

Activation of Validation Edits for Providers with Multiple Service Locations

MLN Matters Number: SE19007 **Revised**

Related Change Request (CR) Number: [9613](#); [9907](#)

Revised Article Release Date: **August 16, 2023**

Effective Date: N/A

Related CR Transmittal Numbers: R1704OTN and R1783OTN

Implementation Date: N/A

What's Changed: We added new information about the practice location address screen for round 3 testing. Substantive changes are in dark red on pages 3 and 4.

Affected Providers

- Hospitals
- Other providers with multiple service locations submitting Outpatient Prospective Payment System (OPPS) claims to Medicare Administrative Contractors (MACs)

What You Need to Know

This Article tells you about enforcing the systematic validation edits requirements in Section 170 of the [Medicare Claims Processing Manual](#), Chapter 1. These aren't new requirements. CMS discussed these requirements in CRs 9613 and 9907, effective January 1, 2017. On March 24, 2020, we announced a delay until further notice to the activation of these for OPPS providers with multiple service locations. Make sure your billing staff knows of these instructions.

Background

Increasingly, hospitals operate an off-campus, outpatient, provider-based, department of a hospital. In some cases, these additional locations are in a different payment locality than the main provider. For Medicare Physician Fee Schedule (PFS) and OPPS payments to be accurate, we use the service facility address of the off-campus, outpatient, provider-based, department of a hospital facility to decide the locality in these cases.

Under Section 1833(t)(21) of the [Social Security Act](#), you must identify non-excepted services at an off-campus, outpatient, provider-based department of a hospital. We'll pay for non-excepted items and services you bill on an institutional claim under the PFS and not the OPPS rates.

Claim Level Information:

You must report the service facility location for an off-campus, outpatient, provider-based department of a hospital in the 2310E loop of the 837 institutional claim transaction.

Direct data entry (DDE) submitters report the service facility location for an off-campus, outpatient, provider-based, department of a hospital. Paper submitters report the service facility address information in Form Locator (FL) "01" on the paper claim form. For PFS services, Medicare systems use this service facility information to decide the applicable payment method or locality whenever it's present.

Medicare systems will validate service facility location to make sure you're providing services in a Medicare-enrolled location. The validation will be exact matching based on the information on the Form CMS-855A you submitted to PECOS. Make sure your claims data matches your PECOS data.

When you provide services on a claim from the billing provider address:

- Report the billing provider address only in the billing provider loop 2010AA
- Don't report any service facility location in loop 2310E (or in DDE MAP 171F screen for DDE submitters)

When you provide services on a claim from 1 campus of a multi-campus provider that reports a billing provider address:

- Report the campus address where you provided the services in the service facility location in loop 2310E if the service facility address is different from the billing provider address loop 2010AA
- Use DDE MAP 171F screen for DDE submitters

When you provide services on a claim from the same off-campus, outpatient, provider-based, department of a hospital:

- Report the off-campus, outpatient, provider-based department service facility address in the service facility provider loop 2310E
- Use in DDE MAP 171F screen for DDE submitters

When you provide services on a claim at multiple locations:

- If you provide any services on the claim at the billing provider address, report the billing provider address only in the billing provider loop 2010AA, and don't report the service facility location in loop 2310E (or in DDE MAP 171F screen for DDE submitters)
- If you provide any services on the claim at more than 1 of the campus locations of a multi-campus provider that isn't the main billing provider address, report the service facility address in loop 2310E if all of the service facility addresses are different from the billing provider address in loop 2010AA (or in DDE MAP 171F screen for DDE submitters) from the first registered campus encounter of the "From" date on the claim
- If you provide any services on the claim at 1 of the campus locations of a multi-campus provider that isn't the main billing provider address and you also provide services on the claim at other off-campus department practice locations, report the campus address where you provided the services in the service facility location in loop 2310E if the

service facility address is different from the billing provider address in loop 2010AA (or in DDE MAP 171F screen for DDE submitters)

- If you provide no services on the claim at the billing provider address or any campus location of a multi-campus provider, report the service facility address in loop 2310E (or in DDE MAP 171F screen for DDE submitters) from the first registered department practice location encounter of the “From” date on the claim.

