

Cardiac Rehabilitation and Intensive Cardiac Rehabilitation – JA6850

Related CR Release Date: March 21, 2010 **Revised**

Date Job Aid Revised: November 17, 2010

Effective Date: January 1, 2010

Implementation Date: October 4, 2010

Note: JA6850 was revised to add a reference to MLN Matters® article MM7113 (<http://www.cms.gov/MLN MattersArticles/downloads/MM7113.pdf>), which announces that (through a National Coverage Determination (NCD)) CMS has determined that, effective for claims with dates of service on and after August 12, 2010, the Ornish Program for Reversing Heart Disease and the Pritikin Program each meet the ICR program requirements.

Key Words MM6850, CR6850, R1974CP, R126BP, R339PI, R170FM, Intensive, Cardiac, Rehabilitation

- Contractors Affected**
- Fiscal Intermediaries (FIs)
 - Medicare Carriers
 - Part A/B Medicare Administrative Contractors (A/B MACs)

Provider Types Affected Physicians, hospitals, and other providers who bill FIs, Carriers, and A/B MACs for Cardiac Rehabilitation and Intensive Cardiac Rehabilitation (ICR) program services provided to Medicare beneficiaries are affected.

Change Request (CR) 6850 announces that, effective January 1, 2010, Medicare Part B pays for Cardiac Rehabilitation and ICR programs, and related items and services if specific criteria are met by:

- The Medicare beneficiary,
- The Cardiac Rehabilitation/ICR program itself,
- The setting in which is it administered, and
- The physician administering the program.

Cardiac Rehabilitation /ICR Program Beneficiary Coverage

- Effective January 1, 2010, Medicare Part B covers Cardiac Rehabilitation and ICR program services for beneficiaries who have experienced one or more of the following:
 - An acute myocardial infarction within the preceding 12 months;
 - A coronary artery bypass surgery;
 - Current stable angina pectoris;
 - Heart valve repair or replacement;
 - Percutaneous transluminal coronary angioplasty or coronary stenting;
 - A heart or heart-lung transplant; or
 - Other cardiac conditions as specified through a national coverage determination (NCD) (Cardiac Rehabilitation only).

Cardiac Rehabilitation /ICR Program Component Requirements

- Covered Cardiac Rehabilitation and ICR programs must include the following components:
 - **Physician-prescribed exercise** - This physical activity includes aerobic exercise combined with other types of exercise (i.e., strengthening, stretching) as determined to be appropriate for individual patients by a physician each day Cardiac Rehabilitation /ICR items/services are furnished.
 - **Cardiac risk factor modification** - This includes education, counseling, and behavioral intervention, tailored to the patients' individual needs.
 - **Psychosocial assessment** - This assessment means an evaluation of an individual's mental and emotional functioning as it relates to the individual's rehabilitation. It should include an assessment of those aspects of the individual's family and home situation that affects the individual's rehabilitation treatment and a psychosocial evaluation of the individual's response to (and rate of progress under) the treatment plan.
 - **Outcomes assessment** - These should include: (1) minimally, assessments from the commencement and conclusion of Cardiac Rehabilitation /ICR, based on patient-centered outcomes which must be measured by the physician immediately at the beginning and end of the program, and (2) objective clinical measures of the effectiveness of the Cardiac Rehabilitation /ICR program for the individual patient, including exercise performance and self-reported measures of exertion and behavior.
 - **An individualized treatment plan** - This plan should be written and tailored to each individual patient and include (1) a description of the individual's diagnosis,(2) the type, amount, frequency, and duration of the Cardiac Rehabilitation /ICR items/services furnished, and (3) the goals set for the individual under the plan. The individualized treatment plan must be established, reviewed, and signed by a physician every 30 days.

Provider Needs to Know...

Cardiac Rehabilitation Sessions Frequency Limitations

- Cardiac Rehabilitation sessions are limited to a maximum of 2 one-hour sessions per day (up to 36 sessions, over a period of up to 36 weeks), with the option for an additional 36 sessions over an extended period of time if approved by the Medicare contractor under Section 1862(a)(1)(A) of the Social Security Act.
- ICR sessions are limited to 72 one-hour sessions, up to 6 sessions per day, over a period of up to 18 weeks.

Cardiac Rehabilitation /ICR Program Setting Requirements

- Cardiac Rehabilitation /ICR services must be furnished in a physician's office or a hospital outpatient setting (for ICR, the hospital outpatient setting must provide ICR, using an approved ICR program).
- All settings must have a physician immediately available and accessible for medical consultations and emergencies at all times when items/services are being furnished under the program.
- This provision is satisfied if the physician meets the requirements for direct supervision of physician office services as specified at 42 Code of Federal Regulations (CFR) 410.26, and for hospital outpatient services as specified at 42 CFR 410.27.

