Evaluation of the HHVBP Model

2017 Annual Report: Appendix of Supplemental Tables and Results

Table 13n. Sample Size for D-in-D Aggregate Medicare Spending and Utilization Results for HH FFS Episodes, CY 2016

Measure	Total Effect	
	HHVBP	Comparison
Medicare SNF Spending/ all FFS HH Episodes	6,180,849	6,180,642
SNF Use among/ All FFS HH Episodes	6,180,849	6,180,642
Medicare Unplanned ACH Spending/all FFS HH Episodes	6,180,849	6,180,642
Unplanned ACH / First FFS HH Episodes	3,624,150	3,623,993
Unplanned ACH / All FFS HH Episodes	6,180,849	6,180,642
ED Use (no Hospitalization) / First HH Episodes	3,624,150	3,623,993
Medicare HH Spending/FFS HH Episode	10,440	48,760

Sample size reflects episodes from 2012-2016 with non-missing data.

Table 14n. Sample Size for D-in-D Aggregate Medicare Spending and Utilization Results for all FFS Beneficiaries, CY 2016

Measure	Total Effect	
	HHVBP	Comparison
Medicare HH Spending/FFS Beneficiary	10,440	48,760
HH Episodes/1,000 FFS Beneficiaries	10,440	48,760

Sample size reflects county-quarters from 2012-2016 with non-missing data. The counties represent an average over a number of FFS beneficiaries, and are weighted as such. The HHVBP county weights equal the number of FFS beneficiaries in the county during the quarter. The comparison county weights were calculated such that the weighted average of the measure equaled the weighted average in the HHVBP state(s) over all quarters of the baseline period. Weights for comparison counties were scaled to equal the total number of FFS beneficiaries in the HHVBP state(s) in each quarter.

4. TPS Supporting Analyses

Table 14. D-in-D Estimates of Measure Scores for 17 Performance Measures Used in TPS Creation

Measure	D-in-D	P Value
Drug Education on Medications Provided to Patient/Caregiver during Episodes of Care	0.369	0.002
Influenza Immunization Received for Current Flu Season	-0.010	0.914
Pneumococcal Polysaccharide Vaccine Ever Received	0.077	0.398
Improvement in Ambulation-Locomotion	0.598	<.0001
Improvement in Bathing	0.576	<.0001
Improvement in Bed Transferring	0.508	<.0001
Improvement in Dyspnea	0.147	0.146
Improvement in Pain Interfering with Activity	0.613	<.0001
Improvement in Management of Oral Medications	0.238	0.014
Discharged to Community	0.470	<.0001
Unplanned Hospitalization / First HH Episodes (%)	0.030	0.773
ED Use (no Hospitalization) / First HH Episodes (%)	0.576	<.0001
How often the home health team gave care in a professional way	-0.068	0.578
How well did the home health team communicate with patients	0.101	0.423
Did the home health team discuss medicines, pain, and home safety with patients	-0.464	0.0001
How do patients rate the overall care from the home health agency	-0.017	0.888
Would patients recommend the home health agency to friends and family	-0.044	0.739

5. New HHVBP Measures

Table 15. Reporting Rates for New HHVBP Measures in 2016, by HHA Characteristic

Agency Characteristics		All 3 Measures Reported	N
All HHAs		73.6%	1622
Size Cohorts	Small HHAs	47.1%	140
	Large HHAs	73.2%	974
	Single Size (Statewide)	85.0%	508
Setting	Freestanding	72.0%	1459
	Hospital-Based	87.1%	163
Age	Open at Baseline	50.8%	248
	Opened < 2012	77.7%	1374
Ownership Status	For-Profit	70.0%	1210
	Government-Owned	80.2%	111
	Non-Profit	85.4%	301

6. Use of HHVBP Connect

6.1 Background

HHVBP Connect is an interactive web-based platform that allows HHAs in the nine HHVBP Model states to:

- “Find the latest updates for the HHVBP Model; download valuable resources to help [agencies] succeed in the model;
- View upcoming HHVBP events and key Model milestones;
- View the ‘2015 Benchmarks and Achievement Thresholds’;
- Obtain the updated Frequently Asked Questions (FAQs);
- View past webinars and register for future webinars;
- Share best practices and chat with colleagues in the nine Model states; and,
- Understand when to submit New Measures data to the HHVBP Secure Portal and when and how to retrieve performance reports.”¹

