginning date of patient's service in MM/DD/YY or MM/DD/YYYY format ^a . Used for code validation. The date cannot precede the first day of the earliest version included in the current release and determines the version of codes and descriptions used for processing.
Date of service: Through	10	Required. Through date of patient's service in MM/DD/YY or MM/DD/YYYY format ^a . The date cannot precede the first day of the earliest version included in the current release.
OPPS flag	1	OPPS/non-OPPS flag. Default value = 1. 1 = OPPS 2 = Non-OPPS
Birth date	10	Patient's birth date in MM/DD/YY or MM/DD/YYYY format ^a . Used for age calculation.
Age in years	3	Patient's age in years. Valid values: 0 - 124. Calculated age (From date minus Birth date) takes precedence over entered age.
Sex	1	Patient's sex. Select a value from the drop-down list of acceptable values.
Patient status	2	Patient status code
Type of bill	3	Code indicating the specific type of bill: inpatient, outpatient, adjustments, voids, etc.
NPI Medicare provider number	13	National provider identifier Medicare provider number.
OSCAR Medicare provider	6	OSCAR Medicare provider number.
Condition codes	2	Code(s) used to identify conditions relating to the bill that may affect payer processing. Maximum of 30 condition codes. Lower case letters are automatically converted to upper case by the program.
Occurrence codes	2	Occurrence code. Maximum of 30 occurrence codes.
Value codes and amounts	11	Value code and value code amount. Maximum of 36 codes.

Field name	Length	Description
Primary pay source		<p>Enter the primary pay source using one of the numbers listed below. The English description displays automatically.</p> <p>01 = Medicare 02 = Medicaid 03 = Title V 04 = Other govt 05 = Work 06 = Blue Cross 07 = Insur co 08 = Self pay 09 = Other 10 = No charge</p>
Patient account number		Number of the group insurance policy or other unique patient identifier by which the patient is billed for medical care. The entry can be a combination of letters and numbers.
Comment		Available for entry of additional information as specified by the user. The entry can be a combination of letters and numbers.
Codes: Diagnosis/Procedure		<p>Click the Diagnosis radio button to enter a diagnosis code. Click the Procedure radio button to enter a procedure code.</p>
Code	8	<p>Enter the diagnosis or procedure code without decimal points. Lower case letters are converted to upper case by the program. The English description for the code appears in the text box to the right of this field.</p> <p>Diagnosis codes. PDX is required. Valid entries for diagnoses are 8-character ICD-10-CM or ICD-9-CM codes, to a maximum of 28 diagnoses. The first three listed diagnoses are assumed to be the patient's reasons for visit diagnosis (RVDX) and may be left blank. The fourth listed diagnosis is assumed to be the principal diagnosis and cannot be blank. Additional diagnoses are secondary and must be in contiguous locations. The first blank non-RVDX diagnosis signifies the end of the list.</p> <p>Procedure codes. Valid entries for procedures are 5-character CPT/HCPCS codes to a maximum of 99 procedures.</p> <p>Important: After entering a code, be sure to click the Add code, Add RVDX or Add PDX button to add the code to the record.</p>

Field name	Length	Description
Modifiers	2	Enter a maximum of five modifiers. Each modifier must be two characters long. Lower case letters are automatically converted to upper case by the program. This field is only enabled when you are entering a procedure.
Revenue code	4	Required for line items. Code that identifies a specific accommodation, ancillary service, or billing calculation (UB-04 form locator 42). One revenue code is required for each line item. This field is only enabled when you are entering a procedure.
Units of service	9	A quantitative measure of services rendered to or for the patient, by procedure code (UB-04 form locator 46). Valid values: 0-999999999 This field is only enabled when you are entering a procedure.
Charges	10	Charges related to the revenue or procedure codes for the current billing period as entered in the Statement Covers period (UB-04 form locator 47). Valid values: 0-99999999.99. This field is only enabled when you are entering a procedure.
Service date	10	Date that the procedure was performed in MM/DD/YY or MM/DD/YYYY format ^a . This field is only enabled when you are entering a procedure.
Line item action flag		Indicates to a payment program that a line item rejection or denial should be ignored or added. Select a value (0 - 4) from the drop-down list of values: 0 - Line item denial or rejection is not ignored. 1 - Line item denial or rejection is ignored (except when edit 30 is present). 2 - External line item denial. Line item is denied even if no IOCE edits are present. 3 - External line item rejection. Line item is rejected even if no IOCE edits are present. 4 - External line item adjustment. Technical charge rules apply. This field is only enabled when you are entering a procedure.
Contractor bypass edits	12	4, 3-byte alpha-numeric characters allowed per single line item; right-justified, zero-filled, default: 000
Contractor bypass APC	5	Numeric; right-justified, zero-filled, default: 00000

Field name	Length	Description
Contractor bypass status indicator	2	Alphanumeric; right-justified, zero-filled, default: 00 Note: If the SI value is one character, it must be reported with a leading blank value instead of 0 (example, " bA" "A")
Contractor bypass payment indicator	2	Numeric; right-justified, zero-filled, default: 00
Contractor bypass discounting formula	1	Numeric; zero-filled, default: 0
Contractor bypass line item denial or rejection flag	1	Numeric; zero-filled, default: 0
Contractor bypass packaging flag	1	Numeric; zero-filled, default: 0
Contractor bypass payment adjustment flag	2	Numeric; right-justified, zero-filled, default: 00
Contractor bypass payment method flag	1	Alphanumeric; zero-filled, default: 0
Diagnoses		A display-only list of the diagnoses entered for the current patient record. You can delete a diagnosis from this list by selecting it and then clicking Delete row on the Edit menu.
Procedures		A display-only list of the procedures (and related information) entered for the current patient record. You can delete a procedure from this list by selecting it and then clicking Delete row on the Edit menu.

a. Dates can be entered with or without a separator (/).

OPPS Menu items

Menu items available from the input window are described in the following table.

Table 4. Menu items

Menu	Item	Function
File	New	Displays a new window, cleared of all previously entered information.
File	Load File	Provides a simple mechanism for the user to choose a file that will then allow the user to load a single test claim in mainframe format that auto- populates the user interface.
File	Exit	Exits the program.
Edit	Cut	Removes the selected text and copies it to the clipboard.
Edit	Copy	Copies the selected text to the clipboard.
Edit	Paste	Inserts the clipboard's contents at the insertion point.
Edit	Delete row	Deletes the diagnosis or procedure (and all information in the row) that was selected.
Help	About	Displays the About box.

Tip

"Hot keys" in menus are displayed after you press the Alt key.

OPPS command buttons

Command buttons on the input window are described in the following table.

Table 5. Command buttons

Button	Function
Add code	Adds the currently displayed diagnosis or procedure code to the patient's record. The code will appear in the Diagnoses or Procedures list at the bottom of the window, as appropriate.
Add RVDX	Adds the currently displayed diagnosis code to the RVDX field in the Diagnoses list at the bottom of the window.
Add PDX	Adds the currently displayed diagnosis code to the PDX field in the Diagnoses list at the bottom of the window.
Clear	Clears the Code field and the code description that appears next to it. For procedures, associated Modifiers, Revenue code, Units of service, Charges, Service date, and Line item action flag are also cleared.
Report	Displays a pre-formatted output report that can be printed or saved. Chapter 4 (page 36) contains more output report information.

OPPS error messages

To help ensure the entry of accurate information, the program automatically performs data entry checks, such as for a month entered as 14, or an age entered as -2. When an error is detected, an error message appears in a message box. Click OK to close the message box.

The following table describes the error messages that can occur during data entry.

Table 6. OPPS error messages

Message	Occurs when ...
Birth date cannot be after From date.	Birth date is after the From date.
Invalid date. Valid formats are mm/dd/yyyy or mm/dd/yy or mmdyyy or mmdyy.	The value entered for the month, day or year is outside the valid range for mm, dd or yyyy, or the format is incorrect. Note: This error message applies to the "Birth date", "From date", or "Through date" fields.
Charges are invalid. Charges must be between 0 and 99999999.99.	Entry for Charges is outside the field's valid entry range.
From date cannot be after Through date.	From date is after the Through date.
From date cannot be after today's date.	Date entry is after the system (today's) date.
From date cannot precede Birth date.	From date precedes the Birth date.
Invalid age. Age in years must be between 0 and 124.	Entered age or calculated age exceeds 124 years.
Partial hospitalization condition code 41 not approved for type of bill.	Bill type is 12x or 14x with a condition code of 41.
Revenue code is a required field. Please enter a revenue code.	User attempts to add a procedure to the patient record without first entering a revenue code.
Service date is a required field. Please enter a service date.	User attempts to add a procedure to the patient record without first entering a service date.
Service date must be within the range of the From and Through dates.	Service date is not within the range of the From and Through dates.
The maximum number of diagnosis codes is 28.	User attempts to add a 29th diagnosis code.
The maximum number of procedure codes is 99.	User attempts to add a 100th procedure code.
Through date cannot be after today's date.	Through date is after the system (today's) date.
Through date cannot precede Birth date.	Through date is prior to the Birth date.
Through date cannot precede From date.	Through date is prior to the From date.

Chapter 4: OPPS data output

This chapter describes the Integrated Outpatient Code Editor (IOCE) program output, including output report fields, edit information, status indicators, and payment indicators. See chapter 10 for instructions on using the data output accessibility features of this software.

Viewing an output report

To view the output report for a claim

1. Complete your data entry using the input window.
2. At the bottom of the input window click Report.

The output report is displayed.

The current version of software installed on your system is noted as a two-digit number in the report heading. In the body of the report, a three-digit number specifies the version of software that was used to process the claim based on the date of service; the third digit represents revisions created since the original release and does not affect your use of the product.

The format of a sample output report is shown below. In actual use, the fields will contain real data. Descriptions of output report fields follow the figure.

Integrated Outpatient Code Editor Software v20.2

Output report fields

Fields on the output report are described in the following table.

Table 7. Output report fields

Name	Description
Patient name Medical record number Dates of service: From and Through Birth date Age in years Sex Patient status Type of bill OPPS flag Condition codes Payer condition codes NPI provider number OSCAR provider number Occurrence codes Value code and amount Payer value code Payer value code amount ICD Code Type Diagnoses Procedures Modifiers Revenue code Units of service Line item charges (Charge) Service date (Date) Line item action flag	Data that was entered on input window. See the Data entry table for descriptions of these fields.

Name	Description
Status indicator	<p>Medicare has assigned each HCPCS/CPT code a letter that signifies whether Medicare will reimburse the service and how it will be reimbursed. The indicator also helps in determining whether policy rules, such as packaging and discounting, apply. Values are:</p> <p>A - Services not paid under OPPS; paid under fee schedule or other payment system</p> <p>B - Non-allowed item or service for OPPS</p> <p>C - Inpatient procedure</p> <p>E - Non-allowed item or service (discontinued 01/01/2017)</p> <p>E1 - Non-allowed item or service</p> <p>E2 - Items and services for which pricing information and claims data are not available</p> <p>F - Corneal tissue acquisition; certain CRNA services and hepatitis B vaccines</p> <p>G - Drug/Biological pass-through</p> <p>H - Pass-through device categories</p> <p>J - New drug or new biological pass-through (discontinued 04/01/2002 and replaced by status indicator G for all drugs/biologicals)</p> <p>J1 - Outpatient department services paid through a comprehensive APC</p> <p>J2 - Hospital Part B services that may be paid through a comprehensive APC</p> <p>K - Non pass-through drugs and non-implantable biologicals, including therapeutic radiopharmaceuticals</p> <p>L - Flu/PPV vaccines</p> <p>M - Service not billable to the FI/MAC</p> <p>N - Items and Services packaged into APC rates</p> <p>P - Partial hospitalization service</p> <p>Q - Packaged services subject to separate payment based on payment criteria (discontinued 01/01/2009 and replaced by status indicators Q1, Q2, Q3, Q4)</p> <p>Q1 - STVX-packaged codes</p> <p>Q2 - T-packaged codes</p> <p>Q3 - Codes that may be paid through a composite APC</p> <p>Q4 - Conditionally packaged laboratory services</p> <p>R - Blood and blood products</p> <p>S - Significant procedure not subject to multiple procedure discounting</p>

Name	Description
	<p>T - Significant procedure subject to multiple procedure discounting</p> <p>U - Brachytherapy sources</p> <p>V - Clinic or emergency department visit</p> <p>W - Invalid HCPCS or Invalid revenue code with blank HCPCS</p> <p>X - Ancillary service</p> <p>Y - Non-implantable DME</p> <p>Z - Valid revenue code with blank HCPCS and no other SI assigned</p>
Payment indicator	<p>Payment indicator. Values are:</p> <p>1 - Paid standard hospital OPPS amount (status indicators J1, J2, R, S, T, U, V, X)</p> <p>2 - Services not paid by OPPS Pricer; paid under fee schedule or other payment system (status indicators A, G, K)</p> <p>3 - Not paid (status indicators E, M, Q, Q1, Q2, Q3, Q4, W, Y), or not paid under OPPS (status indicators B, C, Z)</p> <p>4 - Paid at reasonable cost (status indicator F, L)</p> <p>5 - Paid standard amount for pass-through drug or biological (status indicator G) (discontinued 10/01/2016)</p> <p>6 - Payment based on charge adjusted to cost (status indicator H)</p> <p>7 - Additional payment for new drug or new biological (status indicator J; services prior to 04/01/2002 only)</p> <p>8 - Paid partial hospitalization per diem (status indicator P)</p> <p>9 - No additional payment; payment included in line items with APCs (status indicator N; or no HCPCS code and certain revenue codes; or HCPCS codes G0176 - activity therapy, G0129 - occupational therapy, or G0177 - patient education and training services)</p> <p>10 - Paid FQHC encounter payment</p> <p>11 - Not paid or not included under FQHC encounter payment</p> <p>12 - No additional payment, included in payment for FQHC encounter</p> <p>13 - Paid FQHC encounter payment for New patient or IPPE/AWV</p> <p>14 - Grandfathered tribal FQHC encounter payment</p>
HCPCS APC	APC assigned to the procedure code. See appendix C (page 571) for a list of APCs with their status indicators and descriptions.
Payment APC	APC assigned for payment. Except when specified otherwise (e.g., partial hospitalization, mental health, observation logic, codes with SI of 'Q', etc.), the payment APC and the HCPCS APC are the same. See appendix C (page 571) for a list of APCs with their status indicators and descriptions.

Name	Description
Payment adjustment flag	<p>0 - No payment adjustment</p> <p>1 - Paid standard amount for pass-through drug or biological (status indicator G) (v3.0-v16.2 only)</p> <p>2 - Payment based on charge adjusted to cost (status indicator H) (v1.0-v10.3 only)</p> <p>3 - Additional payment for new drug or new biological applies to APC (status indicator J) (v1.0-v2.3 only)</p> <p>4 - Deductible not applicable (specific list of HCPCS codes) or condition code "MA" is present on the claim</p> <p>5 - Blood/blood product used in blood deductible calculation</p> <p>6 - Blood processing/storage not subject to blood deductible</p> <p>7 - Item provided without cost to provider (deactivated 01/01/2014, v.15.0)</p> <p>8 - Item provided with partial credit to provider (deactivated 01/01/2014, v.15.0)</p> <p>9 - Deductible/co-insurance not applicable</p> <p>10 - Co-insurance not applicable</p> <p>11 - Multiple service units reduced to one by IOCE processing; payment based on single payment rate</p> <p>12 - Offset for device pass-through</p> <p>13 - Offset for additional device pass-through</p> <p>14 - PAMA Section 218 reduction on CT scan</p> <p>15 - Reserved for future use</p> <p>16 - Terminated procedure with pass-through device</p> <p>17 - Condition for device credit present</p> <p>18 - Offset for first pass-through drug or biological</p> <p>19 - Offset for second pass-through drug or biological</p> <p>20 - Offset for third pass-through drug or biological</p> <p>21 - CAA Section 502(b) reduction on film X-ray</p> <p>22 - CAA Section 502(b) reduction on computed radiography technology</p> <p>23 - Co-insurance deductible n/a, as well as subject to a reduction due to film x-ray (CAA Section 502b)</p> <p>24 - Co-insurance deductible n/a, as well as subject to a reduction due to computed radiography technology (CAA Section 502b)</p> <p>91-99 - Each composite APC present, same value for prime and non-prime codes (v9.0 - v9.3 only)</p>

Name	Description
Payment method flag	0 - OPPS pricer determines payment for service 1 - Service not paid based on coverage or billing rules 2 - Service is not subject to OPPS 3 - Service is not subject to OPPS and has an OCE line item denial or rejection 4 - Line item is denied or rejected by MAC; OCE not applied to line item 5 - Payment for service determined under FQHC PPS 6 - CMHC outlier limitation reached 7 - Section 603 service with no reduction in OPPS Pricer 8 - Section 603 service with PFS reduction applied in OPPS Pricer A - Payment reduction for off-campus clinic visit Z - Contractor bypass determines payment for services
Line Item Denial or Rejection Flag	0 - Line item not denied or rejected 1 - Line item denied or rejected (procedure edit return buffer for line item contains a 9, 13, 18, 20, 28, 30, 40, 45, 47, 49, 53, 64, 65, 67, 68, 69, 76, 83, 91, 93, 103-108, 110-111) 2 - The line is not denied or rejected, but occurs on a day that has been denied or rejected (not used as of 4/1/2002 - v3.0) 3 - Line item not denied or rejected; identified for informational alert only
HCPCS Modifier	Reserved for future use
Edit	Edit number, description, and disposition generated by the diagnosis or procedure. The edit dispositions are abbreviated as follows: RTP - Return to provider LIR - Line item rejection LID - Line item denial CD - Claim denial S - Claim suspension For more information on individual edits,.
Claim level edits	Edits that affect the entire claim, rather than an individual diagnosis or procedure.

Name	Description
Overall claim disposition statement	<p>Because it is possible for a claim to have one or more edits in all dispositions, the program assigns an overall disposition to the claim. Values are:</p> <p>0 - No edits are present on the claim.</p> <p>1 - The only edits present are for line item denial or rejection.</p> <p>2 - Claim is for multiple days with one or more days denied or rejected.</p> <p>3 - Claim is denied, rejected, suspended or returned to provider, or single day claim with all line items denied or rejected, with only post-payment edits.</p> <p>4 - Claim is denied, rejected, suspended or returned to provider, or single day claim with all line items denied or rejected, with only pre-payment edits.</p> <p>5 - Claim is denied, rejected, suspended or returned to provider, or single day claim with all line items denied or rejected, with both post- and pre-payment edits.</p>

Menu items from the output report window

Menu items available from the output report window are described in the following table.

Table 8. Menu items

Menu	Item	Function
File	Print	Prints the output report.
File	Save As...	Opens the Save As dialog box to save the currently displayed output report as a text file.
File	Exit	Closes the output report window.
Edit	Copy	Copies the selected text and moves it to the clipboard.
Edit	Select All	Selects the entire output report.

Tip

"Hot keys" in menus are displayed after you press the Alt key.

Dispositions

Each edit is associated with a disposition. For example, there can be a rejection of the line item itself or a rejection of the entire claim. In addition to edit dispositions, the program assigns an overall disposition to the claim. Edit and claim dispositions are discussed in the following sections.

Edit disposition

A disposition is assigned based on the presence of any edits on a line. The meaning of each edit disposition is described in the following table. It is possible for a claim to have one or more edits in all dispositions.

Table 9. Edit disposition definitions

Disposition	Definition
Claim rejection	The provider can correct and resubmit the claim but cannot appeal the rejection.
Claim denial	The provider cannot resubmit the claim but can appeal the denial.
Claim return to provider (RTP)	The provider can resubmit the claim once the problems are corrected.
Claim suspension	The claim is not returned to the provider, but it is not processed for payment until the fiscal intermediary/Medicare Administrative Contractor (FI/MAC) makes a determination or obtains further information.
Line item rejection	The claim can be processed for payment with some line items rejected for payment (i.e., the line item can be corrected and resubmitted but cannot be appealed).
Line item denial	There are one or more edits that cause one or more individual line items to be denied. The claim can be processed for payment with some line items denied for payment (i.e., the line item cannot be resubmitted but can be appealed).

Refer to the Edit disposition summary table for a complete list of program edits and edit dispositions.

Claim disposition

Since a claim can have several edit dispositions assigned to line items, the claim is assigned an overall disposition. Claim dispositions are shown in the "Overall claim disposition statement" section of the Output report fields table (page [38](#)).

Edit disposition summary

The following table lists each edit in the program with its disposition. The meaning of each disposition is provided in the Edit disposition definitions table (page [108](#)). Chapter 5 (page [51](#)) contains information on what conditions will generate an edit, as well as relevant important comments for specific edits.

Table 10. Edit disposition summary

Edit	Edit disposition
1. Invalid diagnosis code	Claim returned to provider
2. Diagnosis and age conflict	Claim returned to provider
3. Diagnosis and sex conflict	Claim returned to provider
4. Medicare secondary payer alert (v1.0 and v1.1 only) ^a	Claim suspension
5. E-diagnosis code can not be used as principal diagnosis	Claim returned to provider
6. Invalid procedure code	Claim returned to provider
7. Procedure and age conflict (inactive)	
8. Procedure and sex conflict	Claim returned to provider
9. Non-covered under any Medicare outpatient benefit, for reasons other than statutory exclusion	Line item denial
10. Service submitted for denial (condition code 21)	Claim denial
11. Service submitted for FI/MAC review (condition code 20)	Claim suspension
12. Questionable covered service	Claim suspension
13. Separate payment for services is not provided by Medicare (v1.0–v6.3 and v.18.0- for codes with SI = E2)	Line item rejection
14. Code indicates a site of service not included in OPPS (v1.0–v6.3 only) ^a	Claim returned to provider
15. Service unit out of range for procedure	Claim returned to provider
16. Multiple bilateral procedures without modifier 50 (v1.0–v6.2 only) ^a	Claim returned to provider

Edit	Edit disposition
17. Inappropriate specification of bilateral procedure	Claim returned to provider
18. Inpatient procedure	Line item denial
19. Mutually exclusive procedure that is not allowed by NCCI even if appropriate modifier is present (<i>deleted, combined with edit 20 retroactive to earliest included version</i>) ^a	Line item rejection
20. Code2 of a code pair that is not allowed by NCCI even if appropriate modifier is present	Line item rejection
21. Medical visit on same day as a type T or S procedure without modifier 25	Claim returned to provider
22. Invalid modifier	Claim returned to provider
23. Invalid date	Claim returned to provider
24. Date out of OCE range	Claim suspension
25. Invalid age	Claim returned to provider
26. Invalid sex	Claim returned to provider
27. Only incidental services reported	Claim rejection
28. Code not recognized by Medicare for outpatient claims; alternate code for same service may be available	Line item rejection
29. Partial hospitalization service for non-mental health diagnosis	Claim returned to provider
30. Insufficient services on day of partial hospitalization	Line item denial
31. Partial hospitalization on same day as ECT or type T procedure (v1.0–v6.3 only) ^a	Claim suspension
32. Partial hospitalization claim spans 3 or less days with insufficient services on at least one of the days (v1.0 - v9.3) ^a	Claim suspension
33. Partial hospitalization claim spans more than 3 days with insufficient number of days having mental health services (v1.0 - v9.3) ^a	Claim suspension
34. Partial hospitalization claim spans more than 3 days with insufficient number of days meeting partial hospitalization criteria (v1.0 - v9.3) ^a	Claim suspension
35. Only Mental Health education and training services provided	Claim returned to provider
36. Extensive mental health services provided on day of ECT or type T procedure (v1.0–v6.3 only) ^a	Claim suspension
37. Terminated bilateral procedure or terminated procedure with units greater than one	Claim returned to provider

Edit	Edit disposition
38. Inconsistency between implanted device or administered substance and implantation or associated procedure	Claim returned to provider
39. Mutually exclusive procedure that would be allowed by NCCI if appropriate modifier were present (<i>deleted, combined with edit 40 retroactive to earliest included version</i>) ^a	Line item rejection
40. Code2 of a code pair that would be allowed by NCCI if appropriate modifier were present	Line item rejection
41. Invalid revenue code	Claim returned to provider
42. Multiple medical visits on same day with same revenue code without condition code G0	Claim returned to provider
43. Transfusion or blood product exchange without specification of blood product	Claim returned to provider
44. Observation revenue code on line item with non-observation HCPCS code	Claim returned to provider
45. Inpatient separate procedures not paid	Line item rejection
46. Partial hospitalization condition code 41 not approved for type of bill	Claim returned to provider
47. Service is not separately payable	Line item rejection
48. Revenue center requires HCPCS	Claim returned to provider
49. Service on same day as inpatient procedure	Line item denial
50. Non-covered under any Medicare outpatient benefit, based on statutory exclusion	Claim returned to provider
51. Multiple observations overlap in time (inactive)	
52. Observation does not meet minimum hours, qualifying diagnoses, and/or 'T' procedure conditions (v3.0–v6.3 only) ^a	Claim returned to provider
53. Codes G0378 and G0379 only allowed with bill type 13x or 85x	Line item rejection
54. Multiple codes for the same service	Claim returned to provider
55. Non-reportable for site of service	Claim returned to provider
56. E/M condition not met and line item date for obs code G0244 is not 12/31 or 1/1 (v4.0–v6.3 only) ^a	Claim returned to provider
57. Composite E/M condition not met for observation and line item date for code G0378 is 1/1	Claim suspension
58. G0379 only allowed with G0378	Claim returned to provider

Edit	Edit disposition
59. Clinical trial requires diagnosis code V707 as other than primary diagnosis (<i>deleted, retroactive to the earliest included version</i>) ^a	Claim returned to provider
60. Use of modifier CA with more than one procedure not allowed	Claim returned to provider
61. Service can only be billed to the DMERC	Claim returned to provider
62. Code not recognized by OPPS; alternate code for same service may be available	Claim returned to provider
63. This OT code only billed on partial hospitalization claims (v1.0 - v13.3)	Claim returned to provider
64. AT service not payable outside the partial hospitalization program (v1.0 - v13.3)	Line item rejection
65. Revenue code not recognized by Medicare	Line item rejection
66. Code requires manual pricing	Claim suspension
67. Service provided prior to FDA approval	Line item denial
68. Service provided prior to date of National Coverage Determination (NCD) approval	Line item denial
69. Service provided outside approval period	Line item denial
70. CA modifier requires patient discharge status indicating expired or transferred	Claim returned to provider
71. Claim lacks required device code (v6.1–v15.3 only)	Claim returned to provider
72. Service not billable to the Fiscal Intermediary/Medicare Administrative Contractor	Claim returned to provider
73. Incorrect billing of blood and blood products	Claim returned to provider
74. Units greater than one for bilateral procedure billed with modifier 50	Claim returned to provider
75. Incorrect billing of modifier FB or FC (v.8.0–v15.3 only)	Claim returned to provider
76. Trauma response critical care code without revenue code 068x and CPT 99291	Line item rejection
77. Claim lacks allowed procedure code (v6.1–v15.3 only)	Claim returned to provider
78. Claim lacks required radiolabeled product (v9.0–v14.3)	Claim returned to provider
79. Incorrect billing of revenue code with HCPCS code	Claim returned to provider
80. Mental health code not approved for partial hospitalization program	Claim returned to provider

Edit	Edit disposition
81. Mental health service not payable outside the partial hospitalization program	Claim returned to provider
82. Charge exceeds token charge (\$1.01)	Claim returned to provider
83. Service provided on or after effective date of NCD non-coverage	Line item denial
84. Claim lacks required primary code	Claim returned to provider
85. Claim lacks required device code or required procedure code (v.13.0–v.14.3)	Claim returned to provider
86. Manifestation code not allowed as principal diagnosis	Claim returned to provider
87. Skin substitute application procedure without appropriate skin substitute product code	Claim returned to provider
88. FQHC payment code not reported for FQHC claim	Claim returned to provider
89. FQHC claim lacks required qualifying visit code	Claim returned to provider
90. Incorrect revenue code reported for FQHC payment code	Claim returned to provider
91. Item or service not covered under FQHC PPS	Line item rejection
92. Device-dependent procedure reported without device code	Claim returned to provider
93. Corneal tissue processing reported without cornea transplant procedure	Line item rejection
94. Biosimilar HCPCS reported without biosimilar modifier (v17.0–v19.0 only)	Claim returned to provider
95. Weekly partial hospitalization services require a minimum of 20 hours of service as evidenced in PHP plan of care (v17.2 only-RTP, v18.3-present, LIR)	Line item rejection (informational only, no impact to payment)
96. Partial hospitalization interim claim From and Through dates must span more than 4 days	Claim returned to provider
97. Partial hospitalization services are required to be billed weekly	Claim returned to provider
98. Claim with pass-through device, drug or biological lacks required procedure	Claim returned to provider
100. Claim for HSCT allogeneic transplantation lacks required revenue code line for donor acquisition services	Claim returned to provider
101. Item or service with modifier PN not allowed under PFS	Claim returned to provider
102. Modifier pairing not allowed on the same line	Claim returned to provider

Edit	Edit disposition
103. Modifier reported prior to FDA approval date (v19.0 only)	Line item denial
104. Service not eligible for all-inclusive rate	Line item rejection
105. Claim reported with pass-through device prior to FDA approval for procedure	Line item denial
106. Add-on code reported without required primary procedure code	Line item denial
108. Add-on code reported without required primary procedure or without required contractor-defined primary procedure code	Line item denial
109. Code first diagnosis present without mental health diagnosis as the first secondary diagnosis	Claim returned to provider
110. Service provided prior to initial marketing date	Line item rejection
111. Service cost is duplicative; included in cost of associated biological	Line item rejection

a. Edits are active only on claims that are more than 7 years old that are processed with previously archived software.

Chapter 5: OPPS program edits

This chapter contains information on the condition(s) which, when present, will generate an edit in the Integrated Outpatient Code Editor (IOCE) program.

At the end of this chapter is a section that contains additional information about certain cases where the logic in arriving at an edit or APC is not particularly obvious (see "[Special logic information](#)" on page [64](#)).

The following table summarizes when edits are generated and also includes other relevant information. Edit dispositions and overall claim disposition information are located in chapter 4 (page [36](#)).

Table 11. Edit summary

Edit	Generated when ...
1. Invalid diagnosis code	The principal diagnosis field (fourth dx position) is blank, there are no diagnoses entered on the claim, or the entered diagnosis code is not valid for the selected version of the program.
2. Diagnosis and age conflict	The diagnosis code includes an age range, and the age is outside that range.
3. Diagnosis and sex conflict	The diagnosis code includes sex designation, and the sex does not match. This edit is bypassed if condition code 45 is present on the claim.
4. Medicare secondary payer alert ^a	The procedure code has a MSP alert warning indicator. This edit applies to v1.0 and v1.1 only, and is not applicable for reason for visit diagnosis.
5. External cause of morbidity code cannot be used as principal diagnosis	The principal diagnosis code is in the range V00-Y99. (For claims containing ICD-9-CM diagnosis codes, the first letter of the principal diagnosis code is an E.)
6. Invalid procedure code	The entered HCPCS code is not valid for the selected version of the program.
7. Procedure and age conflict (inactive)	N/A
8. Procedure and sex conflict	The sex of the patient does not match the sex designated for the procedure coded on the record. This edit is bypassed if condition code 45 is present on the claim.

Edit	Generated when ...
9. Non-covered under any Medicare outpatient benefit, for reasons other than statutory exclusion	The procedure code has a Non-covered for reasons other than statute service flag or Revenue code is 099x with SI of E and is submitted without a HCPCS code. This edit is bypassed when code G0428 is present with SI of E.
10. Service submitted for denial (condition code 21)	The claim has a condition code 21.
11. Service submitted for MAC review (condition code 20)	The claim has a condition code 20.
12. Questionable covered service	The procedure code has a Questionable covered service flag.
13. Separate payment for services is not provided by Medicare ^a	The claim is OPPS and the bill type is 12/14x without condition code 41 or the bill type is 13x, and the HCPCS code is on the 'Separate payment for service not provided by Medicare' list or The claim is non-OPPS and the bill type is any other than those defined for OPPS claims (above), the HCPCS code is on the 'Separate payment for service not provided by Medicare' list, and the status indicator is not B. This edit applies to v1.0–v6.3 and v.18.0- for codes with SI = E2.
14. Code indicates a site of service not included in OPPS ^a	The procedure code has a Not included in OPPS indicator. This edit applies to v1.0–v6.3 only.

Edit	Generated when ...
15. Service unit out of range for procedure (inactive)	<p>The maximum units allowed is greater than zero and</p> <p>The sum of the service units for all line items with the same procedure code on the same day exceeds the maximum allowed for this procedure and</p> <p>Modifier 91 is not present or modifier 91 is present but the HCPCS code is not on the list of laboratory/pathology codes which are exempt from this edit.</p> <p>Units for all line items with the same HCPCS code on the same day are added together when applying this edit. If the total units exceed the code's limits, the procedure edit return buffer is set for all line items that have the HCPCS code. If modifier 91 is present on a line item and the HCPCS code is on a list of codes that are exempt, the unit edits are not applied.</p>
16. Multiple bilateral procedures without modifier 50 ^a	<p>The same bilateral procedure code occurs two or more times on the same service date. This edit is applied to all relevant procedure lines for dates of service prior to 10/01/05 only (v1.0–v6.2).</p>
17. Inappropriate specification of bilateral procedure	<p>(A)</p> <p>The same bilateral procedure code occurs two or more times (based on units and/or lines) on the same service date. This condition (A) is for dates of service prior to 10/01/05 only (v1.0–v6.2).</p> <p>(B)</p> <p>The same inherent bilateral procedure code occurs two or more times (based on units and/or lines) on the same service date.</p> <p>This edit is applied to all relevant bilateral procedure lines, except when modifier 76 or 77 is submitted on the second or subsequent line or units of an inherently bilateral code.</p> <p>Note: For codes with an SI of V that are also on the Inherent Bilateral list, condition code G0 will take precedence over the bilateral edit; these claims will not receive edit 17. This edit is also bypassed if the bill type is 85x.</p>

Edit	Generated when ...
18. Inpatient procedure	<p>A line has a C status indicator and is not on the 'separate procedure' list.</p> <p>or</p> <p>A line has a C status indicator and is on the 'separate procedure' list, and there are no type T lines on the same day.</p> <p>and</p> <p>Modifier CA is not present.</p> <p>All other line items on the same day as the line with a C status indicator are denied (line item denial/rejection flag = 1, APC return buffer) and edit 49 is assigned. Edit 18 is performed before any other non-fatal edits. No other edits are run on any line(s) with edit 18 or 49.</p> <p>For additional information on inpatient procedure processing see "Inpatient procedures" on page 66.</p>
19. Mutually exclusive procedure that is not allowed by NCCI even if appropriate modifier is present (<i>deleted, combined with edit 20 retroactive to earliest included version</i>) ^a	The procedure is one of a pair of mutually exclusive procedures in the NCCI table coded on the same day, where the use of a modifier is not appropriate. Only the code in column 2 of a mutually exclusive pair is rejected; the column 1 code of the pair is not marked as an edit.
20. Code2 of a code pair that is not allowed by NCCI even if appropriate modifier is present	The procedure is identified as part of another procedure on the claim coded on the same day, where the use of a modifier is not appropriate. Only the code in column 2 of a code pair is rejected; the column 1 code of the pair is not marked as an edit.
21. Medical visit on the same day as a type T or S procedure without modifier 25	One or more type T or S procedures occur on the same day as a line item containing an E&M code without modifier 25.
22. Invalid modifier	The modifier is not in the list of valid modifier entries and the revenue code is not 540.
23. Invalid date	The From, Through, or Service date is invalid, or the Service date falls outside the range of the From and Through dates. This edit terminates processing for the claim. Prior to 10/01/2003, a blank service date is not considered an error when the HCPCS code field is blank; as of that date, all lines must have a service date.

Edit	Generated when ...
24. Date out of OCE range	The From date falls outside the date range of any version of the program (page 12). The From date will be used for program version selection, even if the From-Through dates span more than one version. Presence of this edit condition terminates processing for the claim.
25. Invalid age	The age is non-numeric or outside the range of 0-124 years.
26. Invalid sex	The sex is non-numeric or outside the range of 0-2.
27. Only incidental services reported	All line items are incidental (status indicator N) and All line items have a line item denial/rejection flag = 0 and All line items have a line item action flag = 0. Edit 27 is run immediately when edit 18 is not triggered; no other edits are performed on a claim with edit 27.
28. Code not recognized by Medicare for outpatient claims; alternate code for same service may be available	The procedure code has a 'Not recognized by Medicare' indicator.
29. Partial hospitalization service for non-mental health diagnosis	The principal diagnosis is not related to mental health.
30. Insufficient services on day of partial hospitalization	Three or more services from the partial hospitalization services list are not present, or at least one of the three is not a psychotherapy service.
31. Partial hospitalization on same day as ECT or type T procedure ^a	Electroconvulsive therapy or a significant procedure (status indicator T) occurs on the same day as partial hospitalization, and APC 33 (partial hospitalization) is assigned to a mental health service on the same day. This edit applies to v1.0–v6.3 only.
32. Partial hospitalization claim spans 3 or less days with insufficient services on at least one of the days ^a	A claim suspended for medical review (edit 30) does not span more than three days. This edit applies to v1.0–v9.3 only.
33. Partial hospitalization claim spans more than 3 days with insufficient number of days having mental health services ^a	A claim suspended for medical review (edit 30) spans more than three days. However, partial hospitalization services were not provided on at least 57% (4/7) of the days. This edit applies to v1.0–v9.3 only.

Edit	Generated when ...
34. Partial hospitalization claim spans more than 3 days with insufficient number of days meeting partial hospitalization criteria ^a	A claim suspended for medical review (edit 30) spans more than three days and partial hospitalization services were provided on at least 57% (4/7) of the days. However, on the days when partial hospitalization services were provided, less than 75% of the days met the partial hospitalization day of service criteria (i.e., edit 30 occurred on the line item). This edit applies to v1.0–v9.3 only.
35. Only Mental Health education and training services provided	Only education and training services are present without other mental health service; the claim fails mental health status.
36. Extensive mental health services provided on day of type T procedure ^a	Electroconvulsive therapy or a non mental health type T procedure APC is present on the same day as extensive mental health service. This edit applies to v1.0–v6.3 only.
37. Terminated bilateral procedure or terminated procedure with units greater than one	A modifier 52 or 73 is present, as well as: a) an independent or conditional bilateral procedure with modifier 50 or b) a procedure with units greater than 1.
38. Inconsistency between implanted device or administered substance and implantation or associated procedure	The status indicator is H, U, or APC 987-997 (Implant) is present, but no type S, T, or non-implant type X procedures are present on the claim (v1.0-15.3 only). There is a code with status indicator H or U present, but no type S, T, or J1 procedures are present on the same claim.
39. Mutually exclusive procedure that would be allowed by NCCI if appropriate modifier were present (<i>deleted, combined with edit 40 retroactive to earliest included version</i>) ^a	The procedure is one of a pair of mutually exclusive procedures in the NCCI table coded on the same day, where the modifier was either not coded or is not an NCCI modifier. Only the code in column 2 of a mutually exclusive pair is rejected; the column 1 code of the pair is not marked as an edit.
40. Code2 of a code pair that would be allowed by NCCI if appropriate modifier were present	The procedure is identified as part of another procedure on the claim coded on the same day, where the modifier was either not coded or is not an NCCI modifier. Only the code in column 2 of a code pair is rejected; the column 1 code of the pair is not marked as an edit.
41. Invalid revenue code	The revenue code is not in the list of valid revenue code entries.

