1. Some data necessary to classify hospitals by category were missing; thus, the total number of hospitals in each category may not equal the national total.
2. This column shows the impact of updating the wage index used to calculate payment using the proposed FY 2002 hospital inpatient wage index after geographic reclassification by the Medicare Geographic Classification Review Board. The hospital inpatient proposed rule for FY 2002 was published in the Federal Register on May 4, 2001.
3. This column shows the impact of recalibrating the APC weights based on 1999-2000 hospital claims data and of the reassignment of some HCPCs to APCs as discussed in this rule.
4. This column shows the difference in calculating outliers on a APC-specific rather than bill basis.
5. This column shows changes in total payment from CY 2001 to CY 2002. It incorporates all of the changes reflected in columns 1, 2, 3, and 4. In addition, it shows the impact of the CY 2002 payment update and of changes in pass-through payments from CY 2001 to CY 2002. The sum of the columns may be different from the percentage changes shown here due to rounding.
