
RESEARCH REQUEST PACKET

This form shall serve as the research request packet for organizations interested in receiving historical Medicare claims data for use in developing episode definitions for Models 2, 3, and 4 of the Bundled Payments for Care Improvement initiative.

In order to process your request for historical Medicare claims data, you will need to submit the following items:

- ✓ Completed Research Request Packet
- ✓ Data Use Agreement
- ✓ Signature pages for additional data users (if needed)

Please submit these items simultaneously and as soon as possible by email to: BundledPayments@cms.hhs.gov. All forms must be submitted in a searchable digital format (e.g., searchable PDF) with attachments encrypted. Encryption must be compliant with AES 256 encryption guidelines. A decryption key must be sent in a separate email from these forms.

All Research Request Packets and Data Use Agreements must be received by 5:00 pm EDT November 4th, 2011. These documents will only be accepted via email.

Any questions regarding data provision for the Bundled Payments for Care Improvement initiative should be submitted by email to: BundledPayments@cms.hhs.gov. Responses to questions will be shared publicly to ensure that all applicants have access to clarifying information regarding the initiative and the application process. Questions and answers will be posted on the Bundled Payments for Care Improvement website, <http://www.innovations.cms.gov/areas-of-focus/patient-care-models/bundled-payments-for-care-improvement.html>.

NATURE OF THE DATA PROVIDED

In order to facilitate the definition of robust episodes, CMS will provide historical Medicare claims data that spans care settings. The following Limited Data Set (LDS) files will be provided:

- Inpatient Standard Analytic File (SAF)
- Outpatient SAF
- Home Health Agency SAF
- Skilled Nursing Facility SAF
- Carrier SAF
- Durable Medical Equipment SAF
- Denominator

It will be necessary for potential applicants to analyze their patient population to determine the counties from which they draw the majority of their patients. CMS has divided the country into Hospital Referral Clusters (HRCs), which are defined by beneficiary county of residence. Applicants will be responsible for identifying the HRC(s) most appropriate for their analyses. A list of HRCs appears on page 2, and an appendix defining the exact counties included in each HRC begins on page 11.

Date: _____

Maribel Franey, Division Director
Division of Information Security & Privacy Management (DISPM)
Centers for Medicare & Medicaid Services (CMS)

To Whom It May Concern:

I am requesting CMS Limited Data Set (LDS) data to conduct research. I will be using this data to complete a study entitled *Bundled Payments for Care Improvement Episode Development*. This study proposes to develop robust definitions for acute, post-acute, or combined acute and post-acute care episodes. The episode definitions will include conditions that provide the greatest opportunity for cost savings to Medicare in the context of improved care for beneficiaries, providers with whom to partner, and the optimal period of time within which to accept accountability for cost and quality.

The following CMS LDS files are needed for my research:

Years: 2008 and 2009

File Names (Limited Data Set): Inpatient SAF
 Outpatient SAF
 Home Health Agency SAF
 Skilled Nursing Facility SAF
 Carrier SAF
 Durable Medical Equipment SAF
 Denominator

Geographical Regions: (Enter HRCs from list on page 2)

I have included with this letter a study protocol, request worksheet, and LDS Data Use Agreement.

If you have any questions, my organization's contact person is as follows:

Contact Name:

Sincerely,

Signature:

Requestor name:

Requestor address:

RESEARCH PROTOCOL

1. INTRODUCTION

Title: Bundled Payments for Care Improvement Episode Development

Purpose:

This application is for Limited Data Set (LDS) files to support definition of episodes as part of the Bundled Payments for Care Improvement initiative through the Center for Medicare and Medicaid Innovation (CMMI). Through the use of these LDS files, the User will attempt to develop robust definitions for acute, post-acute, or combined acute and post-acute care episodes. The definitions will include elements such as (1) condition(s) that provide the greatest opportunity for savings to Medicare in the context of improved care for beneficiaries, (2) specific providers with whom to partner, and (3) the optimal period(s) of time within which to accept accountability for cost and quality, and will be more detailed as necessary. The User will additionally estimate expenditures for providing this care.