Edit	Generated when ...
42. Multiple medical visits on same day with same revenue code without condition code G0	Multiple medical visits (based on units and/or lines) are present on the same day with the same revenue code, without condition code G0 to indicate that the visits were distinct and independent of each other.
43. Transfusion or blood product exchange without specification of blood product	A blood transfusion or exchange is coded but no blood product is coded.
44. Observation revenue code on line item with non-observation HCPCS code	A 762 (observation) revenue code is used with a HCPCS other than observation (99217-99220, 99234-99236, G0378, G0379).
45. Inpatient separate procedures not paid	On the same day, all lines with status indicator C are on the 'separate procedure' list, and there is at least one type T or J1 line.
46. Partial hospitalization condition code 41 not approved for type of bill	Bill type 12x or 14x is present with condition code 41.
47. Service is not separately payable	<p>The claim consists entirely of a combination of lines that:</p> <ul style="list-style-type: none"> a) are denied or rejected or b) have a status indicator N <p>Edit 47 is assigned to all lines with status indicator N, or that change from Q to N, that are not already denied or rejected and have no other service on the claim.</p>
48. Revenue center requires HCPCS	<p>The bill type is 13x, 74x, 75x, 76x, or 12x/14x without condition code 41, HCPCS is blank, and the revenue center status indicator is not N or F.</p> <p>This edit is bypassed when the revenue code is 100x, 210x, 310x, 099x, 0905-0907, 0500, 0509, 0583, 0660-0663, 0669, 0931, 0932, 0521, 0522, 0524, 0525, 0527, 0528, 0637, or 0948; see also edit 65.</p>
49. Service on same day as inpatient procedure	Line item occurs on the same day as a C status indicator.
50. Non-covered under any Medicare outpatient benefit, based on statutory exclusion	<p>Code is on 'statutory exclusion' list</p> <p>or</p> <p>Revenue code is 0637 with SI of E when submitted without a HCPCS code</p>
51. Multiple observations overlap in time (inactive)	

Edit	Generated when ...
52. Observation does not meet minimum hours, qualifying diagnoses, and/or 'T' procedure conditions ^a	The observation period is less than 8 hours or There is no diagnosis of CHF, chest pain or asthma or There is a T procedure (except 90780) on the same or previous day. This edit applies to v3.0–v6.3 only.
53. Codes G0378 and G0379 only allowed with bill type 13x or 85x	Codes G0378 and/or G0379 appear on the claim and the bill type is not 13x or 85x.
54. Multiple codes for the same service	Any of the following three pairs of codes appear on the same claim: C1012 and P9033, C1013 and P9031, or C1014 and P9035.
55. Non-reportable for site of service	A HCPCS code beginning with the letter C is entered and the bill type is not 12x, 13x or 14x.
56. E/M condition not met and line item date for obs code G0244 is not 12/31 or 1/1 ^a	There is no E/M visit the day of or the day preceding the observation and The date of observation is not 12/31/yyyy or 01/01/yyyy. This edit applies to v4.0–v6.3 only.
57. E/M condition not met for observation and line item date for code G0378 is 1/1	There is no specified E/M or critical care visit the day of or the day preceding the observation and The date of observation is 01/01/yyyy.
58. G0379 only allowed with G0378	Code G0379 is present without code G0378 for the same line item date.
59. Clinical trial requires diagnosis code V707 as other than primary diagnosis (<i>deleted, retroactive to the earliest included version</i>) ^a	Code G0292, G0293 or G0294 is present and Diagnosis code V707 is not present as admit or secondary diagnosis.
60. Use of modifier CA with more than one procedure not allowed	Modifier CA is present on more than one line or Modifier CA is submitted on a line with multiple units.
61. Service can only be billed to the DMERC	The procedure code has a 'DME only' indicator.

Edit	Generated when ...
62. Code not recognized by OPPS; alternate code for same service may be available	The procedure code has a 'Not recognized by Medicare for OPPS' indicator.
63. This OT code only billed on partial hospitalization claims	Occupational therapy services are present and the bill type is 12x or 13x without condition code 41. This edit applies to v1.0–v13.3 only.
64. AT service not payable outside the partial hospitalization program	Activity therapy services are present and the bill type is 12x or 13x without condition code 41. This edit applies to v1.0–v13.3 only.
65. Revenue code not recognized by Medicare	The revenue code is 100x, 210x, 310x, 0500, 0509, 0583, 0660-0663, 0669, 0905-0907, 0931, or 0932; see also edit 48.
66. Code requires manual pricing	The HCPCS code is an unclassified drug code.
67. Service provided prior to FDA approval	The line item date of service of a code is prior to the date of FDA approval.
68. Service provided prior to date of National Coverage Determination (NCD) approval	The line item date of service of a code is prior to the code activation date.
69. Service provided outside approval period	The service was provided outside the period approved by CMS.
70. CA modifier requires patient discharge status indicating expired or transferred	CA modifier requires patient discharge status indicating expired or transferred.
71. Claim lacks required device code	A specified procedure is submitted on a claim without the code(s) for the required device(s). (This edit is bypassed if the procedure is terminated - modifier 52, 73, or 74.) This edit applies to v6.1–v15.3 only
72. Service not billable to the Medicare Administrative Contractor	A code has a status indicator M. This edit is bypassed when the bill type is 85x and revenue code is 096x, 097x, or 098x. This edit is also bypassed when the bill type is 81x or 82x and the revenue code is 657. (Note: The status indicator for the HCPCS code is changed from M to A)
73. Incorrect billing of blood and blood products	Blood product claims lack two identical lines (of HCPCS code, units, and modifier BL), one line with revenue code 38x and the other line with revenue code 39x.

Edit	Generated when ...
74. Units greater than one for bilateral procedure billed with modifier 50	Any code on the Conditional or Independent bilateral list is submitted with modifier 50 and units of service are greater than one on the same line.
75. Incorrect billing of modifier FB or FC	Modifier FB or FC is present and SI is not S, T, V or X. This edit applies to v8.0–v15.3 only.
76. Trauma response critical care code without revenue code 068x and CPT 99291	Trauma response critical care code is present without revenue code 068x and CPT code 99291 on the same date of service.
77. Claim lacks allowed procedure code	A specified device is submitted on a claim without a code for an allowed procedure, and the bill type is not 12x. This edit applies to v6.1–v15.3 only.
78. Claim lacks required radiolabeled product	A specified nuclear medicine procedure is submitted on a claim without the code for a required radiopharmaceutical. This edit applies to v9.0–v14.3 only.
79. Incorrect billing of revenue code with HCPCS code	The revenue code is 381 with a HCPCS code other than packed red cells (P9016, P9021, P9022, P9038, P9039, P9040, P9051, P9054, P9057, P9058) or The revenue code is 382 with a HCPCS code other than whole blood (P9010, P9051, P9054, P9056).
80. Mental health code not approved for partial hospitalization	Mental health HCPCS codes that are not approved for partial hospitalization program submitted on bill type 13x with condition code 41, or bill type 76x.
81. Mental health service not payable outside the partial hospitalization program	Mental health HCPCS codes that are not payable outside the partial hospital program submitted on bill type 12x or 13x without condition code 41.
82. Charge exceeds token charge (\$1.01)	Code C9898 is billed with charges greater than \$1.01.
83. Service provided on or after effective date of NCD non-coverage	The line item date of service of a code is after the date of non-coverage determination.
84. Claim lacks required primary code	Add-on codes 33225, 90785, 90833, 90836 or 90838 are submitted without one of the required primary codes on the same day. (Note: Psychiatric add-on codes are edited only on PHP claims.)

Edit	Generated when ...
85. Claim lacks required device code or required procedure code	Code C9732 and C1840 not submitted together on the same day. (Code for insertion of ocular telescopic lens submitted without the code for the lens, or vice versa). This edit applies to v13.0–v14.3 only.
86. Manifestation code not allowed as principal diagnosis	A diagnosis code considered to be a manifestation code from the Medicare Code Editor (MCE) manifestation diagnosis list is reported as the principal diagnosis code on a hospice bill type claim (81X, 82X).
87. Skin substitute application procedure without appropriate skin substitute product code	A List A skin substitute application procedure is submitted without a list A skin substitute product; or a list B skin substitute application procedure is submitted without a list B skin substitute product on the same date of service.
88. FQHC payment code not reported for FQHC claim	<p>FQHC payment code not reported for a claim with bill type 77x and without Condition Code 65.</p> <p>Note: If the bill type is 770 (No payment claim), edit 88 is not applicable.</p> <p>Note: Edit 88 is bypassed for FQHC PPS claims when Telehealth originating site services HCPCS code Q3014 or Chronic Care Management HCPCS 99490 is reported and there is no FQHC payment code; also edit 88 is bypassed for FQHC when only FQHC non-covered services are present with edit 91.</p>
89. FQHC claim lacks required qualifying visit code	<p>FQHC payment code reported for FQHC claim (bill type is 77x without Condition Code 65) without a qualifying visit HCPCS.</p> <p>Note: Edit 89 is bypassed for FQHC PPS claims when Telehealth originating site services HCPCS code Q3014 or Chronic Care Management HCPCS 99490 is reported and there is no FQHC payment code or qualifying visit code present; also edit 89 is bypassed for FQHC when only FQHC non-covered services are present with edit 91.</p>
90. Incorrect revenue code reported for FQHC payment code	FQHC payment code not reported with revenue code 519, 52X or 900.
91. Item or service not covered under FQHC PPS or for RHC	A service considered to be non-covered under FQHC PPS or for RHC is reported.
92. Device-dependent procedure reported without device code	A device-dependent procedure is reported without a device code.

Edit	Generated when ...
93. Corneal tissue processing reported without cornea transplant procedure	Corneal tissue processing HCPCS (V2785) is reported and there is no corneal transplant procedure present for the same service date.
94. Biosimilar HCPCS reported without biosimilar modifier	A biosimilar HCPCS code is reported on the claim without its corresponding biosimilar manufacturing modifier. This edit applies to v17.0–v19.0 only.
95. Weekly partial hospitalization services require a minimum of 20 hours of service as evidenced in PHP plan of care	A PHP claim contains weekly PH services that total less than 20 hours per 7-day span. This edit applies to v17.2 only-RTP, and v18.3-present, LIR.
96. Partial hospitalization interim claim from and through dates must span more than 4 days	An interim PHP claim (bill type 763 or 133 with condition code 41) From and Through date spans less than 5 days. This edit applies to v17.2 only.
97. Partial hospitalization services are required to be billed weekly	A PHP claim From and Through date spans more than 7 days. This edit applies to v17.2 only.
98. Claim with pass-through device lacks required procedure	A pass-through device is present without an associated, required procedure.
99. Claim with pass-through or non-pass-through drug or biological lacks OPPS payable procedure	There is a pass-through drug or biological HCPCS code present on a claim without an associated OPPS procedure with SI = J1, J2, P, Q1, Q2, Q3, R, S, T, U, V.
100. Claim for HSCT allogeneic transplantation lacks required revenue code line for donor acquisition services	A claim reporting HSCT allogeneic transplantation (procedure code 38240) is reported and there is no additional line on the claim reporting revenue code 815 for donor acquisition services.
101. Item or service with modifier PN not allowed under PFS	Modifier PN is reported for an item or service that is considered to be non-excepted for an off-campus provider-based hospital outpatient department under Section 603.
102. Modifier pairing not allowed on the same line	A line item is reported with a pair of modifiers that have conflicting meaning and should not be reported together. Please reference the data files for a report named Modifier Pairs, which contains an up to date list of modifiers not allowed to be reported on the same line.
103. Modifier reported prior to FDA approval date	A modifier is reported prior to the mid-quarter activation date. This edit applies to v19.0 only.
104. Service not eligible for all-inclusive rate	RHC claim with bill type 71x contains a line reported with modifier CG that is not eligible for the RHC all-inclusive rate.

Edit	Generated when ...
105. Claim reported with pass-through device prior to FDA approval for procedure	A procedure is reported with a pass-through device prior to the FDA approval date for the procedure paired with the device. The line item denial is returned on the device line.
106. Add-on code reported without required primary procedure code	A claim is submitted with a Type I add-on code(s) without the applicable defined primary procedure(s). The edit is returned on the add-on code line(s) when conditions of the edit are not met.
108. Add-on code reported without required primary procedure or required contractor-defined primary procedure code	A claim is submitted with a Type III add-on code(s) without a defined primary(s) or contractor defined primary(s) procedure. This edit is returned on the add-on code line(s) when conditions are not met.
109. Code first diagnosis present without mental health diagnosis as the first secondary diagnosis	A PHP claim is submitted with a Code First Diagnosis without a mental health diagnosis in the first secondary diagnosis position. If the first secondary diagnosis position is blank edit 109 is still returned. Note: Edit 29 is suppressed from being returned if a code first diagnosis is present in the pdx position.
110. Service provided prior to initial marketing date	The line item date of service of a code is prior to the initial marketing date for which it can be reported.
111. Service cost is duplicative; included in cost of associated biological	The reported line item is considered duplicative as the routine costs of all steps in creating a biological are bundled into the covered benefit, the biological. Any procedure identified as being “bundled into biological,” and reported as a line item are rejected. Additionally, this edit is returned if revenue codes 870-873 are submitted as line items with blank HCPCS.

a. Edits are active only on claims that are more than 7 years old that are processed with previously archived software.

Special logic information

This section describes special conditions that apply to the IOCE software program logic for OPPS.

Medical visit processing

Rules for Medical and Procedure Visits on the Same Day and for Multiple Medical Visits on Same Day:

Under some circumstances, medical visits on the same date as a procedure result in additional payments. Modifier 25 reported with an Evaluation and Management (E&M) code, status indicator V, is used to report a medical visit that takes place on the same date that a procedure with status indicator S or T is performed, but that is significant and separately identifiable from the procedure. However, if any E&M code that occurs on a day with a type "T" or "S" procedure does not have a modifier of 25, then edit 21 applies and the claim is returned to the provider.

The condition code G0 specifies that multiple medical visits occurred on the same day with the same revenue center, and that these visits were distinct and constituted independent visits (e.g., two visits to the ER for chest pain, one in the morning and one in the afternoon, and/or two visits to the ER, one in the morning for a fractured arm and one later in the day for chest pain).

Note: For codes with SI of V that are also on the Inherent Bilateral list, condition code "G0" takes precedence over the bilateral edit to allow multiple medical visits on the same day.

Computation of discounting fraction

There are nine different discount formulas that can be applied to a line item:

D = Discounting Fraction (Currently 0.5)

U = Number of Units

T = Terminated Procedure Discount (Currently 0.5)

1. 1.0
2. $(1.0 + D(U-1))/U$
3. T/U
4. $(1 + D)/U$
5. D
6. TD/U (Discontinued 1/1/2008, v9.0)

7. $D(1 + D)/U$ (Discontinued 1/1/2008, v9.0)
8. 2.0
9. 2D

Note: Formula six and seven are discontinued and replaced with formula 3 and 9.

Type “T” multiple and terminated procedure discounting

Line items with a status indicator of “T” are subject to multiple-procedure discounting unless modifiers 76, 77, 78 and/or 79 are present. The “T” line item with the highest payment amount is not multiple procedure discounted, and all other “T” line items are multiple procedure discounted. All line items that do not have a status indicator of “T” are ignored in determining the multiple procedure discount. A modifier of 52 or 73 indicates that a procedure was terminated prior to anesthesia. A terminated type “T” procedure is also discounted although not necessarily at the same level as the discount for multiple type “T” procedures. Terminated bilateral procedures or terminated procedures with units greater than one should not occur, and have the discounting factor set so as to result in the equivalent of a single procedure. Claims submitted with terminated bilateral procedures or terminated procedure with units greater than one are returned to the provider (edit 37).

Bilateral procedures are identified from the “bilateral” field in the physician fee schedule. Bilateral procedures have the following values in the “bilateral” field:

1. Conditional bilateral (i.e. procedure is considered bilateral if the modifier 50 is present)
2. Inherent bilateral (i.e. procedure in and of itself is bilateral)
3. Independent bilateral (i.e., procedure is considered bilateral if the modifier 50 is present, but full payment should be made for each procedure (e.g., certain radiological procedures))

Inherent bilateral procedures are treated as non-bilateral procedures since the bilateralism of the procedure is encompassed in the code. For bilateral procedures the type “T” procedure discounting rules take precedence over the discounting specified in the physician fee schedule.

All line items for which the line item denial or reject indicator is 1 and the line item action flag is zero, or the line item action flag is 2, 3 or 4, are ignored in determining the discount; packaged line items, (the packaging flag is not zero or 3), is also ignored in determining the discount. The discounting process utilizes an APC payment amount file. The discounting factor for bilateral procedures is the same as the discounting factor for multiple type “T” procedures.

Note: There may be some procedure codes that have a SI value assigned that differs from the APC SI (for example, HCPCS SI = T, but APC SI = S). In these circumstances, the discounting formula is assigned based on the HCPCS SI; the APC with the highest payment rate (if multiple ‘T’ procedures are present) although having a different SI, is used to determine the discounted amount for the multiple procedures that may be present.

For the purpose of determining which APC has the highest payment amount, the terminated procedure discount (T) and any applicable offset, is applied prior to selecting the type T

procedure with the highest payment amount. If both offset and terminated procedure discount apply, the offset is applied first, before the terminated procedure discount.

If modifier 50 is present on an independent or conditional bilateral line that has a composite APC, or a separately paid STVX/T-packaged procedure, or a comprehensive APC, the modifier is ignored in assigning the discount formula.

Non-type T procedure discounting

All line items with SI other than “T” are subject to terminated procedure discounting when modifier 52 or 73 is present.

For Discount Formulas applied to non-type T procedures: If not terminated, non-type T Conditional bilateral procedures with modifier 50 are assigned discount formula eight; non-type T Independent bilateral procedures with modifier 50 are also assigned to formula eight (*8).

Inpatient procedures

Through IOCE version 16.3, for outpatients who undergo inpatient-only procedures on an emergency basis who expire before they can be admitted to the hospital, a specified APC payment is made to the provider as reimbursement for all services on that day. The presence of modifier CA (procedure payable inpatient) on the inpatient-only procedure line assigns the specified payment APC and associated status and payment indicators to the line. The packaging flag is turned on for all other lines on that day. Payment is only allowed for one procedure with modifier CA. If multiple inpatient-only procedures are submitted with the modifier CA, the claim is returned to the provider (edit 60). If modifier CA is submitted with an inpatient-only procedure for a patient who did not expire (patient status code is not 20), the claim is returned to the provider (edit 70). See also Inpatient Procedure Processing under Comprehensive APCs for processing logic (v17.0-Current).

Conditional APC processing

Processing procedures with status indicators of Q1 and Q2

Effective January 1, 2017 (v18.0), conditional APC assignment and packaging discussed in this section for procedures with SI = Q1 or Q2 are executed across the claim if multiple service dates are present, and not by individual date of service. References noted as processed by day are to be considered for claims with From Dates prior to January 1, 2017. Procedure codes with SI of Q1 or Q2 are packaged when they appear with other specified services on the same day or claim; however, they may be assigned to a payable SI and APC and paid separately if there are no other specified services on the same day or claim. Procedures with SI = Q1 are packaged in the presence of any payable procedure code with SI of S, T, or V (and through version 15.3, SI = X). Procedures with SI = Q2 are packaged only in the presence of payable codes with SI = T or

effective with version 16.0, J1. The SI is changed from Q1 or Q2 to N for packaging if present with other payable services, or to the standard SI and APC specified for the code when separately payable. If there are multiple Q1 or Q2 procedures on a specific date or claim and no service with which the codes would be packaged on the same date or claim, the Q1/Q2 code assigned to the APC with the highest payment rate is paid and all other codes are packaged. If a procedure with SI = Q1 or Q2 has been previously packaged (SI = N) prior to the execution of the conditional APC processing logic, the packaged Q1 or Q2 is ignored from the selection as the service with the highest paying APC payment rate. Additionally, procedures with SI = Q1 or Q2 that are packaged with SI = N under conditional APC processing logic are not evaluated in any subsequent processing (e.g. composite or comprehensive APC processing).

There are several codes with SI = Q2 that may resolve to a final SI of J1 (comprehensive APC procedure) if they are present with no other payable procedures. In the event this occurs, the Q2 procedure is not subject to comprehensive APC procedure ranking or complexity adjustment, but all other comprehensive APC packaging and exclusion processing is applied.

In the execution of conditional APC processing logic, which occurs prior to the composite APC logic, procedure codes with SI of Q3 (composite candidates) that may be present with Q1 or Q2 procedures are evaluated as payable procedures using the standard SI associated with the Q3 procedure's standard APC.

If a Q1 or Q2 procedure is an independent or conditional bilateral code with modifier 50 and resolves to a standard SI and APC assignment (i.e. not packaged), the modifier is ignored in assigning the discount formula.

Procedures with SI = Q1 or Q2 that are denied or rejected are not included in any subsequent conditional packaging logic, and the default SI (Q1, Q2) is retained as the final SI. If codes with SI of Q1 or Q2 that are denied or rejected are present with other non-denied/rejected Q1 or Q2 codes, if no other payable procedure is present, the non-denied/rejected Q1 or Q2 codes are evaluated and processed for separate payment. There is an exception if Line Item Action Flag = 1 is assigned to the line; the denial or rejection is ignored, and the line is included in subsequent conditional packaging logic, from which the final SI is determined.

Service units are reduced to 1 for any line where an SI of Q1 or Q2 is changed to a separately payable SI and APC and Payment Adjustment Flag 11 is assigned. The reduction of units for procedures designated as sometimes therapy that may have default SI assignment of Q1 or Q2 does not occur if the reporting of the sometimes therapy service under a therapy plan of care results in final assignment of SI = A.

Sometimes therapy processing for wound care services

Certain wound care services considered "sometimes therapy" may be paid an APC rate or from the Physician Fee Schedule, depending on the circumstances under which the service was provided. The IOCE changes the status indicator to A and removes the APC assignment when sometimes therapy codes are appended with therapy modifiers (GP for physical therapy, GO for occupational therapy, or GN for speech language pathology) or therapy revenue codes (042x,

043x, 044x). If the SI is changed to A these services are excluded from being packaged in the presence of a comprehensive APC.

Critical care processing

Processing of certain ancillary services with SI of Q1 or Q3 that are reported with critical care code 99291 are packaged when reported on the same service date, or effective with version 18.0, on the same claim, as the critical care code. If procedure code 99291 is present with any of the specified ancillary procedure codes, the IOCE changes the SI of the ancillary procedure code from Q1 or Q3 to N for packaging. An exception applies if code 99291 is present and modifier 59, XE, XP, XS or XU are present on any line with the same date of service or on the same claim, the specified critical care ancillary codes are not packaged; the SI is changed to the standard SI and APC specified for the code. If 99291 is not present on the same date of service or the same claim, the SI for the ancillary procedures is changed to the standard SI and APC specified for the code when separately payable, or packaged under previous conditional APC processing logic for specified ancillary services with SI = Q1, if there are other payable procedures present.

If critical care code 99291 is present and the claim meets the criteria for assignment under the Comprehensive Observation APC (version 17.0), the exception for the presence of modifier 59, XE, XP, XS or XU does not occur; all ancillary, adjunctive services are packaged under the Comprehensive Observation APC.

Critical care-packaged ancillary service code 94762 is not subject to the modifier 59, XE, XP, XS, XU exception, and always packages when present with critical care code 99291. If reported in the absence of 99291, 94762 (SI = Q3) is subject to conditional APC processing and may package with other payable procedures, or assign the standard APC and SI for separate payment. Note: effective with version 18.3, critical care ancillary service code 36600 is no longer subject to the modifier exception.

Advance care planning

Effective January 1, 2016 (v17.0), Advance Care Planning services reported with procedure codes 99497 and 99498, that are also reported on the same date of service with the Medicare annual wellness visit (initial or subsequent), are paid under the Medicare Physician Fee Schedule (SI changed to A); otherwise, advance care planning is subject to conditional packaging. If advance care planning procedure 99497 is reported with no other payable OPPS service, it is assigned its standard SI and APC values; if reported with other OPPS payable services (SI = S, T, V, J1, J2, Q1, Q2, Q3), on the same claim, it is packaged (SI = N).

Note that procedure code 99498 is an add-on procedure code with standard SI = N. If 99498 is reported with the annual wellness visit but the primary code 99497 is not present, it continues to be packaged with SI = N. If 99498 is not reported with the annual wellness visit, it retains packaging status with SI = N.

Conditional processing for laboratory procedures

Effective 1/1/2014 (v15.0 – v16.3), packaged laboratory codes (with status indicator of N) that are submitted on a claim with bill type 12x or 14x, or 13x when the L1 modifier is appended to a packaged laboratory code, have the SI changed to A and set the packaging flag to 0 (not applicable to edit 27). If packaged laboratory codes are submitted on a claim with bill type 12x and condition code W2 is present, the laboratory codes remain packaged (status indicator N).

Effective January 1, 2016 (v17.0), laboratory codes with SI = Q4 are subject to conditional packaging criteria in determining the final SI assignment, i.e., paid under the clinical lab fee schedule (SI = A), or packaged (SI = N): If a laboratory code with an SI= Q4 results in a final SI assignment of A, it returns a PMF value of 2.

For claims with bill type 13x: if the laboratory code(s) with SI Q4 is reported with modifier L1 and is present with other payable OPPS services that have SI = J1, J2, S, T, V, Q1, Q2, or Q3 on the same claim, the SI is changed to A; otherwise the laboratory code(s) is packaged with SI=N. If there are only laboratory codes present, all laboratory codes with SI=Q4 are changed to SI=A.

Note: Modifier L1 is deactivated as of January 1, 2017 (v18.0), and the provision to change the SI to A if modifier L1 is present is discontinued. If laboratory codes with SI = Q4 are present with other payable OPPS procedures, the laboratory codes are packaged with SI = N.

- Effective January 1, 2017 (v18.0), special conditions apply to OPPS services that have a final SI of Q1, Q3, S, T, or V and a line item action flag of 2 or 3 present. If the payable OPPS service(s) has the line item action flag (2/3) present, the laboratory codes with SI = Q4, are processed for payment by having the SI changed from SI=Q4 to SI=A.
- For claims with bill type 12x without condition code W2, and for claims with bill type 14x: if a laboratory code(s) is present with SI Q4, the SI is changed to A. Laboratory services on claims with bill type 12x that do contain condition code W2 remain packaged (SI = N).

Note: Some laboratory codes (e.g. molecular pathology codes) are always assigned SI = A, and are not subject to the conditional packaging logic. There are also laboratory codes that are assigned SI = N and are not subject to conditional packaging logic; laboratory codes with SI = N are always packaged.

Composite APC processing

Certain codes may be grouped together for reimbursement as a "composite" APC when they occur together on the same claim with the same date of service (SI = Q3). When the composite criteria for a group are met, the primary code is assigned the composite APC and status indicator for payment; non-primary codes, and additional primary codes from the same composite group, are assigned status indicator N and packaged into the composite APC. Special composite adjustment flags identify each composite and all the packaged codes on the claim that are related to that composite. Composite adjustment flags are not assigned for composite-packaged lines that are included on a claim containing a comprehensive APC. Multiple composites, from different composite groups, may be assigned to a claim for the same date. Terminated codes

(modifier 52 or 73) are not included in the composite criteria. If the composite criteria are not met, each code is assigned an individual SI/APC for standard OPPS processing. Some composites may have additional or different assignment criteria. Lines that are denied or rejected are ignored in the composite criteria.

Partial hospitalization and community mental health center processing

Effective January 1, 2017 (v18.0), partial hospitalizations are paid a single level per diem PH APC dependent on the provider type (hospital-based PHP program or a CMHC program), condition codes, bill types and HCPCS codes. To obtain the PH APC a minimum of three or more PH services must be reported per day, one of which must be from the PHP Primary List. (Please reference the HCPCS Map within the data files for the PHP Primary list as well as the list for All PHP services.) The first line item containing the HCPCS code from the PHP Primary list is assigned the PH APC and the final SI = P. All other partial hospitalization services on the same day are packaged, SI is changed to N. A composite adjustment flag identifies the PH APC and all the packaged PH services on the day; a different composite adjustment flag is assigned for each PHP day on the claim. Effective 4/1/2015 through the current version, the payment adjustment flag value of 11 is assigned to the PHP payment APC line when the service units are greater than one, indicating the service units are reduced to one by IOCE processing.

If there is an inpatient only procedure (SI = C) on the same claim as PHP or Daily Mental Health services, no Partial Hospitalization or Daily Mental Health processing logic is performed.

If less than the minimum amount (number and type) of services required for PHP are reported for any day, the PHP day is denied, i.e., all PHP services on the day are denied and no PHP APC is assigned (edit30). Note that certain PHP services that are add-on codes are not included in the count of number of services for the day (Please reference the HCPCS Map within the data files for list of PHP services flagged as add-on codes). Any non-PHP services on the same day are processed per the usual OPPS rules. Lines that are denied or rejected are ignored in PHP processing. If mental health services that are not approved for the partial hospitalization program are submitted on a PHP claim (13x TOB with condition code 41 or TOB 76x), the claim is returned to the provider (edit 80).

Effective October 1, 2017 (v18.3), edit 95 is reactivated for informational purposes only, with no impact on payment. Edit 95 is returned if a PHP claim contains weekly services with less than 20 hours of PHP services per week. Hours of service for PHP services that result in packaging (SI = N) due to PHP APC processing are included in the total count of hours per week; however, certain PHP services that are add-on codes are not included towards the weekly count of hours. If the PHP service indicates a fractional time-based requirement in the procedure code description (e.g. 30 minutes), the fractional amount and the service units are utilized in the calculation of total hours per week. If conditions are present for edit 95, an informational only line item denial or rejection flag value of 3 is returned, indicating that although the conditions for edit 95 exist, payment is not impacted, and the line item rejection disposition flag in the claim return buffer is not set. The IOCE continues to process lines with edit 95 for payment by the OPPS Pricer. The IOCE does not apply edit 95 on the admission week submitted on an admission PHP claim (761, 762, 131 w CC 41, or 132 w CC41), instead if the admission week has

less than 20 hours of PHP services, Payer Condition Code MP is provided. The IOCE also does not apply edit 95 on the discharge week when submitted on a PHP discharge claim (761, 764, 131 w CC 41, or 134 w CC41), instead Payer Condition Code MQ is provided if the discharge week contains less than 20 hours of PHP services. Effective July 1, 2019 (v20.2) the discharge week is identified as the last full (7 day) week on the claim and is never edited with 95 nor any partial days that follow, instead MQ is returned if the last full week contains less than 20 hours of PHP services.

Effective July 1, 2019 (v20.2), the IOCE returns Payer Value Code and Value Code Amount QW 0.0000 on Interim PHP claims that have a partial last week present. The last 5 values of the Value Code Amount provided with QW represent the count of days and hours in which PHP services are provided for the partial week (first portion of week). For example; if the last week on an interim PHP claim is not 7 days but instead only 3 days, and in those 3 days 15 ½ hours of PHP services are provided, the last 5 values in the Value Code Amount is 3.1550. Note that the partial week is not edited with 95. The IOCE processes the next claim and can combine the partial week (first portion) from the previous claim to the next claim by input Value Code and Value Code Amount QA 0.0000 which is submitted by the Shared System Maintainer (SSM). The IOCE combines the two partial weeks into one full week (7 days) and if the full week does not contain up to 20 hours of PHP services, the lines on the second portion of the full week are editing with 95 and Payer Value Code MV is output. The output of MV requires the SSM to adjust the claim containing the first portion of the partial week. The SSM submits Condition Code MW on input to a PHP adjustment claim indicating that the IOCE needs to edit the partial last week present on the claim.

Effective January 1, 2017 (v18.0), CMHC providers may be subject to outlier payment limitations. If condition code 66 (Provider does not wish outlier payment) is present for a CMHC claim with bill type 76x, payment method flag value of 6 is provided on each OPPS payable line (OPPS paid lines are those that would have previously had payment method flag 0). If condition code MY (Outlier cap bypass) is passed to the IOCE by the MAC, with or without condition code 66, payment method flag value of 9 is returned and the outlier payment limitation is bypassed.

Effective October 1, 2018 (v19.3), PHP claims submitting a claim with a code first diagnosis in the principal diagnosis position without a mental health diagnosis in the first secondary diagnosis position, return edit 109. Please reference the Dx10Map within the data files for diagnoses flagged as code first as well as diagnoses flagged as mental health diagnoses.

Daily mental health processing

Effective January 1, 2017 (v18.0), the comparison for summing the payment of the individual MH services to the level II partial hospital-based per diem APC payment rate is changed to compare the sum to the single level PH hospital-based per diem APC payment rate.

Reimbursement for a day of outpatient mental health services in a non-PH program is capped at the amount of the level II hospital-based partial hospital per diem. On a non-PHP claim, the IOCE totals the payments for all the designated MH services with the same date of service; if the sum of the payments for the individual MH services exceeds the level II hospital-based partial

hospital per-diem, the IOCE assigns a special “Mental Health Service” composite payment APC to one of the line items that represent MH services. All other MH services for that day are packaged; SI changed from Q3 to N. A composite adjustment flag identifies the Mental Health Service composite APC and all the packaged MH services on the day that are related to that composite. The payment rate for the Mental Health Services composite APC is the same as that for the level II hospital-based partial hospitalization APC. Lines that are denied or rejected are ignored in the Daily Mental Health logic. Some mental health services are specific to partial hospitalization and are not payable outside of a PH program; if any of these codes is submitted on a 12x, or 13x TOB without condition code 41, the claim is returned to the provider (edit 81).

Effective 4/1/2015 (v16.1), payment adjustment flag value 11 is assigned to the Mental Health payment APC line when the service units are greater than one, indicating the service units are reduced to one by IOCE processing.

LDR prostate brachytherapy composite APC processing and assignment criteria

Note: The LDR composite APC is effective only for versions 9.0 – 18.3; LDR claims with From Dates on or after 1/1/2018 (v19.0) are included in the comprehensive APC processing logic.

- If a "prime" code is present with at least one non-prime code from the same composite on the same date of service, assign the composite APC and related status indicator to the prime code; assign status indicator N to the non-primary code(s) present.
- Assign units of service = 1 to the line with the composite APC.
- Effective 4/1/2015 (v16.1), if the units of service are greater than one for the line with the composite APC, assign units of service = 1 and payment adjustment flag = 11.
- If there is more than one prime code present, assign the composite APC to the prime code with the lowest numerical value and assign status indicator N to the additional prime code(s) on the same day.
- Assign the indicated composite adjustment flag to the composite and all component codes present.
- If the composite APC assignment criterion is not met, assign the standard APC and related SI to any/all component codes present.
- Terminated codes (modifier 52 or 73 present) are ignored in composite APC assignment.
- Procedures that are packaged (SI changed to 'N' in an earlier processing step) are not included in the composite assignment logic.
- Effective 1/1/2017 (v18.0), prime code 55875 may be subject to comprehensive APC processing when reported without non-prime code 77778.

Electrophysiology/ablation composite APC processing and assignment criteria

Note: The electrophysiology/ablation composite APC is effective only for versions 9.0 – v15.3; electrophysiology/ablation claims with From Dates on or after 1/1/2015 (v16.0) are included in the comprehensive APC processing logic.)

- If there is a single code present from group C, or one 'prime' code (group A) and at least one non-prime code (group B) on the same date of service, assign status indicator N to the non-primary code(s) present.
- Assign units of service = 1 to the line with the composite APC.
- If multiple codes from group C are present, assign the composite APC to the code with the lowest numerical value and assign status indicator N to additional group C codes on the same day.
- If there is more than one prime code present, assign the composite APC to the prime code with the lowest numerical value and assign status indicator N to the additional prime code(s) on the same day.
- If the criteria for APC assignment are met with a code from group C as well as from groups A&B, assign the composite APC to the group C code and assign SI of N to the codes from groups A&B.
- If there is one or more codes from group C present with one or more codes from either group A or group B; assign the composite APC to the group C code and assign the standard APC and related SI to any separate group A or group B codes present.
- Assign the indicated composite adjustment flag to the composite and all component codes present.
- If the composite APC assignment criterion is not met, assign the standard APC and related SI to any/all component group A and group B codes present.
- Terminated codes (modifier 52 or 73 present) in group C are assigned to the composite APC; terminated codes in groups A and B are ignored in composite APC assignment
- Procedures that are packaged (SI changed to 'N' in an earlier processing step) are not included in the composite assignment logic.

EAM composite APC level I and level II assignment criteria

Note: Level I and II EAM APCs deleted effective 1/1/2014 (v9.0-v14.3)

- G0378 is used to identify all outpatient observation services, regardless of the reason for observation (diagnosis), the duration of the service, or whether the criteria for the EAM composite APCs are met.
- G0379 is used to identify direct referral from a physician in the community to hospital for observation care, regardless of the reason for observation (diagnosis).

- If there is at least one Level I APC Prime List A clinic visit codes on the day of or day before observation (G0378), or code G0379 is present on the same day as G0378, assign the Level I composite APC and related status indicator to the clinic visit or direct referral code.
- If there is at least one Level II APC Prime List A critical care or emergency room visit code on the day of or day before observation (G0378), assign the composite APC and related SI to the critical care or emergency visit code.
- Hours/Units of service for observation (G0378) must be at least 8 or the composite APC is not assigned. A composite adjustment flag will be applied to the visit line that gains the CAPC and the line for G0378. Note: The SI for G0378 is always N.
- If the criteria is met for a level I and a level II EAM composite APC, assignment of the Level II takes precedence.
- Extended assessment and management composite APCs have SI = V if paid and are assigned units of service =1.
- If multiple qualifying Prime Codes (visit or CC) appear on the day of or day before G0378, assign the composite APC to the prime code with the highest separately paid payment rate; assign the standard APC to any/all other visit codes present.
- Additional clinic, critical care, or emergency room visit codes (whether or not on the prime lists) are assigned to their standard APCs as separately paid items. Exception: Additional reporting of G0379 is always packaged (SI = N) if there is an extended assessment and management APC on the claim. Note: Only one EAM composite APC is assigned per claim.
- If a "T" or "J1" procedure occurs on the day of or day before observation, the composite APC is not assigned.
- Lines with G0378 and G0379 are rejected if the bill type is not 13x (or 85x).
- EAM logic is performed only for claims with bill type 13x, with or without condition code 41.

Extended assessment and management composite APC criteria

Note: Effective 1/1/14, (v15.0-v16.3) a new EAM composite APC was created, replacing Level I and Level II EAM composite APCs. Any logic point referenced above is still relevant to how the EAM composite is assigned or not assigned unless stated otherwise below.