It was launched in January 2016, coinciding with the beginning of HHVBP Model implementation. HHVBP Connect allows the HHVBP Technical Assistance (TA) staff and HHAs in the nine intervention states to securely login to the platform and communicate with each other and share best practices for improving performance and quality among competing HHAs. The resources available on the HHVBP Connect website include newsletters, FAQs, quality improvement tools, materials regarding HHVBP performance measures, and other information pertinent to the HHVBP Model. As part of our evaluation, we assess use of the HHVBP Connect website and its resources to answer the research question: To what extent did participants use the technical assistance provided?

6.2 Approach & Methodology

We assessed use of the HHVBP Connect site by reviewing 2016 data on user registration, logins, online posts, resource downloads, and webinar participation provided by the HHVBP TA contractor. The data did not include information that allowed for identification of individual HHAs. However, the majority of available data regarding HHVBP Connect website use and participation included flags for HHA user type (including HHVBP Practice Users, HHVBP Administrator, and other non-HHA user types²) and organization name. This information allowed us to determine that between 97.8%–100% of users (depending on the resource) represent HHAs in the HHVBP intervention states. The 2.2% of HHVBP Connect users who do not represent HHA users include CMS staff, TA contractor staff, and other CMS contractors. Table 16 below identifies the population that was used for analysis of each type of HHVBP Connect activity or resource. All data presented are for calendar year 2016. Where possible, information is reported separately by month during 2016.

Table 16. Population Analyzed for each HHVBP Connect Activity/Resource

HHVBP Connect Activity/Resource	Description of Population
Registration	HHAs Only
Logins	All HHVBP Connect Users*
“Chatter” Activity	All HHVBP Connect Users*
Resource Downloads	All HHVBP Connect Users*
Webinar Participation	HHAs Only

**Approximately 97.8% of all HHVBP Connect users are HHAs (identified via the HHVBP Connect user profile name variable sent by the TA contractor).*

¹ CMS (2016) Home Health Value-Based Purchasing Model. Accessed from: <https://innovation.cms.gov/initiatives/home-health-value-based-purchasing-model>

² Primarily CMS staff and its contractors.

6.3 Summary of Participation and Resource Use

6.3.1 HHVBP Connect Registration

At the end of 2016, HHVBP Connect had 1,863 registered HHA users (Figure 1). Over half of these registrations occurred in January (1,070). For context, there were a total of 2,011 HHAs in the nine HHVBP intervention states that had a FFS claim in 2016. The total number of registered users may contain multiple staff from a single HHA and may include users that are no longer active (e.g., staff that no longer work at an HHA).

Figure 1. Cumulative HHA Registrations on HHVBP Connect in 2016, by Month

6.3.2 Logins to HHVBP Connect

The TA Contractor tracked the total number of logins for all HHVBP Connect users from June through December 2016 via weekly dashboards. We used the last dashboard of each month for our analyses (e.g., December 2016 login data is drawn from the December 30th dashboard).

Users were required to enter a user name and password for each login to the HHVBP Connect website (i.e., the system logged users out). Available login data represent the aggregate activity across all users (i.e., the number of logins per unique user is not available). From June through December 2016, there were a total of 2,949 logins among all HHVBP Connect users. The monthly logins were relatively consistent from June through October (averaging 461 logins per month), then dropped in the final two months of the year (averaging 322 logins per month; Figure 2).

Login data were only available for June through December 2016.

6.3.3 Participation in HHVBP Connect’s “Chatter” Feature

HHVBP Connect’s “Chatter” feature provides an interactive online community where HHAs are invited to “post status updates, share files and links with other users, ‘like’ posts and documents, ‘follow’ people and groups, and share tools, resources, and documents with other users and groups”³.

The TA Contractor tracked the “Chatter” feature via weekly dashboards throughout 2016 and includes online posts and subsequent responses (Figure 3). We used the last dashboard of each month for our analyses (e.g., December 2016 login data is drawn from the December 30th dashboard). Users of the “Chatter” feature, who include both HHAs and HHVBP TA Contractor staff, posted 377 times during 2016. The number of posts each month was usually between 23 and 40, with peaks of 45 and 52 in May/June and a minimum of 9 in December.