Cardiac Rehabilitation /ICR Program Physician Requirements

- Physicians responsible for Cardiac Rehabilitation /ICR programs are identified as medical directors who oversee or supervise the Cardiac Rehabilitation /ICR program at a particular site.
- The medical director, in consultation with staff, is involved in directing the progress of individuals in the program.
- The medical director, as well as physicians acting as the supervising physician, must possess all of the following:
 - Expertise in the management of individuals with cardiac pathophysiology,
 - Cardiopulmonary training in basic life support or advanced cardiac life support, and
 - License to practice medicine in the state in which the Cardiac Rehabilitation /ICR program is offered. Direct physician supervision may be provided by a supervising physician or the medical director.

ICR Program Approval Requirements

- All prospective ICR programs must be approved by the Centers for Medicare & Medicaid Services (CMS) through the NCD process.
 - To be approved, an ICR program must demonstrate through peer-reviewed, published research that it:
 - Accomplished one or more of the following for its patients: (1) positively affected the progression of coronary heart disease, (2) reduced the need for coronary bypass surgery, or (3) reduced the need for percutaneous coronary interventions; and
-
-

-
-
- Accomplished a statistically significant reduction in five or more of the following measures for patients from their levels before Cardiac Rehabilitation services to after Cardiac Rehabilitation services: (1) low density lipoprotein, (2) triglycerides, (3) body mass index, (4) systolic blood pressure, (5) diastolic blood pressure, and, (6) the need for cholesterol, blood pressure, and diabetes medications.
 - Once an ICR program is approved through the NCD process, all prospective ICR sites that want to furnish ICR items/services via the approved program must enroll with their local Medicare contractor to become an ICR program supplier, using the designated forms at 42 CFR 424.510, and report specialty code 31 (single or multispecialty group practice) in order to be identified as an enrolled ICR supplier.

Note: For purposes of appealing an adverse determination concerning site approval, an ICR site is considered a supplier (or prospective supplier) as defined in 42 CFR 498.2.

- A list of approved ICR programs, identified through the NCD process, will be posted to the CMS website and listed in the Federal Register.

Claims Processing Requirements for Cardiac Rehabilitation and /or ICR Services with Dates of Service on and After January 1, 2010

- Carrier or MAC will pay for *professional* claims containing the following Healthcare Common Procedure Coding System (HCPCS) codes:
 - 93797 (Physician services for outpatient cardiac rehabilitation; without continuous electrocardiographic [ECG] monitoring [per session]),
 - 93798 (Physician services for outpatient cardiac rehabilitation; with continuous ECG monitoring [per session]),
 - G0422 (Intensive Cardiac Rehabilitation; With or Without continuous ECG monitoring, With Exercise, Per Session), and
 - G0423 (Intensive Cardiac Rehabilitation; With or Without continuous ECG monitoring, Without Exercise, Per Session) **only** when billed with place of service (POS) codes 11 (services provided in a physician's office) or 22 (services provided in a hospital outpatient setting).
 - Medicare contractors will deny all professional claims for Cardiac Rehabilitation /ICR services containing any other POS codes, using:
 - Remittance Advice Remark Code (RARC) N428 - "Service/procedure not covered when performed in this place of service,"
 - Claim Adjustment Reason Code (CARC) 58 - "Treatment was deemed by the payer to have been rendered in an inappropriate or invalid place of service. Note: Refer to the 832 Healthcare Policy Identification Segment (loop 2110 Service payment Information REF), if present," and
 - If the claim is received with a GA modifier, indicating a signed Advance Beneficiary Notice (ABN) is on file:
 - Group Code PR (Patient Responsibility) is used, or if the claim contains the GZ
-
-

modifier, indicating no ABN is on file, Group Code CO (Contractual Obligation) is used to assign financial liability to the provider.