- If there is at least one of the critical care, emergency room, or clinic visit codes on the day of or day before observation (G0378), or code G0379 is present on the same day as G0378, assign the composite APC and related status indicator to the critical care, emergency department, clinic visit, or direct referral code.
- Effective 4/1/2015 (v16.1), if the units of service are greater than one for the line with the composite APC, the units will be reduced to 1 and a payment adjustment flag value of 11 will be returned.
- Sometimes therapy codes subject to conditional APC processing due to default SI= Q1 with standard SI=T that meet therapy requirements and have final SI= A, are not considered for

“T” procedure criteria that would prevent EAM composite APC assignment (v15.0-v16.3 only).

Note: Effective 1/1/2016 (v17.0), all EAM Composite APC logic is deactivated; observation claims meeting specified criteria are assigned under a comprehensive observation APC. See Comprehensive Observation Logic for more information.

Direct referral logic

Prior to version 17.0, direct referral from a physician in the community to a hospital for observation care may be used in the assignment of an extended assessment and management composite APC or packaged into T, V or critical care service procedure if present; otherwise, the direct referral is processed as a medical visit. Direct referral for observation that is denied or rejected is not included in any subsequent special direct referral logic, and the default SI is retained as the final SI. Exception: If line item action flag = 1 has been assigned to the line with G0379, the denial/rejection is ignored, the line is included in subsequent direct referral logic, and that logic determines the final SI.

Multiple imaging composite assignment rules & criteria

- Multiple imaging composite APCs are assigned for three "families" of imaging procedures – ultrasound, computed tomography and computed tomographic angiography (CT/CTA), and magnetic resonance imaging and magnetic resonance angiography (MRI/MRA).
- Within two of the imaging families (i.e, CT/CTA and MRI/MRA), imaging composite APCs are further assigned based on procedures performed with contrast and procedures performed without contrast. There is currently a total of five multiple imaging composite APCs (8004, 8005, 8006, 8007, and 8008). For a list of procedures eligible for the composite assignment, refer to the report within the data files labeled, Multiple Imaging Composite APC's.
- If multiple imaging procedures from the same family are performed on the same DOS, a multiple imaging composite APC is assigned to the first eligible code encountered; all other eligible imaging procedures from the same family on the same day are packaged (the status indicator is changed to N).
- Multiple lines or multiple units of the same imaging procedure count to assign the composite APC; independent or conditional bilateral imaging procedures with modifier 50 count as 2 units.
- If multiple imaging procedures within the CT/CTA family, or the MRI/MRA family are performed with contrast and without contrast during the same session (same DOS), the 'with contrast' composite APC is assigned.
- Imaging procedures that are terminated (modifier 52 or 73 present), are not included in the multiple imaging composite assignment logic; standard imaging APC is assigned to the line(s) with modifier 52 or 73 (SI changed from Q3 to separately payable SI and APC).

- Imaging procedures that are packaged (SI changed from Q# to N in an earlier processing step) are not included in the multiple imaging composite assignment logic.
- If the imaging composite APC is assigned to an independent or conditional bilateral code with modifier 50, the modifier is ignored in assigning the discount formula.
- Effective 4/1/2015 (v16.1), if the units of service are greater than one for the line with the composite APC, the OCE re-assigns units of service = 1 and returns a payment adjustment flag = 11.
- Effective 1/1/2016 (v17.0), certain CT scan codes performed on equipment not meeting NEMA standards are reported with modifier CT. If multiple CT scan codes reported with modifier CT are present, and contribute to the assignment of a composite APC, the first eligible line assigned to the composite APC receives payment adjustment flag 14, whether or not modifier CT is reported on the line. All other CT scan codes reported with modifier CT that are included for composite APC assignment are packaged (SI = N), and do not have payment adjustment flag 14 assigned.
- Lines that are candidates for composite APC assignment that are present on a comprehensive APC claim do not have the composite adjustment flag applied; composite candidates are packaged with SI = N under comprehensive APCs.
- Special consideration is given to code 75635, which is a current composite candidate under ultrasound with SI = Q2 which makes it eligible for conditional APC processing. If 75635 is present, consideration of separate payment under conditional APC processing is evaluated prior to composite candidate consideration. If composite conditions are not present, then 75635 is processed for separate payment or packaging under conditional APC processing.

Comprehensive APC processing

Effective 1/1/2015 (v16.0), certain high cost procedures which have an SI=J1 are paid an all-inclusive rate to include all services submitted on the claim, except, for services excluded by statute. All allowed, adjunctive services submitted on the claim are packaged into the "comprehensive" APC payment rate (i.e., the status indicator is changed to N). Multiple comprehensive procedures, if present on the claim in specified combinations, may be assigned to a higher-paying comprehensive APC representing a complexity adjustment. Services that are excluded from the all-inclusive payment retain their standard APC and SI for standard processing.

Effective v17.0, if SRS planning and preparation codes are present on the same claim with the SRS C-APC, the planning and preparation codes are excluded from the C-APC packaging logic.

General comprehensive APC assignment rules and criteria

- Comprehensive APC processing is performed only for OPPS claims with bill type 13x, or claims with bill type 12x with condition code W2.
- Comprehensive APCs are assigned using the following hierarchy:

- Inpatient-Only Patient Expired (SI = J1)
- High-Cost Procedures (SI = J1)
- Comprehensive Observation (SI = J2)
- If there are multiple comprehensive APC procedures existing on the same claim from the different categories listed above, the comprehensive APC procedures are packaged (SI = N) according to the hierarchy of services present; the procedure or service highest in the hierarchy is assigned the comprehensive APC for the claim. Additional processing conditions for each of the different categories is listed separately below.
- Claims containing a payable inpatient procedure (modifier CA and patient status 20) suppress comprehensive APC processing for v16.0 – v16.3, and are processed under inpatient procedure processing previously in place.
- Multiple service units reported on a comprehensive APC line are reduced to one for processing payment based on a single comprehensive APC payment rate; payment adjustment flag 11 is assigned.
- Services that are excluded by statute from packaging include; ambulance, brachytherapy (SI=U), mammography, pass-through drugs, biologicals and devices (SI= G or H), preventive care including influenza and pneumococcal vaccines (SI=L), corneal tissue acquisition, certain CRNA services and Hepatitis B vaccines (SI = F). Certain blood products (i.e. packed red cells or whole blood) reported with the appropriate revenue code are also excluded from packaging under comprehensive APCs.
- Additionally, certain wound care services identified as “sometimes therapy” when appended with a therapy modifier (GP for physical therapy, GO for occupational therapy, or GN for speech language pathology) or a therapy revenue code (042x, 043x, 044x), change the SI of the service to A, and are excluded from comprehensive APC packaging.
- Procedures that are not allowed on OPPS claims (SI = B, C, E, E1, E2 or M) are edited as usual and retain the standard SI, with the exception of procedure codes representing DME services with SI = Y (Billable only to DMERC); DME codes with SI = Y are packaged into the comprehensive APC payment; edit 61 is not returned.
- Comprehensive APC claims containing lines that may be composite APC candidates do not have the composite adjustment flag applied.

Comprehensive APC Assignment for High-Cost Procedures

- If a single comprehensive procedure (SI = J1) is present on a claim, assign the standard comprehensive APC for all-inclusive claim payment.
- If multiple comprehensive APC procedures are present, select the highest ranked comprehensive procedure for standard comprehensive APC assignment.
- Once the highest ranked comprehensive procedure is determined, if there are multiple comprehensive procedures present with SI = J1 or there are qualifying add-on procedure codes present (SI = N), determine if there are any pairings that may qualify for a complexity

adjustment. Multiple occurrences or service units of the same comprehensive procedure, or the reporting of modifier 50, may qualify for complexity adjustment. If there is a qualifying pair present associated with the highest ranked comprehensive procedure, assign the complexity-adjusted comprehensive APC.

- If the highest ranked comprehensive procedure has service units greater than one, reduce the service units to one and assign payment adjustment flag 11.
- If a comprehensive APC procedure is terminated by the reporting of modifier 52, 73 or 74, no complexity adjustment is performed for the claim; the standard comprehensive APC is assigned to the comprehensive procedure with the highest rank. Usual terminated procedure discounting is applied if modifiers 52 or 73 are reported (modifier 74 does not apply the terminated procedure discount).
- If the comprehensive APC is assigned to an independent or conditional bilateral code with modifier 50, the modifier is ignored in assigning the discount formula.
- Effective 1/1/2016 (v17.0), when SRS (stereotactic radiosurgery) planning and preparation codes are reported on the same claim as the comprehensive APC for SRS (APC 5627), the planning and preparation codes are excluded from packaging; the standard SI and APC, or the composite APC and SI (if criteria is met for multiple CT scan imaging procedures) are assigned. If the SRS planning and preparation codes are reported on a claim with any other comprehensive APC procedure, the codes are packaged under the comprehensive APC packaging criteria.
- Effective 1/1/2016 (v17.0), if conditions are present for pass-through device offset, a single device offset is provided for comprehensive APC claims only if the comprehensive APC procedure is paired with the pass-through device. Otherwise, no device offset is provided for device offset conditions that may be present for procedures that are packaged (SI = N) as a result of comprehensive APC processing.
- Effective 1/1/2019 (v20.0), procedure codes assigned to New Technology APCs are excluded from packaging under C-APC processing logic; standard SI and APC are assigned.

Inpatient procedure processing under comprehensive APCs

Effective January 1, 2016 (v17.0), if an inpatient-only procedure is present with modifier CA for a patient who expires or transfers to another hospital (patient status code is 2, 5, 20, 62, 63, 65, 66, 82, 85, 90, 91, 93 or 94), the inpatient procedure is assigned under a comprehensive APC (SI = J1), and all other services reported on the claim are packaged (SI = N), except for those items excluded under comprehensive APC processing. Excluded items with non-covered SI = B, E, C or M return the standard SI; any edits associated with the non-covered SI are not returned. If modifier CA is reported for an inpatient-only procedure and the discharge status does not indicate the patient expired or transferred, the claim is returned to the provider (edit 70). Additional comprehensive APC procedures (SI = J1 or J2) reported on the same claim as the inpatient-only procedure where the patient expired or transferred are packaged (SI = N). If multiple lines, or one line with multiple units, have SI = C and modifier CA, generate edit 60 for all lines with SI = C and modifier CA.

Inpatient-only procedures that are on the s procedure list are bypassed when performed incidental to a surgical procedure with Status Indicator T, or effective 1/1/2015, if reported on a claim with a comprehensive APC procedure (SI = J1). The line(s) with the inpatient-separate procedure is rejected (edit 45) and the claim is processed per usual OPPS rules.

Effective January 1, 2018 if procedure code 01402 (Anesthesia for TKA) is reported on the same day as procedure code 27447 (Total Knee Arthroplasty) the SI of 01402 changes from C to N and will always package. If code 01402 is reported with any other procedure without 27447 reported on the same claim, the SI remains its standard SI = C and processes as usual.

See Inpatient Procedure Processing through v16.3 for older logic in which Inpatient Procedures were not processed under Comprehensive APCs.

Observation processing

Effective January 1, 2016 (v17.0), claims for observation services (SI = J2) meeting specified criteria are paid under a single Comprehensive Observation C-APC payment rate, to include all services submitted on the claim. The same exception criteria for excluded services under high cost procedure comprehensive APCs (SI = J1) apply to the Comprehensive Observation APC, and all allowed adjunctive services submitted on the claim with the Comprehensive Observation APC are packaged (SI is changed to N). If multiple visits are present for qualified Comprehensive Observation C-APC assignment, the visit code with the highest standard APC payment rate is assigned the Comprehensive Observation APC; all other visits are packaged.

Comprehensive observation APC assignment criteria

- There is no procedure with SI = T present for the claim.
- HCPCS G0378 is reported with 8 or more service units.
- There is a visit code present from the following list on the same day or one day before HCPCS G0378: Type A/Type B emergency department visits, critical care, outpatient clinic visit, or HCPCS G0379 for direct referral is present on the same day as G0378.
- The claim does not contain a comprehensive APC procedure with SI = J1.
- If multiple visit codes with SI = J2 are present, the visit code with the highest standard APC payment rate is chosen as the comprehensive observation APC; all other visit codes are packaged (SI = N).
- If the claim does not meet the conditions for comprehensive observation APC assignment, the visit code(s) is/are assigned their standard APC and SI.
- If HCPCS G0379 is present and criteria is not met for comprehensive observation APC, and there are other visit codes present (SI = J2 resulting in standard APC and SI = V), G0379 is packaged. Additional reporting (subsequent occurrences) of HCPCS G0379 are packaged (SI = N).

Device-dependent procedure editing and processing

The use of a device, or multiple devices, is necessary to the performance of certain outpatient procedures. If any of these procedures is submitted without a code for the required device(s), the claim is returned to the provider. Discontinued procedures (indicated by the presence of modifier 52, 73 or 74 on the line) are not returned for a missing device code. Conversely, some devices are allowed only with certain procedures, whether or not the specific device is required. If any of these devices is submitted without a code for an allowed procedure, the claim is returned to the provider (v6.1 – v15.3).

Effective 1/1/2015 (v16.0), the submission of a device-dependent procedure also requires that a device be submitted on the same claim/day. If any device-dependent procedure is submitted without a code for a device on the same claim with the same date of service, the claim is returned to the provider (edit 92). Discontinued procedures (indicated by the presence of modifier 52, 73 or 74 on the line) are not returned for a missing device code.

Effective 1/1/2016 (v17.0), if there is a terminated device intensive procedure from a specified list reported with modifier 73, the device portion cost of the procedure APC is output by the IOCE with a Payer Value Code of QQ. The device portion amount is used by the OPPS Pricer program to reduce the APC payment rate prior to application of the terminated procedure discount. A unique payment adjustment flag value of 16 identifies the device intensive procedure reported with modifier 73. In the event there are multiple terminated device intensive procedures present with modifier 73, the device portion amounts are summed and the total device portion is provided; the payment adjustment flag of 16 is assigned for each terminated procedure. Terminated procedure lines present with modifier 73 that may be packaged (SI = N) do not contribute to the device portion amount, and a payment adjustment flag is not returned.

Note: Effective January 1, 2017 (v18.0), the device portion cost for the terminated procedure offset is determined at the individual HCPCS code level, regardless of the APC assignment.

Some implanted devices and some administered substances (SI = H, U), require an implantation or other associated procedure (SI = S, T or X) to be billed on the same claim. If an associated procedure is not present, the claim is returned to the provider (edit 38).

Special conditions apply for a specified procedure pair, Cardioverter Defibrillator and Pacing Electrode, 33249 and 33225. Both codes have a default SI of Q3, however they are not components of a composite APC. The SIs for 33249 and 33225 is changed from Q3 to the specified SI/APC for standard OPPS processing when they do not appear on the same claim with the same date of service. When both procedures are submitted together on the same date of service, the primary procedure is assigned to the standard APC for payment and the secondary procedure is packaged. [v13.0 – v15.3]

Device credit conditional processing

Providers must append modifier 'FB' to procedures that represent implantation of devices that are obtained at no cost to the provider; modifier 'FC' is appended if a replacement device is

obtained at reduced cost. If there is an offset payment amount for the procedure with the modifier, and if there is a device present on the claim that is matched with that procedure on the offset procedure/device reduction crosswalk, the IOCE applies the appropriate payment adjustment flag (corresponding to the FB or FC modifier) to the procedure line. The IOCE also reduces the APC rate by the full offset amount (for FB), or by 50% of the offset amount (for FC) before determining the highest rate for multiple or terminated procedure discounting. If the modifier is used inappropriately (appended to procedure with SI other than S, T, X, V or Q3), the claim is returned to the provider [edit 75, v8.0 – 14.3]. If both the FB and FC modifiers are appended to the same line, the FB modifier takes precedence and the full offset reduction is applied [v10.0 - v14.3].

Effective 1/1/2014, if modifier FB or FC is reported on a claim with a device implantation procedure, the claim is returned to the provider [edit 75, v15.0 – 15.3].

Standard device requirements apply to both procedures under all circumstances; however, modifier FB or FC on the secondary procedure is ignored for offset reduction if the SI for the procedure is changed to N. (Device requirements changed; modifier FB/FC no longer used for offset reduction, effective v15.0).

Effective 1/1/2016 (v17.0), if conditions exist for full or partial device credit for a device intensive APC represented by the presence of Condition Code 49, 50 or 53, the device credit amount is output by the IOCE with Payer Value Code QU, which is used by the OPPS Pricer program to reduce the device intensive APC payment rate by the device credit amount. A unique payment adjustment flag value of 17 identifies the device intensive procedure for which the device credit applies. In the event there are multiple device intensive APCs present for device credit, the credits are summed and the total is provided in the value code amount field; the payment adjustment flag of 17 is assigned for each device intensive procedure associated with the device credit. Device intensive procedures that are packaged (SI = N) do not contribute to the device credit amount, and a payment adjustment flag is not returned. If the device intensive procedure is a comprehensive APC procedure and is also eligible for complexity-adjusted APC assignment under comprehensive APCs, the device credit amount for the complexity-adjusted comprehensive APC is provided.

Note: Effective January 1, 2017 (v18.0), the full or partial device credit amount is determined at the individual HCPCS code level, regardless of the APC assignment.

Pass-through device processing

Claims with pass-through device HCPCS codes (SI = H) furnished with certain device-intensive procedures require a payment offset to the APC payment rate for the procedure. Effective January 1, 2016 (v17.0), the IOCE shall identify the offset condition for the pass-through device HCPCS and associated device-intensive procedure by providing a unique claim level Payer Value Code (QN), with Value Code amount representing the payment offset in the claim return buffer. A payment adjustment flag is returned to identify the pass-through device HCPCS line(s) associated with the payment offset(s) multiple iterations of the same payment adjustment flag value may be returned in the event there are multiple pass-through device HCPCS lines present

that are associated with the same device-intensive procedure. An additional claim level Payer Value Code (QO) and payment adjustment flag value may be returned if there is an additional condition present for a separate device offset on the same claim (Payment adjustment flag values of 12 & 13 identify the pass-through devices which require offsets). Claims with pass-through devices reported without the associated device-intensive procedure are returned to the provider (edit 98).

Effective April 1, 2018 (v19.1), certain procedure and pass-through device pairings may have a mid-quarter activation date associated with FDA approval. Claims reporting pass-through devices prior to the mid-quarter activation date are line item denied (edit 105). The edit will be returned on the line containing the pass-through device.

Note: Effective January 1, 2017 (v18.0), the pass-through device offset amounts are determined at the HCPCS code level, regardless of the APC assignment.

If there is a comprehensive APC procedure present (SI = J1) and there are conditions present on the claim for pass-through device payment offset, if there is a pass-through device associated (paired) with the primary comprehensive APC procedure, then a single device offset condition is identified for the claim (Payer Value Code QN only with corresponding offset amount).

Conditions that may be present for pass-through device offset on a claim with a comprehensive APC that result in packaging of the device intensive procedure (SI = N) paired with the pass-through device do not produce a pass-through device payment offset.

An exception is made for claims containing the comprehensive APC for an inpatient-only procedure reported with modifier CA for a patient who expires that also contain conditions for pass-through device payment offset; the pass-through device payment offset is provided.

Drug administration

When multiple occurrences of any APC that represents drug administration are assigned in a single day, modifier 59 is required on the code(s) to permit payment for multiple units of that APC, up to a specified maximum; additional units above the maximum are packaged. If modifier 59 is not used, only one occurrence of any drug administration APC is allowed, and any additional units are packaged (v6.0–v7.3 only).

Blood and blood storage processing

In some circumstances, in order for Medicare to correctly allocate payment for blood processing and storage, providers are required to submit two lines with different revenue codes for the same service when blood products are billed. One line is required with revenue code 39X and an identical line (same HCPCS, modifier and units) with revenue code 38X. Revenue code 381 is reserved for billing packed red cells, and revenue code 382 for billing whole blood; if either of these revenue codes is submitted on a line with any other service, the claim is returned to the provider (edit 79) (HCPCS codes with descriptions that include packed red cells or whole blood may be billed with either revenue code).

Effective 1/1/2015, packed red cells reported with revenue code 381 and whole blood reported with revenue code 382 that appear on a claim with a comprehensive APC procedure (SI = J1) are excluded from packaging; the standard SI is retained.

Nuclear medicine procedure processing

Providers must append modifier 'FB' to specified Nuclear Medicine procedures when the diagnostic radiopharmaceutical is received at no cost/full credit. The IOCE appends the corresponding payment adjustment flag of 7 to the nuclear medicine procedure line as indication to Pricer to deduct the standard policy packaged offset amount from the APC rate. (Assignment of the discounting formula by IOCE is not affected; nuclear medicine procedures are non-type T) (v12.0 - v14.3).

Certain nuclear medicine procedures are performed with specific radiolabeled products. If any specified nuclear medicine procedure is submitted without a code for one of the specified radiolabeled products on the same claim, the claim is returned to the provider (edit 78) (v9.0 – v14.3).

Managed care processing

OPPS claims for Managed Care beneficiaries, as identified by the MAC (Payer only condition code MA – Managed Care enrollee), are not subject to line level deductible. Payment adjustment flag 4 is applied to all line items except for those that are packaged (SI = N) with line item charges = \$0.00.

Preventative services processing

Deductible and co-insurance may be waived for certain preventive services (See HCPCS Map within the data files for services flagged as preventive) and for any services submitted with modifier Q3 (Live kidney donor surgery and related services) on the line. A payment adjustment flag value of 9 or 10 is applied to preventive services to specify that either the deductible/ co-insurance is not applicable (PAF 9) or that the Co-insurance is not applicable (PAF 10) (v12.0 - Current). Preventive services or services reporting modifier Q3 that are packaged (SI = N) with line item charges = \$0.00 do not have a payment adjustment flag assigned for deductible and/ or coinsurance waiver.

Deductible is waived for all services coded in the CPT range 10000 – 69999, on any day/date of service when modifier PT (Colorectal cancer screening test converted to diagnostic test or other procedure) is also present on a valid code in the same range on the claim. The IOCE sets the specified payment adjustment flag of 4 on the line, except when any other payment adjustment flag is already applied to the same line. If a line reporting modifier PT is packaged (SI = N) with charges = \$0.00, the payment adjustment flag for deductible waiver is not applied.

Special processing for drugs and biologicals

Effective April 1, 2016 (v17.1), claims containing specified pass-through drugs or biologicals furnished with an associated procedure require pass-through payment offset. If conditions exist for pass-through drug or biological payment offset, the IOCE shall provide a unique Payer Value Code with Value Code amount representing the amount of the payment offset. A payment adjustment flag will be assigned to the pass-through drug or biological to identify which line(s) is associated with the corresponding Payer Value Code and Value Code amount; PAF 18, identify the first pass-through drug or biological, while PAFs 19 and 20 identify the second and third pass-through drug or biologicals. Multiple iterations of the same payment adjustment flag value may be returned in the event there are multiple pass-through drugs or biologicals present that are associated with the same offset condition. Claims that may contain multiple conditions eligible for pass-through drug or biological offset return additional Payer Value Codes.

Conditions that may be present for pass-through drug or biological payment offset on a claim with a comprehensive APC that result in packaging of the associated procedure (SI = N) paired with the pass-through drug or biological continue to produce a pass-through drug or biological payment offset. Specific pass-through drugs and biologicals that are not reported with an associated procedure for APC payment offset do not have coinsurance applied. Each PT drug present must be paired with an associated procedure (APC) in order to complete processing (edit 98).

There are four categories of pass-through drug and biological conditions eligible for payment offset: radiopharmaceuticals, skin substitute products, contrast agents and stress agents. Conditions for payment offset for pass-through radiopharmaceuticals reported with an associated nuclear medicine procedure are considered across the claim; otherwise conditions for payment offset for other pass-through drug and biological categories reported with an associated procedure are performed for the same service date.

Effective October 1, 2016 (v17.3), claims containing drugs and biological HCPCS codes with pass-through status (SI = G) or non-pass-through status (SI = K) that are reported without an OPPS payable procedure (SI = J1, J2, P, Q1, Q2, Q3, R, S, T, U, V) are returned to the provider (edit 99). There are exceptions for blood clotting factor HCPCS which may be self-administered, and certain biologic response modifier HCPCS, which do not require that an OPPS procedure is present. Additionally, payment for pass-through and non-pass-through drugs is no longer determined by the OPPS Pricer; the IOCE assigns payment indicator value of 2 for pass-through and non-pass-through drug HCPCS codes, representing drugs HCPCS priced by fee schedule (e.g. ASP drug file), although the final payment APC is provided.

Effective January 1, 2018 (v19.0), services that are necessary to perform in order to produce a biological are bundled into the total cost of the biological. Claims submitted using these bundled services (HCPCS) are line item rejected with edit 111, indicating that the service cost is duplicative. Additionally, if revenue code 870-873 (Cell/Gene Therapy) are reported with blank hcpcs, edit 111 is returned (LIR) to identify that the charges associated with the revenue center are bundled into the cost of a biological.

Skin substitute editing and processing

Certain skin substitute products are separately paid, based on their standard SI/APC assignment, only when billed with specified skin substitute application procedure codes. If one of the specified application procedure codes is not present on the same date of service as the skin substitute, the skin substitute product is packaged (has its SI changed to N) (v13.0 – v14.3).

Effective 1/1/2014 (v15.0), the submission of certain skin substitute application procedures require the reporting of a skin substitute product for the same day. Certain skin substitute application procedures and skin substitute products are divided into two lists based on high or low cost. Claims containing a high cost skin substitute application procedure without any of the high cost skin substitute product codes, and conversely any low cost skin substitute application procedure without a low cost skin substitute product code for the same day, are returned to the provider (edit 87). (See HCPCS map within the data files for products flagged as high or low cost skin substitutes.)

Effective 10/1/2015 (v16.3), if a skin substitute product code is present with line item action flag value of 2 representing an external line item denial, the line is not ignored by the IOCE for the purposes of applying edit 87. If the denied skin substitute product is on the list of skin substitute products and the skin substitute application procedure is also present, edit 87 is not returned.

Biosimilar HCPCS processing

Effective January 1, 2016 (v17.0), OPPS and non-OPPS claims containing biosimilar HCPCS codes without a corresponding modifier representing the biosimilar manufacturer, are returned to the provider (edit 94).

Effective July 1, 2017, certain modifiers used for biosimilar HCPCS reporting may have a mid-quarter activation date associated with the FDA approval. Claims reporting these specific modifiers prior to the mid-quarter activation date are line item denied (edit 103).

Note: Edits 94 and 103 are discontinued effective April 1/2018 (v19.1). These edits are returned on claims submitted within their respective effective dates.

HSCT and donor acquisition services processing

Effective January 1, 2017 (v18.0), claims containing HSCT (hematopoietic stem cell transplantation) allogeneic transplantation procedure 38240 require the reporting of a separate line representing donor acquisition costs with revenue code 815. If the separate line with revenue code 815 is not present, the claim is returned to the provider (edit 100).

Radiological processing

CT scan equipment not meeting NEMA standards

Effective January 1, 2016 (v17.0), if modifier CT is reported for certain imaging codes for CT scans performed on equipment not meeting NEMA standards, a payment adjustment flag value of 14 is passed to the OPPS Pricer indicating the line is subject to payment reduction. Codes from the specified list that are reported with modifier CT and are packaged (SI = N) due to multiple imaging composite APC assignment or comprehensive APC assignment, do not receive payment adjustment. The first code assigned to a multiple imaging composite APC receives the payment adjustment flag if there are CT scan codes reported with modifier CT that are constituents of the composite APC (i.e., the composite APC line may or may not have modifier CT reported).

Note: Modifier CT should not be reported on the same hcpcs line with X-ray Modifiers FX or FY as they are modifier conflicts, edit 102 is returned to the provider.

Film x-ray HCPCS processing

Effective January 1, 2017 (v18.0), if modifier FX (x-ray taken using film) is reported with a film x-ray HCPCS code, a payment adjustment flag value of 21 is passed to the OPPS Pricer program indicating the line is subject to payment reduction. If the film x-ray reported with modifier FX is packaged (SI = N), no payment adjustment flag is assigned. If a film x-ray HCPCS code is reported with modifier FX and is also on the coinsurance deductible n/a procedure list, payment adjustment flag 23 is returned to pricer indicating that the line is subject to a payment reduction as well as the coinsurance/ deductible being not applicable.

Computed radiography technology HCPCS processing

Effective January 1, 2018 (v19.0), if modifier FY (X-ray using computed radiography technology/cassette-based imaging) is reported with an x-ray HCPCS code using computed radiography technology, a payment adjustment flag value of 22 is passed to the OPPS Pricer program indicating the line is subject to payment reduction. If the computed radiography x-ray reported with modifier FY is packaged (SI = N), no payment adjustment flag is assigned. If an x-ray HCPCS code is reported with modifier FY and is also on the coinsurance deductible n/a procedure list, payment adjustment flag 24 is returned to pricer indicating that the line is subject to a payment reduction as well as the coinsurance/ deductible being not applicable.

Note: Effective January 1, 2018 (v19.0), edit 102 is returned if modifiers FX and FY are reported together on the same line as they are identified as a modifier pairing conflicts. To review the list of modifier conflicts subject to edit 102, please reference the data files and the report named modifier conflicts.

Hospice and home health processing

In order to allow the MAC to process and pay for certain services on Hospice claims, any HCPCS code with status indicator M that is submitted with revenue code 657 on 81x or 82x bill types have the status indicator changed from M to A; the claim is not returned to the provider.

Note: This logic is discontinued effective 1/1/2014 as edit 61 and 72 are excluded from hospice claims processing (bill type 81x, 82x).

Home health claim submissions are episode-based with dates of service that can span a maximum of 60 days. To allow for the claims to be processed through the IOCE, diagnosis codes reported on a claim with dates of service that span the annual October diagnosis update and the previous release are not edited.

Effective 10/1/2014, diagnosis codes considered to be manifestation codes (per the Medicare Code Editor [MCE]) are not allowed as the principal diagnosis on hospice claims and effective 1/1/2015 for home health claims submitted with bill type 32x. Hospice and Home Health claims submitted with a manifestation code as principal diagnosis are returned to the provider with (edit 86).

Vaccine administration, antigens, splints, and casts are paid under OPPS for hospitals. In certain situations, these services when provided by HHAs not under the Home Health PPS, and to hospice patients for the treatment of a non-terminal illness, are also paid under OPPS.

Effective January 1, 2017 (v18.0), Negative Pressure Wound Therapy (NPWT), reported with procedure codes 97607 or 97608, are separately payable OPPS services for HHAs when submitted on claims with bill type 34x, not under the Home Health PPS. If the NPWT codes are reported as a therapy service (therapy modifier and/or therapy revenue code present for the line), the codes are not processed as “sometimes therapy” and changed to SI=A by the IOCE; the standard SI and APC are retained for payment purposes. For the specified lists of services mentioned above please refer to the HCPCS map within data files.

Effective with the July 2018 release (v19.2), HHA claims (bill type 32x) are subject to procedure based edits 6 (Invalid Procedure) and 22 (Invalid Modifier); except in the instance of reporting a HIPPS code with revenue code 0023. Effective with the April 2019 release (v20.1), HHA’s (32x) submitting claims with dates of services that span the annual (January) release and the previous quarter do not return edit 6 if the service provided is effective for the reported line item date of service.

Non-excepted items or services in off-campus provider-based hospitals

Effective January 1, 2017 (v18.0), certain items and services, when provided in an off-campus provider-based hospital outpatient department, may be considered non-excepted under Section 603 of the Bipartisan Budget Act of 2015. Non-excepted services are reported with modifier PN (Non-excepted off-campus svc), and are subject to special processing in the IOCE for determination of whether or not payment is to be made or reduced under an alternative method (i.e. Physician Fee Schedule (PFS)). Claims containing certain services that are not

allowable with modifier PN are returned to the provider (edit 101). Claims that are reported with two of the following modifiers (PO, PN, or ER) on the same line item are returned to the provider, (edit 102).

Criteria for non-excepted services reported with modifier PN

- Special processing occurs only for hospital outpatient claims with bill type 13x with and without condition code 41, and bill type 76x (CMHC).
- Non-excepted processing logic occurs after all other IOCE processing.
- Services reported with modifier PN are identified using the Payment Method Flag for determination of payment method or reduction by the OPPS Pricer (PMF 7 or PMF 8).

Hospital outpatient claims with bill type 13x without condition code 41

- Emergency department visits and critical care encounters that have standard assignment under SI = V or S (critical care) are not allowed with modifier PN. Edit 101 is applied (RTP) and the Payment Method Flag is not set to a value of 7 or 8.
- Payment Method Flag Value 7 is applied for the following:
 - Services with SI = F, H, L, R and U that are excepted under Section 603
 - Services with SI = J1, J2, Q1, Q2, Q3, Q4, S, T and V that have Payment Adjustment Flag Value 4, 9 or 10 assigned (preventive services)
 - Certain HCPCS codes for radiation treatment with SI = B when reported with modifier PN have the SI changed to S and are assigned a special APC (see quarterly data file reports for a list of procedure codes)
- Payment Method Flag Value 8 is applied for the following:
 - Services with SI = J1, J2, Q1, Q2, Q3, Q4, S, T, and V, except for emergency department visits with SI = V and critical care encounters with SI = S.

Note: HCPCS G0463 for clinic visit with SI = J2 (for comprehensive observation APC) or standard SI = V is always assigned Payment Method Flag 8; it is not included in the list of emergency department visit codes or critical care encounters that are subject to edit 101.
 - Effective January 1, 2019, off-campus provider-based outpatient departments submitting clinic visit HCPCS code G0463 with modifier PO also have payment method flag of 8 returned, to apply the physician fee schedule reduction in the OPPS Pricer. Note: Modifiers PO and PN cannot be submitted on the same hcpcs line item, edit 102 is returned to the provider.
 - Services with SI = A, G, K and N have no impact; Payment Method Flag values 7 and 8 are not applicable.

Hospital off-campus provider-based outpatient departments submitting claims with Modifier PO

- Effective January 1, 2015, modifier PO is added as a valid modifier to voluntarily report items or services furnished in an off-campus provider-based outpatient department of a hospital. Effective January 1, 2016, reporting modifier PO is required to be reported for items or services performed in a hospital off-campus provider-based outpatient department.
- Effective January 1, 2019, off-campus provider-based outpatient departments submitting clinic visit HCPCS code G0463 with modifier PO have payment method flag A returned, to apply a payment reduction in the OPPS Pricer. Note: Modifiers PO, PN, or ER cannot be submitted on the same HCPCS line item, edit 102 is returned to the provider.

Hospital outpatient claims with bill type 13x with condition code 41 (PHP)

- PHP services with SI = P have a change in APC assignment to the CMHC PHP APC, with Payment Method Flag 7 applied.

Note: Non-PHP services reported with modifier PN that may be present on a hospital PHP claim are subject to the logic listed above for claims with bill type 13x without condition code 41.

CMHC PHP outpatient claims with bill type 76x

- PHP services with SI = P are not allowed with modifier PN. Edit 101 is applied (RTP) and the Payment Method Flag is not set to a value of 7 or 8.

FQHC processing under FQHC PPS

Effective for claims with From Dates on or after October 1, 2014, claims submitted through the IOCE with bill type 77x for Federally Qualified Health Centers (FQHC) are processed under FQHC PPS. Processing occurs for each date of service if the claim contains multiple dates. FQHC claims are paid under a per encounter basis for qualified clinic visits. Any supporting ancillary services provided on the day of the FQHC visit are packaged into the encounter payment. If the FQHC claim contains multiple dates of service, each day is processed separately through the IOCE. Special output flag values are assigned during FQHC processing under the IOCE to facilitate identification of FQHC payment processing by the Pricer program.

Criteria for processing FQHC PPS claims through the IOCE

FQHC encounters require the reporting of both a unique FQHC payment HCPCS code indicating the type of visit (New or established medical visit, new or established mental health visit, or Initial Preventive Physical Exam/Annual Wellness Visit), and a qualifying visit HCPCS related to the services performed. FQHC claims that do not contain a required FQHC payment HCPCS code are returned to the provider (edit 88). The FQHC HCPCS payment code must be reported with revenue code 519, 52x or 900. FQHC payment HCPCS codes reporting revenue codes other than

those listed are returned to the provider (edit 90). FQHC claims that do not contain both the FQHC payment HCPCS code and a qualifying visit code are also returned to the provider (edit 89). The FQHC payment HCPCS code identifies the line where the Pricer program applies the FQHC encounter payment. (For a list of paired qualifying visit codes, reference the code pairs report within the data files.)

Specific revenue code to FQHC payment code requirements are as follows:

- Medical visit codes require revenue code 52x or 519
- Mental health visit codes require revenue code 900 or 519

FQHC encounters for new patient visits or for the IPPE/AWV are identified by the IOCE for additional payment adjustment by the Pricer program. Only one FQHC payment code per day is identified for the new patient/IPPE/AWV payment adjustment.

Payable FQHC payment code lines are flagged with a Payment Indicator (PI) = 10, unless there is a new patient or IPPE/AWV visit present. If there is a new patient visit or IPPE/AWV reported, PI= 13 is assigned to the FQHC payment code representing the new patient/IPPE/AWV visit. If multiple visits are reported, only one new patient FQHC payment HCPCS is assigned PI=13 per day. Any additional FQHC payment codes present for the same day are assigned PI=10. Qualifying visit codes that accompany the FQHC payment code are flagged with PI=12 and are packaged with Packaging Flag =5.

If a mental health visit is provided on the same day as a medical clinic visit, both visits are recognized for FQHC encounter payments, providing the claim meets the criteria for payment of each visit, i.e. FQHC payment HCPCS codes are present for each visit, qualifying visit HCPCS codes are present, and appropriate revenue codes are reported.

If there is an additional FQHC payment code for an established medical visit reported on the same day with modifier 59, this indicates that the visit is a subsequent, unrelated illness or injury provided on the same day as another FQHC visit. The subsequent visit may be eligible for FQHC encounter payment, provided the appropriate FQHC visit criteria are met for the established patient FQHC visit reported with modifier 59. Any additional FQHC visits reported on the same day, reported with or without modifier 59, are packaged.

A composite adjustment flag is assigned for lines reporting FQHC payment codes, identifying the type of FQHC visit(s) present for a date of service, whether for: 01) medical visit or IPPE/AWV, 02) mental health visit, or 03) a subsequent visit reported with modifier 59. The composite adjustment flag is used by the Pricer program to identify line item charges associated with each type of FQHC encounter. All FQHC payment codes are assigned a composite adjustment flag by the IOCE; the assignment of the composite adjustment flag has no bearing on whether or not the visit is eligible for separate FQHC encounter payment.

Additional criteria for FQHC processing

Effective January 1, 2016 (v17.0), Grandfathered Tribal FQHC providers are identified by the presence of payer only condition code MG passed to the IOCE on a claim for FQHC PPS services.

Claims submitted for Grandfathered Tribal FQHC providers have different encounter requirements than other FQHC PPS providers. Only one visit is payable per day; if multiple visits are present for the same day, the first medical visit (or first mental health visit if no medical visits are reported) is identified to OPPS Pricer for payment with a payment indicator (PI=14); all other visits are packaged.

