Introduction and Rationale for Health-Related Social Needs Screening and Data Collection

This document is designed to guide Enhancing Oncology Model (EOM) participants in the data collection of their beneficiaries’ health-related social needs (HRSNs), one of eight required participant redesign activities (PRAs).

EOM is a Center for Medicare & Medicaid Innovation (Innovation Center) alternative payment model designed to promote high-quality, person-centered care, advance health equity, promote better care coordination, improve access to care, reduce costs, and improve outcomes for Medicare fee-for-service (FFS) beneficiaries with cancer who receive an initiating cancer therapy. EOM builds on lessons from the Oncology Care Model (OCM) and shares certain features with OCM, including episode-based payments that financially incentivize physician group practices (PGPs) to improve care and lower costs. EOM participants are oncology PGPs that prescribe and administer cancer therapy for included cancer types, and the model is centered on 6-month episodes of care triggered by receipt of an initiating cancer therapy for an included cancer type. Seven cancer types are included in the model:

1. breast cancer
2. chronic leukemia
3. lung cancer
4. lymphoma
5. multiple myeloma
6. prostate cancer
7. small intestine / colorectal cancer

Under the terms of the EOM Participation Agreement (PA), EOM participants are required to implement eight participant redesign activities (PRAs). In alignment with the Centers for Medicare & Medicaid Services’ (CMS’) commitment to reducing health disparities and achieving health equity in CMS quality programs and within Innovation Center models, EOM is dedicated to advancing health equity within all stages of model design, implementation, and evaluation.2,3

One PRA required of EOM participants is identifying health-related social needs (HRSNs) using an HRSN screening tool for their eligible beneficiaries. There is strong evidence that non-clinical drivers of health are the largest contributor to health outcomes and are associated with increased

---

1 Low-risk breast cancer and low-intensity prostate cancer are not included in EOM. For the purposes of EOM, low-risk breast cancer is defined as breast cancer treated with only long-term oral endocrine chemotherapy; and low-intensity prostate cancer is defined as prostate cancer treated with either androgen deprivation and/or anti-androgen therapy without any other chemotherapy.

health care utilization and costs.\textsuperscript{4, 5} By standardizing HRSN screening and referral, a practice can inform larger, community-wide efforts to ensure the availability of and access to community services that are responsive to the needs of CMS beneficiaries (see Figure 1).\textsuperscript{6} Advancing health equity requires identifying and addressing HRSNs, which are defined as \textit{adverse social conditions that negatively impact a person’s health or health care}, as defined in Table 1.

\begin{itemize}
\end{itemize}
Figure 1. Addressing HRSNs as part of the EOM Enhanced Services

Participants will identify and are encouraged to address health-related social needs (HRSNs)

EOM participants are required to identify EOM beneficiaries’ health-related social needs, using HRSN screening tools to screen for the following at a minimum:

- Transportation
- Food Insecurity
- Housing Instability

What are Health-Related Social Needs (HRSNs) and Social Determinants of Health (SDOH)?

HRSNs:
Adverse social conditions that negatively impact a person’s health or health care
- HRSN screening tools can help capture individual level factors, such as lack of access to transportation for an upcoming appointment or financial toxicity from chemotherapy costs.

SDOH:
The conditions in which people are born, grow, work, live and age as well as the wider set of forces and systems shaping the conditions of daily life.
- SDOH encompass the structural, systemic and contextual factors that shape a person’s life
- Evidence shows that identifying and addressing SDOH is essential to reducing health disparities and promoting health equity.

Example Screening Tools:
- The National Comprehensive Cancer Network® (NCCN®) Distress Thermometer and Problem List
- Accountable Health Communities (AHC) Screening Tool
- Protocol for Responding to and Assessing Patients’ Assets, Risks and Experiences (PRAPARE) Tool

HRSN data can inform EOM participants’ decision-making to improve patient experience and facilitate whole-person, patient-centered care.

CMS is not requiring EOM participants to report HRSN data to CMS at this time.

HRSN screenings will aid practices in identifying areas of need and creating community linkages and partnerships to help address identified issues.

EOM providers and patient navigators will have access to HRSN data to aid care planning and connect patients with referrals to community resources.

---

11 These are examples and do not constitute an endorsement by CMS or CMS affiliates.
Important Terminology for Health-Related Social Needs and Social Determinants of Health

While several terms and definitions are used to discuss the social determinants of health (SDOH), CMS has most often referred to individual-level non-clinical needs that are identified through screening in a clinical setting as health-related social needs (HRSNs), which will be used throughout this guide. HRSNs are the adverse social conditions that negatively impact a person’s health or health care. Where SDOH are the structural and contextual factors that shape a person’s life, HRSNs are individual level factors, such as, challenges in obtaining proper nutrition during cancer treatment, access to transportation for infusion appointments, or housing instability. HRSNs should be identified and mitigated through referrals to community resources and other patient navigation efforts.12,13 HRSNs impact the health and well-being of many Medicare beneficiaries with cancer and pose a risk of exacerbating health disparities if not identified and mitigated, for example, referrals and other patient navigation efforts. Section 5 provides several publicly available resources related to HRSNs.

As terminology continues to evolve in the field, EOM participants may encounter the terms below as they seek to integrate HRSN screening and referral into their practice transformation. The table below provides definitions and context to help EOM participants understand how these terms are used.