- The FI or MAC will pay *institutional* claims containing HCPCS 93797, 93798, G0422, and G0423 on Types of Bill (TOB) 13X under the Hospital Outpatient Prospective Payment System and 85X on reasonable cost.
 - The FI or MAC will pay for Cardiac Rehabilitation /ICR services for hospitals in Maryland under the jurisdiction of the Health Services Cost Review Commission on an outpatient basis (TOBs 13X) in accordance with the terms of the Maryland waiver. Claims for G0422 and G0423 from Method II critical access hospitals should be billed on TOB 85X with revenue codes 96X, 97X, or 98X.
 - The FI or MAC will deny claims for Cardiac Rehabilitation /ICR services (HCPCS codes 93797, 93798, G0422, and G0423) for services that are provided in other than TOBs 13X and 85X, using:
 - RARC N428 - "Service/procedure not covered when performed in this place of service,"
 - CARC 58 – "Treatment was deemed by the payer to have been rendered in an inappropriate or invalid place of service. NOTE: Refer to the 832 Healthcare Policy Identification Segment (loop 2110 Service payment Information REF), if present," and
 - If the claim is received with a GA modifier, indicating a signed ABN is on file, Group Code PR (Patient Responsibility) is used, or if the claim contains the GZ modifier, indicating no ABN is on file, Group Code CO (Contractual Obligation) is used to assign financial liability to the provider.
 - Medicare contractors will deny both professional and institutional claims for Cardiac Rehabilitation services that exceed two units per date of service, or six units per date of service for ICR, using:
 - CARC 119 – "Benefit maximum for this time period or occurrence has been reached,"
 - RARC N362 – "The number of days or units exceeds our acceptable maximum," and
 - If the claim is received with a GA modifier, indicating a signed ABN is on file, Group Code PR (Patient Responsibility) is used, or if the claim contains the GZ modifier, indicating no ABN on file, Group Code CO (Contractual Obligation) is used to assign financial liability to the provider.
 - Medicare will pay for HCPCS codes 93797 and 93798 for Cardiac Rehabilitation services that exceed 36 sessions when the KX modifier is on the claim.
 - However, Medicare contractors will deny claims for over 36 sessions of Cardiac Rehabilitation services without the KX modifier and, in doing so, will use the following:
 - CARC 151 – "Payment adjusted because the payer deems the information submitted does not support this many/frequency of services,"
-
-

-
-
- RARC N435 – “Exceeds number/frequency approved /allowed within time period without support documentation,” and
 - If the claim is received with a GA modifier indicating a signed ABN is on file, Group Code PR (Patient Responsibility) is used, or if the claim contains the GZ modifier indicating no ABN on file, Group Code CO (Contractual Obligation) is used to assign financial liability to the provider.
 - Medicare contractors will deny ICR claims (G0422 and G0423) that exceed 72 sessions within 126 days from the date of the first session unless the modifier KX is on the claim. In denying such claims, they will use:
 - CARC 119 – “Benefit maximum for this time period or occurrence has been reached,”
 - RARC N435 – “Exceeds number/frequency approved /allowed within time period without support documentation,” and
 - If the claim is received with a GA modifier, indicating a signed ABN is on file, Group Code PR (Patient Responsibility) is used, or if the claim contains the GZ modifier, indicating no ABN on file, Group Code CO (Contractual Obligation) is used to assign financial liability to the provider.
 - Medicare contractors will only pay for ICR services when submitted by providers enrolled as supplier specialty code 31 (intensive cardiac rehabilitation).
 - ICR services submitted by providers enrolled as other than specialty code 31 will be denied, using:
 - CARC 8 – “The procedure code is inconsistent with the provider type/specialty (taxonomy). NOTE: Refer to the 835 Healthcare Policy Identification Segment (loop 2110 Service Payment Information REF), if present,”
 - RARC N95 – “This provider type may not bill this service,” and
 - If the claim is received with a GA modifier, indicating a signed ABN is on file, Group Code PR (Patient Responsibility) is used, or if the claim contains the GZ modifier, indicating no ABN on file, Group Code CO (Contractual Obligation) is used to assign financial liability to the provider.

Background

- The Medicare Improvements for Patients and Providers Act (MIPPA) of 2008 established coverage provisions for Cardiac Rehabilitation and ICR programs.
 - CMS implemented the MIPPA Cardiac Rehabilitation and ICR statutory coverage provisions through rule making, in the calendar year (CY) 2010 Physician Fee Schedule (PFS), by adding Section 410.49 (Cardiac rehabilitation program and intensive cardiac rehabilitation program: Conditions of coverage) to the Public Health Code of Federal Regulations (42 CFR).
 - The regulation at 42 CFR 410.49 includes all coverage provisions for Cardiac
-
-

Rehabilitation and ICR items and services, identifies definitions, covered indications, settings, physician supervision requirements, and physician standards, required Cardiac Rehabilitation and ICR components, limitations to the number of sessions covered, and the period of time over which the sessions may be covered.

- On October 30, 2009, the CY 2010 PFS Final Rule with Comment was finalized and put on display and is available at <http://edocket.access.gpo.gov/2009/pdf/E9-26502.pdf> on the Internet. The Final Rule was published in the Federal Register on November 25, 2009, and is available on pages 62004-62005.
 - ICR services means a physician-supervised program that furnishes the same items/services under the same conditions as a Cardiac Rehabilitation program but must also demonstrate through peer-reviewed published research that it improves patients' cardiovascular disease through specific outcome measurements that are described in 42 CFR 410.49(c).
-
-

**Operational
Impact**

Medicare contractors will not research and adjust any Cardiac Rehabilitation or ICR claims (HCPCS 93797, 93798, G0422, and G0423), processed prior to the implementation of CR6850. However, they will adjust claims that are brought to their attention.
