HD		Hospice discharge assessment: A0050-[1,2] and A0250=[09]
XX		Inactivation record: A0050=[3] and A0250=[01,09]

#### Item Edits

Edit ID	Edit Type	Severity	Edit Text
-3009	Format	Fatal	Values of Code and Checklist Items: Only the coded values listed in the "Item Values" table of the Detailed Data Specifications Report may be submitted for this item.
-3028	Consistency	Fatal	The Item Subset Code (ISC) is a two-character code that indicates the type of record that is being submitted. The set of active items is controlled by the ISC. The submission system will recalculate the ISC and compare the recalculated value with the value that is submitted in ITM_SBST_CD. If the recalculated value does not match the value submitted in ITM_SBST_CD, a fatal error will result. The ISC is defined as follows: If A0050 = [1,2] and A0250 = [01] then ITM_SBST_CD = [HA] If A0050 = [1,2] and A0250 = [09] then ITM_SBST_CD = [HD] If A0050 = [3] and A0250 = [01,09] then ITM_SBST_CD = [XX] For a more complete explanation of the meaning and use of the ISC codes, please refer to the documentation that accompanies these data specifications.

#### Item Values

Value	LOINC Code	Value Text
00		Minimum value
99		Maximum value

#### Item Edits

Edit ID	Edit Type	Severity	Edit Text
-3012	Format	Fatal	Values of Numeric Items: Only the values listed in the "Item Values" table of the Detailed Data Specifications Report may be submitted for this item. The submitted value must be greater than or equal to the minimum value listed in the table and less than or equal to the maximum value listed in the table, or it must match one of the remaining special values (if any) that are listed in the table. The length of the submitted value must not exceed the allowed maximum length for the item. Signed numbers (with a leading plus or minus sign) will not be accepted.
-3013	Format	Fatal	Formatting of Positive Integer Numeric Items: Only positive integer values and the special values (if any) that are listed in the "Item Values" table of the Detailed Data Specifications Report will be accepted for this item. Leading zeroes may be included or omitted from the submitted value as long as the resulting length of the string does not exceed the allowed maximum length for the item. A decimal point and decimal values are not allowed. A sign will not be accepted. The following examples are allowable if the value to be submitted is equal to [1] and the maximum length is equal to 2: [1], [01]. The following values are NOT allowed and will lead to a fatal error: [1.], [1.0], [01.], [01.0], [1.1], [01.1], [1.01], [+1], [-2], [+1.3], [-4.5].
-3025	Consistency	Fatal	The first record that is submitted to correct or inactivate an existing record must have a value of "01" in CRCTN_NUM (correction number). If that correction/inactivation is accepted and if a subsequent correction/inactivation is required, it must have a value of "02", and so on. In other words, the correction number in CRCTN_NUM on the first correction/inactivation must be "01", and the value on each subsequent correction/inactivation must be incremented by 1. If the value submitted in CRCTN_NUM is incorrect, a fatal error will result and the submitted record will be rejected.
-3052	Consistency	Fatal	If A0050=[1], then CRCTN_NUM must equal [00].

Fatal

FAC\_ID is the facility/provider ID.

a) This must be the FAC\_ID assigned to the provider upon registration. The submitted value must match the FAC\_ID in the QIES Assessment Processing System for the facility or provider.

b) A user submitting a file for a provider must be authorized to submit for the provider identified by the FAC\_ID item in the file.
