

## TECHNICAL EXPERT PANEL COMPOSITION (MEMBERSHIP) LIST

---

**Project Title:**

Development of Outpatient Outcome Measures for the Merit-based Incentive Payment System (MIPS)

**Dates:**

Yale New Haven Health Services Corporation Center for Outcomes Research and Evaluation (CORE) anticipates holding approximately no fewer than five teleconference meetings between July 2017 and July 2019. Each teleconference meeting will last 2 hours.

**Project Overview:**

CMS is developing quality measures to assess the quality of care provided by clinicians who are eligible to participate in the MIPS (hereinafter, MIPS eligible clinicians). The measures will assess each eligible clinician's outcome rate (e.g., inpatient admissions, emergency department [ED] visits, and/or observation stay rates) relative to that of other MIPS eligible clinicians with similar patients. The measures will be risk adjusted for patient complexity, unlike other measures currently applied at the eligible clinician or group level. The quality measure scores will be calculated using patient characteristics and outcomes documented on routinely submitted Medicare claims; therefore, the clinicians whose performance will be assessed by the quality measures will not need to submit any additional data directly to CMS. The Technical Expert Panel (TEP) will provide input to help shape the approach to the measures, such as which types of admissions should be counted in the measures.

CORE is completing this work under contract to CMS. The contract name is Measure & Instrument Development and Support (MIDS): Development, Reevaluation, and Implementation of Outpatient Outcome/Efficiency Measures. The contract number is HHSM-500-2013-13018I.

As part of its measure development process, CORE convenes groups of stakeholders and experts who contribute direction and thoughtful input during measure development and maintenance. The appointment term for the TEP was originally from July 2017 through September 2018. CORE extended the TEP agreement until the project's completion in July 2019 for completion of measure development. The individuals named in [Table 1](#) were selected and have agreed to serve as the TEP for this project. TEP members who participated in the early phase of measure development through September 2018 but who are no longer participating are denoted by an asterisk (\*).