Preventive services under the FQHC PPS shall be packaged into the FQHC encounter payment; however, line items reporting preventive services are subject to a waiver of coinsurance payment. The IOCE shall identify to the Pricer program the FQHC packaged preventive services by way of a specific packaging flag value 6 (Packaged preventive service as part of FQHC encounter payment not subject to coinsurance payment).

Effective January 1, 2016, Advance Care Planning services reported with code 99497 are considered a preventive service under FQHC PPS when reported with an annual wellness visit (initial or subsequent). If advance care planning is reported with the annual wellness visit it is identified as a packaged preventive service. If advance care planning is reported without the annual wellness visit, it is treated as a qualifying visit code to satisfy the FQHC encounter requirements and is packaged as a qualifying visit code.

Influenza and pneumococcal vaccines and associated vaccine administration services continue to be paid under reasonable cost through the cost report, and are not packaged into the FQHC encounter payment. If influenza and/or pneumococcal vaccine and vaccine administration is reported on the FQHC claim, the services are identified for the Pricer program as non-packaged services that are excluded from the FQHC encounter payment (PI=11).

Telehealth facility fees continue to be paid by the Medicare physician fee schedule, and are not packaged into the FQHC encounter payment. If telehealth facility fees are reported on the FQHC claim, the service is processed through the IOCE and identified as a non-packaged service for the Pricer program in order to be processed for fee schedule payment (packaging flag = 0). Effective July 1, 2015 (v16.2), Telehealth facility fees reported without a FQHC payment code and qualifying visit code are not returned to the provider.

Items or services that are not covered under the FQHC are line item rejected PPS (DME, ambulance, laboratory, and other non-covered services). Non-covered lines are assigned line item action flag 5 and PI=3, and although SI is ignored under FQHC, all non-covered lines are assigned to SI=E1. If line items with non-covered charges are passed into the IOCE with Line Item Action flag 5 previously assigned, these lines are not line item rejected.

Note: All line item submitted on a claim with bill type 770 (No payment claim) are submitted to the IOCE with Line Item Action Flag 5 assigned; edit 91 is not returned for claims with bill type 770, nor is any other editing performed.

FQHC non-covered items or services include durable medical equipment submitted with revenue code 29X, ambulance services submitted with revenue code 54X, laboratory services paid under the Clinical Lab Fee Schedule (excluding venipuncture, 36415, which is packaged), hospital-based care, group services and non-face-to-face services.

Effective October 1, 2015 (v16.3), claims containing only FQHC non-covered services reported without a FQHC payment code and qualifying visit code are not returned to the provider.

Effective 1/1/2016 (v17.0), Chronic Care Management (CCM) services are not packaged under FQHC PPS. If Chronic Care Management is reported, PI = 2 is assigned, indicating that it is paid under the Medicare Physician Fee Schedule. CCM services reported without a FQHC payment code or qualifying visit code bypass edits 88 and 89.

For claims with From dates on or after October 1, 2014 through March 31, 2015 (v15.3 – v16.0), mental health visits reporting psychotherapy services that are add-on codes require the reporting of a primary service code. A subset of the primary service codes for psychotherapy are also considered qualifying visit codes under the FQHC PPS. In order to satisfy the criteria for a FQHC mental health visit reporting a psychotherapy add-on code, if a psychotherapy add-on code is present with a mental health FQHC payment code, the psychotherapy add-on code is paired to a qualifying visit code that represents a primary service for the psychotherapy add-on code. If the primary service code is missing from a claim containing a FQHC mental health visit with a psychotherapy add-on code, the claim shall be returned to the provider (edit 84). If there are multiple visits present for the day, once the criteria for a FQHC mental health visit with psychotherapy is satisfied for the add-on code, the paired qualifying visit code cannot be used as a qualifying visit code for other FQHC payment codes that may be present. However, the processing of psychotherapy add-on codes occurs after the assignment of any new patient, IPPE/AWV, or other medical visit processing; qualifying visit codes that are utilized for previous medical visit assignment are not available for pairing with the psychotherapy add-on code for FQHC mental health clinic visits. For claims with From dates on or after April 1, 2015 (v16.1), mental health visits reporting psychotherapy add-on codes are no longer considered qualifying visits under the FQHC PPS. The psychotherapy add-on codes are packaged into the FQHC encounter payment when reported with a qualifying visit.

Services with SI = M are not billable to the MAC and are subject to edit 72. Effective 4/1/2018 (v19.1), there is a list of HCPCS codes with SI = M that are reportable for FQHC claims and therefore bypass edit 72 processing. For the list of HCPCS applicable to the edit 72 bypass condition, see the HCPCS Map within the quarterly data files.

Rural health clinic processing

Effective 4/1/2016 (v17.1), the non-covered services list for FQHC is applied to RHC (Rural Health Clinic) claims with bill type 71x. Program logic associated with the execution of edit 91 and the return of line item action flag 5 is included for RHC claims (Note: RHC claims are not subject to any additional FQHC PPS logic.)

Services with SI = M are not billable to the MAC and are subject to edit 72. Effective 4/1/2018 (v19.1), there is a list of HCPCS codes with SI = M that are reportable for RHC claims and therefore bypass edit 72 processing. For the list of HCPCS applicable to the edit 72 bypass condition, see the HCPCS Map within the quarterly data files.

Effective 4/1/2018 (v19.1), certain services deemed incorrectly reported with modifier CG (Policy criteria applied) for RHC claims are line item rejected (edit 104) as not being included in the RHC all-inclusive rate.

Chapter 6: Non-OPPS data entry

This chapter describes how to interactively enter data into the Integrated Outpatient Code Editor (IOCE) software. See chapter 10 for instructions on using the data entry accessibility features of this software.

The chapter contains the following information for non-OPPS data processing: complete definitions for fields, explanations of menus and command buttons, and a list of error messages that can occur.

Note: IOCE software uses one graphical user interface for interactively processing claims from both OPPS and non-OPPS hospitals. Consequently, three new fields (Primary Pay Source, Patient account number, and Comment) were added specifically for non-OPPS data entry.

Versions and date ranges

The following table lists the versions contained in this release of IOCE software for non-OPPS hospital claims processing. The date entered in the program as Date of Service From determines the version used for processing.

Table 12. Program versions

IOCE version	Effective date range
20.2.0	07/01/2019–07/01/2029 ^a
20.1.0	04/01/2019–06/30/2019
20.0.x	01/01/2019–03/31/2019
19.3.x	10/01/2018–12/31/2018
19.2.x	07/01/2018–09/30/2018
19.1.x	04/01/2018–06/30/2018
19.0.x	01/01/2018–03/31/2018
18.3.x	10/01/2017–12/31/2017
18.2.x	07/01/2017–09/30/2017
18.1.x	04/01/2017–06/30/2017
18.0.x	01/01/2017–03/31/2017
17.3.x	10/01/2016–12/31/2016

IOCE version	Effective date range
17.2.x	07/01/2016–09/30/2016
17.1.x	04/01/2016–06/30/2016
17.0.x	01/01/2016–03/31/2016
16.3.x	10/01/2015–12/31/2015
16.2.x	07/01/2015–09/30/2015
16.1.x	04/01/2015–06/30/2015
16.0.x	01/01/2015–03/31/2015
15.3.x	10/01/2014–12/31/2014
15.2.x	07/01/2014–09/30/2014
15.1.x	04/01/2014–06/30/2014
15.0.x	01/01/2014–03/31/2014
14.3.x	10/01/2013–12/31/2013
14.2.x	07/01/2013–09/30/2013
14.1.x	04/01/2013–06/30/2013
14.0.x	01/01/2013–03/31/2013
13.3.x	10/01/2012–12/31/2012

a. The ending date of the current version will be modified to the actual ending date with the next release.

Accessing the software

To access the interactive interface of IOCE software, follow these steps:

1. On the Start menu, point to Programs, Integrated Outpatient Code Editor, and select IOCE Interactive.

The splash screen appears, followed by the Integrated Outpatient Code Editor Software window.

2. Enter claim data on the Integrated Outpatient Code Editor Software window.

The data entry (input) window is shown in the following figure. The CPT copyright date is represented by xxxx in the figure; the actual date in your software will be current with the latest release of the product.

For help with data entry:

- Use the data entry table for data entry field information.
- Use the non-OPPS menu items table (page [99](#)) when entering diagnosis and/or procedure codes.
- If you get an error message, refer to the non-OPPS error messages table (page [101](#)).

Non-OPPS data entry fields

Non-OPPS fields on the input window are described in the following table. Refer to the Data elements table for Uniform Billing (UB) locator information for fields.

Note: Grayed-out names indicate fields that have a pre-set value or are not available for data entry.

The screenshot shows the 'Integrated Outpatient Code Editor Software' window. Annotations on the left point to various fields:

- Patient information:** Points to the 'Patient name' field.
- Codes section:** Points to the 'Codes' section header.
- Click to add codes:** Points to the 'Add code' button.
- Contractor bypass fields:** Points to the 'Contractor Bypass' section.
- Click to add codes as RVDX:** Points to the 'Add RVDX' button.
- Click to add codes as PDX:** Points to the 'Add PDX' button.
- Click to clear code information:** Points to the 'Clear' button.
- Click to see report:** Points to the 'Report' button.

The interface includes the following sections and fields:

- Patient information:** Patient name, Medical record number, From Date, Through Date, Birth date, Age in years, Sex, Patient Status, Type of bill.
- Condition Codes:** A row of 10 input fields.
- Occurrence Codes:** A row of 10 input fields.
- Value Codes & Amounts:** A row of 5 input fields.
- Primary Pay Source:** A dropdown menu.
- Patient account number:** An input field.
- Comment:** A text area.
- Codes section:**
 - Codes:** Radio buttons for 'Diagnosis' and 'Procedure', followed by a 'Code' input field.
 - Modifiers:** A row of 4 input fields.
 - Revenue codes:** A row of 4 input fields.
 - Units of service:** An input field.
 - Charges:** An input field.
 - Service date:** An input field.
 - Action Flag:** A dropdown menu.
 - Contractor Bypass:** A section with various flags and indicators.
 - Packaging Flag:** A dropdown menu.
 - Payment Adjustment Flag:** A dropdown menu.
 - Payment Method Flag:** A dropdown menu.
- Diagnoses:** A table with columns: Code, Mod 1, Mod 2, Mod 3, Mod 4, Mod 5, Rev Code, Units, Charges, Service Date, Action Flag, C.
- Procedures:** A table with columns: Code, Mod 1, Mod 2, Mod 3, Mod 4, Mod 5, Rev Code, Units, Charges, Service Date, Action Flag, C.
- Report:** A button to generate a report.

At the bottom, a copyright notice reads: 'CPT codes copyright 2018 by the American Medical Association. All Rights Reserved.'

Figure 3: Non-OPPS input window

Table 13. Non-OPPS data entry fields

Field name	Length	Description
Patient name	31	Name of the patient.
Medical record number	17	Patient's medical record number.
Date of service: From	10	Required. Beginning date of patient's service in MM/DD/YY or MM/DD/YYYY format ^a . Used for code validation. The date cannot precede the first day of the earliest non-OPPS version in the current release and determines the version of codes and descriptions used for processing.
Date of service: Through	10	Required. Through date of patient's service in MM/DD/YY or MM/DD/YYYY format ^a . The date cannot precede the first day of the earliest non-OPPS version in the current release.
OPPS flag	1	OPPS/non-OPPS flag. Default value = 1. 1 = OPPS 2 = Non-OPPS
Birth date	10	Patient's birth date in MM/DD/YY or MM/DD/YYYY format. Used for age calculation.
Age in years	3	Patient's age in years. Valid values: 0 - 124. Calculated age (From date minus Birth date) takes precedence over entered age.
Sex	1	Patient's sex. Select a value from the drop-down list of acceptable values.
Patient status	2	Patient status code
Type of bill	3	Code indicating the specific type of bill: inpatient, outpatient, adjustments, voids, etc.
NPI Medicare provider number	13	National provider identifier Medicare provider number.
OSCAR Medicare provider number.	6	OSCAR Medicare provider number.
Condition codes	2	Code(s) used to identify conditions relating to the bill that may affect payer processing. Maximum of 30 condition codes. Lower case letters are automatically converted to upper case by the program.
Occurrence codes	2	Occurrence code. Maximum of 30 occurrence codes.
Value codes and amount	11	Value code and value code amount. Maximum of 36 value codes.

Field name	Length	Description
Primary pay source		<p>Enter the primary pay source using one of the numbers listed below. The English description displays automatically.</p> <p>01 = Medicare 02 = Medicaid 03 = Title V 04 = Other govt 05 = Work 06 = Blue Cross 07 = Insur co 08 = Self pay 09 = Other 10 = No charge</p>
Patient account number		Number of the group insurance policy or other unique patient identifier by which the patient is billed for medical care. The entry can be a combination of letters and numbers.
Comment		Available for entry of additional information as specified by the user. The entry can be a combination of letters and numbers.
Codes: Diagnosis/Procedure		<p>Click the Diagnosis radio button to enter a diagnosis code. Click the Procedure radio button to enter a procedure code.</p>
Code	8	<p>Enter the diagnosis or procedure code without decimal points. Lower case letters are converted to upper case by the program. The English description for the code appears in the text box to the right of this field.</p> <p>Diagnosis codes. PDX is required. Valid entries for diagnoses are 8-character ICD-10-CM or ICD-9-CM codes, to a maximum of 28 diagnoses. The first three listed diagnoses are assumed to be the patient's reasons for visit diagnosis (RVDX) and may be left blank. The fourth listed diagnosis is assumed to be the principal diagnosis and cannot be blank. Additional diagnoses are secondary and must be in contiguous locations. The first blank non-RVDX diagnosis signifies the end of the list.</p> <p>Procedure codes. Valid entries for procedures are 5-character CPT/HCPCS codes to a maximum of 99 procedures.</p> <p>Important: After entering a code, be sure to click the Add code, Add RVDX or Add PDX button to add the code to the record.</p>

Field name	Length	Description
Modifiers	2	Enter a maximum of five modifiers. Each modifier must be two characters long. Lower case letters are automatically converted to upper case by the program. This field is only enabled when you are entering a procedure.
Revenue code	4	Required for line items. Code that identifies a specific accommodation, ancillary service, or billing calculation (UB-04 form locator 42). One revenue code is required for each line item. This field is only enabled when you are entering a procedure.
Contractor bypass edits	12	4, 3-byte alpha-numeric characters allowed per single line item; right-justified, zero-filled, default: 000
Contractor bypass APC	5	Numeric; right-justified, zero-filled, default: 00000
Contractor bypass status indicator	2	Contractor bypass status indicator; Alphanumeric; right-justified, zero-filled, default: 00 Note: If the SI value is one character, it must be reported with a leading blank value instead of 0 (example, " bA" "A")
Contractor bypass payment indicator	2	Numeric; right-justified, zero-filled, default: 00
Contractor bypass discounting formula	1	Numeric; zero-filled, default: 0
Contractor bypass line item denial or rejection flag	1	Numeric; zero-filled, default: 0
Contractor bypass packaging flag	1	Numeric; zero-filled, default: 0
Contractor bypass payment adjustment flag	2	Numeric; right-justified, zero-filled, default: 00
Contractor bypass payment method flag	1	Alphanumeric; zero-filled, default: 0

a. Dates can be entered with or without a separator (/)

Non-OPPS menu items

Menu items available from the input window are described in the following table.

Table 14. Menu items

Menu	Item	Function
File	New	Displays a new window, cleared of all previously entered information.
File	Exit	Exits the program.
Edit	Cut	Removes the selected text and copies it to the clipboard.
Edit	Copy	Copies the selected text to the clipboard.
Edit	Paste	Inserts the clipboard's contents at the insertion point.
Edit	Delete row	Deletes the diagnosis or procedure (and all information in the row) that was selected.
Help	About	Displays the About box.

Tip

"Hot keys" in menus are displayed after you press the Alt key.

Non-OPPS command buttons

Command buttons on the input window are described in the following table.

Table 15. Command buttons

Button	Function
Add code	Adds the currently displayed diagnosis or procedure code to the patient's record. The code will appear in the Diagnoses or Procedures list at the bottom of the window, as appropriate.
Add RVDX	Adds the currently displayed diagnosis code to the RVDX field in the Diagnoses list at the bottom of the window.
Add PDX	Adds the currently displayed diagnosis code to the PDX field in the Diagnoses list at the bottom of the window.
Clear	Clears the Code field and the code description that appears next to it. For procedures, associated Modifiers, Revenue code, Units of service, Charges, Service date, and Line item action flag are also cleared.
Report	Displays a pre-formatted output report that can be printed or saved. For more output report information, see " Non-OPPS data output " on page 103 .

Non-OPPS error messages

To help ensure the entry of accurate information, the program automatically performs data entry checks, such as for a month entered as 14, or an age entered as -2. When an error is detected, an error message appears in a message box. Click OK to close the message box.

Table 16. Non-OPPS error messages

Message	Occurs when ...
Birth date cannot be after From date.	Birth date is after the From date.
Birth date cannot be after today's date.	Date in the date field is after the system (today's) date.
Invalid date. Valid formats are mm/dd/yyyy or mm/dd/yy or mmdyyy or mmdyy.	The value entered for the month, day or year is outside the valid range for mm, dd or yyyy, or the format is incorrect. Note: This error message applies to the "Birth date", "From date", or "Through date" fields.
Charges are invalid. Charges must be between 0 and 99999999.99.	Entry for Charges is outside the field's valid entry range.
From date cannot be after Through date.	From date is after the Through date.
From date cannot be after today's date.	Date entry is after the system (today's) date.
From date cannot precede Birth date.	From date precedes the Birth date.
From date cannot precede mm/dd/yyyy.	Date is prior to the first day of the earliest non-OPPS version included in the current release.
Invalid age. Age in years must be between 0 and 124.	Entered age or calculated age exceeds 124 years.
Partial hospitalization condition code 41 not approved for type of bill.	Bill type is 12x or 14x with a condition code of 41.
Revenue code is a required field. Please enter a revenue code.	User attempts to add a procedure to the patient record without first entering a revenue code.
Service date is a required field. Please enter a service date.	User attempts to add a procedure to the patient record without first entering a service date.
Service date must be within the range of the From and Through dates.	Service date is not within the range of the From and Through dates.
The maximum number of diagnosis codes is 28.	User attempts to add a 29th diagnosis code.

Message	Occurs when ...
The maximum number of procedure codes is 99.	User attempts to add a 100th procedure code.
Through date cannot be after today's date.	Through date is after the system (today's) date.
Through date cannot precede Birth date.	Through date is prior to the Birth date.
Through date cannot precede From date.	Through date is prior to the From date.
Through date cannot precede mm/dd/yyyy.	Through date is prior to the first day of the earliest non-OPPS version included in the current release.

Chapter 7: Non-OPPS data output

This chapter describes the Integrated Outpatient Code Editor (IOCE) program output, including output report fields, edit information, status indicators, and payment indicators. See chapter 10 for instructions on using the data output accessibility features of this software.

Viewing an output report

To view the output report for a claim

1. Complete your data entry using the input window.
2. At the bottom of the input window click Report.

The output report is displayed.

The current version of software installed on your system is noted as a two-digit number in the report heading. In the body of the report, a three-digit number specifies the version of software that was used to process the claim based on the date of service; the third digit represents revisions created since the original release and does not affect your use of the product.

The format of a sample output report is shown below. In actual use, the fields will contain real data. Descriptions of output report fields follow the figure.

Integrated Outpatient Code Editor Software v20.2

Patient Name:
 Medical Record Number:
 Patient Acct#:
 Dates of Service: From: 01/01/2018 Through: 01/01/2018
 Birth Date: Age in years: 65 Sex: 1 Male
 Patient Status: Type of Bill: 851
 NPI: OSCAR:
 Condition Codes:
 Payer Condition Codes:
 Occurrence Codes:
 Value codes (Input):
 Value codes (Output):
 OCE Version Used: 20.2.0 OPPS Flag: 2

Comment:

Reason For Visit Diagnosis

Principal Diagnosis

Claim Level Edits

No Claim Level Edits Reported.
 Overall Claim Disposition
 No edits present on claim.
 Bill Type should not be 83x
 Primary Pay Source:

Output report fields

Fields on the output report are described in the following table.

Table 17. Output report fields

Name	Description
Patient name Medical record number Dates of service: From and Through Birth date Age in years Sex Patient status Type of bill OPPS flag Condition codes Payer condition codes NPI provider number OSCAR provider number Occurrence codes Value code and amount Patient value code ^a Patient value code amount ^a ICD Code Type Diagnoses Procedures Modifiers Revenue code Units of service Line item charges (Charge) Service date (Date) Line item action flag ^a	Data that was entered on input window. See the Non-OPPS data entry fields table (page 96) for descriptions of these fields.
Status indicator ^a	
Payment indicator ^a	
ASCs	When applicable, the ASC group number will be returned in the Payment APC field on 83x bill types. (v8.2 and 8.3 only)
Discounting formula ^a	
Payment adjustment flag ^a	

Name	Description
Line Item Denial or Rejection Flag	<p>0 - Line item not denied or rejected</p> <p>1 - Line item denied or rejected (procedure edit return buffer for line item contains a 9, 13, 18, 20, 28, 30, 40, 45, 47, 49, 53, 64-65, 67-69, 76, 83, 91, 93, 103-108, 110-111)</p> <p>2 - The line is not denied or rejected, but occurs on a day that has been denied or rejected (not used as of 4/1/2002 - v3.0)</p> <p>3 - Line item not denied or rejected; identified for informational alert only</p>
HCPCS Modifier	Reserved for future use
Edit	<p>Edit number, description, and disposition generated by the diagnosis or procedure. The edit dispositions are abbreviated as follows:</p> <p>RTP - Return to provider</p> <p>LIR - Line item rejection</p> <p>LID - Line item denial</p> <p>CD - Claim denial</p> <p>S - Claim suspension</p> <p>See "Edit disposition summary" for more information on individual edits.</p>
Claim level edits	Edits that affect the entire claim, rather than an individual diagnosis or procedure.
Overall claim disposition statement	<p>Because it is possible for a claim to have one or more edits in all dispositions, the program assigns an overall disposition to the claim. Values are:</p> <p>0 - No edits are present on the claim.</p> <p>1 - The only edits present are for line item denial or rejection.</p> <p>2 - Claim is for multiple days with one or more days denied or rejected.</p> <p>3 - Claim is denied, rejected, suspended or returned to provider, or single day claim with all line items denied or rejected, with only post-payment edits.</p> <p>4 - Claim is denied, rejected, suspended or returned to provider, or single day claim with all line items denied or rejected, with only pre-payment edits.</p> <p>5 - Claim is denied, rejected, suspended or returned to provider, or single day claim with all line items denied or rejected, with both post- and pre-payment edits.</p>

a. No value will be returned on non-OPPS claims.

Menu items from the output report window

Menu items available from the output report window are described in the following table.

Table 18. Menu items

Menu	Item	Function
File	Print	Prints the output report.
File	Save As...	Opens the Save As dialog box to save the currently displayed output report as a text file.
File	Exit	Closes the output report window.
Edit	Copy	Copies the selected text and moves it to the clipboard.
Edit	Select All	Selects the entire output report.

Tip

"Hot keys" in menus are displayed after you press the Alt key.

Payment information

Non-OPPS payment is not directed by the IOCE.

Dispositions

Each edit is associated with a disposition. For example, there can be a rejection of the line item itself or a rejection of the entire claim. In addition to edit dispositions, the program assigns an overall disposition to the claim. Edit and claim dispositions are discussed in the following sections.

Edit disposition

A disposition is assigned based on the presence of any edits on a line. The meaning of each edit disposition is described in the following table. It is possible for a claim to have one or more edits in all dispositions.

Table 19. Edit disposition definitions

Disposition	Definition
Claim rejection	The provider can correct and resubmit the claim but cannot appeal the rejection.
Claim denial	The provider cannot resubmit the claim but can appeal the denial.
Claim return to provider (RTP)	The provider can resubmit the claim once the problems are corrected.
Claim suspension	The claim is not returned to the provider, but it is not processed for payment until the fiscal intermediary/Medicare Administrative Contractor (FI/MAC) makes a determination or obtains further information.
Line item rejection	The claim can be processed for payment with some line items rejected for payment (i.e., the line item can be corrected and resubmitted but cannot be appealed).
Line item denial	There are one or more edits that cause one or more individual line items to be denied. The claim can be processed for payment with some line items denied for payment (i.e., the line item cannot be resubmitted but can be appealed).

Refer to the Edit disposition summary table for a complete list of program edits and edit dispositions.

Claim disposition

Since a claim can have several edit dispositions assigned to line items, the claim is assigned an overall disposition. Claim dispositions are shown in the "Overall claim disposition statement" in the Edit disposition summary.

Edit disposition summary

The table below lists the edits currently applied to non-OPPS hospital outpatient claims with their dispositions. Note that edits are not numbered sequentially; IOCE edits that are not currently applied to non-OPPS hospital claims are not listed. The meaning of each disposition is described in the edit disposition section (page [108](#)). The non-OPPS program edits chapter (page [111](#)) contains information on what conditions will generate an edit, as well as relevant important comments for specific edits.

Table 20. Edit disposition summary

Edit	Edit disposition
1. Invalid diagnosis code	Claim returned to provider
2. Diagnosis and age conflict	Claim returned to provider
3. Diagnosis and sex conflict	Claim returned to provider
5. External cause of morbidity code cannot be used as principal diagnosis	Claim returned to provider
6. Invalid procedure code	Claim returned to provider
8. Procedure and sex conflict	Claim returned to provider
9. Non-covered under any Medicare outpatient benefit, for reasons other than statutory exclusion	Line item denial
10. Service submitted for denial (condition code 21)	Claim denial
11. Service submitted for FI/MAC review (condition code 20)	Claim suspension
12. Questionable covered service	Claim suspension
15. Service unit out of range for procedure	Claim returned to provider
17. Inappropriate specification of bilateral procedure	Claim returned to provider
20. Code2 of a code pair that is not allowed by NCCI even if appropriate modifier is present	Line item rejection
22. Invalid modifier	Claim returned to provider
23. Invalid date	Claim returned to provider
24. Date out of OCE range	Claim suspension
25. Invalid age	Claim returned to provider
26. Invalid sex	Claim returned to provider
28. Code not recognized by Medicare for outpatient claims; alternate code for same service may be available	Line item rejection

Edit	Edit disposition
40. Code2 of a code pair that would be allowed by NCCI if appropriate modifier were present	Line item rejection
41. Invalid revenue code	Claim returned to provider
46. Partial hospitalization condition code 41 not approved for type of bill	Claim returned to provider
50. Non-covered under any Medicare outpatient benefit, based on statutory exclusion	Claim returned to provider
53. Codes G0378 and G0379 only allowed with bill type 13x or 85x	Line item rejection
54. Multiple codes for the same service	Claim returned to provider
61. Service can only be billed to the DMERC	Claim returned to provider
65. Revenue code not recognized by Medicare	Line item rejection
67. Service provided prior to FDA approval	Line item denial
68. Service provided prior to date of National Coverage Determination (NCD) approval	Line item denial
69. Service provided outside approval period	Line item denial
72. Service not billable to the Medicare Administrative Contractor	Claim returned to provider
74. Units greater than one for bilateral procedure billed with modifier 50	Claim returned to provider
83. Service provided on or after effective date of NCD non-coverage	Line item denial
94. Biosimilar HCPCS reported without biosimilar modifier (v17.0–v19.0 only)	Claim returned to provider
102. Modifier pairing not allowed on the same line	Claim returned to provider
103. Modifier reported prior to FDA approval date (v19.0 only)	Line item denial
106. Add-on code reported without required primary procedure code	Line item denial
107. Add-on code reported without required contractor-defined primary procedure code	Line item denial
108. Add-on code reported without required primary procedure or without required contractor-defined primary procedure code	Line item denial
110. Service provided prior to initial marketing date	Line item rejection
111. Service cost is duplicative; included in cost of associated biological	Line item rejection

Chapter 8: Non-OPPS program edits

This chapter contains information on the condition(s) which, when present, will generate an edit in the Integrated Outpatient Code Editor (IOCE) program for non-OPPS claims.

At the end of this chapter is a "Special logic information" (page [116](#)) section that contains additional information about specific non-OPPS editing logic in the IOCE.

The following table summarizes when edits are generated and also includes other relevant information. Note that edits are not numbered sequentially; IOCE edits that are not currently applied to non-OPPS hospital claims are not listed. Edit dispositions and overall claim disposition information are located in the non-OPPS data output chapter (page [103](#)).

Table 21. Edit summary

Edit	Generated when ...
1. Invalid diagnosis code	The principal diagnosis field (fourth dx position) is blank, there are no diagnoses entered on the claim, or the entered diagnosis code is not valid for the selected version of the program.
2. Diagnosis and age conflict	The diagnosis code includes an age range, and the age is outside that range.
3. Diagnosis and sex conflict	The diagnosis code includes sex designation, and the sex does not match. This edit is bypassed if condition code 45 is present on the claim.
5. External cause of morbidity code cannot be used as principal diagnosis	The principal diagnosis code is in the range V00-Y99. (For claims containing ICD-9-CM diagnosis codes, the first letter of the principal diagnosis code is an E.)
6. Invalid procedure code	The entered HCPCS code is not valid for the selected version of the program.
8. Procedure and sex conflict	The sex of the patient does not match the sex designated for the procedure coded on the record. This edit is bypassed if condition code 45 is present on the claim.
9. Non-covered under any Medicare outpatient benefit, for reasons other than statutory exclusion	The procedure code has a Non-covered for reasons other than statute service flag. This edit is bypassed when code G0428 is present with SI of E.

Edit	Generated when ...
10. Service submitted for denial (condition code 21)	The claim has a condition code 21.
11. Service submitted for MAC review (condition code 20)	The claim has a condition code 20.
12. Questionable covered service	The procedure code has a Questionable covered service flag.
15. Service unit out of range for procedure (inactive)	<p>The maximum units allowed is greater than zero and</p> <p>The sum of the service units for all line items with the same procedure code on the same day exceeds the maximum allowed for this procedure and</p> <p>Modifier p is not present or modifier 91 is present but the HCPCS code is not on the list of laboratory/pathology codes which are exempt from this edit.</p> <p>Units for all line items with the same HCPCS code on the same day are added together when applying this edit. If the total units exceed the code's limits, the procedure edit return buffer is set for all line items that have the HCPCS code. If modifier 91 is present on a line item and the HCPCS code is on a list of codes that are exempt, the unit edits are not applied.</p>
17. Inappropriate specification of bilateral procedure	<p>The same inherent bilateral procedure code occurs two or more times (based on units and/or lines) on the same service date.</p> <p>This edit is applied to all relevant bilateral procedure lines, except when modifier 76 or 77 is submitted on the second or subsequent line or units of an inherently bilateral code.</p> <p>Note: For codes with an SI of V that are also on the Inherent Bilateral list, condition code G0 will take precedence over the bilateral edit; these claims will not receive edit 17. This edit is also bypassed if the bill type is 85x.</p>
20. Code2 of a code pair that is not allowed by NCCI even if appropriate modifier is present	The procedure is identified as part of another procedure on the claim coded on the same day, where the use of a modifier is not appropriate. Only the code in column 2 of a code pair is rejected; the column 1 code of the pair is not marked as an edit.

Edit	Generated when ...
22. Invalid modifier	The modifier is not in the list of valid modifier entries and the revenue code is not 540.
23. Invalid date	The From, Through, or Service date is invalid, or the Service date falls outside the range of the From and Through dates. This edit terminates processing for the claim. All lines must have a service date.
24. Date out of OCE range	The From date falls outside the date range of any version of the program (page 93). The From date will be used for program version selection, even if the From-Through dates span more than one version. Presence of this edit condition terminates processing for the claim.
25. Invalid age	The age is non-numeric or outside the range of 0-124 years.
26. Invalid sex	The sex is non-numeric or outside the range of 0-2.
28. Code not recognized by Medicare for outpatient claims; alternate code for same service may be available	The procedure code has a 'Not recognized by Medicare' indicator.
40. Code2 of a code pair that would be allowed by NCCI if appropriate modifier were present	The procedure is identified as part of another procedure on the claim coded on the same day, where the modifier was either not coded or is not an NCCI modifier. Only the code in column 2 of a code pair is rejected; the column 1 code of the pair is not marked as an edit.
41. Invalid revenue code	The revenue code is not in the list of valid revenue code entries.
46. Partial hospitalization condition code 41 not approved for type of bill	Bill type 12x or 14x is present with condition code 41.
50. Non-covered under any Medicare outpatient benefit, based on statutory exclusion	Code is on 'statutory exclusion' list or Revenue code is 0637 with SI of E when submitted without a HCPCS code.
53. Codes G0378 and G0379 only allowed with bill type 13x or 85x	Codes G0378 and/or G0379 appear on the claim and the bill type is not 13x or 85x.
54. Multiple codes for the same service	Any of the following three pairs of codes appear on the same claim: C1012 and P9033, C1013 and P9031, or C1014 and P9035.

Edit	Generated when ...
61. Service can only be billed to the DMERC	The procedure code has a 'DME only' indicator.
65. Revenue code not recognized by Medicare	The revenue code is 100x, 210x, 310x, 0500, 0509, 0583, 0660-0663, 0669, 0905-0907, 0931, or 0932.
67. Service provided prior to FDA approval	The line item date of service of a code is prior to the date of FDA approval.
68. Service provided prior to date of National Coverage Determination (NCD) approval	The line item date of service of a code is prior to the code activation date.
69. Service provided outside approval period	The service was provided outside the period approved by CMS.
72. Service not billable to the Medicare Administrative Contractor	A code has a status indicator M. This edit is bypassed when the bill type is 85x and revenue code is 096x, 097x, or 098x. This edit is also bypassed when the bill type is 81x or 82x and the revenue code is 657. (Note: The status indicator for the HCPCS code is changed from M to A)
74. Units greater than one for bilateral procedure billed with modifier 50	Any code on the Conditional or Independent bilateral list is submitted with modifier 50 and units of service are greater than one on the same or multiple lines, and the bill type is 85x with revenue code 96x, 97x, or 98x.
83. Service provided on or after effective date of NCD non-coverage	The line item date of service of a code is after the date of non-coverage determination.
94. Biosimilar HCPCS reported without biosimilar modifier	A biosimilar HCPCS code is reported on the claim without its corresponding biosimilar manufacturing modifier. This edit applies to v17.0–v19.0 only.
102. Modifier pairing not allowed on the same line	A line item is reported with a pair of modifiers that have conflicting meaning and should not be reported together. Please reference the data files for a report named Modifier Pairs, which contains an up to date list of modifiers not allowed to be reported on the same line
103. Modifier reported prior to FDA approval date	A modifier is reported prior to the mid-quarter activation date. This edit applies to v19.0 only.
106. Add-on code reported without required primary procedure code	A claim is submitted with a Type I add-on code(s) without the applicable defined primary procedure(s). The edit is returned on the add-on code line(s) when conditions of the edit are not met.

Edit	Generated when ...
107. Add-on code reported without required contractor-defined primary procedure code	A claim with bill type 85x (CAH) is submitted with a Type II add-on code(s) reported with a professional services revenue code (96x, 97x or 98x), to allow for contractors to review and define the primary procedure on the claim.
108. Add-on code reported without required primary procedure or without required contractor-defined primary procedure code	A claim is submitted with a Type III add-on code(s) without a defined primary(s) or contractor defined primary(s) procedure. This edit is returned on the add-on code line(s) when conditions are not met..
110. Service provided prior to initial marketing date	The reported line item date of service of a code is prior to the initial marketing date, for which it can be reported.
111. Service cost is duplicative; included in cost of associated biological	The reported line item is considered duplicative as the routine costs of all steps in creating a biological are bundled into the covered benefit, the biological. Any procedure identified as being “bundled into biological,” and reported as a line item are rejected. Additionally, this edit is returned if revenue codes 870-873 are submitted as line items with blank HCPCS.

Special logic information

There is no longer any special logic applied for non-OPPS claims. For a list of applicable non-OPPS edits, please see Edit summary for non-OPPS (page [111](#)).

Chapter 9: Batch processing

This chapter describes how to process data with the Integrated Outpatient Code Editor (IOCE) program in batch as an alternate to interactively processing claims one at a time.

Data entry for batch processing is done using a standard ASCII file that you create with your file editor.

The advantage of batch processing is fast data entry with a single processing step for all claims.

To use batch processing:

1. On the Start menu, point to Programs, IOCE Software, and select MS-DOS prompt.

Note: If using Microsoft® Windows® 7, right-click on the MS-DOS prompt and select "Run as administrator." Then map the DOS prompt to point to the IOCE software folder: C:\Program Files\IOCE Software.

2. At the DOS prompt, enter the following command to batch process the claims in your input file:

```
oce <input filename> <output filename>
```

where <input filename> is a user-specified file that contains data for each claim to be processed, and <output filename> is a user-specified file where the processed information will be saved.

Batch input

The batch input file is a fixed-format, sequential file that allows 300 characters of data for each record. There are three types of records that comprise one claim in the input file. These records are defined in the following table.

Table 22. Input record types

Code	Name	Description
C	Claim data	This record contains demographic (age, sex, patient status) data, From and Through dates for the claim, OPPS/non-OPPS flag, and a patient ID number.
D	Diagnosis codes	This record contains a list of up to 28 ICD-10-CM or ICD-9-CM diagnosis codes that apply to the entire claim. First three diagnosis codes assumed to be Reason for Visit Diagnoses; Fourth diagnosis code assumed to be Principal Diagnosis.
E	Value codes (Part 1)	This record contains value codes 1-24.
F	Value codes (Part 2)	This record contains value codes 25-36.
L	Line item data	This record contains the line item data for each procedure on the claim. A maximum of 450 L records can be entered for each claim.

Each claim in the input file must contain at least 5 input records (C, D, E, F and L, in that order), and may contain as many as 454 input records (1 C record, 1 D record, 1 E record, 1 F record and 450 L records). The end of each claim is detected when the next C record is read, or when the end of the file is reached.

Input record layouts

The input layout for each of the three types of input records is provided in the following three tables.

Table 23. C record layout (Claim data)

Position	Length	Description
1	1	Uppercase C to indicate the record type.
2	17	Claim identification number. This number should be unique to each claim in the input file.
19	3	Age (right-justified, blank-filled). Maximum age is 124.
22	1	Sex. Valid values: 0 - Unknown 1 - Male 2 - Female
23	8	From date. The opening date of the claim in yyyymmdd format.
31	8	Through date. The closing date of the claim in yyyymmdd format.
39	22	Unused
61	3	Bill type (inpatient, outpatient, void, etc.).
64	13	NPI (National Provider Identifier) Medicare provider number.
77	6	OSCAR Medicare provider number.
83	2	Patient status code.
85	1	OPPS/non-OPPS flag. Default value = 1. A blank, zero, or other value is defaulted to '1'. 1 = OPPS 2 = Non-OPPS
86	60	List of occurrence codes (Max. 30, 2-byte fields). Note: Each entry must be contiguous: the first blank occurrence code is assumed to signify the end of the occurrence code list.

