## Health Status Outcomes Summary

No changes in beneficiary health outcomes resulting from the Medicare Durable Medical Equipment, Prosthetics, Orthotics, and Supplies (DMEPOS) Competitive Bidding Program have been observed to date.

These materials contain the mortality and morbidity rates for one group of beneficiaries being monitored: the standard wheelchairs access group. Utilizer Groups are composed of Medicare beneficiaries who have a claim for the product in the month of observation or any of the previous three months. Access Groups include beneficiaries who are likely to use the product and are determined by whether a beneficiary has a condition related to product use. The standard wheelchairs access group comprises beneficiaries who are likely to need standard wheelchairs and wheelchair parts.

The health outcomes being measured are deaths, hospitalizations, emergency room visits, physician visits, admissions to skilled nursing facilities, average number of days spent hospitalized in a month, and average number of days in a skilled nursing facility in a month.

To control for historical trends, each competitive bidding area (CBA's) historical baseline for each rate is provided, beginning in January 2011. Historical rates for both Round 2 CBAs and non-CBAs are provided for each of the four DME MAC regions to provide context for the Round 1 Recompete CBA rates. The rates in Round 1 Recompete CBAs continue in line with historical rates and they also track closely with rates in non-competitive bid regions.

Note that mortality and morbidity rates generally display seasonal trends. The first quarter of each year typically has elevated rates of mortality and morbidity; however, the trends generally mirror past seasons and are closely matched by the non-competitive bid regions.

Additionally, rates that appear more variable tend to be based on a smaller number of beneficiaries. For example, the Utilizer Groups have fewer beneficiaries than the Access Groups, so rates for the Utilizer groups tend to be more variable.

### **\*IMPORTANT\***

This update incorporates changes to our monitoring approach that commenced at the end of the Round 1 Rebid program on December 31, 2013, and due to the availability of complete data for the first full year of the Round 1 Recompete program that was implemented January 1, 2014. These changes include:

- Monitoring usage and health outcomes related to six additional product categories (Transcutaneous Electric Nerve Stimulation (TENS), Nebulizers, Infusion Pumps, Commode Chairs, Seat Lifts, and Patient Lifts) that were introduced under Round 1 Recompete. We monitor usage and health outcome rates in six corresponding utilizer groups, and seven access groups. For the infusion pump product category, we monitor rates in two separate access groups.

- Monitoring both Round 1 Recompete and Round 2 using the list of Healthcare Common Procedure Coding System (HCPCS) codes that are covered by Round 1 Recompete.
- Comparing trends between the three groups of beneficiaries (mentioned above) in Round 2 and Round 1 Recompete CBAs, instead of Round 1 Rebid CBAs.