The episodes developed here will be used to improve the Medicare program through payment reform. By aligning the incentives of hospitals and providers, episode-based payment strategies aim to improve care coordination, achieving the three-part aim of better care, better health, and lower cost. The episode definitions resulting from this research will be generalizable, and Medicare providers will be able to adjust them to meet the needs of their specific patient population. The episodes are expected to align incentives towards care redesign in a manner that benefits both patients and providers.

2. PROJECT ISSUES AND METHODS

List the MS-DRGs around which you propose to develop episodes, and describe the type of episodes you wish to explore (acute, post-acute, or combined). Note that in your final application, you will not be limited to the MS-DRGs you list here.

Describe in detail the plan to analyze the data for the project, including the methodology and procedures that will be used.

The data generated from this analysis, if promising, will be presented to CMS in the form of an application for participation in the Bundled Payments for Care Improvement initiative. The format presented in the application will be followed as closely as possible in generating episode definitions. If you anticipate generating and using further tabulations, aggregations, or other data presentations beyond the scope of this application, please indicate the forums under which you plan to present these results here.

State whether any of the methodology or tools contain proprietary information (proprietary information is exempt from release requirements under the Freedom of Information Act if it falls within the scope of Exemption 4, 5 U.S.C. § 552(b)(4)).

3. DATA MANAGEMENT SAFEGUARDS

Who will have the main responsibility for organizing, storing, and archiving the data? Please provide name(s) and job title(s).

Explain the infrastructure (facilities, hardware, software, other) that will secure the CMS data files.

Are additional organizations involved in analyzing the data files provided by CMS? If so, please indicate how these organizations' analysts will access the data files:

VPN Connection

Will travel to physical location of data files at requesting organization

Request that a copy of the data files be housed at second location

Other

Describe the procedures that will be used to protect the privacy and identity of an individual. For example, how will the privacy of information of beneficiaries in the files be safeguarded and guaranteed?

Describe safeguards that would be followed for permitted disclosures of data, if applicable.

No disclosures of data to anyone outside CMS will be permitted.

4. KEY PERSONNEL

List all staff, including consultants, who will have access to the limited data set file(s) and their role in the project.

5. DISSEMINATION/IMPLEMENTATION

The findings of this research, if promising, will be used in application for awards under the Bundled Payments for Care Improvement initiative of the Centers for Medicare and Medicaid Innovation. Through this mechanism, episodes and payment proposals have the potential to influence the care received by millions of Medicare beneficiaries towards the three-part aim of improving care, improving health, and reducing cost. The results of this research will not be sold or marketed for commercial purposes.

Data will not be disseminated on the individual or aggregate level.

6. PROPRIETARY INFORMATION

If the Research Application provided by the Requesting Organization contains proprietary information, a statement to that effect must be included in Section 2, above, and submitted to CMS.

Proprietary information is exempt from release under the Freedom of Information Act if it falls within the scope of Exemption 4, 5 U.S.C. § 552(b)(4).

7. FINANCIAL ARRANGEMENT

The Centers for Medicare and Medicaid Services will cover the cost of providing limited data sets to applicants. These will include the files listed on the Data Use Agreement, within a geographic region to be determined based on the patient population of the applicant organization. Note that this negates Section 10 of the Data Use Agreement, which indicates that the organization applying for data will be responsible for all associated costs. Organizations whose research protocols and Data Use Agreements are approved will be provided the amount of data deemed acceptable to CMS at no cost to them.

DATA FILES REQUESTED

Upon successful completion of both this research request packet and the data use agreement, historical Medicare claims data will be provided to you, with the specific files you receive to be based on your geographical location. A list of Hospital Referral Clusters (HRCs) is available on page 2 of this packet, and a comprehensive listing of the counties included in each HRC is located in the appendix.

Please list the files that you are requesting, based on your patient population. If you are requesting more than one HRC, please specify the percent of your patient population that resides in each cluster. Note that the HRCs are divided by county of beneficiary residence.

EXTRACT SPECIFICATIONS

Data extracts will be delivered in CSV format with a SAS program.
USB hard drives will be used as the output media.

SHIPPING INFORMATION

To whom should the data be shipped?