Position	Length	Description
146	60	List of condition codes (Max. 30, 2-byte fields). Note: Each entry must be contiguous: the first blank condition code is assumed to signify the end of the condition code list.
206	95	Room for optional user data. This data is passed directly to output and does not impact processing.

Table 24. D record layout (Diagnosis codes)

Position	Length	Description
1	1	Uppercase D to indicate the record type.
2	17	Claim identification number.
19	224	List of diagnosis codes (left-justified). Accepts a maximum of 28 eight-character codes. The first three codes are assumed to be the reason for visit diagnoses (RVDX) and may be left blank; the fourth code is the principal diagnosis (PDX) and cannot be blank. The remaining diagnoses are secondary. Input must be contiguous; the program interprets the first blank non-RVDX diagnosis field as the end of the listing. DX code is listed in first 7 bytes, left-justified, blank-filled. The eighth byte in each dx input space is reserved for POA indicator (future use).
243	58	Unused, blank-filled.

Table 25. E record layout (Value codes - Part 1)

Position	Length	Description
1	1	Uppercase E to indicate the record type.
2	17	Claim Identifier (must match C record claim identifier).
19	264	<p>Value Codes and Amounts (Max. 24, 11-byte fields)</p> <p>Note: The field is split into two parts, a 2-byte value code part left-aligned, and a 9-byte part, the amount, right-justified, blank-filled.</p> <p>Note: Each entry must be contiguous: the first blank value code (first 2 bytes) is assumed to signify the end of the value code list.</p> <p>Note: This line must be filled with 24 valid value codes before value codes are entered on line F.</p>
283	18	Unused, blank-filled.

Table 26. F record layout (Value codes - Part 2)

Position	Length	Description
1	1	Uppercase F to indicate the record type.
2	17	Claim Identifier (must match C record claim identifier).
19	132	Value Codes and Amounts (Max. 12, 11-byte fields) Note: The field is split into two parts, a 2-byte value code part left-aligned, and a 9-byte part, the amount, right-justified, blank-filled. Note: Each entry must be contiguous: the first blank value code (first 2 bytes) is assumed to signify the end of the value code list. Note: Value codes on this line are ignored unless line E has 24 valid value codes.
151	150	Unused, blank-filled.

Table 27. L record layout (Line item data)

Position	Length	Description
1	1	Uppercase L to indicate the record type.
2	17	Claim identification number.
19	3	Line item ID number. This number should be unique among all line items for this claim.
22	5	HCPCS procedure code.
27	10	List of HCPCS modifiers (left-justified, blank-filled). Accepts a maximum of 5 two-character modifiers. Input must be contiguous; the program interprets the first blank field as the end of the listing.

Position	Length	Description
37	8	Service date in yyyymmdd format, required for all line items.
45	4	Revenue code (right-justified, zero or blank-filled). A code that identifies a specific accommodation, ancillary service, or billing calculation (form locator 42). One revenue code is required for each line item.
49	9	Units of service (right-justified, zero-filled). A quantitative measure of services rendered to or for the patient, by procedure code (form locator 46).
58	10	Line item charge (right-justified, zero-filled). Charges related to the revenue code for the current billing period as entered in the Statement Covers period (form locator 47).
68	1	Line item action flag.
69	12	Contractor bypass edits; 4, 3-byte alphanumeric characters allowed per single line item; right-justified, zero-filled, default: 000
81	5	Contractor bypass APC; Numeric; right-justified, zero-filled, default: 00000
86	2	Contractor bypass status indicator; Alphanumeric; right-justified, zero-filled, default: 00 Note: If the SI value is one character, it must be reported with a leading blank value instead of 0 (example, " bA" "A")
88	2	Contractor bypass payment indicator; Numeric; right-justified, zero-filled, default: 00
90	1	Contractor bypass discounting formula; Numeric; zero-filled, default: 0
91	1	Contractor bypass line item denial or rejection flag; Numeric; zero-filled, default: 0

Position	Length	Description
92	1	Contractor bypass packaging flag; Numeric; zero-filled, default: 0
93	2	Contractor bypass payment adjustment flag; Numeric; right-justified, zero-filled, default: 00
95	1	Contractor bypass payment method flag; Alphanumeric; zero-filled, default: 0
96	205	Unused; blank-filled

Batch output

When claims are batch processed, the output is saved to the user-specified output file that was entered after the -o option on the command line (see the beginning of this chapter for a sample of the command line). The output file is a fixed-format, sequential file that allows 300 characters of data for each record. There are seven types of records that comprise one claim in the output file. These records are defined in the following table.

Table 28. Output record types

Code	Name	Description
M	Claim edits - part 1	Claim edits.
N	Claim edits - part 2	More claim edits.
O	Diagnosis edits - part 1	Edits for diagnoses 1–9.
P	Diagnosis edits - part 2	Edits for diagnoses 10–18. If the claim contained fewer than 6 diagnoses, there will be no P record for the claim.
Q	Diagnosis edits - part 3	Edits for diagnoses 19–28. If the claim contained fewer than 11 diagnoses, there will be no Q record for the claim.
R	Line item edits - part 1	APC and procedure line item edits. For each L record the claim contained, there will be one R record.
S	Line item edits - part 2	Modifier, date, and revenue code line item edits. For each L record the claim contained, there will be one S record.

Each claim in the output file will contain all of the input records for that claim followed by all of the IOCE-created output records. For example, the output file for a claim that contains four diagnoses and three line item records would consist of the following records:

CDLLLMNORSRSRS

Since the claim contains only four diagnoses, neither a P nor a Q record is created. Also, since the claim contains three line item data records, three sets of RS records are created.

Output record formats

The output layout for each type of output record (M,N,O,P,Q,R,S) is provided in the following tables.

Table 29. M record (Claim edits - part 1)

Position	Length	Description
1	1	Uppercase M to indicate the record type.
2	17	Claim identification number (copied from the C record).
19	1	Claim processed flag. Valid values: 0 - Claim processed 1 - Claim not processed: invalid date (edit 23 or 24); inappropriate bill type/condition code combination (edit 46 - only for bill types where no other edits are applied); or 83x bill type (or other invalid bill type) 2 - Claim not processed: no line items present 3 - Claim not processed: condition code 21 present (edit 10) 4 - Fatal error; Contractor bypass issue, claim could not be processed; exit immediately. 9 - A fatal error has been detected during initialization; processing should be terminated immediately.

Position	Length	Description
20	1	<p>Overall claim disposition. Valid values:</p> <p>0 - No edits are present on the claim</p> <p>1 - The only edits present are for line item denial or rejection</p> <p>2 - Claim is for multiple days with one or more days denied or rejected</p> <p>3 - Claim is denied, rejected, suspended or returned to provider, or single day claim with all line items denied or rejected, with only post-payment edits</p> <p>4 - Claim is denied, rejected, suspended or returned to provider, or single day claim with all line items denied or rejected, with only pre-payment edits</p> <p>5 - Claim is denied, rejected, suspended or returned to provider, or single day claim with all line items denied or rejected, with both post- and pre- payment edits</p>
21	1	<p>Claim rejection disposition. The provider can correct and resubmit the claim but cannot appeal the rejection.</p> <p>0 - Claim not rejected</p> <p>1 - One or more edits are present that cause the claim to be rejected</p> <p>2 - One or more edits are present that cause one or more days of a multiple-day claim to be rejected</p>
22	1	<p>Claim denial disposition. The provider cannot resubmit the claim but can appeal the denial.</p> <p>0 - Claim not denied</p> <p>1 - One or more edits are present that cause the claim to be denied</p> <p>2 - One or more edits are present that cause one or more days of a multiple-day claim to be denied, or a single-day claim with all lines denied (edit 18 only)</p>
23	1	<p>Claim returned to provider disposition. The provider can resubmit the claim once the problems are corrected.</p> <p>0 - Claim is not returned to provider</p> <p>1 - One or more edits are present that cause the claim to be returned to provider</p>

Position	Length	Description
24	1	<p>Claim suspension disposition. The claim is not returned to the provider, but it is not processed for payment until the fiscal intermediary/Medicare Administrative Contractor makes a determination or obtains further information.</p> <p>0 - Claim is not suspended 1 - One or more edits are present that cause the entire claim to be suspended</p>
25	1	<p>Line item rejection disposition. The claim can be processed for payment with some line items rejected for payment (i.e., the line item can be corrected and resubmitted but cannot be appealed).</p> <p>0 - No line items are rejected. 1 - One or more edits are present that cause one or more line items to be rejected.</p>
26	1	<p>Line item denial disposition. There are one or more edits that cause one or more individual line items to be denied. The claim can be processed for payment with some line items rejected for payment (i.e., the line item cannot be resubmitted but can be appealed).</p> <p>0 - No line items are denied 1 - One or more edits are present that cause one or more line items to be denied</p>
27	12	Claim rejection reasons; 4 three-byte fields that identify the edits that caused the claim to be rejected. Edits are right-justified, zero-filled.
39	24	Claim denial reasons; 8 three-byte fields that identify the edits that caused the claim to be denied. Edits are right-justified, zero-filled.
63	90	Claim return to provider reasons; 30 three-byte fields that identify the edits that could cause the claim to be returned to the provider. Edits are right-justified, zero-filled.

Position	Length	Description
153	110	<p>Payer Value Code and Payer Value Code Amount. 10 eleven-character fields (2-character value code (QN-QW) followed by 9-character amount (nnnnnnn.nn*)). Assigned by IOCE based on criteria for APC payment offset.</p> <p>QN—First APC device offset QO—Additional APC device offset QP—Placeholder reserved for future use QQ—Terminated procedure with pass-through device OR condition for device credit present QR—First APC pass-through drug or biological offset QS—Second APC pass-through drug or biological offset QT—Third APC pass-through drug or biological offset QU—Condition for device credit present QV—(Reserved for future use) QW—Partial week present on interim PHP claim</p> <p>Note: Value Code QA is provided on input and the value code amount provided should zero-fill the first 4 values, the next 5 values represent an IOCE calculated amount for total days and hours of PHP services. One byte for days and 4 bytes to record full and partial hours. For example, 2 days and 8 and ½ hours converts to the following value code amount 000020850.</p> <p>Note: If offset conditions do not exist, the value code label (QN-QW) is blank; the amount is zero-filled.</p>
263	38	Unused; blank-filled

Table 30. N record (Claim edits - part 2)

Position	Length	Description
1	1	Uppercase N to indicate the record type
2	17	Claim identification number (copied from the C record)
19	48	Claim suspension reasons; 16 three-byte fields that identify the edits that caused the claim to be suspended. Edits are right-justified, zero-filled.
67	36	Line item rejection reasons; 12 three-byte fields that identify the edits that caused the line item to be rejected. Edits are right-justified, zero-filled.
103	18	Line item denial reasons; 6 three-byte fields that identify the edits that caused the line item to be denied. Edits are right-justified, zero-filled.
121	1	APC return buffer flag
122	13	NPI Medicare provider number (from input)
135	6	OSCAR Medicare provider number (from input)
141	3	Number of line items (from input)
144	8	Two-byte ID of the software version used in processing the claim in yy.vv.rr format
152	2	Patient status code, transferred from input
154	1	OPPS/non-OPPS flag, transferred from input
155	1	Non-OPPS Bill Type Flag 0 = N/A 1 = Bill type should be 83x (v8.2 - v8.3) 2 = Bill type should not be 83x
156	20	Payer condition codes (10 codes, 2-byte fields, used for output)
176	125	Unused; blank-filled

Table 31. O record (Diagnosis edits - part 1)

Position	Length	Description
1	1	Uppercase O to indicate the record type
2	17	Claim identification number (copied from the C record)
19	24	Diagnosis 1 (RVDX1) edits ^a (8 three-byte fields). Admit Diagnosis. Edits are right-justified, zero-filled.
43	24	Diagnosis 2 (RVDX2) edits (8 three-byte fields). Principal Diagnosis. Edits are right-justified, zero-filled.
67	24	Diagnosis 3 (RVDX3) edits (8 three-byte fields). Edits are right-justified, zero-filled.
91	24	Diagnosis 4 (PDX) edits (8 three-byte fields). Edits are right-justified, zero-filled.
115	24	Diagnosis 5 edits (8 three-byte fields). Edits are right-justified, zero-filled.
139	24	Diagnosis 6 edits (8 three-byte fields). Edits are right-justified, zero-filled.
163	24	Diagnosis 7 edits (8 three-byte fields). Edits are right-justified, zero-filled.
187	24	Diagnosis 8 edits (8 three-byte fields). Edits are right-justified, zero-filled.
211	24	Diagnosis 9 edits (8 three-byte fields). Edits are right-justified, zero-filled.
235	66	Unused, blank-filled

a. For more information on edits, see the chapters on "OPPS data output" (page [36](#)) and "OPPS program edits" (page [51](#)).

Table 32. P record (Diagnosis edits - part 2)

Position	Length	Description
1	1	Uppercase P to indicate the record type
2	17	Claim identification number (copied from the C record)
19	24	Diagnosis 10 edits ^a (8 three-byte fields). Edits are right-justified, zero-filled.
43	24	Diagnosis 11 edits (8 three-byte fields). Edits are right-justified, zero-filled.
67	24	Diagnosis 12 edits (8 three-byte fields). Edits are right-justified, zero-filled.
91	24	Diagnosis 13 edits (8 three-byte fields). Edits are right-justified, zero-filled.
115	24	Diagnosis 14 edits (8 three-byte fields). Edits are right-justified, zero-filled.
139	24	Diagnosis 15 edits (8 three-byte fields). Edits are right-justified, zero-filled.
163	24	Diagnosis 16 edits (8 three-byte fields). Edits are right-justified, zero-filled.
187	24	Diagnosis 17 edits (8 three-byte fields). Edits are right-justified, zero-filled.
211	24	Diagnosis 18 edits (8 three-byte fields). Edits are right-justified, zero-filled.
235	66	Unused, blank-filled

a. For more information on edits, see the chapters on "OPPS data output" (page [36](#)) and "OPPS program edits" (page [51](#)).

Table 33. Q record (Diagnosis edits - part 3)

Position	Length	Description
1	1	Uppercase Q to indicate the record type
2	17	Claim identification number (copied from the C record)
19	24	Diagnosis 19 edits ^a (8 three-byte fields). Edits are right-justified, zero-filled.
43	24	Diagnosis 20 edits (8 three-byte fields). Edits are right-justified, zero-filled.
67	24	Diagnosis 21 edits (8 three-byte fields). Edits are right-justified, zero-filled.
91	24	Diagnosis 22 edits (8 three-byte fields). Edits are right-justified, zero-filled.
115	24	Diagnosis 23 edits (8 three-byte fields). Edits are right-justified, zero-filled.
139	24	Diagnosis 24 edits (8 three-byte fields). Edits are right-justified, zero-filled.
163	24	Diagnosis 25 edits (8 three-byte fields). Edits are right-justified, zero-filled.
187	24	Diagnosis 26 edits (8 three-byte fields). Edits are right-justified, zero-filled.
211	24	Diagnosis 27 edits (8 three-byte fields). Edits are right-justified, zero-filled.
235	24	Diagnosis 28 edits (8 three-byte fields). Edits are right-justified, zero-filled.
259	42	Unused, blank-filled

a. For more information on edits, see the chapters on "OPPS data output" (page [36](#)) and "OPPS program edits" (page [51](#)).

Table 34. R record (Line item edits - part 1)

Position	Length	Description
1	1	Uppercase R to indicate the record type
2	17	Claim identification number (copied from the C record)
19	3	Line item number (copied from the L record that is associated with these edits)
22	5	APC assigned for payment. Except when specified otherwise (e.g., partial hospitalization, some inpatient-only, and other procedure claims, etc.), the payment APC and the HCPCS APC are the same. See the "List of APCs" appendix (page 571) for a list of APCs with their status indicators and descriptions. Note: The ASC number will be assigned on 83x bill types when applicable (v8.2 and 8.3 only).
27	5	APC assigned to the HCPCS code. See the "List of APCs" appendix (page 571) for a list of APCs with their status indicators and descriptions.
32	2	Status indicator ^a (right-justified, blank-filled). Values are: A - Services not paid under OPPS; paid under fee schedule or other payment system B - Non-allowed item or service for OPPS C - Inpatient procedure E - Non-allowed item or service ^s E1 - Non-allowed item or service E2 - Items and services for which pricing information and claims data are not available F - Corneal tissue acquisition; certain CRNA services and hepatitis B vaccines G - Drug/Biological pass-through H - Pass-through device categories

Position	Length	Description
		<p>J - New drug or new biological pass-through (discontinued 04/01/2002 and replaced by status indicator G for all drugs/biologicals)</p> <p>J1 - Outpatient department services paid through a comprehensive APC</p> <p>J2 - Hospital Part B services that may be paid through a comprehensive AP</p> <p>K - Non pass-through drugs and non-implantable biologicals, including therapeutic radiopharmaceuticals</p> <p>L - Flu/PPV vaccines</p> <p>M - Service not billable to the MAC</p> <p>N - Items and Services packaged into APC rates</p> <p>P - Partial hospitalization service</p> <p>Q - Packaged services and other codes subject to separate payment based on payment criteria^b</p> <p>Q1 - STV-packaged codes</p> <p>Q2 - T-packaged codes</p> <p>Q3 - Codes that may be paid through a composite APC</p> <p>Q4 - Conditionally packaged laboratory services</p> <p>R - Blood and blood products</p> <p>S - Significant procedure not subject to multiple procedure discounting</p> <p>T - Significant procedure subject to multiple procedure discounting</p> <p>U - Brachytherapy sources</p> <p>V - Clinic or emergency department visit</p> <p>W - Invalid HCPCS or Invalid revenue code with blank HCPCS</p> <p>X - Ancillary service (valid through 15.3)ⁱ</p> <p>Y - Non-implantable DME</p> <p>Z - Valid revenue code with blank HCPCS and no other SI assigned</p>

Position	Length	Description
34	2	<p>Payment indicator^{ar} (right-justified, blank-filled). Values are:</p> <p>1 - Paid standard hospital OPPS amount (status indicators J1, K, R, S, T, U, V, X)</p> <p>2 - Services not paid by OPPS Pricer; paid under fee schedule or other payment system (status indicators A, G, K)</p> <p>3 - Not paid (status indicators E, M, Q, Q1, Q2, Q3, W, Y), or not paid under OPPS (status indicators B, C, Z)</p> <p>4 - Paid at reasonable cost (status indicator F, L)</p> <p>5 - Paid standard amount for pass-through drug or biological (status indicator G)</p> <p>6 - Payment based on charge adjusted to cost (status indicator H)</p> <p>7 - Additional payment for new drug or new biological (status indicator J; services prior to 04/01/2002 only)</p> <p>8 - Paid partial hospitalization per diem (status indicator P)</p> <p>9 - No additional payment; payment included in line items with APCs (status indicator N; or no HCPCS code and certain revenue codes; or HCPCS codes G0176 - activity therapy, G0129 - occupational therapy, or G0177 - patient education and training services)</p> <p>10 - Paid FQHC encounter payment</p> <p>11 - Not paid or not included under FQHC encounter payment</p> <p>12 - No additional payment, included in payment for FQHC encounter</p> <p>13 - Paid FQHC encounter payment for New patient or IPPE/AWV</p> <p>14 - Grandfathered tribal FQHC encounter payment</p>

Position	Length	Description
36	1	<p>Discounting formula^a. One of the following nine discount formulas can be applied to a line item:</p> <p>1 - 1.0</p> <p>2 - $(1.0 + D(U-1))/U$</p> <p>3 - T/U</p> <p>4 - $(1+D)/U$</p> <p>5 - D</p> <p>6 - TD/U</p> <p>7 - $D(1+D)/U$</p> <p>8 - 2.0</p> <p>9 - $2D/U$</p> <p>Where:</p> <p>D = discounting fraction (currently 0.5)</p> <p>U = number of units</p> <p>T = terminated procedure discount (currently 0.5)</p> <p>Note: Effective 1/1/08 (v9.0), formula #6 and #7 are discontinued.</p>
37	1	<p>Line item denial or rejection flag^a</p> <p>0 - Line item not denied or rejected</p> <p>1 - Line item is denied or rejected</p> <p>2 - The line is not denied or rejected, but occurs on a day that has been denied or rejected (not used as of 04/01/2002)</p> <p>3 - Line item not denied or rejected; identified for informational alert only</p>
38	1	<p>Packaging flag^a</p> <p>0 - Not packaged</p> <p>1 - Packaged service (status indicator N, or no HCPCS code and certain revenue codes)</p> <p>2 - Packaged as part of partial hospitalization per diem or daily mental health service per diem (v1.0-9.3 only)^c</p> <p>3 - Artificial charges for surgical procedures (submitted charges for surgical HCPCS < \$1.01)</p> <p>4 - Packaged as part of drug administration APC payment (v6.0–v7.3 only)</p> <p>5 - Packaged as part of FQHC encounter payment</p> <p>6 - Packaged preventive service as part of FQHC encounter payment not subject to coinsurance payment</p>

Position	Length	Description
39	2	<p>Payment adjustment flag^a (right-justified, blank-filled)</p> <p>0 - No payment adjustment</p> <p>1 - Paid standard amount for pass-through drug or biological (status indicator G)</p> <p>2 - Payment based on charge adjusted to cost (status indicator H)</p> <p>3 - Additional payment for new drug or new biological applies to APC (status indicator J)^g</p> <p>4 - Deductible not applicable (specific list of HCPCS codes) or condition code "MA" is present on the claim</p> <p>5 - Blood/blood product used in blood deductible calculation</p> <p>6 - Blood processing/storage not subject to blood deductible</p> <p>7 - Item provided without cost to provider^f</p> <p>8 - Item provided with partial credit to provider^f</p> <p>9 - Deductible/co-insurance not applicable^e</p> <p>10 - Co-insurance not applicable^e</p> <p>11 - Multiple units of service present paid at single comprehensive APC payment rateⁱ</p> <p>12 - Offset for device pass-through^k</p> <p>13 - Offset for additional device pass-through^k</p> <p>14 - PAMA Section 218 reduction on CT scan^l</p> <p>15 - Placeholder reserved for future use</p> <p>16 - Terminated procedure with pass-through device^o</p> <p>17 - Condition for device credit present^p</p> <p>18 - Offset for first pass-through drug or biological^q</p> <p>19 - Offset for second pass-through drug or biological^q</p> <p>20 - Offset for third pass-through drug or biological^q</p> <p>21 - CAA Section 502b reduction on film x-ray</p> <p>22 - CAA Section 502b reduction on computed radiography technology</p> <p>23 - Co-insurance deductible n/a, as well as subject to a reduction due to film x-ray (CAA Section 502b)</p> <p>24 - Co-insurance deductible n/a, as well as subject to a reduction due to computed radiography technology (CAA Section 502b)</p> <p>91-99 - Each composite APC present, same value for prime and non-prime codes (v9.0 - 9.3 only)^d</p>

Position	Length	Description
41	1	Payment method flag ^a 0 - OPPS pricer determines payment for service 1 - Service not paid based on coverage or billing rules 2 - Service is not subject to OPPS 3 - Service is not subject to OPPS and has an OCE line item denial or rejection 4 - Line item is denied or rejected by MAC; OCE not applied to line item 5 - Payment for service determined under FQHC PPS 6 – CMHC outlier limitation reached 7 – Section 603 service with no reduction in OPPS Pricer 8 – Section 603 service with PFS reduction applied in OPPS Pricer 9 – CMHC outlier limitation bypassed A – Payment reduction for off-campus clinic visit Z – Contractor bypass determines payment for services
42	9	Service units (from input)
51	90	Procedure edits ^e (30 three-byte fields). Edits are right-justified, zero-filled.
141	5	HCPCS procedure codes (from input)
146	1	Line item action flag (from input)
147	2	Composite Adjustment Flag ^{ah}
149	4	Reserved for future use
153	148	Unused, blank-filled

a. Not activated for claims with OPPS flag = 2 (blanks are returned in the APC return buffer), unless the contractor edit bypass logic is applied and Payment Method Flag of Z is output to identify that the line(s) payment is determined by the contractor.

b. Status indicator Q was replaced by status indicators Q(#) in January 2009 (v10.0)

c. Packaging flag 2 was replaced by the composite adjustment flag starting in January 2009 (v10.0)

d. Payment adjustment flag values 91-99 discontinued 1/1/09, replaced by the composite adjustment flag (v10.0)

e. Two new payment adjustment flags (9, 10) added for January 2011

f. Payment adjustment flags 7 & 8 deactivated effective January 2014 (v15.0)

g. Discontinued 04/01/2002 and replaced by status indicator G for all drugs/biologics.

h. Values defined for composite adjustment flag that are used only for FQHC PPS processing are output on claims with bill type 77x without condition code 65; no composite APCs are assigned (v15.3).

- i. Status indicator X is deactivated as of January 1, 2015 (v16.0).
- j. Description for payment adjustment flag 11 modified 4/1/2015 (v16.1).
- k. Payment adjustment flags 12 and 13 are associated with conditions present for APC pass-through device offset; multiple conditions for the same claim requiring payment offset due to the presence of multiple device/procedure combinations may require the assignment of both payment adjustment flags 12 and 13.
- l. Payment adjustment flag 14 is applied to a specific list of CT scan procedure codes; if there is a CT scan code from the specified list reported with modifier CT that is packaged with SI = N as a result of composite APC or comprehensive APC processing, payment adjustment flag 14 is not applied.
- m. Status Indicators J2 and Q4 are added effective 1/1/2016 (v17.0).
- n. Effective 1/1/2016, laboratory codes with SI = Q4 that result in a final SI = A are assigned PMF = 2
- o. Payment adjustment flag 16 is assigned to a terminated device intensive procedure reported with modifier 73.
- p. Payment adjustment flag 17 is assigned to a device intensive procedure if condition code 49, 50 or 53 is reported.
- q. Payment adjustment flags 18-20 are assigned for conditions that may be present for pass-through drugs or biologicals requiring payment offset.
- r. Effective 10/1/2016 (v17.3) payment indicator assignments for pass-through drugs (SI = G) and non-pass-through drugs (SI = K) change to a value of 2; payment indicator 5 is discontinued*.
- s. Effective 1/1/2017 (v18.0) SI E is deactivated and replaced with new SI values E1 and E2.

Table 35. S record (Line item edits - part 2)

Position	Length	Description
1	1	Uppercase S to indicate the record type
2	17	Claim identification number (copied from the C record)
19	3	Line item number (copied from L record associated with these edits)
22	12	Modifier 1 edits (4 three-byte fields). Edits are right-justified, zero-filled.
34	12	Modifier 2 edits (4 three-byte fields). Edits are right-justified, zero-filled.
46	12	Modifier 3 edits (4 three-byte fields). Edits are right-justified, zero-filled.
58	12	Modifier 4 edits (4 three-byte fields). Edits are right-justified, zero-filled.
70	12	Modifier 5 edits (4 three-byte fields). Edits are right-justified, zero-filled.

Position	Length	Description
82	12	Date edits (4 three-byte fields). Edits are right-justified, zero-filled.
94	15	Revenue edits (5 three-byte fields). Edits are right-justified, zero-filled.
109	10	Charge (from input)
119	182	Unused, blank-filled

Log file

The software generates a log file for each batch run. The default name for the log file is `oce.log`. Information that can be found in the log file includes:

- Name and version number of the program
- Copyright statement
- Input file name
- Output file name
- Start time of the batch run
- Claim ID (if no claim ID, patient number) followed by the error message
- End time of the batch run
- Ignored line items (450 is maximum allowed per record)
- A list of records that were ignored (identified by record number)

Below is an example of a log file; during actual use, vx.x and mm/dd/yyyy will be replaced with real data.

Program name	Integrated Outpatient Code Editor Software vx.x
Copyright statement	CPT codes, descriptions and material only are copyright 2011 American Medical Association. All Rights Reserved. No fee schedules, basic units, relative values or related listings are included in CPT. AMA does not directly or indirectly practice medicine or dispense medical services. The AMA assumes no liability for the data contained herein.
Input and output file	All rights reserved. Input file: testlog.in Output file: testlog.out
Run start time	Start Time: 10:44:02 mm/dd/yyyy
Errors	Too many L records on this patient. Only the first 450 were processed.
Run end time	End Time: 10:44:02 mm/dd/yyyy
Ignored line items	The following input lines were ignored: 453, 454, 455.

Figure 4: IOCE PC log file

Error messages

Error messages that can occur during batch processing are listed in the following table.

Table 36. Error messages

Message	Reason for occurrence	Where displayed
Claim could not be processed (claim has no line items).	Each claim must have at least one line item (L-record)	Log file
Claim could not be processed (edit 10 - condition code 21 is present).	The claim could not be fully processed due to Edit 10 (Service submitted for denial (condition code 21)	Log file
Claim could not be processed (edits 23, 24, 46, TOB 83x or other invalid bill type)	The claim was not fully processed due to one of the following reasons: Edit 23 (Invalid Date - from, through or service); Edit 24 (Date out of OCE range); Edit 46 (Partial hospitalization condition code 41 not approved for type of bill); Invalid Bill Type; A subsequent message will be provided on from and through reasons related to from and through date editing	Log file
Error opening input file: <filename>.	The file name specified on the command line could not be opened or is missing.	Window & Log file
Error reading input file: <filename>.	The file name specified on the command line could not be read.	Window & Log file
Fatal error; IOCE cannot run - the environment cannot be set up as needed;	Run time environment not established	Log file
From date cannot be after Through date.	The date in the From date field is after the Through date.	Log file
The date is outside the IOCE date range.	The date is outside the range mm/dd/yyyy (first day of the earliest version (page 12)) to 01/01/20xx where 20xx is the end year for the most current version ^a	Log file

Message	Reason for occurrence	Where displayed
Through date is invalid.	The value of either mm, dd or yyyy in the date is not in the valid range for mm, dd or yyyy.	Log file
Too many L records on this patient. Only the first 450 were processed.	The input file contains more than 450 L records for one patient.	Log file
Was not processed as it contains multiple D records	There was more than one D-record within the claim - only one allowed	Log file

a. The IOCE date range for claims from non-OPPS hospitals is 07/01/2007 to 01/01/20xx, where 20xx is the end year for the most current version (page [93](#)).

Chapter 10: Accessibility features

This chapter describes how to interactively enter data into the Integrated Outpatient Code Editor (IOCE) software.

The chapter contains the following information for OPPS data processing: complete definitions for fields, explanations of menus and command buttons, and a list of error messages that can occur.

System requirements

The following are system requirements for accessibility.

- Windows-based Assistive Technology software (needs to be running prior to using IOCE).
- JAVA Access Bridge

Note: IOCE software uses one graphical user interface for interactively processing claims from both OPPS and non-OPPS hospitals. Consequently, three fields for non-OPPS data entry will be grayed-out on the OPPS data entry screen.

Data entry

This section provides information about the data entry fields, including valid entry ranges, where appropriate. It also explains how to navigate through the data entry window and perform functions, such as editing fields or copying text. Any error messages that can occur during data entry are also listed and explained.

To access the interactive interface of IOCE software

1. On the Start menu, point to Programs, Integrated Outpatient Code Editor, and select IOCE Interactive.

The splash screen appears, followed by the Integrated Outpatient Code Editor Software window.

2. Enter claim data on the Integrated Outpatient Code Editor Software window.

The data entry (input) window is shown in the Viewing an output report section (page [153](#)). The CPT copyright date is represented by xxxx in the figure; the actual date in your software will be current with the latest release of the product.

For help with data entry:

- Use the Data entry table for data entry field information.
- Use the Data entry menu items table (page [150](#)) when entering diagnosis and/or procedure codes.
- If you get an error message, refer to the error messages table (page [152](#)).

Data entry fields

Fields on the input window, for both OPPS and non-OPPS claims, are described in the following table. Refer to the Data elements table for Uniform Billing (UB) locator information for fields. You can access the fields on the data entry window using the Tab key to advance from field to field. The order of the fields in the following table represents the tab order as you advance from one field to the next.

Table 37. Data entry fields

Field name	Length	Description
Patient name	31	Name of the patient.
Medical record number	17	Patient's medical record number.
Date of service: From	10	Required. Beginning date of patient's service in MM/DD/YY or MM/DD/YYYY format ^a . Used for code validation. The date cannot precede the first day of the earliest version included in the current release and determines the version of codes and descriptions used for processing.
Date of service: Through	10	Required. Through date of patient's service in MM/DD/YY or MM/DD/YYYY format ^a . The date cannot precede the first day of the earliest version included in the current release.
OPPS flag	1	OPPS/non-OPPS flag. Default value = 1. 1 = OPPS 2 = Non-OPPS
Birth date	10	Patient's birth date in MM/DD/YY or MM/DD/YYYY format ^a . Used for age calculation.
Age in years	3	Patient's age in years. Valid values: 0 - 124. Calculated age (From date minus Birth date) takes precedence over entered age.
Sex	1	Patient's sex. Select a value from the drop-down list of acceptable values.
Patient status	2	Patient status code

Field name	Length	Description
Type of bill	3	Code indicating the specific type of bill: inpatient, outpatient, adjustments, voids, etc.
NPI Medicare provider number	13	National provider identifier Medicare provider number.
OSCAR Medicare provider number	6	OSCAR Medicare provider number.
Condition codes	2	Code(s) used to identify conditions relating to the bill that may affect payer processing. Maximum of 30 condition codes. Lower case letters are automatically converted to upper case by the program.
Occurrence codes	30	Occurrence code. Maximum of 30 occurrence codes.
Value codes and amounts	36	Value code and value code amount.
Primary pay source		Enter the primary pay source using one of the numbers listed below. The English description displays automatically. 01 = Medicare 02 = Medicaid 03 = Title V 04 = Other govt 05 = Work 06 = Blue Cross 07 = Insur co 08 = Self pay 09 = Other 10 = No charge
Patient account number		For non-OPPS only. Number of the group insurance policy or other unique patient identifier by which the patient is billed for medical care. The entry can be a combination of letters and numbers.
Comment		For non-OPPS only. Available for entry of additional information as specified by the user. The entry can be a combination of letters and numbers.
Codes: Diagnosis/Procedure		Click the Diagnosis radio button to enter a diagnosis code. Click the Procedure radio button to enter a procedure code.

Field name	Length	Description
Code	8	<p>Enter the diagnosis or procedure code without decimal points. Lower case letters are converted to upper case by the program. The English description for the code appears in the text box to the right of this field.</p> <p>Diagnosis codes. PDX is required. Valid entries for diagnoses are 8-character ICD-10-CM or ICD-9-CM codes, to a maximum of 28 diagnoses. The first three listed diagnoses are assumed to be the patient's reasons for visit diagnosis (RVDX) and may be left blank. The fourth listed diagnosis is assumed to be the principal diagnosis and cannot be blank. Additional diagnoses are secondary and must be in contiguous locations. The first blank non-RVDX diagnosis signifies the end of the list.</p> <p>Procedure codes. Valid entries for procedures are 5-character CPT/HCPCS codes to a maximum of 99 procedures.</p> <p>Important: After entering a code, be sure to click the Add code, Add RVDX or Add PDX button to add the code to the record.</p>
Modifiers	2	Enter a maximum of five modifiers. Each modifier must be two characters long. Lower case letters are automatically converted to upper case by the program. This field is only enabled when you are entering a procedure.
Revenue code	4	Required for line items. Code that identifies a specific accommodation, ancillary service, or billing calculation (UB-04 form locator 42). One revenue code is required for each line item. This field is only enabled when you are entering a procedure.
Units of service	9	<p>A quantitative measure of services rendered to or for the patient, by procedure code (UB-04 form locator 46). Valid values: 0-999999999</p> <p>This field is only enabled when you are entering a procedure.</p>
Charges	10	Charges related to the revenue or procedure codes for the current billing period as entered in the Statement Covers period (UB-04 form locator 47). Valid values: 0-99999999.99. This field is only enabled when you are entering a procedure.
Service date	10	Date that the procedure was performed in MM/DD/YY or MM/DD/YYYY format ^a . This field is only enabled when you are entering a procedure.

Field name	Length	Description
Line item action flag	1	Indicates to a payment program that a line item rejection or denial should be ignored or added. Select a value (0 - 4) from the drop-down list of values: 0 - Line item denial or rejection is not ignored. 1 - Line item denial or rejection is ignored (except when edit 30 is present). 2 - External line item denial. Line item is denied even if no IOCE edits are present. 3 - External line item rejection. Line item is rejected even if no IOCE edits are present. 4 - External line item adjustment. Technical charge rules apply. This field is only enabled when you are entering a procedure.
Diagnoses	8	A display-only list of the diagnoses entered for the current patient record. You can delete a diagnosis from this list by selecting it and then clicking Delete row on the Edit menu. To select the Diagnosis radio button, press Alt+D.
Procedures	5	A display-only list of the procedures (and related information) entered for the current patient record. You can delete a procedure from this list by selecting it and then clicking Delete row on the Edit menu. To select the Procedure radio button, press Alt+O.

a. Dates can be entered with or without a separator (/).

Data entry menu items

Menu items available from the data entry window are described in the following table. Refer to the function column to locate the task you want to perform. Accelerator keys allow you to bypass a menu and activate a function more quickly.

Table 38. Menu items

Function	Description	Accelerator keys
New	Displays a new window, cleared of all previously entered information.	Ctrl+N
Load File	Provides a simple mechanism for the user to choose a file that will then allow the user to load a single test claim in mainframe format that auto- populates the user interface.	Ctrl+L
Exit	Exits the program.	Ctrl+Q
Cut	Removes the selected text and copies it to the clipboard.	Ctrl+X
Copy	Copies the selected text to the clipboard.	Ctrl+C
Paste	Inserts the clipboard's contents at the insertion point.	Ctrl+P
Delete row	Deletes the diagnosis or procedure (and all information in the row) that was selected.	Ctrl+D
About	Displays the About box and the copyright information for the IOCE software.	Alt+H+A

Note: The Load File feature provides the option to load a single test record to the user interface from a file and generate output reports. Using this feature, the user can quickly load a test record to the user interface, as well as edit data from the user interface to see how it affects a claim.

Input window command buttons

Command buttons on the input window are described in the following table. Refer to the Function column to locate the task you want to perform, including the Accelerator keys. To switch between the Diagnosis and Procedure tables on the input window, press Ctrl+Tab.

Table 39. Command buttons

Button	Function
Add code	Adds the currently displayed diagnosis or procedure code to the patient's record. The code will appear in the Diagnoses or Procedures list at the bottom of the window, as appropriate. Press Alt+A to activate this function.
Add RVDX	Adds the currently displayed diagnosis code to the RVDX field in the Diagnoses list at the bottom of the window.
Add PDX	Adds the currently displayed diagnosis code to the PDX field in the Diagnoses list at the bottom of the window.
Clear	Clears the Code field and the code description that appears next to it. For procedures, Modifiers, Revenue code, Units of service, Charges, Service date, and Line item action flag are also cleared.
Report	Displays a pre-formatted output report that can be printed or saved. See the Output report fields table (page 156) for more information on the output report. Press Alt+R to activate this function.

Error messages

To help ensure the entry of accurate information, the program automatically performs data entry checks, such as for a month entered as 14, or an age entered as -2. When an error is detected, an error message appears in a message box.

The following table describes the error messages that can occur during data entry.

