## Welcome to the Centers for Medicare & Medicaid Services (CMS) ICD-10 Web site.

Here you will find:

- Resources to help you prepare for the U.S. health care industry's change from ICD-9 to ICD-10 for medical diagnosis and inpatient procedure coding
- Links to CMS Version 5010 information

These two transitions will require system and business changes throughout the health care industry. ICD-10 will affect coding for everyone covered by the Health Insurance Portability and Accountability Act (HIPAA), not just those who submit Medicare claims

## About the ICD-10 Transition on October 1, 2013

ICD-10 codes must be used on all HIPAA transactions, including outpatient claims with dates of service, and inpatient claims with dates of discharge on and after October 1, 2013. Otherwise, your claims and other transactions may be rejected, and you will need to resubmit them with the ICD-10 codes. This could result in delays and may impact your reimbursements, so it is important to start now to prepare for the changeover to ICD-10 codes.