National Testing

Round 1 Testing

During the week of July 23 - 30, 2018, we did a national trial activation of the FISS Edits 34977 and 34978 in production environments. We activated Reason Codes 34977 (claim service facility address doesn't match provider practice file address) and 34978 (Off-campus provider claim line that contains a HCPCS must have a PN or PO). The testing was transparent to you, as we suspended most claims impacted by the test for 1 billing cycle and then we turned editing off so the claim could continue processing as normal.

This national test showed that many providers aren't sending the correct exact service facility location on the claim that produces an exact match with the Medicare-enrolled location entered into PECOS for their off-campus provider departments.

Most discrepancies had to do with spelling variations. For example, in PECOS, the word you entered was “Road” as part of your address, but you entered “Rd” or “Rd.” as part of the address on the claim submission. Another example, in PECOS the word entered was “STE” as part of the address, but you entered “Suite” as part of your address on the claim submission.

Round 2 Testing

Make sure all practice locations are present in PECOS and, if any locations aren't in PECOS, submit the 855A to add the location. You can review your practice locations in PECOS or in the confirmation letter from PECOS when you last added a location to see if your service facility address for the off-campus provider department locations you put on your claim is an exact match.

We did a second round of national testing in November 2018. You should have used the time before this national testing to correct the off-campus provider department location addresses within your billing systems to match exactly to PECOS for your off-campus provider departments.

Round 3 Testing

Before round 3 testing, we issued instructions to the FISS maintainer to make the practice location address screen available to providers in DDE in the April 2019 system quarterly release. Starting in April 2019, the practice location screen is available in DDE. We postponed full production implementation for 3 more months to give you time to adjust to the new practice location screen. **Practice address sent on the claim in MAP 171F screen, must match the address found in the MAP 1AB1/ MAP 1AB2 screens or the claim will be returned to the provider (RTP).**

Round 3 Testing Update & Full Production Delayed

We completed round 3 testing. We decided to postpone full production implementation until further notice. Once we implement full production, we'll turn on the edits permanently and set them to RTP claims that don't exactly match. You can make corrections to your service facility address for a claim submitted in the DDE MAP 171F screen for DDE submitters. If you need to add a new or correct an existing practice location address, you'll need to submit a new 855A enrollment application in PECOS.

Round 4 Testing Update & Full Production Delayed Due to COVID-19

We postponed full production implementation due to the COVID-19 public health emergency (PHE).

Round 5 Testing

We did another round of testing in May 2023 after the PHE ended to make sure we've a smooth implementation of the edits. We did this testing to make sure providers have used the new practice location screen tool and made necessary claims submission updates to their systems and were prepared for implementation of the edits after the end of the PHE.

Round 5 Testing Update & Full Production

During Round 5 testing, overall claim volume for Reason Codes 34977 (claim service facility address doesn't match provider practice file address) and 34978 (Off-campus provider claim line that contains a HCPCS must have a PN or PO) trended downward. We didn't identify any new issues during Round 5 Testing.

On August 1, 2023, we'll start deploying editing into full production and we've told the MACs to develop implementation plans to permanently turn on the Reason Codes and set them up to RTP claims that don't exactly match. Your MAC will notify you of their implementation plans.

You can make corrections to your service facility address for a claim submitted and editing reveals the claim has typographical errors that don't match the official postal address in PECOS and in the DDE MAP 171F screen for DDE submitters. If you need to add a new practice location that hasn't been enrolled or correct an existing practice location address that's changed since initial enrollment, you'll still need to submit a new 855A enrollment application in PECOS.

We expect that the almost 7-year time frame that the edits haven't been active gave you ample time to validate your claims submission system and the PECOS information for your off-campus provider departments are exact matches.

More Information