Table 40. Error messages

Message	Occurs when ...
Birth date cannot be after From date.	Birth date is after the From date.
Invalid date. Valid formats are mm/dd/yyyy or mm/dd/yy or mmdyyy or mmdyy.	The value entered for the month, day or year is outside the valid range for mm, dd or yyyy, or the format is incorrect. Note: This error message applies to the "Birth date", "From date", or "Through date" fields.
Birth date cannot be after today's date.	Date in the date field is after the system (today's) date, for non-OPPS claims only .
Charges are invalid. Charges must be between 0 and 99999999.99.	Entry for Charges is outside the field's valid entry range.
From date cannot be after Through date.	From date is after the Through date.
From date cannot be after today's date.	Date entry is after the system (today's) date.
From date cannot precede Birth date.	From date precedes the Birth date.
From date cannot precede mm/dd/yyyy ^a .	Date is prior to the first day of the earliest non-OPPS version included in the current release, for non-OPPS claims only .
Invalid age. Age in years must be between 0 and 124.	Entered age or calculated age exceeds 124 years.
Partial hospitalization condition code 41 not approved for type of bill.	Bill type is 12x or 14x with a condition code of 41.
Revenue code is a required field. Please enter a revenue code.	User attempts to add a procedure to the patient record without first entering a revenue code.
Service date is a required field. Please enter a service date.	User attempts to add a procedure to the patient record without first entering a service date.
Service date must be within the range of the From and Through dates.	Service date is not within the range of the From and Through dates.
The maximum number of diagnosis codes is 28.	User attempts to add a 29th diagnosis code.

Message	Occurs when ...
The maximum number of procedure codes is 99.	User attempts to add a 100th procedure code.
Through date cannot be after today's date.	Through date is after the system (today's) date.
Through date cannot precede Birth date.	Through date is prior to the Birth date.
Through date cannot precede From date.	Through date is prior to the From date.
Through date cannot precede mm/dd/yyyy ^a .	Through date is prior to the first day of the earliest non-OPPS version included in the current release, for non-OPPS claims only.

a. Dates can be entered with or without a separator (/).

Program output

This section describes the output generated by the software after you have entered your data into the program on the data entry window. The output is displayed on your computer screen and can be printed, copied, or saved to a text file.

Reports are created and saved singly and the IOCE Software does not append them. If you want a file of multiple reports, you can copy several output reports, one at a time as you generate them, and paste them, one at a time, into a text file. Once data is erased from the data entry window or the Report window is closed, the output is no longer available unless you re-enter the data.

This section also contains an illustration of an output report.

Viewing an output report

To view the output report for a claim,

1. Complete your data entry as described earlier in this chapter.
2. At the bottom of the data entry window, click Report (Alt+R).

The output report displays.

The current version of software installed on your system is noted as a two-digit number in the report heading. In the body of the report, a three-digit number specifies the version of software that was used to process the claim based on the date of service; the third digit represents revisions created since the original release and does not affect your use of the product.

The format of a sample output report is shown below. In actual use, the fields will contain real data. Descriptions of output report fields follow the figure.

Fields on the output report are described in the following table.

Table 41. Output report fields

Name	Description	OPPS/ non-OPPS
Patient name Medical record number Dates of service: From and Through Birth date Age in years Sex Patient status Type of bill OPPS flag Condition codes NPI provider number OSCAR provider number Occurrence codes Value code and amount Payer value code Payer value code amount ICD Code Type Diagnoses Procedures Modifiers Revenue code Units of service Line item charges (Charge) Service date (Date) Line item action flag	Data that was entered on input window. See the Data entry table for descriptions of these fields.	OPPS and non-OPPS

Name	Description	OPPS/ non-OPPS
Status indicator	<p>Medicare has assigned each HCPCS/CPT code a letter that signifies whether Medicare will reimburse the service and how it will be reimbursed. The indicator also helps in determining whether policy rules, such as packaging and discounting, apply. Values are:</p> <p>A - Services not paid under OPPS; paid under fee schedule or other payment system</p> <p>B - Non-allowed item or service for OPPS</p> <p>C - Inpatient procedure</p> <p>E - Non-allowed item or service (discontinued 01/01/2017)</p> <p>E1 - Non-allowed item or service</p> <p>E2 - Items and services for which pricing information and claims data are not available</p> <p>F - Corneal tissue acquisition; certain CRNA services and hepatitis B vaccines</p> <p>G - Drug/Biological pass-through</p> <p>H - Pass-through device categories</p> <p>J - New drug or new biological pass-through (discontinued 04/01/2002 and replaced by status indicator G for all drugs/biologicals)</p> <p>J1 - Outpatient department services paid through a comprehensive APC</p> <p>J2 - Hospital Part B services that may be paid through a comprehensive APC</p> <p>K - Non pass-through drugs and non-implantable biologicals, including therapeutic radiopharmaceuticals</p> <p>L - Flu/PPV vaccines</p> <p>M - Service not billable to MAC</p> <p>N - Items and Services packaged into APC rates</p> <p>P - Partial hospitalization service</p> <p>Q - Packaged services subject to separate payment based on payment criteria (discontinued 01/01/2009 and replaced by status indicators Q1, Q2, Q3)</p> <p>Q1 - STVX-packaged codes</p> <p>Q2 - T-packaged codes</p> <p>Q3 - Codes that may be paid through a composite APC</p>	OPPS only

Name	Description	OPPS/ non-OPPS
	Q4 - Conditionally packaged laboratory services R - Blood and blood products S - Significant procedure not subject to multiple procedure discounting T - Significant procedure subject to multiple procedure discounting U - Brachytherapy sources V - Clinic or emergency department visit W - Invalid HCPCS or Invalid revenue code with blank HCPCS X - Ancillary service Y - Non-implantable DME Z - Valid revenue code with blank HCPCS and no other SI assigned	
Payment indicator	Payment indicator. Values are: 1 - Paid standard hospital OPPS amount (status indicators K, R, S, T, U, V, X) 2 - Services not paid by OPPS Pricer; paid under fee schedule or other payment system (status indicators A, G, K) 3 - Not paid (status indicators E, M, Q, Q1, Q2, Q3, W, Y), or not paid under OPPS (status indicators B, C, Z) 4 - Paid at reasonable cost (status indicator F, L) 5 - Paid standard amount for pass-through drug or biological (status indicator G) 6 - Payment based on charge adjusted to cost (status indicator H) 7 - Additional payment for new drug or new biological (status indicator J; services prior to 04/01/2002 only)	OPPS only

Name	Description	OPPS/ non-OPPS
	<p>8 - Paid partial hospitalization per diem (status indicator P)</p> <p>9 - No additional payment; payment included in line items with APCs (status indicator N; or no HCPCS code and certain revenue codes; or HCPCS codes G0176 - activity therapy, G0129 - occupational therapy, or G0177 - patient education and training services)</p> <p>10 – Paid FQHC encounter payment</p> <p>11 – Not paid or not included under FQHC encounter payment</p> <p>12 – No additional payment, included in payment for FQHC encounter</p> <p>13 - Paid FQHC encounter payment for New patient or IPPE/AWV</p> <p>14 - Grandfathered tribal FQHC encounter payment</p>	
HCPCS APC	APC assigned to the procedure code. See the "List of APCs" appendix (page 571) for a list of APCs with their status indicators and descriptions.	OPPS only
Payment APC	APC assigned for payment. Except when specified otherwise (e.g., partial hospitalization, mental health, observation logic, codes with SI of 'Q', etc.), the payment APC and the HCPCS APC are the same. See the "List of APCs" appendix (page 571) for a list of APCs with their status indicators and descriptions.	OPPS only
ASCs	When applicable, the ASC group number will be returned in the Payment APC field on 83x bill types. (v8.2 and 8.3 only)	Non-OPPS only
Discounting formula		OPPS only

Name	Description	OPPS/ non-OPPS
Payment adjustment flag ^a	Right-justified, blank-filled. Values are: 0 - No payment adjustment 1 - Paid standard amount for pass-through drug or biological (status indicator G) 2 - Payment based on charge adjusted to cost (status indicator H) 3 - Additional payment for new drug or new biological applies to APC (status indicator J) 4 - Deductible not applicable (specific list of HCPCS codes) or condition code "MA" is present on the claim 5 - Blood/blood product used in blood deductible calculation 6 - Blood processing/storage not subject to blood deductible 7 - Item provided without cost to provider 8 - Item provided with partial credit to provider 9 - Deductible/co-insurance not applicable	OPPS only

Name	Description	OPPS/ non-OPPS
	10 - Co-insurance not applicable 11 - Multiple service units reduced to one by IOCE processing; payment based on single payment rate 12 - Offset for device pass-through ^c 13 - Offset for additional device pass-through ^c 14 - PAMA Section 218 reduction on CT scan ^d 15 - Reserved for future use 16 - Terminated procedure with pass-through device 17 - Condition for device credit present 18 - Offset for first pass-through drug or biological 19 - Offset for second pass-through drug or biological 20 - Offset for third pass-through drug or biological 21 - CAA Section 502(b) reduction on film X-ray 22 - CAA Section 502b reduction on computed radiography technology 23 – Co-insurance deductible n/a, as well as subject to a reduction due to film x-ray (CAA Section 502b) 24 – Co-insurance deductible n/a, as well as subject to a reduction due to computed radiography technology (CAA Section 502b) 91–99 - Each composite APC present, same value for prime and non-prime codes (v9.0 - v9.3 only) ^b	
Composite adjustment flag ^a	00 - Not a composite 01–ZZ - First through the nth composite APC present; same composite flag identifies the prime and non-prime codes in each composite APC group. For FQHC PPS claims (bill type 77x) only, the following values are defined for composite adjustment flag: 01 – FQHC medical clinic visit 02 – FQHC mental health clinic visit 03 – Subsequent FQHC medical clinic visit (modifier 59 reported)	OPPS only

Name	Description	OPPS/ non-OPPS
Line item action flag ^a	<p>Used in determination of discount formula, and also passed to pricer.</p> <p>0 - Line item denial or rejection is not ignored</p> <p>1 - Line item denial or rejection is ignored (except when edit 30 is present)</p> <p>2 - External line item denial. Line item is denied even if no edits are present</p> <p>3 - External line item rejection. Line item is rejected even if no edits are present</p> <p>4 - External line item adjustment. Technical charge rules apply</p> <p>5 - Non-covered service excluded from payment under FQHC PPS</p>	OPPS only
Packaging flag ^a	<p>0 - Not packaged</p> <p>1 - Packaged service (status indicator N, or no HCPCS code and certain revenue codes)</p> <p>2 - Packaged as part of partial hospitalization per diem or daily mental health service per diem (v1.0 - v9.3 only)^c</p> <p>3 - Artificial charges for surgical procedures (submitted charges for surgical HCPCS < \$1.01)^t</p> <p>4 - Packaged as part of drug administration APC payment (v6.0–v7.3 only)</p> <p>5 – Packaged as part of FQHC encounter payment</p> <p>6 – Packaged preventive service as part of FQHC encounter payment not subject to coinsurance payment</p>	OPPS only

Name	Description	OPPS/ non-OPPS
Payment method flag ^a	0 - OPPS pricer determines payment for service 1 - Service not paid based on coverage or billing rules 2 - Service is not subject to OPPS 3 - Service is not subject to OPPS, and has an OCE line item denial or rejection 4 - Line item is denied or rejected by MAC; OCE not applied to line item 5 - Payment for service determined under FQHC PPS 6 - CMHC outlier limitation reached 7 - Section 603 service with no reduction in OPPS Pricer 8 - Section 603 service with PFS reduction applied in OPPS Pricer 9 - CMHC outlier limitation bypassed A - Payment reduction for off-campus clinic visit Z - Contractor bypass determines payment for services	OPPS only
Line item denial or rejection flag ^a	0 - Line item is not denied or rejected 1 - Line item is denied or rejected (procedure edit return buffer for line item contains a 9, 13, 18, 20, 28, 30, 40, 45, 47, 49, 53, 64-65, 67-69, 76, 83, 91, 93, 103-108) 2 - The line is not denied or rejected, but occurs on a day that has been denied or rejected (not used as of 4/01/02 - v.3.0) 3 - Line item not denied or rejected; identified for informational alert only	OPPS only
HCPCS modifier	Reserved for future use	

Name	Description	OPPS/ non-OPPS
Edit	Edit number, description, and disposition generated by the diagnosis or procedure. The edit dispositions are abbreviated as follows: RTP - Return to provider LIR - Line item rejection LID - Line item denial CD - Claim denial S - Claim suspension See the Edit disposition summary (page 167) for more information on individual edits.	OPPS and non-OPPS
Claim level edits	Edits that affect the entire claim, rather than an individual diagnosis or procedure.	OPPS and non-OPPS
Overall claim disposition statement	Because it is possible for a claim to have one or more edits in all dispositions, the program assigns an overall disposition to the claim. Values are: 0 - No edits are present on the claim. 1 - The only edits present are for line item denial or rejection. 2 - Claim is for multiple days with one or more days denied or rejected. 3 - Claim is denied, rejected, suspended or returned to provider, or single day claim with all line items denied or rejected, with only post-payment edits. 4 - Claim is denied, rejected, suspended or returned to provider, or single day claim with all line items denied or rejected, with only pre-payment edits. 5 - Claim is denied, rejected, suspended or returned to provider, or single day claim with all line items denied or rejected, with both post- and pre- payment edits.	OPPS and non-OPPS

- a. Not activated for claims with OPPS flag = 2 (blanks are returned in the APC return buffer), unless the contractor edit bypass logic is applied and Payment Method Flag of Z is output to identify that the line(s) payment is determined by the contractor.
- b. Payment adjustment flag values 91-99 discontinued 1/1/09, replaced by the composite adjustment flag (v10.0)
- c. Payment adjustment flags 12 and 13 are associated with conditions preset for APC pass-through device offset; multiple conditions for the same claim requiring payment offset due to the presence of multiple device/procedure combinations may require the assignment of both payment adjustment flags 12 and 13.

d. Payment adjustment flag 14 is applied to a specific list of CT scan procedure codes; if there is a CT scan code from the specified list reported with modifier CT that is packaged with SI = N as a result of composite APC or comprehensive APC processing, payment adjustment flag 14 is not applied.

Output report menu items

Menu items available from the output report window are described in the following table. Refer to the function column to locate the task you want to perform. Accelerator keys allow you to bypass a menu and activate a function more quickly.

Table 42. Menu items

Function	Description	Accelerator key
Print	Prints the output report.	Ctrl+P
Save As...	Opens the Save As dialog box to save the currently displayed output report as a text file.	Ctrl+S
Exit	Closes the output report window.	Ctrl+Q
Copy	Copies the selected text and moves it to the clipboard.	Ctrl+C
Select All	Selects the entire output report.	Ctrl+A

Output report command button

The following table describes the command button on the output report window.

Table 43. Output report command button

Function	Description	Accelerator key
Close	Closes the output report window and switches the focus to the data entry window.	Ctrl+C

Program edits

The edits in the IOCE Software are described in this section along with the edit dispositions.

Dispositions

Each edit is associated with a disposition. For example, there can be a rejection of the line item itself or a rejection of the entire claim. In addition to edit dispositions, the program assigns an overall disposition to the claim. Edit and claim dispositions are discussed below.

Edit disposition

A disposition is assigned based on the presence of any edits on a line. The meaning of each edit disposition is described in the following table. It is possible for a claim to have one or more edits in all dispositions. The Edit disposition summary table (page [167](#)) contains a complete list of program edits and edit dispositions.

Table 44. Edit disposition definitions

Disposition	Definition
Claim rejection	The provider can correct and resubmit the claim but cannot appeal the rejection.
Claim denial	The provider cannot resubmit the claim but can appeal the denial.
Claim return to provider (RTP)	The provider can resubmit the claim once the problems are corrected.
Claim suspension	The claim is not returned to the provider, but it is not processed for payment until the fiscal intermediary/Medicare Administrative Contractor (MAC) makes a determination or obtains further information.
Line item rejection	The claim can be processed for payment with some line items rejected for payment (i.e., the line item can be corrected and resubmitted but cannot be appealed).
Line item denial	There are one or more edits that cause one or more individual line items to be denied. The claim can be processed for payment with some line items denied for payment (i.e., the line item cannot be resubmitted but can be appealed).

Claim disposition

Since a claim can have several edit dispositions assigned to line items, the claim is assigned an overall disposition. Claim dispositions are shown in the "Overall claim disposition statement" section of the Output report fields table (page [105](#)).

Edit disposition summary

The following table lists each edit in the program with its disposition. The meaning of each disposition is provided in the Edit disposition definitions table (page [166](#)). Chapter 5 (page [51](#)) and chapter 8 (page [111](#)) contain information on what conditions will generate an edit, as well as relevant important comments for specific edits.

Table 45. Edit disposition summary

Edit	Edit disposition	OPPS/ non-OPPS
1. Invalid diagnosis code	Claim returned to provider	OPPS and non-OPPS
2. Diagnosis and age conflict	Claim returned to provider	OPPS and non-OPPS
3. Diagnosis and sex conflict	Claim returned to provider	OPPS and non-OPPS
4. Medicare secondary payer alert (v1.0 and v1.1 only) ^a	Claim suspension	OPPS only
5. External cause of morbidity code cannot be used as principal diagnosis	Claim returned to provider	OPPS and non-OPPS
6. Invalid procedure code	Claim returned to provider	OPPS and non-OPPS
7. Procedure and age conflict (inactive)	--	OPPS only
8. Procedure and sex conflict	Claim returned to provider	OPPS and non-OPPS
9. Non-covered under any Medicare outpatient benefit, for reasons other than statutory exclusion	Line item denial	OPPS and non-OPPS
10. Service submitted for denial (condition code 21)	Claim denial	OPPS and non-OPPS

Edit	Edit disposition	OPPS/ non-OPPS
11. Service submitted for MAC review (condition code 20)	Claim suspension	OPPS and non-OPPS
12. Questionable covered service	Claim suspension	OPPS and non-OPPS
13. Separate payment for services is not provided by Medicare (v1.0–v6.3 only) ^a	Line item rejection	OPPS only
14. Code indicates a site of service not included in OPPS (v1.0–v6.3 only) ^a	Claim returned to provider	OPPS only
15. Service unit out of range for procedure	Claim returned to provider	OPPS and non-OPPS
16. Multiple bilateral procedures without modifier 50 (v1.0–v6.2 only) ^a	Claim returned to provider	OPPS only
17. Inappropriate specification of bilateral procedure	Claim returned to provider	OPPS and non-OPPS
18. Inpatient procedure	Line item denial	OPPS only
19. Mutually exclusive procedure that is not allowed by NCCI even if appropriate modifier is present (<i>deleted, combined with edit 20 retroactive to earliest included version</i>) ^a	Line item rejection	OPPS only
20. Code2 of a code pair that is not allowed by NCCI even if appropriate modifier is present	Line item rejection	OPPS and non-OPPS
21. Medical visit on same day as a type T or S procedure without modifier 25	Claim returned to provider	OPPS only
22. Invalid modifier	Claim returned to provider	OPPS and non-OPPS
23. Invalid date	Claim returned to provider	OPPS and non-OPPS
24. Date out of OCE range	Claim suspension	OPPS and non-OPPS
25. Invalid age	Claim returned to provider	OPPS and non-OPPS
26. Invalid sex	Claim returned to provider	OPPS and non-OPPS
27. Only incidental services reported	Claim rejection	OPPS only

Edit	Edit disposition	OPPS/ non-OPPS
28. Code not recognized by Medicare for outpatient claims; alternate code for same service may be available	Line item rejection	OPPS and non-OPPS
29. Partial hospitalization service for non-mental health diagnosis	Claim returned to provider	OPPS only
30. Insufficient services on day of partial hospitalization	Line item denial	OPPS only
31. Partial hospitalization on same day as ECT or type T procedure (v1.0–v6.3 only) ^a	Claim suspension	OPPS only
32. Partial hospitalization claim spans 3 or less days with insufficient services on at least one of the days (v1.0 - v9.3) ^a	Claim suspension	OPPS only
33. Partial hospitalization claim spans more than 3 days with insufficient number of days having mental health services (v1.0 - v9.3) ^a	Claim suspension	OPPS only
34. Partial hospitalization claim spans more than 3 days with insufficient number of days meeting partial hospitalization criteria (v1.0 - v9.3) ^a	Claim suspension	OPPS only
35. Only Mental Health education and training services provided	Claim returned to provider	OPPS only
36. Extensive mental health services provided on day of ECT or type T procedure (v1.0–v6.3 only) ^a	Claim suspension	OPPS only
37. Terminated bilateral procedure or terminated procedure with units greater than one	Claim returned to provider	OPPS only
38. Inconsistency between implanted device or administered substance and implantation or associated procedure	Claim returned to provider	OPPS only
39. Mutually exclusive procedure that would be allowed by NCCI if appropriate modifier were present <i>(deleted, combined with edit 40 retroactive to earliest included version)</i> ^a	Line item rejection	OPPS only
40. Code2 of a code pair that would be allowed by NCCI if appropriate modifier were present	Line item rejection	OPPS and non-OPPS
41. Invalid revenue code	Claim returned to provider	OPPS and non-OPPS

Edit	Edit disposition	OPPS/ non-OPPS
42. Multiple medical visits on same day with same revenue code without condition code G0	Claim returned to provider	OPPS only
43. Transfusion or blood product exchange without specification of blood product	Claim returned to provider	OPPS only
44. Observation revenue code on line item with non-observation HCPCS code	Claim returned to provider	OPPS only
45. Inpatient separate procedures not paid	Line item rejection	OPPS only
46. Partial hospitalization condition code 41 not approved for type of bill	Claim returned to provider	OPPS and non-OPPS
47. Service is not separately payable	Line item rejection	OPPS only
48. Revenue center requires HCPCS	Claim returned to provider	OPPS only
49. Service on same day as inpatient procedure	Line item denial	OPPS only
50. Non-covered under any Medicare outpatient benefit, based on statutory exclusion	Claim returned to provider	OPPS and non-OPPS
51. Multiple observations overlap in time (inactive)	--	OPPS only
52. Observation does not meet minimum hours, qualifying diagnoses, and/or 'T' procedure conditions (v3.0–v6.3 only) ^a	Claim returned to provider	OPPS only
53. Codes G0378 and G0379 only allowed with bill type 13x or 85x	Line item rejection	OPPS and non-OPPS
54. Multiple codes for the same service	Claim returned to provider	OPPS and non-OPPS
55. Non-reportable for site of service	Claim returned to provider	OPPS only
56. E/M condition not met and line item date for obs code G0244 is not 12/31 or 1/1 (v4.0–v6.3 only) ^a	Claim returned to provider	OPPS only
57. Composite E/M condition not met for observation and line item date for code G0378 is 1/1	Claim suspension	OPPS only
58. G0379 only allowed with G0378	Claim returned to provider	OPPS only
59. Clinical trial requires diagnosis code V707 as other than primary diagnosis (deleted, retroactive to the earliest included version) ^a	Claim returned to provider	OPPS only
60. Use of modifier CA with more than one procedure not allowed	Claim returned to provider	OPPS only

Edit	Edit disposition	OPPS/ non-OPPS
61. Service can only be billed to the DMERC	Claim returned to provider	OPPS and non-OPPS
62. Code not recognized by OPPS; alternate code for same service may be available	Claim returned to provider	OPPS only
63. This OT code only billed on partial hospitalization claims	Claim returned to provider	OPPS only
64. AT service not payable outside the partial hospitalization program	Line item rejection	OPPS only
65. Revenue code not recognized by Medicare	Line item rejection	OPPS and non-OPPS
66. Code requires manual pricing	Claim suspension	OPPS only
67. Service provided prior to FDA approval	Line item denial	OPPS and non-OPPS
68. Service provided prior to date of National Coverage Determination (NCD) approval	Line item denial	OPPS and non-OPPS
69. Service provided outside approval period	Line item denial	OPPS and non-OPPS
70. CA modifier requires patient status code 20	Claim returned to provider	OPPS only
71. Claim lacks required device code	Claim returned to provider	OPPS only
72. Service not billable to the Fiscal Intermediary/Medicare Administrative Contractor	Claim returned to provider	OPPS and non-OPPS
73. Incorrect billing of blood and blood products	Claim returned to provider	OPPS only
74. Units greater than one for bilateral procedure billed with modifier 50	Claim returned to provider	OPPS and non-OPPS
75. Incorrect billing of modifier FB or FC	Claim returned to provider	OPPS only
76. Trauma response critical care code without revenue code 068x and CPT 99291	Line item rejection	OPPS only
77. Claim lacks allowed procedure code	Claim returned to provider	OPPS only
78. Claim lacks required radiolabeled product	Claim returned to provider	OPPS only
79. Incorrect billing of revenue code with HCPCS code	Claim returned to provider	OPPS only
80. Mental health code not approved for partial hospitalization program	Claim returned to provider	OPPS only

Edit	Edit disposition	OPPS/ non-OPPS
81. Mental health service not payable outside the partial hospitalization program	Claim returned to provider	OPPS only
82. Charge exceeds token charge (\$1.01)	Claim returned to provider	OPPS only
83. Service provided on or after effective date of NCD non-coverage	Line item denial	OPPS and non-OPPS
84. Claim lacks required primary code	Claim returned to provider	OPPS only
85. Claim lacks required device code or required procedure code	Claim returned to provider	OPPS only
86. Manifestation code not allowed as principal diagnosis	Claim returned to provider	OPPS only
87. Skin substitute application procedure without appropriate skin substitute product code	Claim returned to provider	OPPS only
88. FQHC payment code not reported for FQHC claim	Claim returned to provider	OPPS only
89. FQHC claim lacks required qualifying visit code	Claim returned to provider	OPPS only
90. Incorrect revenue code reported for FQHC payment code	Claim returned to provider	OPPS only
91. Item or service not covered under FQHC PPS	Line item rejection	OPPS only
92. Device-dependent procedure reported without device code	Claim returned to provider	OPPS only
93. Corneal tissue processing reported without cornea transplant procedure	Line item rejection	OPPS only
94. Biosimilar HCPCS reported without biosimilar modifier (v17.0–v19.0 only)	Claim returned to provider	OPPS and non-OPPS
95. Weekly partial hospitalization services require a minimum of 20 hours of service as evidenced in PHP plan of care (v17.2 only-RTP, v18.2-present, LIR)	Line item rejection (informational only, no impact to payment)	OPPS only
96. Partial hospitalization interim claim From and Through dates must span more than 4 days	Claim returned to provider	OPPS only
97. Partial hospitalization services are required to be billed weekly	Claim returned to provider	OPPS only

Edit	Edit disposition	OPPS/ non-OPPS
98. Claim with pass-through device, drug or biological lacks required procedure	Claim returned to provider	OPPS only
99. Claim with pass-through or non-pass-through drug or biological lacks OPPS payable procedure	Claim returned to provider	OPPS only
100. Claim for HSCT allogeneic transplantation lacks required revenue code line for donor acquisition services	Claim returned to provider	OPPS only
101. Item or service with modifier PN not allowed under PFS	Claim returned to provider	OPPS only
102. Modifier pairing not allowed on the same line	Claim returned to provider	OPPS and non-OPPS
103. Modifier reported prior to FDA approval date (v19.0 only)	Line item denial	OPPS and non-OPPS
104. Service not eligible for all-inclusive rate	Line item rejection	OPPS only
105. Claim reported with pass-through device prior to FDA approval for the procedure	Line item denial	OPPS only
106. Add-on code reported without required primary procedure code	Line item denial	OPPS and non-OPPS
107. Add-on code reported without required contractor-defined primary procedure code	Line item denial	Non-OPPS only
108. Add-on code reported without required primary procedure or required contractor-defined primary procedure code	Line item denial	OPPS and non-OPPS
109. Code first diagnosis present without mental health diagnosis as the first secondary diagnosis	Claim returned to provider	OPPS only
110. Service provided prior to initial marketing date	Line item rejection	OPPS and non-OPPS
111. Service cost is duplicative; included in cost of associated biological	Line item rejection	OPPS and non-OPPS

a. Edits are active only on claims that are more than 7 years old that are processed with previously archived software.

Appendix A: Diagnosis edit code lists

This appendix lists the diagnosis codes for the following categories associated with edits in the program.

Diagnosis code categories (ICD-10 CM codes)

- Adult diagnoses
- Newborn diagnoses
- Pediatric diagnoses
- Maternity diagnoses
- Diagnoses for females only
- Diagnoses for males only
- Manifestation diagnoses
- Mental health diagnoses

Diagnosis code categories (ICD-9 CM codes)

- Adult diagnoses
- Newborn diagnoses
- Pediatric diagnoses
- Maternity diagnoses
- Diagnoses for females only
- Diagnoses for males only
- Manifestation diagnoses
- Mental health diagnoses

Adult diagnoses (ICD-10 CM codes)

A1814	Tuberculosis of prostate
C9150	Adult T-cell lymph/leuk (HTLV-1-assoc) not achieve remission
C9151	Adult T-cell lymphoma/leukemia (HTLV-1-assoc), in remission
C9152	Adult T-cell lymphoma/leukemia (HTLV-1-assoc), in relapse
E28310	Symptomatic premature menopause
E28319	Asymptomatic premature menopause
F0150	Vascular dementia without behavioral disturbance
F0151	Vascular dementia with behavioral disturbance
F0390	Unspecified dementia without behavioral disturbance
F0391	Unspecified dementia with behavioral disturbance
F69	Unspecified disorder of adult personality and behavior
G112	Late-onset cerebellar ataxia
G1221	Amyotrophic lateral sclerosis
G301	Alzheimer's disease with late onset
H02031	Senile entropion of right upper eyelid
H02032	Senile entropion of right lower eyelid
H02033	Senile entropion of right eye, unspecified eyelid
H02034	Senile entropion of left upper eyelid
H02035	Senile entropion of left lower eyelid
H02036	Senile entropion of left eye, unspecified eyelid
H02039	Senile entropion of unspecified eye, unspecified eyelid
H02131	Senile ectropion of right upper eyelid
H02132	Senile ectropion of right lower eyelid
H02133	Senile ectropion of right eye, unspecified eyelid
H02134	Senile ectropion of left upper eyelid
H02135	Senile ectropion of left lower eyelid
H02136	Senile ectropion of left eye, unspecified eyelid
H02139	Senile ectropion of unspecified eye, unspecified eyelid
H25011	Cortical age-related cataract, right eye
H25012	Cortical age-related cataract, left eye
H25013	Cortical age-related cataract, bilateral
H25019	Cortical age-related cataract, unspecified eye
H25031	Anterior subcapsular polar age-related cataract, right eye
H25032	Anterior subcapsular polar age-related cataract, left eye
H25033	Anterior subcapsular polar age-related cataract, bilateral
H25039	Anterior subcapsular polar age-related cataract, unsp eye
H25041	Posterior subcapsular polar age-related cataract, right eye
H25042	Posterior subcapsular polar age-related cataract, left eye
H25043	Posterior subcapsular polar age-related cataract, bilateral
H25049	Posterior subcapsular polar age-related cataract, unsp eye
H25091	Other age-related incipient cataract, right eye
H25092	Other age-related incipient cataract, left eye
H25093	Other age-related incipient cataract, bilateral
H25099	Other age-related incipient cataract, unspecified eye
H2510	Age-related nuclear cataract, unspecified eye
H2511	Age-related nuclear cataract, right eye
H2512	Age-related nuclear cataract, left eye

H2513	Age-related nuclear cataract, bilateral
H2520	Age-related cataract, morgagnian type, unspecified eye
H2521	Age-related cataract, morgagnian type, right eye
H2522	Age-related cataract, morgagnian type, left eye
H2523	Age-related cataract, morgagnian type, bilateral

Z6838	Body mass index (BMI) 38.0-38.9, adult
Z6839	Body mass index (BMI) 39.0-39.9, adult
Z6841	Body mass index (BMI) 40.0-44.9, adult
Z6842	Body mass index (BMI) 45.0-49.9, adult
Z6843	Body mass index (BMI) 50-59.9, adult
Z6844	Body mass index (BMI) 60.0-69.9, adult
Z6845	Body mass index (BMI) 70 or greater, adult
Z72811	Adult antisocial behavior
Z780	Asymptomatic menopausal state
Z8651	Personal history of combat and operational stress reaction
Z91410	Personal history of adult physical and sexual abuse
Z91411	Personal history of adult psychological abuse
Z91412	Personal history of adult neglect
Z91419	Personal history of unspecified adult abuse
Z9182	Personal history of military deployment
Z9852	Vasectomy status

Newborn diagnoses (ICD-10 CM codes)

A33	Tetanus neonatorum
E8411	Meconium ileus in cystic fibrosis
H04531	Neonatal obstruction of right nasolacrimal duct
H04532	Neonatal obstruction of left nasolacrimal duct
H04533	Neonatal obstruction of bilateral nasolacrimal duct
H04539	Neonatal obstruction of unspecified nasolacrimal duct
N470	Adherent prepuce, newborn
Z00110	Health examination for newborn under 8 days old
Z00111	Health examination for newborn 8 to 28 days old
Z050	Obs & eval of NB for suspected cardiac condition ruled out
Z051	Obs & eval of NB for suspected infect condition ruled out
Z052	Obs & eval of NB for suspected neuro condition ruled out
Z053	Obs & eval of NB for suspected resp condition ruled out
Z0541	Obs & eval of NB for suspected genetic condition ruled out
Z0542	Obs & eval of NB for suspected metabolic condition ruled out
Z0543	Obs & eval of NB for suspected immunologic cond ruled out
Z055	Obs & eval of NB for suspected GI condition ruled out
Z056	Obs & eval of NB for suspected GU condition ruled out
Z0571	Obs & eval of NB for suspected skin, subcu cond ruled out
Z0572	Obs & eval of NB for suspected ms condition ruled out
Z0573	Obs & eval of NB for suspected conn tiss condition ruled out
Z058	Obs & eval of NB for oth suspected condition ruled out
Z059	Obs & eval of NB for unsp suspected condition ruled out
Z3800	Single liveborn infant, delivered vaginally
Z3801	Single liveborn infant, delivered by cesarean
Z381	Single liveborn infant, born outside hospital
Z382	Single liveborn infant, unspecified as to place of birth
Z3830	Twin liveborn infant, delivered vaginally
Z3831	Twin liveborn infant, delivered by cesarean
Z384	Twin liveborn infant, born outside hospital
Z385	Twin liveborn infant, unspecified as to place of birth
Z3861	Triplet liveborn infant, delivered vaginally
Z3862	Triplet liveborn infant, delivered by cesarean
Z3863	Quadruplet liveborn infant, delivered vaginally
Z3864	Quadruplet liveborn infant, delivered by cesarean
Z3865	Quintuplet liveborn infant, delivered vaginally
Z3866	Quintuplet liveborn infant, delivered by cesarean
Z3868	Other multiple liveborn infant, delivered vaginally
Z3869	Other multiple liveborn infant, delivered by cesarean
Z387	Other multiple liveborn infant, born outside hospital
Z388	Other multiple liveborn infant, unsp as to place of birth

Pediatric diagnoses (ICD-10 CM codes)

A4851	Infant botulism
B0820	Exanthema subitum [sixth disease], unspecified
B0821	Exanthema subitum [sixth disease] due to human herpesvirus 6
B0822	Exanthema subitum [sixth disease] due to human herpesvirus 7
C9330	Juvenile myelomonocytic leukemia, not achieve remission
C9331	Juvenile myelomonocytic leukemia, in remission
C9332	Juvenile myelomonocytic leukemia, in relapse
E301	Precocious puberty
E308	Other disorders of puberty
F642	Gender identity disorder of childhood
F843	Other childhood disintegrative disorder
G937	Reye's syndrome
H26001	Unspecified infantile and juvenile cataract, right eye
H26002	Unspecified infantile and juvenile cataract, left eye
H26003	Unspecified infantile and juvenile cataract, bilateral
H26009	Unspecified infantile and juvenile cataract, unspecified eye
H26011	Infantile and juv cortical/lamellar/zonular cataract, r eye
H26012	Infantile and juv cortical/lamellar/zonular cataract, l eye
H26013	Infantile and juv cortical/lamellar/zonular cataract, bi
H26019	Infantile & juv cortical/lamellar/zonular cataract, unsp eye
H26031	Infantile and juvenile nuclear cataract, right eye
H26032	Infantile and juvenile nuclear cataract, left eye
H26033	Infantile and juvenile nuclear cataract, bilateral
H26039	Infantile and juvenile nuclear cataract, unspecified eye
H26041	Ant subcapsular polar infantile and juvenile cataract, r eye
H26042	Ant subcapsular polar infantile and juv cataract, left eye
H26043	Ant subcapsular polar infantile and juvenile cataract, bi
H26049	Ant subcapsular polar infantile and juv cataract, unsp eye
H26051	Post subcapsular polar infantile and juv cataract, r eye
H26052	Post subcapsular polar infantile and juv cataract, left eye
H26053	Post subcapsular polar infantile and juvenile cataract, bi
H26059	Post subcapsular polar infantile and juv cataract, unsp eye
H26061	Combined forms of infantile and juvenile cataract, right eye
H26062	Combined forms of infantile and juvenile cataract, left eye
H26063	Combined forms of infantile and juvenile cataract, bilateral
H26069	Combined forms of infantile and juvenile cataract, unsp eye
H2609	Other infantile and juvenile cataract
L122	Chronic bullous disease of childhood
L2083	Infantile (acute) (chronic) eczema
L211	Seborrheic infantile dermatitis
L444	Infantile papular acrodermatitis [Gianotti-Crosti]
L704	Infantile acne
N922	Excessive menstruation at puberty
R0481	Acute idiopathic pulmonary hemorrhage in infants
R1083	Colic
R620	Delayed milestone in childhood
R6251	Failure to thrive (child)

