**Project Title:**

Development of Inpatient Outcome Measures for the Merit-based Incentive Payment System (MIPS)

**Dates:**

September 2017 through September 2018.

**Project Overview:**

The Centers for Medicare & Medicaid Services (CMS) has contracted with Yale New Haven Health Services Corporation/Center for Outcomes Research & Evaluation (CORE) to adapt one or two claims-based hospital measures to assess the quality of care provided to Medicare beneficiaries by clinicians who are eligible to participate in the MIPS (hereinafter, MIPS eligible clinicians). The contract name is Development, Reevaluation, and Implementation of Hospital Outcome/Efficiency Measures for Hospital and Eligible Clinicians. The contract number is HHSM-500-2013-13018I, Task Order HHSM-500-T0001.

Previously, CMS/CORE developed a range of measures to assess hospital quality. CMS/CORE plans to adapt one or two of these existing measures to assess care provided by MIPS eligible clinicians. The measure(s) already specified for the hospital setting cover a range of acute and/or chronic conditions, and elective procedures. The adapted measure(s) will likely include one outcome measure assessing a range of hospitalized patients and one measure based on an elective procedure. The measure(s) will assess each clinician's outcome rate, such as readmission rate or complications rate, relative to that of other MIPS eligible clinicians with similar patients. The quality measure scores will be calculated using patient characteristics and outcomes documented on routinely submitted Medicare claims; therefore, the clinicians whose performance will be assessed by the quality measures will not need to submit any additional data directly to CMS. As part of its measure development process, CMS asks measure developers to convene groups of stakeholders and experts who contribute direction and thoughtful input to the measure developer during measure development and maintenance. The following individuals in [Table 1](#) were selected and have agreed to serve as the Technical Expert Panel for this project.
