

## MS-DRG Definitions Manual V36.0 ERRATA R1

The following is a list of issues discovered in the MS-DRG V36.0 ICD-10 MS-DRG Definitions Manual that have been resolved in this current MS-DRG V36.0 ICD-10 MS-DRG Definitions Manual Release (R1).

**Definitions Manual Issue:** The ICD-10 MS-DRG Definitions Manual v36.0 did not reflect the resequencing of the diagnosis and procedure code lists as finalized in the FY 2019 IPPS/LTCH PPS final rule for MS-DRGs 11, 12 and 13.

DRG 011 TRACHEOSTOMY FOR FACE, MOUTH & NECK DIAGNOSES OR LARYNGECTOMY WITH MCC  
DRG 012 TRACHEOSTOMY FOR FACE, MOUTH & NECK DIAGNOSES OR LARYNGECTOMY WITH CC  
DRG 013 TRACHEOSTOMY FOR FACE, MOUTH & NECK DIAGNOSES OR LARYNGECTOMY WITHOUT CC/MCC

**Description:** We stated that the list of principal diagnosis codes for face, mouth and neck would be sequenced first, followed by the list of tracheostomy procedure codes and lastly, the list of laryngectomy procedure codes.

**Resolution:** The list of principal diagnosis codes for face, mouth and neck are now sequenced first, followed by the list of tracheostomy procedure codes and lastly, the list of laryngectomy procedure codes. This does not require any additional changes in the definitions manual or in the ICD-10 MS-DRG Grouper software version 36.

**Definitions Manual Issue:** There were 168 principal diagnosis code(s) for which 65 secondary diagnosis codes are excluded from acting as a complication or comorbidity (CC) or major complication or comorbidity (MCC) that were erroneously omitted from the assigned Principal Diagnosis (PDx) Collection group in Appendix C

**Description:** Appendix C is a list of all of the codes that are defined as either a complication or comorbidity (CC) or a major complication or comorbidity (MCC) when used as a secondary diagnosis. Part 1 lists these codes.

Each code is indicated as CC or MCC. If the CC or MCC is allowed with all principal diagnoses, then the phrase NoExcl follows the CC/MCC indicator. Otherwise, a link is given to a collection of diagnosis codes which, when used as the principal diagnosis, will cause the CC or MCC to be considered as only a non CC.

**Resolution:** We have updated the PDx Collection groups in Appendix C to accurately reflect the 168 principal diagnosis code(s) for which the 65 secondary diagnosis codes are excluded from acting as a complication or comorbidity (CC) or major complication or comorbidity (MCC). This update also includes the creation of new PDx Collection Groups. A table listing the secondary diagnosis codes, the PDx Collection group number and the principal diagnosis code(s) is shown below.

**Definitions Manual Issue:** 50 procedure code pairs erroneously missing from Appendix E

Appendix E Part 3 lists the procedure combinations for which the combination is designated non-OR even though one or more of the procedures in the combination is O.R.

Description: We have removed 44 procedure code pairs from Appendix E Part 3 because both codes in the pair are non-OR procedures and no longer meet the definition for Appendix E Part 3. The remaining 6 procedure code pairs that do meet the definition for Appendix E Part 3 were erroneously missing from the ICD-10 MS-DRG v36 Definitions Manual.

Resolution: The 6 procedure code pairs are now reflected in Appendix E Part 3.

A table listing the 6 procedure code pairs that were erroneously missing from Appendix E Part 3 is included below, followed by a table of the 44 procedure code pairs that have been removed. This does not require any additional changes in the definitions manual or in the ICD-10 MS-DRG GROUPER software version 36.
