Reporting of Patient-Reported Outcome (PRO) and Limited Risk Variable Data

About Managed File Transfer

Managed File Transfer (MFT) is the data submission method used in the Comprehensive Care for Joint Replacement (CJR) model. This method replaced Secure File Transfer (SFT), which is no longer available to submit patient-reported outcome (PRO) data.

Note: If access to MFT has already been obtained for use in other Centers for Medicare & Medicaid Services (CMS) programs, then re-registration for MFT is not required.

Pre-registration Step

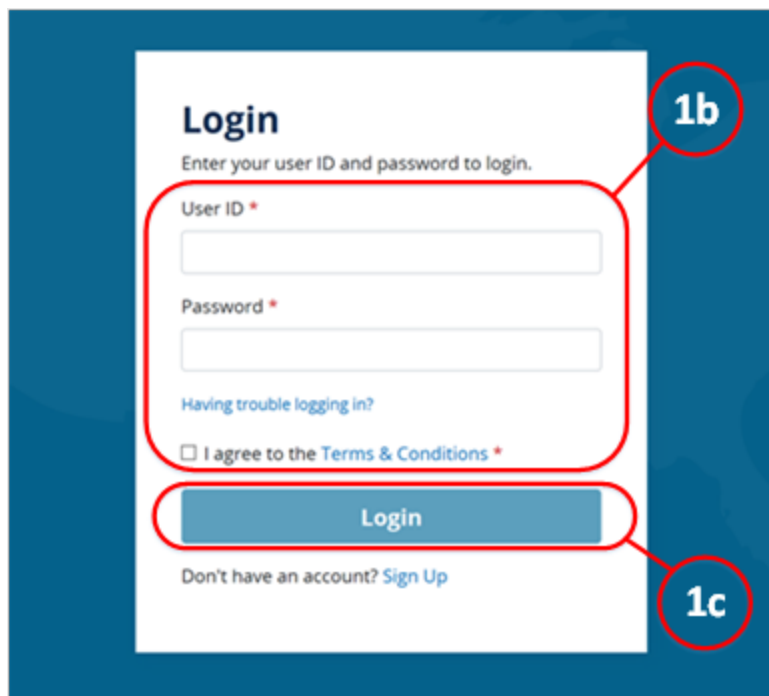

To register for MFT, you must have a Health Care Quality Information Systems (HCQIS) Access Roles and Profile (HARP) ID. To register, please see the HARP Registration Instructions on CMMI connect-> Files -> CJR Connect -> CJR PRO Data Collection folder. Link <https://app.innovation.cms.gov/CMMIConnect/s/>
