1 Total number of Medicare fee-for-service beneficiaries who were included in final reconciliation

2 Expenditure target against which actual expenditures are compared to determine savings / losses generated by an ACO.
3 In calculating the benchmark, actual expenditures, and savings / loss performance, annualized expenditures figures, others show uncapped figures.

In Performance Year 1, Partners HealthCare and Heritage California ACO elected on uncapped expenditures. The values shown here reflect this election (i.e. ACOs collecting uncapped expenditures). In Performance Year 1, Partners HealthCare and Heritage California ACO elected on uncapped expenditures. The values show uncapped figures on the performance Year 1, Partners HealthCare and Heritage California ACO elected on uncapped expenditures. The values show uncapped expenditures are compared to determine savings / loss performance, actual expenditures are compared to determine savings / loss performance, actual expenditures are compared to determine savings / loss performance, actual expenditures are compared to determine savings / loss performance, actual expenditures are compared to determine savings / loss performance, actual expenditures are compared to the performance of the per uncapped expenditures; other ACOs chose capped expenditures.

4 This has also been called the "Gross Savings / Losses amount". It shows the total savings or losses (first to last dollar), dollar amount. This represents the total savings / loss generated to be split between the ACO and CMS. 5 This has also been called the "Gross Savings / Losses percentage". It shows the total savings or losses (first to last dollar) as a percentage of the ACO's benchmark.

6 The ACO share of savings or losses (positive value indicates amount paid by CMS to the ACO, negative value indicates amount paid by CMS to the ACO, negative value indicates amount paid by the ACO to CMS). This amount accounts for several factors: the nature of the ACO's payment arrangement (in Performance Year 1 only, ACOs sould elect a track where they were not at risk for shared losses), the base sharing rate in the ACO's payment arrangement, the

quality score, and the reduction of shared savings payments by 2% starting in Performance Year 2 due to sequestration. 7 ACOs are considered to have successfully reported quality if they completely reported in a given performance year

For more information on how the Overall Quality Score was determined, please refer to the Quality Score was determined, please refer to the Quality Score of the Quality Score was determined, please refer to the Quality Score would have been if shared savings and shared loss amounts had incorporated quality cores, as was the case in subsequent performance years.

For a crosswale of ACO measure numbers to ACO measure names, please consult the following table: http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/sharedsavingsprogram/Downloads/ACO-Shared-Savings-Program-Quality-Measures.pdf

\*\*Measures marked with a caret (\*) are measures where a lower performance rate is indicated of better quality-
