- When you submit your Marketplace application, you and your family may be able to save on Marketplace premiums or qualify for Medicaid or the Children's Health Insurance Program (CHIP), based on your household income.
- Preventive services, like shots and screenings, can help prevent illness and other health problems, or find issues at an early stage when treatment is likely to work best. All Marketplace health plans and many other plans must cover certain preventive services without charging you a copayment or coinsurance, if your doctor or other provider is in your plan's network.