³ “HHVBP Connect Website Overview” Slides from 2/11/2016 Webinar.

Figure 3. HHVBP Connect “Chatter” Activity by HHVBP Connect Users in 2016, by Month

Table 17 below summarizes the “Chatter” activity between the TA Contractor and HHAs. HHVBP TA staff accounted for close to half (43%) of the overall use of the “Chatter” feature. Their posts and responses were focused primarily on the promotion of upcoming online events (e.g., a webinar) or newly available resources (e.g., an updated FAQ document), and responding to HHA questions and requests. Broadly, HHAs’ use of the “Chatter” feature focused on website use and technical assistance, including questions about passwords, requests to share resource or webinar registration links, and assistance with registration on the HHVBP Secure Portal. The most common website technical assistance issue posted by HHAs was regarding the webinar registration process. There were also a number of posts and comments requesting information on baseline report and interim performance report data availability and new measures (e.g., how to submit, requesting more details).

Table 17. “Chatter” Posts and Responses by TA Contractor and HHAs

	Posts	Responses	Total
TA Contractor	76	87	163
HHA Users	29	190	219
Total	105	277	382

6.3.4 Use of HHVBP Connect Library Resources and Live Webinar Participation

In addition to participating in the “Chatter” activity described above, HHVBP Connect users can download resources posted in the website’s library and participate in live webinars.

Download of HHVBP Connect Library Resources

To provide assistance to HHAs, the HHVBP TA Contractor made several resources available in the HHVBP Connect Library on a broad range of topics and categories. Throughout 2016, the TA Contractor created and shared 96 different library resources on the HHVBP Connect website in a variety of formats, including audio webinar recordings and documents (e.g., PDFs, Excel files).

To better understand the types of content most frequently downloaded by users in the first year of the Model, we grouped the library resources into three broad domains and counted the number of downloads corresponding to each domain (Table 18). Domain 1 encompasses background material on the HHVBP Model, information about HHVBP Connect, and regularly updated reference documents (e.g., FAQs). Although there were only three “Fact Sheets”

Evaluation of the HHVBP Model

2017 Annual Report: Appendix of Supplemental Tables and Results

resources, they were downloaded over 600 times. Domain 2 provides introductory materials to help HHAs access and use both the HHVBP Connect and Secure Portal sites. The 14 resources under Domain 2’s sub-category “New Measure Submission” were downloaded 3,404 times (average of 243 downloads/resource). Finally, Domain 3 includes materials developed by the TA Contractor to facilitate performance improvement. These include quality improvement tools as well as organizational assessments, which help HHAs understand key HHVBP Model categories and provide action plans to aid in organizational improvement efforts.

Table 18. HHVBP Connect Resource Domains and Downloads in 2016

	# of Resources	# of Downloads	Downloads per Resource
Domain 1 – Background & Updates HHVBP Model and HHVBP Connect	14	2,177	155.5
Final Rules	3	210	70.0
Monthly Updates – Newsletters & Frequently Asked Questions	8	1,364	170.5
Fact Sheets	3	603	201.0
Domain 2 – Introduction to and Use of HHVBP Connect and HHVBP Secure Portal	35	4,625	132.1
New Measure Submission	14	3,404	243.1
Introduction/Registration, User Manual, HHVBP Connect vs. Secure Portal	21	1,221	58.1
Domain 3 – Performance Improvement Tools	47	4,708	100.2
Quality Improvement Resources	39	3,931	100.8
Understanding HHVBP Measures	10	1,072	107.2
Understanding the TPS Calculation	2	274	137.0
Journey to Improvement/QI Webinars and Materials	22	2,064	93.8
Understanding your Interim Performance Report	5	521	104.2
Organizational Assessments	8	777	97.1
Action Plans	4	452	113.0
Assessment Tools	4	325	81.3

Data include downloads by all HHVBP Connect users, 97.8% of whom are HHAs.

Of the 96 resources in the HHVBP Connect library during 2016, the number of downloads ranged from 587 for the new measure template to just 19 for the HHVBP Registration Overview. Table 19 displays the resources that had at least 200 downloads during 2016. The high number of downloads for some of the Domain 1 and Domain 2 resources may partly be due to their broad applicability to all HHAs (e.g., new measures resources). While collectively the Domain 3 resources accounted for more downloads than each of the other two domains, individually they addressed specific quality improvement topics that may only be applicable to certain HHAs. It does not appear that the volume of downloads is largely a function of timing, as some resources released late in 2016 still have a high number of total downloads; for example, the resource with the second highest number of downloads (HHVBP New Measures Template [for] January 2017) was released in December 2016.