R6811	Excessive crying of infant (baby)
R6812	Fussy infant (baby)
R6813	Apparent life threatening event in infant (ALTE)
R6819	Other nonspecific symptoms peculiar to infancy
T7402XA	Child neglect or abandonment, confirmed, initial encounter
T7402XD	Child neglect or abandonment, confirmed, subs encntr
T7402XS	Child neglect or abandonment, confirmed, sequela
T7412XA	Child physical abuse, confirmed, initial encounter
T7412XD	Child physical abuse, confirmed, subsequent encounter
T7412XS	Child physical abuse, confirmed, sequela
T7422XA	Child sexual abuse, confirmed, initial encounter
T7422XD	Child sexual abuse, confirmed, subsequent encounter
T7422XS	Child sexual abuse, confirmed, sequela
T7432XA	Child psychological abuse, confirmed, initial encounter
T7432XD	Child psychological abuse, confirmed, subsequent encounter
T7432XS	Child psychological abuse, confirmed, sequela
T744XXA	Shaken infant syndrome, initial encounter
T744XXD	Shaken infant syndrome, subsequent encounter
T744XXS	Shaken infant syndrome, sequela
T7452XA	Child sexual exploitation, confirmed, initial encounter
T7452XD	Child sexual exploitation, confirmed, subsequent encounter
T7452XS	Child sexual exploitation, confirmed, sequela
T7462XA	Child forced labor exploitation, confirmed, init
T7462XD	Child forced labor exploitation, confirmed, subs
T7462XS	Child forced labor exploitation, confirmed, sequela
T7492XA	Unspecified child maltreatment, confirmed, initial encounter
T7492XD	Unspecified child maltreatment, confirmed, subs encntr
T7492XS	Unspecified child maltreatment, confirmed, sequela
T7602XA	Child neglect or abandonment, suspected, initial encounter
T7602XD	Child neglect or abandonment, suspected, subs encntr
T7602XS	Child neglect or abandonment, suspected, sequela
T7612XA	Child physical abuse, suspected, initial encounter
T7612XD	Child physical abuse, suspected, subsequent encounter
T7612XS	Child physical abuse, suspected, sequela
T7622XA	Child sexual abuse, suspected, initial encounter
T7622XD	Child sexual abuse, suspected, subsequent encounter
T7622XS	Child sexual abuse, suspected, sequela
T7632XA	Child psychological abuse, suspected, initial encounter
T7632XD	Child psychological abuse, suspected, subsequent encounter
T7632XS	Child psychological abuse, suspected, sequela
T7652XA	Child sexual exploitation, suspected, initial encounter
T7652XD	Child sexual exploitation, suspected, subsequent encounter
T7652XS	Child sexual exploitation, suspected, sequela
T7662XA	Child forced labor exploitation, suspected, init
T7662XD	Child forced labor exploitation, suspected, subs
T7662XS	Child forced labor exploitation, suspected, sequela
T7692XA	Unspecified child maltreatment, suspected, initial encounter
T7692XD	Unspecified child maltreatment, suspected, subs encntr
T7692XS	Unspecified child maltreatment, suspected, sequela
Z00121	Encounter for routine child health exam w abnormal findings
Z00129	Encntr for routine child health exam w/o abnormal findings
Z002	Encounter for exam for period of rapid growth in childhood

Z003	Encounter for examination for adolescent development state
Z0070	Encntr for exam for delay growth in chldhd w/o abn findings
Z0071	Encntr for exam for delay growth in chldhd w abn findings
Z0442	Encounter for exam and obs following alleged child rape
Z0472	Encntr for exam and obs fol alleged child physical abuse
Z6221	Child in welfare custody
Z623	Hostility towards and scapegoating of child
Z69010	Encntr for mental hlth serv for victim of prntl child abuse
Z69020	Encntr for mntl hlth serv for vctm of non-prntl child abuse
Z72810	Child and adolescent antisocial behavior
Z73810	Behavioral insomnia of childhood, sleep-onset assoc type
Z73811	Behavioral insomnia of childhood, limit setting type
Z73812	Behavioral insomnia of childhood, combined type
Z73819	Behavioral insomnia of childhood, unspecified type
Z762	Encntr for hlth suprvsn and care of healthy infant and child

Maternity diagnoses (ICD-10 CM codes)

A34	Obstetrical tetanus
C58	Malignant neoplasm of placenta
D392	Neoplasm of uncertain behavior of placenta
F530	Postpartum depression
F531	Puerperal psychosis
M830	Puerperal osteomalacia
O0000	Abdominal pregnancy without intrauterine pregnancy
O0001	Abdominal pregnancy with intrauterine pregnancy
O00101	Right tubal pregnancy without intrauterine pregnancy
O00102	Left tubal pregnancy without intrauterine pregnancy
O00109	Unspecified tubal pregnancy without intrauterine pregnancy
O00111	Right tubal pregnancy with intrauterine pregnancy
O00112	Left tubal pregnancy with intrauterine pregnancy
O00119	Unspecified tubal pregnancy with intrauterine pregnancy
O00201	Right ovarian pregnancy without intrauterine pregnancy
O00202	Left ovarian pregnancy without intrauterine pregnancy
O00209	Unspecified ovarian pregnancy without intrauterine pregnancy
O00211	Right ovarian pregnancy with intrauterine pregnancy
O00212	Left ovarian pregnancy with intrauterine pregnancy
O00219	Unspecified ovarian pregnancy with intrauterine pregnancy
O0080	Other ectopic pregnancy without intrauterine pregnancy
O0081	Other ectopic pregnancy with intrauterine pregnancy
O0090	Unspecified ectopic pregnancy without intrauterine pregnancy
O0091	Unspecified ectopic pregnancy with intrauterine pregnancy
O010	Classical hydatidiform mole
O011	Incomplete and partial hydatidiform mole
O019	Hydatidiform mole, unspecified
O020	Blighted ovum and nonhydatidiform mole
O021	Missed abortion
O0281	Inapprop chg quantitav hCG in early pregnancy
O0289	Other abnormal products of conception
O029	Abnormal product of conception, unspecified
O030	Genitl trct and pelvic infection fol incmpl spon abortion
O031	Delayed or excessive hemor following incmpl spon abortion
O032	Embolism following incomplete spontaneous abortion
O0330	Unsp complication following incomplete spontaneous abortion
O0331	Shock following incomplete spontaneous abortion
O0332	Renal failure following incomplete spontaneous abortion
O0333	Metabolic disorder following incomplete spontaneous abortion
O0334	Damage to pelvic organs following incomplete spon abortion
O0335	Oth venous comp following incomplete spontaneous abortion
O0336	Cardiac arrest following incomplete spontaneous abortion
O0337	Sepsis following incomplete spontaneous abortion
O0338	Urinary tract infection following incomplete spon abortion
O0339	Incomplete spontaneous abortion with other complications
O034	Incomplete spontaneous abortion without complication
O035	Genitl trct and pelvic infct fol complete or unsp spon abort

O036	Delayed or excess hemor fol complete or unsp spon abortion
O037	Embolism following complete or unsp spontaneous abortion
O0380	Unsp comp following complete or unsp spontaneous abortion
O0381	Shock following complete or unspecified spontaneous abortion
O0382	Renal failure following complete or unsp spon abortion
O0383	Metabolic disorder following complete or unsp spon abortion
O0384	Damage to pelvic organs fol complete or unsp spon abortion
O0385	Oth venous comp following complete or unsp spon abortion
O0386	Cardiac arrest following complete or unsp spon abortion
O0387	Sepsis following complete or unsp spontaneous abortion
O0388	Urinary tract infection fol complete or unsp spon abortion
O0389	Complete or unsp spontaneous abortion with oth complications
O039	Complete or unsp spontaneous abortion without complication
O045	Genitl trct and pelvic infct fol (induced) term of pregnancy
O046	Delayed or excess hemor fol (induced) term of pregnancy
O047	Embolism following (induced) termination of pregnancy
O0480	(Induced) termination of pregnancy with unsp complications
O0481	Shock following (induced) termination of pregnancy
O0482	Renal failure following (induced) termination of pregnancy
O0483	Metabolic disorder following (induced) term of pregnancy
O0484	Damage to pelvic organs fol (induced) term of pregnancy
O0485	Oth venous comp following (induced) termination of pregnancy
O0486	Cardiac arrest following (induced) termination of pregnancy
O0487	Sepsis following (induced) termination of pregnancy
O0488	Urinary tract infection fol (induced) term of pregnancy
O0489	(Induced) termination of pregnancy with other complications
O070	Genitl trct and pelvic infct fol failed attempt term of preg
O071	Delayed or excess hemor fol failed attempt term of pregnancy
O072	Embolism following failed attempted termination of pregnancy
O0730	Failed attempted termination of pregnancy w unsp comp
O0731	Shock following failed attempted termination of pregnancy
O0732	Renal failure following failed attempted term of pregnancy
O0733	Metabolic disorder fol failed attempt term of pregnancy
O0734	Damage to pelvic organs fol failed attempt term of pregnancy
O0735	Oth venous comp following failed attempted term of pregnancy
O0736	Cardiac arrest following failed attempted term of pregnancy
O0737	Sepsis following failed attempted termination of pregnancy
O0738	Urinary tract infection fol failed attempt term of pregnancy
O0739	Failed attempted termination of pregnancy w oth comp
O074	Failed attempted termination of pregnancy w/o complication
O080	Genitl trct and pelvic infct fol ectopic and molar pregnancy
O081	Delayed or excess hemor fol ectopic and molar pregnancy
O082	Embolism following ectopic and molar pregnancy
O083	Shock following ectopic and molar pregnancy
O084	Renal failure following ectopic and molar pregnancy
O085	Metabolic disorders following an ectopic and molar pregnancy
O086	Damage to pelvic organs and tiss fol an ect and molar preg
O087	Oth venous comp following an ectopic and molar pregnancy
O0881	Cardiac arrest following an ectopic and molar pregnancy
O0882	Sepsis following ectopic and molar pregnancy
O0883	Urinary tract infection fol an ectopic and molar pregnancy
O0889	Other complications following an ectopic and molar pregnancy

O089	Unsp complication following an ectopic and molar pregnancy
O0900	Suprvsn of preg w history of infertility, unsp trimester
O0901	Suprvsn of preg w history of infertility, first trimester
O0902	Suprvsn of preg w history of infertility, second trimester

Z3A42	42 weeks gestation of pregnancy
Z3A49	Greater than 42 weeks gestation of pregnancy

Diagnoses for females only (ICD-10 CM codes)

A1816	Tuberculosis of cervix
A1817	Tuberculous female pelvic inflammatory disease
A1818	Tuberculosis of other female genital organs
A34	Obstetrical tetanus
A5142	Secondary syphilitic female pelvic disease
A5402	Gonococcal vulvovaginitis, unspecified
A5403	Gonococcal cervicitis, unspecified
A5424	Gonococcal female pelvic inflammatory disease
A5602	Chlamydial vulvovaginitis
A5611	Chlamydial female pelvic inflammatory disease
A5901	Trichomonal vulvovaginitis
A6003	Herpesviral cervicitis
A6004	Herpesviral vulvovaginitis
B373	Candidiasis of vulva and vagina
C50011	Malignant neoplasm of nipple and areola, right female breast
C50012	Malignant neoplasm of nipple and areola, left female breast
C50019	Malignant neoplasm of nipple and areola, unsp female breast
C50111	Malignant neoplasm of central portion of right female breast
C50112	Malignant neoplasm of central portion of left female breast
C50119	Malignant neoplasm of central portion of unsp female breast
C50211	Malig neoplasm of upper-inner quadrant of right female breast
C50212	Malig neoplasm of upper-inner quadrant of left female breast
C50219	Malig neoplasm of upper-inner quadrant of unsp female breast
C50311	Malig neoplasm of lower-inner quadrant of right female breast
C50312	Malig neoplasm of lower-inner quadrant of left female breast
C50319	Malig neoplasm of lower-inner quadrant of unsp female breast
C50411	Malig neoplasm of upper-outer quadrant of right female breast
C50412	Malig neoplasm of upper-outer quadrant of left female breast
C50419	Malig neoplasm of upper-outer quadrant of unsp female breast
C50511	Malig neoplasm of lower-outer quadrant of right female breast
C50512	Malig neoplasm of lower-outer quadrant of left female breast
C50519	Malig neoplasm of lower-outer quadrant of unsp female breast
C50611	Malignant neoplasm of axillary tail of right female breast
C50612	Malignant neoplasm of axillary tail of left female breast
C50619	Malignant neoplasm of axillary tail of unsp female breast
C50811	Malignant neoplasm of ovrlp sites of right female breast
C50812	Malignant neoplasm of ovrlp sites of left female breast
C50819	Malignant neoplasm of ovrlp sites of unsp female breast
C50911	Malignant neoplasm of unsp site of right female breast
C50912	Malignant neoplasm of unspecified site of left female breast
C50919	Malignant neoplasm of unsp site of unspecified female breast
C510	Malignant neoplasm of labium majus
C511	Malignant neoplasm of labium minus
C512	Malignant neoplasm of clitoris
C518	Malignant neoplasm of overlapping sites of vulva
C519	Malignant neoplasm of vulva, unspecified
C52	Malignant neoplasm of vagina

C530	Malignant neoplasm of endocervix
C531	Malignant neoplasm of exocervix
C538	Malignant neoplasm of overlapping sites of cervix uteri
C539	Malignant neoplasm of cervix uteri, unspecified
C540	Malignant neoplasm of isthmus uteri
C541	Malignant neoplasm of endometrium
C542	Malignant neoplasm of myometrium
C543	Malignant neoplasm of fundus uteri
C548	Malignant neoplasm of overlapping sites of corpus uteri
C549	Malignant neoplasm of corpus uteri, unspecified
C55	Malignant neoplasm of uterus, part unspecified
C561	Malignant neoplasm of right ovary
C562	Malignant neoplasm of left ovary
C569	Malignant neoplasm of unspecified ovary
C5700	Malignant neoplasm of unspecified fallopian tube
C5701	Malignant neoplasm of right fallopian tube
C5702	Malignant neoplasm of left fallopian tube
C5710	Malignant neoplasm of unspecified broad ligament
C5711	Malignant neoplasm of right broad ligament
C5712	Malignant neoplasm of left broad ligament
C5720	Malignant neoplasm of unspecified round ligament
C5721	Malignant neoplasm of right round ligament
C5722	Malignant neoplasm of left round ligament
C573	Malignant neoplasm of parametrium
C574	Malignant neoplasm of uterine adnexa, unspecified
C577	Malignant neoplasm of other specified female genital organs
C578	Malignant neoplasm of ovrlp sites of female genital organs
C579	Malignant neoplasm of female genital organ, unspecified
C58	Malignant neoplasm of placenta
C7960	Secondary malignant neoplasm of unspecified ovary
C7961	Secondary malignant neoplasm of right ovary
C7962	Secondary malignant neoplasm of left ovary
D060	Carcinoma in situ of endocervix
D061	Carcinoma in situ of exocervix
D067	Carcinoma in situ of other parts of cervix
D069	Carcinoma in situ of cervix, unspecified
D070	Carcinoma in situ of endometrium
D071	Carcinoma in situ of vulva
D072	Carcinoma in situ of vagina
D0730	Carcinoma in situ of unspecified female genital organs
D0739	Carcinoma in situ of other female genital organs
D250	Submucous leiomyoma of uterus
D251	Intramural leiomyoma of uterus
D252	Subserosal leiomyoma of uterus
D259	Leiomyoma of uterus, unspecified
D260	Other benign neoplasm of cervix uteri
D261	Other benign neoplasm of corpus uteri
D267	Other benign neoplasm of other parts of uterus
D269	Other benign neoplasm of uterus, unspecified
D270	Benign neoplasm of right ovary
D271	Benign neoplasm of left ovary
D279	Benign neoplasm of unspecified ovary

D280	Benign neoplasm of vulva
D281	Benign neoplasm of vagina
D282	Benign neoplasm of uterine tubes and ligaments
D287	Benign neoplasm of other specified female genital organs
D289	Benign neoplasm of female genital organ, unspecified
D390	Neoplasm of uncertain behavior of uterus
D3910	Neoplasm of uncertain behavior of unspecified ovary
D3911	Neoplasm of uncertain behavior of right ovary
D3912	Neoplasm of uncertain behavior of left ovary
D392	Neoplasm of uncertain behavior of placenta
D398	Neoplasm of uncertain behavior of oth female genital organs
D399	Neoplasm of uncertain behavior of female genital organ, unsp
E280	Estrogen excess
E281	Androgen excess
E282	Polycystic ovarian syndrome
E28310	Symptomatic premature menopause
E28319	Asymptomatic premature menopause
E2839	Other primary ovarian failure
E288	Other ovarian dysfunction
E289	Ovarian dysfunction, unspecified
E8940	Asymptomatic postprocedural ovarian failure
E8941	Symptomatic postprocedural ovarian failure
F3281	Premenstrual dysphoric disorder
F5222	Female sexual arousal disorder
F5231	Female orgasmic disorder
F525	Vaginismus not due to a substance or known physiol condition
F530	Postpartum depression
F531	Puerperal psychosis
G43821	Menstrual migraine, not intractable, with status migrainosus
G43829	Menstrual migraine, not intractable, w/o status migrainosus
G43831	Menstrual migraine, intractable, with status migrainosus
G43839	Menstrual migraine, intractable, without status migrainosus
I863	Vulval varices
L292	Pruritus vulvae
M830	Puerperal osteomalacia
N35021	Urethral stricture due to childbirth
N35028	Other post-traumatic urethral stricture, female
N3512	Postinfective urethral stricture, NEC, female
N3582	Other urethral stricture, female
N3592	Unspecified urethral stricture, female
N7001	Acute salpingitis
N7002	Acute oophoritis
N7003	Acute salpingitis and oophoritis
N7011	Chronic salpingitis
N7012	Chronic oophoritis
N7013	Chronic salpingitis and oophoritis
N7091	Salpingitis, unspecified
N7092	Oophoritis, unspecified
N7093	Salpingitis and oophoritis, unspecified
N710	Acute inflammatory disease of uterus
N711	Chronic inflammatory disease of uterus
N719	Inflammatory disease of uterus, unspecified

N72	Inflammatory disease of cervix uteri
N730	Acute parametritis and pelvic cellulitis
N731	Chronic parametritis and pelvic cellulitis
N732	Unspecified parametritis and pelvic cellulitis
N733	Female acute pelvic peritonitis
N734	Female chronic pelvic peritonitis
N735	Female pelvic peritonitis, unspecified
N736	Female pelvic peritoneal adhesions (postinfective)
N738	Other specified female pelvic inflammatory diseases
N739	Female pelvic inflammatory disease, unspecified
N74	Female pelvic inflam disorders in diseases classd elswhr
N750	Cyst of Bartholin's gland
N751	Abscess of Bartholin's gland
N758	Other diseases of Bartholin's gland
N759	Disease of Bartholin's gland, unspecified
N760	Acute vaginitis
N761	Subacute and chronic vaginitis
N762	Acute vulvitis
N763	Subacute and chronic vulvitis
N764	Abscess of vulva
N765	Ulceration of vagina
N766	Ulceration of vulva
N7681	Mucositis (ulcerative) of vagina and vulva
N7689	Other specified inflammation of vagina and vulva
N770	Ulceration of vulva in diseases classified elsewhere
N771	Vaginitis, vulvitis and vulvovaginitis in dis classd elswhr
N800	Endometriosis of uterus
N801	Endometriosis of ovary
N802	Endometriosis of fallopian tube
N803	Endometriosis of pelvic peritoneum
N804	Endometriosis of rectovaginal septum and vagina
N805	Endometriosis of intestine
N806	Endometriosis in cutaneous scar
N808	Other endometriosis
N809	Endometriosis, unspecified
N810	Urethrocele
N8110	Cystocele, unspecified
N8111	Cystocele, midline
N8112	Cystocele, lateral
N812	Incomplete uterovaginal prolapse
N813	Complete uterovaginal prolapse
N814	Uterovaginal prolapse, unspecified
N815	Vaginal enterocele
N816	Rectocele
N8181	Perineocele
N8182	Incompetence or weakening of pubocervical tissue
N8183	Incompetence or weakening of rectovaginal tissue
N8184	Pelvic muscle wasting
N8185	Cervical stump prolapse
N8189	Other female genital prolapse
N819	Female genital prolapse, unspecified
N820	Vesicovaginal fistula

N821	Other female urinary-genital tract fistulae
N822	Fistula of vagina to small intestine
N823	Fistula of vagina to large intestine
N824	Other female intestinal-genital tract fistulae
N825	Female genital tract-skin fistulae
N828	Other female genital tract fistulae
N829	Female genital tract fistula, unspecified
N8300	Follicular cyst of ovary, unspecified side
N8301	Follicular cyst of right ovary
N8302	Follicular cyst of left ovary
N8310	Corpus luteum cyst of ovary, unspecified side
N8311	Corpus luteum cyst of right ovary
N8312	Corpus luteum cyst of left ovary
N83201	Unspecified ovarian cyst, right side
N83202	Unspecified ovarian cyst, left side
N83209	Unspecified ovarian cyst, unspecified side
N83291	Other ovarian cyst, right side
N83292	Other ovarian cyst, left side
N83299	Other ovarian cyst, unspecified side
N83311	Acquired atrophy of right ovary
N83312	Acquired atrophy of left ovary
N83319	Acquired atrophy of ovary, unspecified side
N83321	Acquired atrophy of right fallopian tube
N83322	Acquired atrophy of left fallopian tube
N83329	Acquired atrophy of fallopian tube, unspecified side
N83331	Acquired atrophy of right ovary and fallopian tube
N83332	Acquired atrophy of left ovary and fallopian tube
N83339	Acquired atrophy of ovary and fallop, unspecified side
N8340	Prolapse and hernia of ovary and fallop, unspecified side
N8341	Prolapse and hernia of right ovary and fallopian tube
N8342	Prolapse and hernia of left ovary and fallopian tube
N83511	Torsion of right ovary and ovarian pedicle
N83512	Torsion of left ovary and ovarian pedicle
N83519	Torsion of ovary and ovarian pedicle, unspecified side
N83521	Torsion of right fallopian tube
N83522	Torsion of left fallopian tube
N83529	Torsion of fallopian tube, unspecified side
N8353	Torsion of ovary, ovarian pedicle and fallopian tube
N836	Hematosalpinx
N837	Hematoma of broad ligament
N838	Oth noninflammatory disord of ovary, fallop and broad ligmt
N839	Noninflammatory disord of ovary, fallop & broad ligmt, unsp
N840	Polyp of corpus uteri
N841	Polyp of cervix uteri
N842	Polyp of vagina
N843	Polyp of vulva
N848	Polyp of other parts of female genital tract
N849	Polyp of female genital tract, unspecified
N8500	Endometrial hyperplasia, unspecified
N8501	Benign endometrial hyperplasia
N8502	Endometrial intraepithelial neoplasia [EIN]
N852	Hypertrophy of uterus

N853	Subinvolution of uterus
N854	Malposition of uterus
N855	Inversion of uterus
N856	Intrauterine synechiae
N857	Hematometra
N858	Other specified noninflammatory disorders of uterus
N859	Noninflammatory disorder of uterus, unspecified
N86	Erosion and ectropion of cervix uteri
N870	Mild cervical dysplasia
N871	Moderate cervical dysplasia
N879	Dysplasia of cervix uteri, unspecified
N880	Leukoplakia of cervix uteri
N881	Old laceration of cervix uteri
N882	Stricture and stenosis of cervix uteri
N883	Incompetence of cervix uteri
N884	Hypertrophic elongation of cervix uteri
N888	Other specified noninflammatory disorders of cervix uteri
N889	Noninflammatory disorder of cervix uteri, unspecified
N890	Mild vaginal dysplasia
N891	Moderate vaginal dysplasia
N893	Dysplasia of vagina, unspecified
N894	Leukoplakia of vagina
N895	Stricture and atresia of vagina
N896	Tight hymenal ring
N897	Hematocolpos
N898	Other specified noninflammatory disorders of vagina
N899	Noninflammatory disorder of vagina, unspecified
N900	Mild vulvar dysplasia
N901	Moderate vulvar dysplasia
N903	Dysplasia of vulva, unspecified
N904	Leukoplakia of vulva
N905	Atrophy of vulva
N9060	Unspecified hypertrophy of vulva
N9061	Childhood asymmetric labium majus enlargement
N9069	Other specified hypertrophy of vulva
N907	Vulvar cyst
N90810	Female genital mutilation status, unspecified
N90811	Female genital mutilation Type I status
N90812	Female genital mutilation Type II status
N90813	Female genital mutilation Type III status
N90818	Other female genital mutilation status
N9089	Other noninflammatory disorders of vulva and perineum
N909	Noninflammatory disorder of vulva and perineum, unspecified
N910	Primary amenorrhea
N911	Secondary amenorrhea
N912	Amenorrhea, unspecified
N913	Primary oligomenorrhea
N914	Secondary oligomenorrhea
N915	Oligomenorrhea, unspecified
N920	Excessive and frequent menstruation with regular cycle
N921	Excessive and frequent menstruation with irregular cycle
N922	Excessive menstruation at puberty

N923	Ovulation bleeding
N924	Excessive bleeding in the premenopausal period
N925	Other specified irregular menstruation
N926	Irregular menstruation, unspecified
N930	Postcoital and contact bleeding
N931	Pre-pubertal vaginal bleeding
N938	Other specified abnormal uterine and vaginal bleeding
N939	Abnormal uterine and vaginal bleeding, unspecified
N940	Mittelschmerz
N9410	Unspecified dyspareunia
N9411	Superficial (introital) dyspareunia
N9412	Deep dyspareunia
N9419	Other specified dyspareunia
N942	Vaginismus
N943	Premenstrual tension syndrome
N944	Primary dysmenorrhea
N945	Secondary dysmenorrhea
N946	Dysmenorrhea, unspecified
N94810	Vulvar vestibulitis
N94818	Other vulvodynia
N94819	Vulvodynia, unspecified
N9489	Oth cond assoc w female genital organs and menstrual cycle
N949	Unsp cond assoc w female genital organs and menstrual cycle
N950	Postmenopausal bleeding
N951	Menopausal and female climacteric states
N952	Postmenopausal atrophic vaginitis
N958	Other specified menopausal and perimenopausal disorders
N959	Unspecified menopausal and perimenopausal disorder
N96	Recurrent pregnancy loss
N970	Female infertility associated with anovulation
N971	Female infertility of tubal origin
N972	Female infertility of uterine origin
N978	Female infertility of other origin
N979	Female infertility, unspecified
N980	Infection associated with artificial insemination
N981	Hyperstimulation of ovaries
N982	Comp of attempt introduce of fertilized ovum fol in vitro
N983	Comp of attempted introduction of embryo in embryo transfer
N988	Other complications associated with artificial fertilization
N989	Complication associated with artificial fertilization, unsp
N9912	Postprocedural urethral stricture, female
N992	Postprocedural adhesions of vagina
N993	Prolapse of vaginal vault after hysterectomy
N9983	Residual ovary syndrome
O0000	Abdominal pregnancy without intrauterine pregnancy
O0001	Abdominal pregnancy with intrauterine pregnancy
O00101	Right tubal pregnancy without intrauterine pregnancy
O00102	Left tubal pregnancy without intrauterine pregnancy
O00109	Unspecified tubal pregnancy without intrauterine pregnancy
O00111	Right tubal pregnancy with intrauterine pregnancy
O00112	Left tubal pregnancy with intrauterine pregnancy
O00119	Unspecified tubal pregnancy with intrauterine pregnancy

O00201	Right ovarian pregnancy without intrauterine pregnancy
O00202	Left ovarian pregnancy without intrauterine pregnancy
O00209	Unspecified ovarian pregnancy without intrauterine pregnancy
O00211	Right ovarian pregnancy with intrauterine pregnancy

Mental health diagnoses (ICD-10 CM codes)

F0150	Vascular dementia without behavioral disturbance
F0151	Vascular dementia with behavioral disturbance
F0280	Dementia in oth diseases classd elswhr w/o behavrl disturb
F0281	Dementia in oth diseases classd elswhr w behavioral disturb
F0390	Unspecified dementia without behavioral disturbance
F0391	Unspecified dementia with behavioral disturbance
F04	Amnesic disorder due to known physiological condition
F060	Psychotic disorder w hallucin due to known physiol condition
F061	Catatonic disorder due to known physiological condition
F062	Psychotic disorder w delusions due to known physiol cond
F0630	Mood disorder due to known physiological condition, unsp
F0631	Mood disorder due to known physiol cond w depressv features
F0632	Mood disord d/t physiol cond w major depressive-like epsd
F0633	Mood disorder due to known physiol cond w manic features
F0634	Mood disorder due to known physiol cond w mixed features
F064	Anxiety disorder due to known physiological condition
F068	Oth mental disorders due to known physiological condition
F070	Personality change due to known physiological condition
F0781	Postconcussional syndrome
F0789	Oth personality & behavrl disord due to known physiol cond
F079	Unsp personality & behavrl disord due to known physiol cond
F09	Unsp mental disorder due to known physiological condition
F1010	Alcohol abuse, uncomplicated
F1011	Alcohol abuse, in remission
F10120	Alcohol abuse with intoxication, uncomplicated
F10121	Alcohol abuse with intoxication delirium
F10129	Alcohol abuse with intoxication, unspecified
F1014	Alcohol abuse with alcohol-induced mood disorder
F10150	Alcohol abuse w alcoh-induce psychotic disorder w delusions
F10151	Alcohol abuse w alcoh-induce psychotic disorder w hallucin
F10159	Alcohol abuse with alcohol-induced psychotic disorder, unsp
F10180	Alcohol abuse with alcohol-induced anxiety disorder
F10181	Alcohol abuse with alcohol-induced sexual dysfunction
F10182	Alcohol abuse with alcohol-induced sleep disorder
F10188	Alcohol abuse with other alcohol-induced disorder
F1019	Alcohol abuse with unspecified alcohol-induced disorder
F1020	Alcohol dependence, uncomplicated
F1021	Alcohol dependence, in remission
F10220	Alcohol dependence with intoxication, uncomplicated
F10221	Alcohol dependence with intoxication delirium
F10229	Alcohol dependence with intoxication, unspecified
F10230	Alcohol dependence with withdrawal, uncomplicated
F10231	Alcohol dependence with withdrawal delirium
F10232	Alcohol dependence w withdrawal with perceptual disturbance
F10239	Alcohol dependence with withdrawal, unspecified
F1024	Alcohol dependence with alcohol-induced mood disorder
F10250	Alcohol depend w alcoh-induce psychotic disorder w delusions

F10251	Alcohol depend w alcoh-induce psychotic disorder w hallucin
F10259	Alcohol dependence w alcoh-induce psychotic disorder, unsp
F1026	Alcohol depend w alcoh-induce persisting amnestic disorder
F1027	Alcohol dependence with alcohol-induced persisting dementia
F10280	Alcohol dependence with alcohol-induced anxiety disorder
F10281	Alcohol dependence with alcohol-induced sexual dysfunction
F10282	Alcohol dependence with alcohol-induced sleep disorder
F10288	Alcohol dependence with other alcohol-induced disorder
F1029	Alcohol dependence with unspecified alcohol-induced disorder
F10920	Alcohol use, unspecified with intoxication, uncomplicated
F10921	Alcohol use, unspecified with intoxication delirium
F10929	Alcohol use, unspecified with intoxication, unspecified
F1094	Alcohol use, unspecified with alcohol-induced mood disorder
F10950	Alcohol use, unsp w alcoh-induce psych disorder w delusions
F10951	Alcohol use, unsp w alcoh-induce psych disorder w hallucin
F10959	Alcohol use, unsp w alcohol-induced psychotic disorder, unsp
F1096	Alcohol use, unsp w alcoh-induce persist amnestic disorder
F1097	Alcohol use, unsp with alcohol-induced persisting dementia
F10980	Alcohol use, unsp with alcohol-induced anxiety disorder
F10981	Alcohol use, unsp with alcohol-induced sexual dysfunction
F10982	Alcohol use, unspecified with alcohol-induced sleep disorder
F10988	Alcohol use, unspecified with other alcohol-induced disorder
F1099	Alcohol use, unsp with unspecified alcohol-induced disorder
F1110	Opioid abuse, uncomplicated
F1111	Opioid abuse, in remission
F11120	Opioid abuse with intoxication, uncomplicated
F11121	Opioid abuse with intoxication delirium
F11122	Opioid abuse with intoxication with perceptual disturbance
F11129	Opioid abuse with intoxication, unspecified
F1114	Opioid abuse with opioid-induced mood disorder
F11150	Opioid abuse w opioid-induced psychotic disorder w delusions
F11151	Opioid abuse w opioid-induced psychotic disorder w hallucin
F11159	Opioid abuse with opioid-induced psychotic disorder, unsp
F11181	Opioid abuse with opioid-induced sexual dysfunction
F11182	Opioid abuse with opioid-induced sleep disorder

Appendix B: Procedure edit code lists

This appendix lists the procedure codes for the following categories associated with edits in the program.

Procedure code categories

- Procedure age restrictions
- Procedures for females only
- Procedures for males only
- Non-covered service
- Questionable covered service
- Inpatient procedures
- Inpatient separate procedure
- Code not recognized by TRICARE
- Code not recognized by OPPOS
- TRICARE reimbursement not allowed
- Mental Health services not approved for Partial Hospitalization Program
- Mental Health services not payable outside Partial Hospitalization Program
- Skin substitute procedures and products - low cost
- Skin substitute procedures and products - high cost
- Device procedures
- Devices

Procedures for females only

0071T	Us leiomyomata ablate <200	53661	Dilation of urethra
0072T	Us leiomyomata ablate >200	53665	Dilation of urethra
00842	Anesth amniocentesis	53860	Transurethral rf treatment
00846	Anesth hysterectomy	55980	Sex transformation f to m
00851	Anesth tubal ligation	56405	I & d of vulva/perineum
00906	Anesth removal of vulva	56420	Drainage of gland abscess
00940	Anesth vaginal procedures	56440	Surgery for vulva lesion
00942	Anesth surg on vag/urethral	56441	Lysis of labial lesion(s)
00944	Anesth vaginal hysterectomy	56442	Hymenotomy
00948	Anesth repair of cervix	56501	Destroy vulva lesions sim
00950	Anesth vaginal endoscopy	56515	Destroy vulva lesion/s compl
00952	Anesth hysteroscope/graph	56605	Biopsy of vulva/perineum
01960	Anesth vaginal delivery	56606	Biopsy of vulva/perineum
01961	Anesth cs delivery	56620	Partial removal of vulva
01962	Anesth emer hysterectomy	56625	Complete removal of vulva
01963	Anesth cs hysterectomy	56630	Extensive vulva surgery
01965	Anesth inc/missed ab proc	56631	Extensive vulva surgery
01966	Anesth induced ab procedure	56632	Extensive vulva surgery
01967	Anesth/analg vag delivery	56633	Extensive vulva surgery
01968	Anes/analg cs deliver add-on	56634	Extensive vulva surgery
01969	Anesth/analg cs hyst add-on	56637	Extensive vulva surgery
0357T	Cryopreservation oocyte(s)	56640	Extensive vulva surgery
0404T	Trnscrvt uterin fibroid abltj	56700	Partial removal of hymen
0500F	Initial prenatal care visit	56740	Remove vagina gland lesion
0501F	Prenatal flow sheet	56800	Repair of vagina
0502F	Subsequent prenatal care	56805	Repair clitoris
0503F	Postpartum care visit	56810	Repair of perineum
11976	Remove contraceptive capsule	56820	Exam of vulva w/scope
3015F	Cerv cancer screen docd	56821	Exam/biopsy of vulva w/scope
36460	Transfusion service fetal	57000	Exploration of vagina
46744	Repair of cloacal anomaly	57010	Drainage of pelvic abscess
46746	Repair of cloacal anomaly	57020	Drainage of pelvic fluid
46748	Repair of cloacal anomaly	57022	I & d vaginal hematoma pp
50722	Release of ureter	57023	I & d vag hematoma non-ob
51845	Repair bladder neck	57061	Destroy vag lesions simple
51900	Repair bladder/vagina lesion	57065	Destroy vag lesions complex
51920	Close bladder-uterus fistula	57100	Biopsy of vagina
51925	Hysterectomy/bladder repair	57105	Biopsy of vagina
52270	Cystoscopy & revise urethra	57106	Remove vagina wall partial
52285	Cystoscopy and treatment	57107	Remove vagina tissue part
53210	Removal of urethra	57109	Vaginectomy partial w/nodes
53230	Removal of urethra lesion	57110	Remove vagina wall complete
53430	Reconstruction of urethra	57111	Remove vagina tissue compl
53502	Repair of urethra injury	57112	Vaginectomy w/nodes compl
53660	Dilation of urethra	57120	Closure of vagina

57130	Remove vagina lesion	57505	Endocervical curettage
57135	Remove vagina lesion	57510	Cauterization of cervix
57150	Treat vagina infection	57511	Cryocautery of cervix
57155	Insert uteri tandem/ovoids	57513	Laser surgery of cervix
57156	Ins vag brachytx device	57520	Conization of cervix
57160	Insert pessary/other device	57522	Conization of cervix
57170	Fitting of diaphragm/cap	57530	Removal of cervix
57180	Treat vaginal bleeding	57531	Removal of cervix radical
57200	Repair of vagina	57540	Removal of residual cervix
57210	Repair vagina/perineum	57545	Remove cervix/repair pelvis
57220	Revision of urethra	57550	Removal of residual cervix
57230	Repair of urethral lesion	57555	Remove cervix/repair vagina
57240	Anterior colporrhaphy	57556	Remove cervix repair bowel
57250	Repair rectum & vagina	57558	D&c of cervical stump
57260	Cmbn ant pst colprhy	57700	Revision of cervix
57265	Cmbn ap colprhy w/ntrcl rpr	57720	Revision of cervix
57267	Insert mesh/pelvic flr addon	57800	Dilation of cervical canal
57268	Repair of bowel bulge	58100	Biopsy of uterus lining
57270	Repair of bowel pouch	58110	Bx done w/colposcopy add-on
57280	Suspension of vagina	58120	Dilation and curettage
57282	Colpopexy extraperitoneal	58140	Myomectomy abdom method
57283	Colpopexy intraperitoneal	58145	Myomectomy vag method
57284	Repair paravag defect open	58146	Myomectomy abdom complex
57285	Repair paravag defect vag	58150	Total hysterectomy
57287	Revise/remove sling repair	58152	Total hysterectomy
57288	Repair bladder defect	58180	Partial hysterectomy
57289	Repair bladder & vagina	58200	Extensive hysterectomy
57291	Construction of vagina	58210	Extensive hysterectomy
57292	Construct vagina with graft	58240	Removal of pelvis contents
57295	Revise vag graft via vagina	58260	Vaginal hysterectomy
57296	Revise vag graft open abd	58262	Vag hyst including t/o
57300	Repair rectum-vagina fistula	58263	Vag hyst w/t/o & vag repair
57305	Repair rectum-vagina fistula	58267	Vag hyst w/urinary repair
57307	Fistula repair & colostomy	58270	Vag hyst w/enterocele repair
57308	Fistula repair transperine	58275	Hysterectomy/revise vagina
57310	Repair urethrovaginal lesion	58280	Hysterectomy/revise vagina
57311	Repair urethrovaginal lesion	58285	Extensive hysterectomy
57320	Repair bladder-vagina lesion	58290	Vag hyst complex
57330	Repair bladder-vagina lesion	58291	Vag hyst incl t/o complex
57335	Repair vagina	58292	Vag hyst t/o & repair compl
57400	Dilation of vagina	58293	Vag hyst w/uro repair compl
57410	Pelvic examination	58294	Vag hyst w/enterocele compl
57415	Remove vaginal foreign body	58300	Insert intrauterine device
57420	Exam of vagina w/scope	58301	Remove intrauterine device
57421	Exam/biopsy of vag w/scope	58321	Artificial insemination
57423	Repair paravag defect lap	58322	Artificial insemination
57425	Laparoscopy surg colpopexy	58323	Sperm washing
57426	Revise prosth vag graft lap	58340	Catheter for hystero-graphy
57452	Exam of cervix w/scope	58345	Reopen fallopian tube
57454	Bx/curett of cervix w/scope	58346	Insert heyman uteri capsule
57455	Biopsy of cervix w/scope	58350	Reopen fallopian tube
57456	Endocerv curettage w/scope	58353	Endometr ablate thermal
57460	Bx of cervix w/scope leep	58356	Endometrial cryoablation
57461	Conz of cervix w/scope leep	58400	Suspension of uterus
57500	Biopsy of cervix	58410	Suspension of uterus

