**Project Title:**

Development of Inpatient Outcome Measures for the Merit-based Incentive Payment System (MIPS)

**Dates:**

September 2018 through March 2019.

**Project Overview:**

The Centers for Medicare & Medicaid Services (CMS) has contracted with Yale New Haven Health Services Corporation/Center for Outcomes Research & Evaluation (CORE) to adapt one or two claims-based hospital measures to assess the quality of care provided to Medicare beneficiaries by clinicians who are eligible to participate in the MIPS (hereinafter, MIPS eligible clinicians). The contract name is Development, Reevaluation, and Implementation of Hospital Outcome/Efficiency Measures for Hospital and Eligible Clinicians. The contract number is HHSM-500-2013-13018I, Task Order HHSM-500-T0001.

Previously, CORE developed a range of measures to assess hospital quality. The primary goal of this project is to re-specify (or adapt) two hospital quality measures for the measurement of clinicians. The two measures CORE will re-specify are the:

1. Risk-Standardized Complication Rate Following Elective Primary Total Hip Arthroplasty and/or Total Knee Arthroplasty (hereafter “hip/knee complication measure”).
2. Hospital-Wide All-Cause Unplanned Readmission Measure (hereafter “HWR measure”).

CMS will re-specify these two measures for use in assessing individual and/or groups of clinicians participating in the Merit-based Incentive Payment System (MIPS). The re-specified measures will assess each Clinician’s or Clinician Group’s readmission or complication rate, respectively, relative to that of other MIPS participating clinicians with similar patients. One measure, HWR, is already in use in the MIPS; this is an updated re-specification. The quality measure scores will be calculated using patient characteristics and outcomes documented on routinely submitted Medicare claims; therefore, the clinicians whose performance will be assessed by the quality measures will not need to submit any additional data directly to CMS.

As part of its measure development process, CORE convened groups of stakeholders and experts who contribute direction and thoughtful input to the measure developer during measure development and maintenance. The following individuals in [Table 1](#) were selected and have agreed to serve as the Technical Expert Panel for this project.