Table 19. Most Commonly Downloaded Resources by HHVBP Connect Users in 2016

Resource Title	Domain	Total Downloads
HHVBP New Measures Template [for 2016]	Domain 2	587
HHVBP New Measures Template [for] January 2017	Domain 2	401
HHVBP New Measures Quick Reference Guide	Domain 2	387

<i>All Other Resource Files</i>	<i>Domains 1, 2, 3</i>	<i>7,573</i>

HHVBP Connect Webinar Participation

In addition to resources available in the library, the HHVBP TA Contractor hosted 15 webinars for HHAs on HHVBP Connect throughout 2016. The webinar topics, webinar date, and attendance by HHAs are shown in Figure 4 (listed by date of webinar). These data refer to live attendance to the online event and reflect HHAs only (i.e., do not include non-HHA participants). Webinar participation was higher during the first half of 2016, averaging 501 participants per event, compared to an average of 373 participants per event for webinars held in July–December. Webinar topics with the highest participation rates included the HHVBP Connect Website Overview in February (668), the Performance Reports & TPS Calculation in February (562), and Submitting New Measures Data in September (558). All webinars reflected content in Domain 2 and Domain 3 (i.e., there were no webinars for Domain 1).

Figure 4. HHVBP Connect Webinar Topics and Participation in 2016 by Domain.

Note: Webinar participation refers to attendance during the live online event only.

Analyses of HHVBP Connect Webinar Participation across HHA Characteristics

HHVBP Connect webinar participation was also analyzed across the following HHA characteristics: size cohort, ownership, and setting. The Provider of Services File was used to obtain ownership and setting data, and the Preliminary TPS/payment Adjustment Report was used for size cohort. HHA characteristics were assigned to CMS Certification Numbers (CCNs) that were self-reported by webinar participants; invalid CCNs (i.e., CCNs with invalid values; corresponded to HHAs in non-VBP states, or did not have a FFS claim in 2016) were excluded from the analyses.

Of the 3,046 unique CCNs that were self-reported by webinar participants, 1,058 (34.7%) were CCNs from one of the nine intervention states with a paid FFS claim 2016 (Table 20). Over half (53%) of all HHVBP HHAs participated in at least one HHVBP Connect Webinar (1,058/2,011). Compared to all HHAs in the nine HHVBP states, HHA webinar participants were more likely to be non-profit (22.8% vs. 6.8%) and hospital-based (14.2% vs. 8.6%). HHA webinar participants were slightly more likely to be in large cohorts or entire state cohorts than small cohorts. Of note, 9.3% of webinar participants did not receive a TPS in the Preliminary TPS/Payment Adjustment Report.

Evaluation of the HHVBP Model

2017 Annual Report: Appendix of Supplemental Tables and Results

Table 20. HHVBP Connect Webinar Participation by HHAs in 2016, by HHA Characteristics.

	HHA Characteristic	Unique HHA Webinar Participants with Valid CCN (N=1,058)	HHAs in HHVBP States* (N=2,011)
Ownership Type	For-Profit	67.8%	77.5%
	Non-Profit	22.8%	6.8%
	Government	9.5%	15.8%
Setting	Freestanding	85.8%	91.4%
	Hospital-Based	14.2%	8.6%
Size Cohort**	Small Cohort	6.2%	6.9%
	Large Cohort	52.4%	48.3%
	Entire State Cohort	32.1%	25.3%
	No Cohort (Did not receive 2016 TPS)	9.3%	19.6%

*Total number of HHAs in the nine HHVBP states with a paid fee-for-service claim in 2016; includes HHAs that closed before the end of 2016.

**Size cohort aligns with the definition used in the HHVBP Model: small agencies serve less than 60 unique beneficiaries a year, and large agencies serve at least 60 unique beneficiaries a year. In states with fewer than nine small HHAs (i.e., AZ, MD, NC, TN, WA), the small and large cohorts are combined into a single state cohort.