58520	Repair of ruptured uterus	58822	Drain ovary abscess percut
58540	Revision of uterus	58825	Transposition ovary(s)
58541	Lsh uterus 250 g or less	58900	Biopsy of ovary(s)
58542	Lsh w/t/o ut 250 g or less	58920	Partial removal of ovary(s)
58543	Lsh uterus above 250 g	58925	Removal of ovarian cyst(s)
58544	Lsh w/t/o uterus above 250 g	58940	Removal of ovary(s)
58545	Laparoscopic myomectomy	58943	Removal of ovary(s)
58546	Laparo-myomectomy complex	58950	Resect ovarian malignancy
58548	Lap radical hyst	58951	Resect ovarian malignancy
58550	Laparo-asst vag hysterectomy	58952	Resect ovarian malignancy
58552	Laparo-vag hyst incl t/o	58953	Tah rad dissect for debulk
58553	Laparo-vag hyst complex	58954	Tah rad debulk/lymph remove
58554	Laparo-vag hyst w/t/o compl	58956	Bso omentectomy w/tah
58555	Hysteroscopy dx sep proc	58957	Resect recurrent gyn mal
58558	Hysteroscopy biopsy	58958	Resect recur gyn mal w/lym
58559	Hysteroscopy lysis	58960	Exploration of abdomen
58560	Hysteroscopy resect septum	58970	Retrieval of oocyte
58561	Hysteroscopy remove myoma	58974	Transfer of embryo
58562	Hysteroscopy remove fb	58976	Transfer of embryo
58563	Hysteroscopy ablation	58999	Genital surgery procedure
58565	Hysteroscopy sterilization	59000	Amniocentesis diagnostic
58570	Tlh uterus 250 g or less	59001	Amniocentesis therapeutic
58571	Tlh w/t/o 250 g or less	59012	Fetal cord puncture prenatal
58572	Tlh uterus over 250 g	59015	Chorion biopsy
58573	Tlh w/t/o uterus over 250 g	59020	Fetal contract stress test
58575	Laps tot hyst resj mal	59025	Fetal non-stress test
58578	Laparo proc uterus	59030	Fetal scalp blood sample
58579	Hysteroscope procedure	59050	Fetal monitor w/report
58600	Division of fallopian tube	59051	Fetal monitor/interpret only
58605	Division of fallopian tube	59070	Transabdom amniotom w/us
58611	Ligate oviduct(s) add-on	59072	Umbilical cord occlud w/us
58615	Occlude fallopian tube(s)	59074	Fetal fluid drainage w/us
58660	Laparoscopy lysis	59076	Fetal shunt placement w/us
58661	Laparoscopy remove adnexa	59100	Remove uterus lesion
58662	Laparoscopy excise lesions	59120	Treat ectopic pregnancy
58670	Laparoscopy tubal cautery	59121	Treat ectopic pregnancy
58671	Laparoscopy tubal block	59130	Treat ectopic pregnancy
58672	Laparoscopy fimbrioplasty	59135	Treat ectopic pregnancy
58673	Laparoscopy salpingostomy	59136	Treat ectopic pregnancy
58674	Laps abltj uterine fibroids	59140	Treat ectopic pregnancy
58679	Laparo proc oviduct-ovary	59150	Treat ectopic pregnancy
58700	Removal of fallopian tube	59151	Treat ectopic pregnancy
58720	Removal of ovary/tube(s)	59160	D & c after delivery
58740	Adhesiolysis tube ovary	59200	Insert cervical dilator
58750	Repair oviduct	59300	Episiotomy or vaginal repair
58752	Revise ovarian tube(s)	59320	Revision of cervix
58760	Fimbrioplasty	59325	Revision of cervix
58770	Create new tubal opening	59350	Repair of uterus
58800	Drainage of ovarian cyst(s)	59400	Obstetrical care
58805	Drainage of ovarian cyst(s)	59409	Obstetrical care
58820	Drain ovary abscess open	59410	Obstetrical care

59412	Antepartum manipulation	76827	Echo exam of fetal heart
59414	Deliver placenta	76828	Echo exam of fetal heart
59425	Antepartum care only	76830	Transvaginal us non-ob
59426	Antepartum care only	76831	Echo exam uterus
59430	Care after delivery	76941	Echo guide for transfusion
59510	Cesarean delivery	76945	Echo guide villus sampling
59514	Cesarean delivery only	76946	Echo guide for amniocentesis
59515	Cesarean delivery	76948	Echo guide ova aspiration
59525	Remove uterus after cesarean	80055	Obstetric panel
59610	Vbac delivery	80081	Obstetric panel
59612	Vbac delivery only	81025	Urine pregnancy test
59614	Vbac care after delivery	81500	Onco (ovar) two proteins
59618	Attempted vbac delivery	81503	Onco (ovar) five proteins
59620	Attempted vbac delivery only	81507	Fetal aneuploidy trisom risk
59622	Attempted vbac after care	81508	Ftl cgen abnor two proteins
59812	Treatment of miscarriage	81509	Ftl cgen abnor 3 proteins
59820	Care of miscarriage	81510	Ftl cgen abnor three anal
59821	Treatment of miscarriage	81511	Ftl cgen abnor four anal
59830	Treat uterus infection	81512	Ftl cgen abnor five anal
59840	Abortion	82120	Amines vaginal fluid qual
59841	Abortion	82143	Amniotic fluid scan
59850	Abortion	82731	Assay of fetal fibronectin
59851	Abortion	84112	Eval amniotic fluid protein
59852	Abortion	84135	Assay of pregnanediol
59855	Abortion	84138	Assay of pregnanetriol
59856	Abortion	84163	Pappa serum
59857	Abortion	84830	Ovulation tests
59866	Abortion (mpr)	85460	Hemoglobin fetal
59870	Evacuate mole of uterus	85461	Hemoglobin fetal
59871	Remove cerclage suture	88141	Cytopath c/v interpret
59897	Fetal invas px w/us	88142	Cytopath c/v thin layer
59898	Laparo proc ob care/deliver	88143	Cytopath c/v thin layer redo
59899	Maternity care procedure	88147	Cytopath c/v automated
64435	N block inj paracervical	88148	Cytopath c/v auto rescreen
74710	X-ray measurement of pelvis	88150	Cytopath c/v manual
74712	Mri fetal sngl/1st gestation	88153	Cytopath c/v redo
74713	Mri fetal ea addl gestation	88155	Cytopath c/v index add-on
74740	X-ray female genital tract	88164	Cytopath tbs c/v manual
74742	X-ray fallopian tube	88165	Cytopath tbs c/v redo
74775	X-ray exam of perineum	88166	Cytopath tbs c/v auto redo
76801	Ob us < 14 wks single fetus	88167	Cytopath tbs c/v select
76802	Ob us < 14 wks addl fetus	88174	Cytopath c/v auto in fluid
76805	Ob us >= 14 wks sngl fetus	88175	Cytopath c/v auto fluid redo
76810	Ob us >= 14 wks addl fetus	88267	Chromosome analys placenta
76811	Ob us detailed sngl fetus	88269	Chromosome analys amniotic
76812	Ob us detailed addl fetus	89300	Semen analysis w/huhner
76813	Ob us nuchal meas 1 gest	89337	Cryopreservation oocyte(s)
76814	Ob us nuchal meas add-on	99500	Home visit prenatal
76815	Ob us limited fetus(s)	99501	Home visit postnatal

44005	Freeing of bowel adhesion	44300	Open bowel to skin
44010	Incision of small bowel	44310	Ileostomy/jejunostomy
44015	Insert needle cath bowel	44314	Revision of ileostomy
44020	Explore small intestine	44316	Devise bowel pouch
44021	Decompress small bowel	44320	Colostomy
44025	Incision of large bowel	44322	Colostomy with biopsies
44050	Reduce bowel obstruction	44345	Revision of colostomy
44055	Correct malrotation of bowel	44346	Revision of colostomy
44110	Excise intestine lesion(s)	44602	Suture small intestine
44111	Excision of bowel lesion(s)	44603	Suture small intestine
44120	Removal of small intestine	44604	Suture large intestine
44121	Removal of small intestine	44605	Repair of bowel lesion
44125	Removal of small intestine	44615	Intestinal stricturoplasty
44126	Enterectomy w/o taper cong	44620	Repair bowel opening
44127	Enterectomy w/taper cong	44625	Repair bowel opening
44128	Enterectomy cong add-on	44626	Repair bowel opening
44130	Bowel to bowel fusion	44640	Repair bowel-skin fistula
44132	Enterectomy cadaver donor	44650	Repair bowel fistula
44133	Enterectomy live donor	44660	Repair bowel-bladder fistula
44135	Intestine transplnt cadaver	44661	Repair bowel-bladder fistula
44136	Intestine transplant live	44680	Surgical revision intestine
44137	Remove intestinal allograft	44700	Suspend bowel w/prosthesis
44139	Mobilization of colon	44715	Prepare donor intestine
44140	Partial removal of colon	44720	Prep donor intestine/venous
44141	Partial removal of colon	44721	Prep donor intestine/artery
44143	Partial removal of colon	44800	Excision of bowel pouch
44144	Partial removal of colon	44820	Excision of mesentery lesion
44145	Partial removal of colon	44850	Repair of mesentery
44146	Partial removal of colon	44899	Bowel surgery procedure
44147	Partial removal of colon	44900	Drain appendix abscess open
44150	Removal of colon	44960	Appendectomy

45110	Removal of rectum	47143	Prep donor liver whole
45111	Partial removal of rectum	47144	Prep donor liver 3-segment
45112	Removal of rectum	47145	Prep donor liver lobe split
45113	Partial proctectomy	47146	Prep donor liver/venous
45114	Partial removal of rectum	47147	Prep donor liver/arterial
45116	Partial removal of rectum	47300	Surgery for liver lesion
45119	Remove rectum w/reservoir	47350	Repair liver wound
45120	Removal of rectum	47360	Repair liver wound
45121	Removal of rectum and colon	47361	Repair liver wound
45123	Partial proctectomy	47362	Repair liver wound
45126	Pelvic exenteration	47380	Open ablate liver tumor rf
45130	Excision of rectal prolapse	47381	Open ablate liver tumor cryo
45135	Excision of rectal prolapse	47400	Incision of liver duct
45136	Excise ileoanal reservoir	47420	Incision of bile duct
45395	Lap removal of rectum	47425	Incision of bile duct
45397	Lap remove rectum w/pouch	47460	Incise bile duct sphincter
45400	Laparoscopic proc	47480	Incision of gallbladder
45402	Lap proctopexy w/sig resect	47550	Bile duct endoscopy add-on
45540	Correct rectal prolapse	47570	Laparo cholecystoenterostomy
45550	Repair rectum/remove sigmoid	47600	Removal of gallbladder
45562	Exploration/repair of rectum	47605	Removal of gallbladder
45563	Exploration/repair of rectum	47610	Removal of gallbladder
45800	Repair rect/bladder fistula	47612	Removal of gallbladder
45805	Repair fistula w/colostomy	47620	Removal of gallbladder
45820	Repair rectourethral fistula	47700	Exploration of bile ducts
45825	Repair fistula w/colostomy	47701	Bile duct revision
46705	Repair of anal stricture	47711	Excision of bile duct tumor
46710	Repr per/vag pouch sngl proc	47712	Excision of bile duct tumor
46712	Repr per/vag pouch dbl proc	47715	Excision of bile duct cyst
46715	Rep perf anoper fistu	47720	Fuse gallbladder & bowel
46716	Rep perf anoper/vestib fistu	47721	Fuse upper gi structures
46730	Construction of absent anus	47740	Fuse gallbladder & bowel
46735	Construction of absent anus	47741	Fuse gallbladder & bowel
46740	Construction of absent anus	47760	Fuse bile ducts and bowel
46742	Repair of imperforated anus	47765	Fuse liver ducts & bowel
46744	Repair of cloacal anomaly	47780	Fuse bile ducts and bowel
46746	Repair of cloacal anomaly	47785	Fuse bile ducts and bowel
46748	Repair of cloacal anomaly	47800	Reconstruction of bile ducts
46751	Repair of anal sphincter	47801	Placement bile duct support
47010	Open drainage liver lesion	47802	Fuse liver duct & intestine
47015	Inject/aspirate liver cyst	47900	Suture bile duct injury
47100	Wedge biopsy of liver	48000	Drainage of abdomen
47120	Partial removal of liver	48001	Placement of drain pancreas
47122	Extensive removal of liver	48020	Removal of pancreatic stone
47125	Partial removal of liver	48100	Biopsy of pancreas open
47130	Partial removal of liver	48105	Resect/debride pancreas
47133	Removal of donor liver	48120	Removal of pancreas lesion
47135	Transplantation of liver	48140	Partial removal of pancreas
47140	Partial removal donor liver	48145	Partial removal of pancreas
47141	Partial removal donor liver	48146	Pancreatectomy
47142	Partial removal donor liver	48148	Removal of pancreatic duct

48150	Partial removal of pancreas	50130	Removal of kidney stone
48152	Pancreatectomy	50135	Exploration of kidney
48153	Pancreatectomy	50205	Renal biopsy open
48154	Pancreatectomy	50220	Remove kidney open
48155	Removal of pancreas	50225	Removal kidney open complex
48400	Injection intraop add-on	50230	Removal kidney open radical
48500	Surgery of pancreatic cyst	50234	Removal of kidney & ureter
48510	Drain pancreatic pseudocyst	50236	Removal of kidney & ureter
48520	Fuse pancreas cyst and bowel	50240	Partial removal of kidney
48540	Fuse pancreas cyst and bowel	50250	Cryoablate renal mass open
48545	Pancreatorrhaphy	50280	Removal of kidney lesion
48547	Duodenal exclusion	50290	Removal of kidney lesion
48548	Fuse pancreas and bowel	50300	Remove cadaver donor kidney
48551	Prep donor pancreas	50320	Remove kidney living donor
48552	Prep donor pancreas/venous	50323	Prep cadaver renal allograft
48554	Transpl allograft pancreas	50325	Prep donor renal graft
48556	Removal allograft pancreas	50327	Prep renal graft/venous
49000	Exploration of abdomen	50328	Prep renal graft/arterial
49002	Reopening of abdomen	50329	Prep renal graft/ureteral
49010	Exploration behind abdomen	50340	Removal of kidney
49020	Drainage abdom abscess open	50360	Transplantation of kidney
49040	Drain open abdom abscess	50365	Transplantation of kidney
49060	Drain open retroperi abscess	50370	Remove transplanted kidney
49062	Drain to peritoneal cavity	50380	Reimplantation of kidney
49203	Exc abd tum 5 cm or less	50400	Revision of kidney/ureter
49204	Exc abd tum over 5 cm	50405	Revision of kidney/ureter
49205	Exc abd tum over 10 cm	50500	Repair of kidney wound
49215	Excise sacral spine tumor	50520	Close kidney-skin fistula
49220	Multiple surgery abdomen	50525	Close nephrovisceral fistula
49255	Removal of omentum	50526	Close nephrovisceral fistula
49412	Ins device for rt guide open	50540	Revision of horseshoe kidney
49425	Insert abdomen-venous drain	50545	Laparo radical nephrectomy
49428	Ligation of shunt	50546	Laparoscopic nephrectomy
49605	Repair umbilical lesion	50547	Laparo removal donor kidney
49606	Repair umbilical lesion	50548	Laparo remove w/ureter
49610	Repair umbilical lesion	50600	Exploration of ureter
49611	Repair umbilical lesion	50605	Insert ureteral support
49900	Repair of abdominal wall	50610	Removal of ureter stone
49904	Omental flap extra-abdom	50620	Removal of ureter stone
49905	Omental flap intra-abdom	50630	Removal of ureter stone
49906	Free omental flap microvasc	50650	Removal of ureter
50010	Exploration of kidney	50660	Removal of ureter
50040	Drainage of kidney	50700	Revision of ureter
50045	Exploration of kidney	50715	Release of ureter
50060	Removal of kidney stone	50722	Release of ureter
50065	Incision of kidney	50725	Release/revise ureter
50070	Incision of kidney	50728	Revise ureter
50075	Removal of kidney stone	50740	Fusion of ureter & kidney
50100	Revise kidney blood vessels	50750	Fusion of ureter & kidney
50120	Exploration of kidney	50760	Fusion of ureters
50125	Explore and drain kidney	50770	Splicing of ureters

50780	Reimplant ureter in bladder	55801	Removal of prostate
50782	Reimplant ureter in bladder	55810	Extensive prostate surgery

54416	Remv/repl penis contain pros
54417	Remv/replc penis pros compl
54660	Revision of testis
55873	Cryoablate prostate
57288	Repair bladder defect
58565	Hysteroscopy sterilization
61623	Endovasc tempory vessel occl
61626	Transcath occlusion non-cns
61885	Insrt/redo neurostim 1 array
61886	Implant neurostim arrays
61888	Revise/remove neuroreceiver
62350	Implant spinal canal cath
62360	Insert spine infusion device
62361	Implant spine infusion pump
62362	Implant spine infusion pump
63075	Neck spine disk surgery
63610	Stimulation of spinal cord
63650	Implant neuroelectrodes
63655	Implant neuroelectrodes
63663	Revise spine eltrd perq aray
63664	Revise spine eltrd plate
63685	Insrt/redo spine n generator

63741	Install spinal shunt
63744	Revision of spinal shunt
64553	Implant neuroelectrodes
64555	Implant neuroelectrodes
64561	Implant neuroelectrodes
64568	Inc for vagus n elect impl
64569	Revise/repl vagus n eltrd
64575	Implant neuroelectrodes
64580	Implant neuroelectrodes
64581	Implant neuroelectrodes
64590	Insrt/redo pn/gastr stimul
64595	Revise/rmv pn/gastr stimul
64885	Nerve graft head/neck </4 cm
64886	Nerve graft head/neck >4 cm
64890	Nerve graft hand/foot </4 cm
64891	Nerve graft hand/foot >4 cm
64910	Nerve repair w/allograft
65770	Revise cornea with implant
66180	Aqueous shunt eye w/graft
66183	Insert ant drainage device
69714	Implant temple bone w/stimul
69715	Temple bne implnt w/stimulat
69717	Temple bone implant revision
69930	Implant cochlear device
75733	Artery x-rays adrenals
75746	Artery x-rays lung
75870	Vein x-ray skull
75898	Follow-up angiography
86891	Autologous blood op salvage
92928	Prq card stent w/angio 1 vsl
92933	Prq card stent/ath/angio
92937	Prq revasc byp graft 1 vsl
92943	Prq card revasc chronic 1vs1
92986	Revision of aortic valve
92987	Revision of mitral valve
93532	R & I heart cath congenital
93580	Transcath closure of asd
93581	Transcath closure of vsd
93582	Perq transcath closure pda
93590	Perq transcath cls mitral
93591	Perq transcath cls aortic
93600	Bundle of his recording
93602	Intra-atrial recording
93603	Right ventricular recording
93610	Intra-atrial pacing
93650	Ablate heart dysrhythm focus
93653	Ep & ablate supravent arrhyt
93654	Ep & ablate ventric tachy
93656	Tx atrial fib pulm vein isol
C9600	Perc drug-el cor stent sing
C9602	Perc d-e cor stent ather s

C9604	Perc d-e cor revasc t cabg s
C9607	Perc d-e cor revasc chro sin
C9728	Place device/marker, non pro
C9739	Cystoscopy prostatic imp 1-3
C9740	Cysto impl 4 or more
C9745	Nasal endo eustachian tube
C9749	Repair nasal stenosis w/imp
C9752	Intraosseous des lumb/sacrum
C9754	Perc av fistula, direct
C9755	Rf magnetic-guide av fistula

Devices

A4648	Implantable tissue marker
C1713	Anchor/screw bn/bn,tis/bn
C1714	Cath, trans atherectomy, dir
C1715	Brachytherapy needle
C1721	Aicd, dual chamber
C1722	Aicd, single chamber
C1724	Cath, trans atherec,rotation
C1725	Cath, translumin non-laser
C1726	Cath, bal dil, non-vascular
C1727	Cath, bal tis dis, non-vas
C1728	Cath, brachytx seed adm
C1729	Cath, drainage
C1730	Cath, ep, 19 or few elect
C1731	Cath, ep, 20 or more elec
C1732	Cath, ep, diag/abl, 3d/vect
C1733	Cath, ep, othr than cool-tip
C1749	Endo, colon, retro imaging
C1750	Cath, hemodialysis,long-term
C1751	Cath, inf, per/cent/midline
C1752	Cath,hemodialysis,short-term
C1753	Cath, intravas ultrasound
C1754	Catheter, intradiscal
C1755	Catheter, intraspinal
C1756	Cath, pacing, transesoph
C1757	Cath, thrombectomy/embolect
C1758	Catheter, ureteral
C1759	Cath, intra echocardiography
C1760	Closure dev, vasc
C1762	Conn tiss, human(inc fascia)
C1763	Conn tiss, non-human
C1764	Event recorder, cardiac
C1765	Adhesion barrier
C1766	Intro/sheath,strble,non-peel
C1767	Generator, neuro non-recharg
C1768	Graft, vascular
C1769	Guide wire
C1770	Imaging coil, mr, insertable
C1771	Rep dev, urinary, w/sling
C1772	Infusion pump, programmable
C1773	Ret dev, insertable
C1776	Joint device (implantable)
C1777	Lead, aicd, endo single coil
C1778	Lead, neurostimulator
C1779	Lead, pmkr, transvenous vdd
C1780	Lens, intraocular (new tech)
C1781	Mesh (implantable)

C1782	Morcellator
C1783	Ocular imp, aqueous drain de
C1784	Ocular dev, intraop, det ret
C1785	Pmkr, dual, rate-resp
C1786	Pmkr, single, rate-resp
C1787	Patient progr, neurostim
C1788	Port, indwelling, imp
C1789	Prosthesis, breast, imp
C1813	Prosthesis, penile, inflatab
C1814	Retinal tamp, silicone oil
C1815	Pros, urinary sph, imp
C1816	Receiver/transmitter, neuro
C1817	Septal defect imp sys
C1818	Integrated keratoprosthesis
C1819	Tissue localization-excision
C1820	Generator neuro rechg bat sy
C1821	Interspinous implant
C1822	Gen, neuro, hf, rechg bat
C1823	Gen, neuro, trans sen/stim
C1830	Power bone marrow bx needle
C1840	Telescopic intraocular lens
C1841	Retinal prosth int/ext comp
C1874	Stent, coated/cov w/del sys
C1875	Stent, coated/cov w/o del sy
C1876	Stent, non-coa/non-cov w/del
C1877	Stent, non-coat/cov w/o del
C1878	Matrl for vocal cord
C1880	Vena cava filter
C1881	Dialysis access system
C1882	Aicd, other than sing/dual
C1883	Adapt/ext, pacing/neuro lead
C1884	Embolization protect syst
C1885	Cath, translumin angio laser
C1886	Catheter, ablation
C1887	Catheter, guiding
C1888	Endovas non-cardiac abl cath
C1889	Implant/insert device, noc
C1891	Infusion pump,non-prog, perm
C1892	Intro/sheath, fixed, peel-away
C1893	Intro/sheath, fixed, non-peel
C1894	Intro/sheath, non-laser
C1895	Lead, aicd, endo dual coil
C1896	Lead, aicd, non sing/dual
C1897	Lead, neurostim test kit
C1898	Lead, pmkr, other than trans
C1899	Lead, pmkr/aicd combination
C1900	Lead, coronary venous
C2613	Lung bx plug w/del sys
C2614	Probe, perc lumb disc
C2615	Sealant, pulmonary, liquid
C2617	Stent, non-cor, tem w/o del

C2618	Probe/needle, cryo
C2619	Pmkr, dual, non rate-resp
C2620	Pmkr, single, non rate-resp
C2621	Pmkr, other than sing/dual
C2622	Prosthesis, penile, non-inf
C2623	Cath, translumin, drug-coat
C2624	Wireless pressure sensor
C2625	Stent, non-cor, tem w/del sy
C2626	Infusion pump, non-prog,temp
C2627	Cath, suprapubic/cystoscopic
C2628	Catheter, occlusion
C2629	Intro/sheath, laser
C2630	Cath, ep, cool-tip
C2631	Rep dev, urinary, w/o sling
L8600	Implant breast silicone/eq
L8603	Collagen imp urinary 2.5 ml
L8604	Dextranomer/hyaluronic acid
L8605	Inj bulking agent anal canal
L8606	Synthetic implnt urinary 1ml
L8607	Inj vocal cord bulking agent
L8609	Artificial cornea
L8610	Ocular implant
L8612	Aqueous shunt prosthesis
L8613	Ossicular implant
L8614	Cochlear device
L8630	Metacarpophalangeal implant
L8631	Mcp joint repl 2 pc or more
L8641	Metatarsal joint implant
L8642	Hallux implant
L8658	Interphalangeal joint spacer
L8659	Interphalangeal joint repl
L8670	Vascular graft, synthetic
L8679	Imp neurosti pls gn any type
L8682	Implt neurostim radiofq rec
L8690	Aud osseo dev, int/ext comp
L8699	Prosthetic implant nos
L9900	O&p supply/accessory/service

Appendix C: Other code lists

This appendix contains the following code lists for special logic.

- STV-packaged services
- T-packaged services
- Critical care-packaged
- Partial hospital program services list (A and B)
- Mental health services composite
- Comprehensive APC Complexity Adjusted Code pairs
- Pass-through device offset pairs
- Pass-through contrast
- Pass-through radiopharmaceutical
- Pass-through skin product

STV-packaged services codelist

The following list of codes shows the status indicator that would be assigned if the code(s) were paid separately.

Code	Description	Status indicator
0058T	Cryopreservation ovary tiss	S
0106T	Touch quant sensory test	S
0107T	Vibrate quant sensory test	S
0108T	Cool quant sensory test	S
0109T	Heat quant sensory test	S
0110T	Nos quant sensory test	S
0126T	Chd risk imt study	S
0198T	Ocular blood flow measure	S
0206T	Cptr dbs alys car elec dta	S
0207T	Clear eyelid gland w/heat	S
0208T	Audiometry air only	S
0209T	Audiometry air & bone	S
0210T	Speech audiometry threshold	S
0211T	Speech audiom thresh & recog	S
0212T	Compre audiometry evaluation	S
0232T	Njx platelet plasma	S
0278T	Tempr	S
0296T	Ext ecg recording	S
0297T	Ext ecg scan w/report	S
0317T	Elec alys vagus nrv pls gen	S
0330T	Tear film img uni/bi w/i&r	S
0347T	Ins bone device for rsa	S
0348T	Rsa spine exam	S

Code	Description	Status indicator
0349T	Rsa upper extr exam	S
0350T	Rsa lower extr exam	S
0356T	Insrt drug device for iop	S
0357T	Cryopreservation oocyte(s)	S
0358T	Bia whole body	S
0379T	Vis field assmnt tech suppt	S
0380T	Comp animat ret imag series	S
0417T	Prgrmg eval cardiac modulj	S
0418T	Interro eval cardiac modulj	S
0422T	Tactile breast img uni/bi	S
0472T	Prgrmg io rta eltrd ra	S
0473T	Reprgrmg io rta eltrd ra	S

12018	Rpr f/e/e/n/l/m >30.0 cm	T
15786	Abrasion lesion single	T
15788	Chemical peel face epiderm	T
15792	Chemical peel nonfacial	T
15793	Chemical peel nonfacial	T
15852	Dressing change not for burn	T
15860	Test for blood flow in graft	S
16000	Initial treatment of burn(s)	T
16020	Dress/debrid p-thick burn s	T
17000	Destruct premalg lesion	T
17110	Destruct b9 lesion 1-14	T
17111	Destruct lesion 15 or more	T
17250	Chem caut of grantlj tissue	T
17260	Destruction of skin lesions	T
17261	Destruction of skin lesions	T
17262	Destruction of skin lesions	T
17263	Destruction of skin lesions	T
17272	Destruction of skin lesions	T
17280	Destruction of skin lesions	T
17340	Cryotherapy of skin	S
17360	Skin peel therapy	T
17999	Skin tissue procedure	T
19281	Perq device breast 1st imag	T
19283	Perq dev breast 1st strtctc	T

Code	Description	Status indicator
19285	Perq dev breast 1st us imag	T
19287	Perq dev breast 1st mr guide	T
20665	Removal of fixation device	S
20979	Us bone stimulation	S
29125	Apply forearm splint	S
29126	Apply forearm splint	S
29130	Application of finger splint	S
29131	Application of finger splint	S
29240	Strapping of shoulder	S
29260	Strapping of elbow or wrist	S
29280	Strapping of hand or finger	S
29520	Strapping of hip	S
29530	Strapping of knee	S
29550	Strapping of toes	S
30300	Remove nasal foreign body	S
30901	Control of nosebleed	S
31720	Clearance of airways	S
36420	Vein access cutdown < 1 yr	S
36425	Vein access cutdown > 1 yr	S
36468	Njx sclrsnt spider veins	T
36591	Draw blood off venous device	S
36592	Collect blood from picc	S
36600	Withdrawal of arterial blood	S
36680	Insert needle bone cavity	S
38792	Ra tracer id of sentinl node	S
40804	Removal foreign body mouth	T
41250	Repair tongue laceration	S
41800	Drainage of gum lesion	S

Code	Description	Status indicator
42809	Remove pharynx foreign body	S
43752	Nasal/orogastric w/tube plmt	S
43753	Tx gastro intub w/asp	S
43754	Dx gastr intub w/asp spec	S
43756	Dx duod intub w/asp spec	T
45520	Treatment of rectal prolapse	T
46600	Diagnostic anoscopy spx	S
46601	Diagnostic anoscopy	S
49465	Fluoro exam of g/colon tube	S
51701	Insert bladder catheter	S
51702	Insert temp bladder cath	S
51736	Urine flow measurement	S
51741	Electro-uflowmetry first	S
51792	Urinary reflex study	S
51798	Us urine capacity measure	S
53601	Dilate urethra stricture	S
53661	Dilation of urethra	S
54050	Destruction penis lesion(s)	T
54056	Cryosurgery penis lesion(s)	T
57150	Treat vagina infection	S
64402	N block inj facial	S
65205	Remove foreign body from eye	S
65210	Remove foreign body from eye	S
65220	Remove foreign body from eye	S
65222	Remove foreign body from eye	S
65430	Corneal smear	S

Code	Description	Status indicator
67820	Revise eyelashes	S
68200	Treat eyelid by injection	S
68801	Dilate tear duct opening	S
69200	Clear outer ear canal	S
69209	Remove impacted ear wax uni	S
69210	Remove impacted ear wax uni	S
69220	Clean out mastoid cavity	T
70030	X-ray eye for foreign body	S
70100	X-ray exam of jaw <4views	S
70110	X-ray exam of jaw 4/> views	S
70120	X-ray exam of mastoids	S
70130	X-ray exam of mastoids	S
70134	X-ray exam of middle ear	S
70140	X-ray exam of facial bones	S
70150	X-ray exam of facial bones	S
70160	X-ray exam of nasal bones	S
70190	X-ray exam of eye sockets	S
70200	X-ray exam of eye sockets	S
70210	X-ray exam of sinuses	S
70220	X-ray exam of sinuses	S
70240	X-ray exam pituitary saddle	S
70250	X-ray exam of skull	S
70260	X-ray exam of skull	S
70300	X-ray exam of teeth	S
70310	X-ray exam of teeth	S
70320	Full mouth x-ray of teeth	S
70328	X-ray exam of jaw joint	S
70330	X-ray exam of jaw joints	S

Code	Description	Status indicator
70350	X-ray head for orthodontia	S
70355	Panoramic x-ray of jaws	S
70360	X-ray exam of neck	S
70370	Throat x-ray & fluoroscopy	S
70371	Speech evaluation complex	S
70380	X-ray exam of salivary gland	S
71047	X-ray exam chest 3 views	S
71048	X-ray exam chest 4+ views	S
71100	X-ray exam ribs uni 2 views	S

Appendix D: List of APCs

This appendix lists all current APCs with their status indicators and descriptions.

APC	Status	Description
00701	K	Sr89 strontium
00726	K	Dexrazoxane HCl injection
00731	K	Sargramostim injection
00736	K	Amphotericin b liposome inj
00738	K	Rasburicase
00751	K	Mechlorethamine hcl inj
00752	K	Dactinomycin injection
00759	K	Naltrexone, depot form
00800	K	Leuprolide acetate
00802	K	Etoposide oral
00807	K	Aldesleukin injection
00809	K	Bcg live intravesical 1mg
00810	K	Goserelin acetate implant
00812	K	Carmustine injection
00820	K	Daunorubicin injection
00823	K	Docetaxel injection
00825	K	Nelarabine injection
00836	K	Interferon alfa-2b inj
00840	K	Inj melphalan hydrochl
00843	K	Pegaspargase injection
00844	K	Pentostatin injection
00850	K	Streptozocin injection
00851	K	Thiotepa injection
00856	K	Porfimer sodium injection
00858	K	Inj cladribine
00864	K	Mitoxantrone hydrochl

APC	Status	Description
00873	K	Hyalgan supartz visco-3 dose
00874	K	Synvisc or synvisc-one
00875	K	Euflexxa inj per dose
00877	K	Orthovisc inj per dose
00887	K	Azathioprine parenteral
00890	K	Lymphocyte immune globulin
00901	K	Alpha 1 proteinase inhibitor
00902	K	Injection,onabotulinumtoxinA
00903	K	Cytomegalovirus imm IV /vial
00910	K	Interferon beta-1b / .25 MG
00925	K	Factor viii
00927	K	Factor viii recombinant
00928	K	Factor ix complex
00929	K	Anti-inhibitor
00931	K	Factor IX non-recombinant
00932	K	Factor ix recombinant nos
00943	K	Octagam injection
00944	K	Gammagard liquid injection
00946	K	Hepagam b im injection
00947	K	Flebogamma injection
00948	K	Gamunex-C/Gammaked
00961	K	Albumin (human),5%, 50ml
00963	K	Albumin (human), 5%, 250 ml
00964	K	Albumin (human), 25%, 20 ml
00965	K	Albumin (human), 25%, 50ml
01015	K	Injection glatiramer acetate
01064	K	I131 iodide cap, rx
01083	K	Adalimumab injection
01138	K	Hepagam b intravenous, inj

APC	Status	Description
01139	K	Protein c concentrate
01142	K	Supprelin LA implant
01150	K	I131 iodide sol, rx
01166	K	Cytarabine liposome inj
01168	K	Inj, temsirolimus
01178	K	Busulfan injection
01203	K	Verteporfin injection
01207	K	Octreotide injection, depot
01213	K	Antihemophilic viii/vwf comp
01214	K	Inj IVIG privigen 500 mg
01232	K	Mitomycin injection
01235	K	Valrubicin injection
01236	K	Levoleucovorin injection
01237	K	Inj iron dextran
01253	K	Triamcinolone A inj PRS-free
01263	K	Antithrombin iii injection
01268	K	Xyntha inj
01274	K	Edetate calcium disodium inj
01281	K	Bevacizumab injection
01289	K	AbobotulinumtoxinA
01295	K	Sm 153 lexidronam
01296	K	Degarelix injection
01297	K	Ferumoxytol, non-esrd
01311	K	Canakinumab injection
01312	K	Hizentra injection
01327	K	Imiglucerase injection
01340	K	Collagenase, clost hist inj
01341	K	Amobarbital 125 MG inj
01352	K	Wilate injection

APC	Status	Description
01353	K	Belimumab injection
01408	K	Cyclophosphamide 100 MG inj
01413	K	Lumizyme injection
01415	K	Glassia injection
01416	K	Factor xiii anti-hem factor
01417	K	Gel-one
01420	K	Aflibercept injection
01421	K	Imported lipodox inj
01426	K	Eribulin mesylate injection
01431	K	Centruroides immune f(ab)
01433	K	Calcitonin salmon injection
01440	K	Inj desmopressin acetate
01442	K	Non-HEU TC-99M add-on/dose
01443	K	Icatibant injection
01446	K	Visualization adjunct
01458	K	Phentolaine mesylate inj
01466	K	Inj, vincristine sul lip 1mg
01467	K	Factor ix recombinan rixubis
01468	K	Inj Aripiprazole Ext Rel 1mg
01469	K	Inj filgrastim excl biosimil
01471	K	Injection, Pertuzumab, 1 mg
01472	K	Inj beta interferon im 1 mcg
01474	K	Certolizumab pegol inj 1mg
01475	K	Golimumab for iv use 1mg
01476	K	Obinutuzumab inj
01478	K	Inj human fibrinogen con nos
01480	K	Elosulfase alfa, injection
01482	K	Darbepoetin alfa, esrd use
01485	K	Ferumoxytol, esrd use

APC	Status	Description
01486	K	Factor ix fc fusion recomb
01488	K	Injection, ramucirumab

Appendix E: Summary of changes

Modifications made to the current release of the Integrated Outpatient Code Editor (IOCE) are summarized in the following sections.

Software

- Basic changes to accommodate table and date range modifications.
- IOCE will maintain only seven years of programs and codes. The earliest supported version in this release is 13.3.x and the earliest version date is 10/01/12.
- Implemented new logic to return edit 6 if an invalid procedure code is submitted on a 770-bill type.
- Implemented logic to allow certain wound care services identified as being sometimes therapy to be excluded from comprehensive APC packaging if the conditions are present for changing the SI to A.
- Implemented the following logic items for partial hospitalization:
 - Accept Payer Value Code and Value Code Amount QA on input to identify that the previous Partial Hospitalization Program (PHP) claim had a partial last week that needs to be combined into the first week of the processing claim to calculate one full week of services (7 days).
 - Return Payer Condition Code MV if the combined partial weeks (first and second portion equal 7 days) is not 20 hours.
 - Accept Condition Code MW on input, indicating that after combining the partial weeks together, 20 hours of services were not provided and the first portion of the combined week needs editing.
 - Return Payer Condition Code MQ if an admission to discharge claim (761 or 131 CC 41) or an interim to discharge claim (764 or 134 CC 41) is submitted and the last 7-day week on the claim is not 20 hours.

Files

The code description file was updated; diagnosis and/or procedure codes have been updated with current additions, revisions, and deletions.

Tables

- The following new input payer value code has been added:
 - QA: Offset for combining partial PHP week on interim PHP claim
- The following new payer condition codes have been added:
 - MV: Second portion of combined PHP week is not 20 hours
 - MW: First portion of combined PHP week is not 20 hours
- The following return code has been added:
 - 28. Input format is incorrect for value code amount field

Documentation

The following changes were made to the IOCE Software User's Manual:

- The following code lists were updated in Appendix B (Procedure edit code lists):
 - Procedures for males only
 - Non-covered under any Medicare outpatient benefit (based on other than statute)
 - Inpatient procedures
 - Code not recognized by OPPS
 - Service not billable to MAC
 - Skin substitute procedures and products - low cost
 - Skin substitute procedures and products - high cost
 - Device procedures
- The following code lists were updated in Appendix C (Other code lists):
 - Partial hospital program services list (A and B)
- Appendix D List of APCs has been updated.
