

## TECHNICAL EXPERT PANEL (TEP) COMPOSITION (MEMBERSHIP) LIST

**Project Title:** Development, Reevaluation, and Implementation of Outpatient Outcome/Efficiency Measures

**Dates:** October 2018 through July 2019

### Project Overview:

The Centers for Medicare & Medicaid Services (CMS) has contracted with Yale New Haven Health Services Corporation Center for Outcomes Research and Evaluation (CORE) and its partner, the Lewin Group (Lewin), to develop an electronic clinical quality measure (eCQM) that assesses the percentage of patients that received appropriate treatment for ST-segment elevation myocardial infarctions (STEMIs) in the emergency department (ED). The contract name is Development, Reevaluation, and Implementation of Outpatient Outcome/Efficiency Measures. The contract number is HHSM-500-2013-13018I. As part of its measure development process, CMS asks measure developers to convene groups of stakeholders and experts who contribute direction and thoughtful input to the measure developer during measure development and maintenance.

Per Version 14.0 of CMS's *MMS Blueprint for the CMS Measures Management System*, eCQMs are based on information readily available in electronic health records (EHR) in a structured format and can be readily accessed without affecting facility workflow. The electronic specification of the measure will ensure that all data elements used to calculate the measure's performance score can be captured in the EHR.

A roster for the TEP convened to support the STEMI eCQM—including each member's name, credentials, professional role, perspective, and conflicts of interest—is provided in the table below. Please note that none of the members selected for this expert panel reported conflicts of interest that preclude them from participating.
