

MEASURE SPECIFICATIONS AND DRUG LIST FOR “USE OF HIGH RISK MEDICATIONS IN THE ELDERLY” MEASURE IN THE 2011 INDIVIDUAL PHYSICIAN QRUR REPORTS

Document Length: 424 Pages

Overview

Measure Description

- The percentage of patients 65 years of age and older who received at least one high-risk medication.
- The percentage of patients 65 years of age and older who received at least two different high-risk medications.

Deviations from HEDIS Specifications

- The denominator from the third-party specifications includes beneficiaries who have “continuous medical and pharmacy benefit enrollment for the measurement year with no more than one gap in enrollment of up to 45 days during the measurement year. The patient must be enrolled as of December 31 of the measurement year.” The common enrollment specifications (and exclusion of 2011 part year beneficiaries) mean that all beneficiaries in the denominator will have enrollment for all of 2011. Also, the allowed gap of 45 days for HEDIS specs is different from the one-month gap allowed in our specs.
- The third-party specifications do not specify the setting for the NDC codes, but there are no NDC codes on claims other than Part D so we only search Part D claims.

Assumptions/Notes

- The measurement year is 2011.
- Measure denominator requires continuous medical and pharmacy benefit enrollment for the measurement year with no more than one gap in enrollment of up to 45 days during the measurement year. The patient must be enrolled as of December 31 of the measurement year. Note that Mathematica’s enrollment pre-processing has already occurred, so this requirement will be met for Parts A and B since part year beneficiaries from 2011 will be previously dropped.
- The look-back period for all claims-based quality measures is no more than 1 year.
- These specs are based on the HEDIS 2011 EP specs, even though the 2010 version is the NQF endorsed version. There are no substantive differences between the 2010 and 2011 specs, so the 2011 specs were used. The name used by NCQA is different than the name used by Mathematica (“drugs to be avoided in the elderly”); NCQA has named it differently because there are certain cases where the drugs should be used.

Data Sources

Denominator inclusion data:

- 2011 Part A file
- 2011 Part B file
- 2011 Part D file

Denominator exclusion data:

- None

Numerator inclusion data:

- 2011 Part D file
-

Denominator

Beneficiaries are included in the denominator if the following criteria are met:

- 65 years and older as of December 31 of the measurement year
- Continuous medical and pharmacy benefit enrollment for the measurement year with no more than one gap in enrollment of up to one month during the measurement year

Enrolled as of December 31 of the measurement

Rate Calculations

For both rates, a lower rate represents better performance.

Technical Specifications

Denominator

The eligible population of beneficiaries who were a) 65 years and older as of December 31 of the measurement year and b) have continuous medical and pharmacy benefit enrollment for the measurement year with no more than one gap in enrollment of one month during the measurement year. The patient must be enrolled in Parts A, B, and D in December of the measurement year.

A. For each beneficiary attributed to a provider use the enrollment arrays created in the enrollment pre-processing program and create NCQA_HRME_DEN = 1 if:

1. 65 <= Years between BENE_DOB and 12/31/2011 **and**

The sum of the Part A, B, and D enrollment flags in each month of 2011 is less than 3 in no more than one month. The sum of the flags in December 2011 must be equal to 3.

Denominator Exclusions

None

Numerator

Numerator 1 - At least one prescription dispensed for any high-risk medication (Appendix A) during the measurement year.

1. For each beneficiary, create NCQA_HRME1_NUM variable
2. Search the 2011 Part D File and flag beneficiaries for inclusion in the numerator.
 - 2.1. NCQA_HRME1_NUM = 1 if
 - 2.2. The beneficiary was dispensed at least one of the drugs identified in Appendix A between 1/1/2011 and 12/31/2011.
3. **Else** NCQA_HRME1_NUM = 0

Numerator 2 - At least two prescriptions dispensed for different high-risk medications (Drug ID column in Appendix A) during the measurement year.

4. For each beneficiary, create NCQA_HRME2_NUM variable
5. Search the 2011 Part D File and flag beneficiaries for inclusion in the numerator.
 - 5.1. NCQA_HRME2_NUM = 1 if
 - 5.2. The beneficiary was dispensed at least two different drugs identified in the Drug ID column of Appendix A between 1/1/2011 and 12/31/2011.

Else NCQA_HRME2_NUM = 0

Provider Performance Measure

A. For each provider, create

$$\text{NCQA_HRME1_RATE} = \left(\frac{\text{Sum of NCQA_HRME1_NUM for attributed beneficiaries}}{\text{Sum of NCQA_HRME1_DEN for attributed beneficiaries}} \right) * 100$$

B. For each provider, create

$$\text{NCQA_HRME2_RATE} = \left(\frac{\text{Sum of NCQA_HRME2_NUM for attributed beneficiaries}}{\text{Sum of NCQA_HRME2_DEN for attributed beneficiaries}} \right) * 100$$
