

Appendix G

Part B Therapy Users CY 2002:

Most Frequently Observed Diagnosis Tables -

Annual Expenditure Ranking

## Key to Appendix G:

The tables in Appendix G describe the most commonly reported Part B therapy user diagnosis groups in CY 2002. Individual therapy users are classified by the first principal claim diagnosis listed during the first therapy encounter.

The ICD-9 code groups with the greatest number of unique therapy users represented in Appendix J were then ranked in order of average annual expenditures per therapy user (Rank 1 = highest average annual expenditures). For example, in Appendix G-Table 1, the acute stroke diagnosis (436) had the highest average total therapy expenditure in CY 2002 at \$1787. This can be compared to the overall therapy user average of \$895 presented in the "All Therapy Users" row above. Most tables contain the first 100 ranked diagnosis groups.

The tan shaded cells indicate the relative ranking and the dollar value average column being ranked in the respective tables. For example, in Appendix G-Table 2, the "PT Users" table, the tan cells represent the total PT expenditures for any therapy user that received PT services for that diagnosis. The non-highlighted OT and SLP cells indicate the therapy expenditures for these services that are related to the PT user (e.g. complex cases require multiple therapies).

**NOTE:** To identify the average therapy expenditures for a specific type of therapy for a specific diagnosis group, review the amounts in the tan cells for that specific therapy type (e.g. Appendix G-Table 3 for average OT expenditures for acute stroke (ICD-9 = 436).

Appendix G-Table 6 provides a variation of Appendix K- Table 1. Both tables describe individual therapy users that received any type of therapy services (PT and/or OT and/or SLP) in CY 2002. While Appendix G-Table 1 describes the average annual expenditures of the most frequently occurring diagnosis groups among all therapy users, Appendix G-Table 6 describes the average annual expenditures of the most frequently occurring diagnosis groups, but only for therapy users representing the top 5 percent in annual expenditures. For example, in Appendix G-Table 1, acute stroke has the highest average expenditure at \$1787 while in Appendix G-Table 6; acute stroke is ranked eighth among the top 5% users, while averaging a significantly higher annual expenditure amount of \$6086.

These tables provide a general picture of the average annual expenditures most often associated with users presenting with commonly reported diagnoses and highlight differences in average annual expenditures and ranking of particular diagnosis groups depending upon the type of therapy services being described. It also highlights the differences in average annual expenditures and diagnosis group ranking when comparing high expenditure users with average users of therapy services.

## Appendix G-Table 1 Ranking of Average Annual Therapy Expenditures for Most Frequently Observed Diagnoses: All Therapy Users

ICD-9 \$ Rank All Therapy Types	ICD-9 Code	Diagnosis Description	All Therapy Users (N)	Total Therapy Paid (Average)	PT Paid (Average)	OT Paid (Average)	SLP Paid (Average)
		All Therapy Users	3,747,396	\$895	\$669	\$163	\$63
1	436	Acute, but ill-defined, cerebrovascular disease	63,108	\$1,787	\$878	\$559	\$350
2	438.0	Late effects of cerebrovascular disease, cognitive deficits	9,175	\$1,718	\$727	\$643	\$348
3	438.20	Late effects of cerebrovascular disease, hemiplegia affecting unspecified side	8,329	\$1,710	\$814	\$627	\$269
4	780.9	Other general symptoms	23,350	\$1,629	\$825	\$651	\$152
5	715.09	Osteoarthritis, generalized, multiple sites	12,232	\$1,556	\$1,120	\$401	\$35
6	719.79	Difficulty in walking, multiple sites	9,149	\$1,546	\$1,054	\$392	\$99
7	438.9	Late effects of cerebrovascular disease, unspecified late effects of cerebrovascular disease	6,726	\$1,502	\$728	\$512	\$262
8	401.9	Essential hypertension, unspecified	11,215	\$1,499	\$773	\$520	\$205
9	820.8	Fracture of neck of femur, unspecified part, closed	17,720	\$1,489	\$1,005	\$381	\$102
10	719.70	Difficulty in walking, site unspecified	33,965	\$1,465	\$981	\$382	\$102
11	728.2	Muscular wasting and disuse atrophy, not elsewhere classified	33,681	\$1,464	\$930	\$457	\$77
12	332.0	Parkinson's Disease, paralysis agitans	26,013	\$1,458	\$845	\$407	\$207
13	799.3	Debility, unspecified	27,202	\$1,435	\$807	\$510	\$118
14	707.0	Decubitus ulcer	7,211	\$1,395	\$1,010	\$281	\$104
15	250.00	Type II Diabetes Mellitus or unspecified type, not stated as uncontrolled, without mention of complication	11,519	\$1,381	\$697	\$473	\$211