Table 1. HRSN and SDOH Terminology

</thead>
<tbody>
<tr>
<td>Drivers of health (DOH)/Social drivers of health</td>
<td>Non-clinical factors known to impact patient outcomes, including socioeconomic status, housing availability, and nutrition, as well as marked inequity in outcomes based on patient demographics such as race and ethnicity, being a member of a minority religious group, geographic location, sexual orientation and gender identity, religion, and disability status.</td>
<td>As part of 2023 Merit-based Incentive Payment System (MIPS) measures, a measure was added for screening for social drivers of health.</td>
</tr>
<tr>
<td>Social risk factors</td>
<td>Specific adverse social conditions that are associated with poor health, including, but not limited to, factors such as socioeconomic status; housing availability, and nutrition (among others), often inequality affecting historically marginalized communities on the basis of race and ethnicity, rurality, sexual orientation and gender identity, religion, disability status, and cultural context; social relationships; and residential and community context.</td>
<td>While this term is often used interchangeably with “drivers of health,” external experts in the field have distinguished between social determinants/drivers of health and social risk factors in this way: social determinants/social drivers are neutral (e.g., income), where social risk factors are “individual-level adverse social determinant[s] (e.g., low income).” Note that belonging to a racial category is not a social risk factor—rather, the social risk factor is the interpersonal and institutional discrimination faced by members of these groups.</td>
</tr>
</tbody>
</table>

19 Office of the Assistant Secretary for Planning and Evaluation, Social Drivers of Health. [https://aspe.hhs.gov/topics/health-health-care/social-drivers-health](https://aspe.hhs.gov/topics/health-health-care/social-drivers-health)

23 See Footnote 19.
The rationale for requiring HRSN screening and patient navigation (e.g., referral to services) in EOM includes, but is not limited to:

1. Screening identifies social risk factors that contribute to poor health outcomes, greater disparities, and higher health care cost and utilization.
2. Studies show that most patients believe that information on social needs should be used to improve care.24
3. Health care providers find value in screening to inform clinical decision making and believe it has the potential to improve patient outcomes. Examples of clinical impacts include, but are not limited to, missed appointments and follow-up due to lack of transportation,25 poor medication adherence due to food insecurity,26 and postponed health care and medication due to housing instability.27 Screening will help providers meet whole-patient needs and advance patient-centered care.28

The following sections provide more detail about EOM HRSN data collection:

- HRSN requirements and recommended tools are described in Section 1.
- Screening questions are described in Section 2.
- HRSN best practices and considerations are described in Section 3.
- Addressing HRSNs through community referrals and patient navigation is described in Section 4.
- Additional EOM and HRSN resources are listed in Section 5.

---

28 See Footnote 24.
Section 1: HRSN Requirements and Nationally Recognized Data Collection Tools

1.1 Identifying HRSNs as a Participant Redesign Activity

Under the terms of the PA, EOM participants are required to implement eight participant redesign activities (PRAs), the first six of which are Enhanced Services (Figure 2). Participants can bill for Monthly Enhanced Oncology Services (MEOS) payments to support the implementation of these Enhanced Services for their eligible beneficiaries.

One PRA required of EOM participants is the use of established, validated screening tools to collect HRSN data from EOM beneficiaries and to develop a plan for addressing those needs. EOM participants may identify and address subsequent social needs through a combination of patient navigation and care planning activities.

Figure 2. EOM Participant Redesign Activities

- Provide beneficiaries **24/7 access** to an appropriate clinician with real-time access to the EOM participant’s medical records
- Provide core functions of **patient navigation**, as appropriate, to EOM beneficiaries
- Document a **care plan** for each EOM beneficiary that contains the 13 components of the Institute of Medicine (IOM) Care Management Plan
- Treat beneficiaries with therapies in a manner consistent with nationally recognized **clinical guidelines**
- Identify EOM beneficiary **health-related social needs (HRSNs)** using a health-related social needs screening tool
- Gradual implementation of **electronic patient-reported outcomes (ePROs)**
- Utilize data for **Continuous Quality Improvement (CQI)**, including the development of a health equity plan
- Use of **certified Electronic Health Records (EHR) Technology (CEHRT)**

EOM participants will provide patient navigation, as appropriate, to EOM beneficiaries, which may include linking beneficiaries to follow-up services and community resources (e.g., referring eligible beneficiaries to cancer survivor support groups and community organizations or other third parties that assist with or provide child/elder care, housing, transportation, or financial support). EOM participants will also follow up regularly with the beneficiary to ensure they are connected with the community resource(s) and are getting the services they need.
EOM Health-related Social Needs Guide

EOM participants will also offer patient navigation services to bridge other gaps in care, such as access to clinical trials and connections to other health specialists or community resources, to reduce health disparities. EOM participants are encouraged to develop relationships with community partners to accomplish these goals. While every EOM participant’s community is different, ideas for community resources include, but are not limited to, state and county public health institutions, social services organizations, places of worship, and other agencies and organizations that serve these communities. The Administration for Community Living (ACL), within the U.S. Department of Health and Human Services, funds over 30,000 community-based organizations in every state across the country to support older adults and people with disabilities. This national network serves over 10 million older adults each year, with a focus on high cost, high need populations and equity. A section of their website is dedicated to information and resources on advancing partnerships to align health care and social services, with a primary focus on the community care hub model. Additionally, the Centers for Disease Control and Prevention developed a workbook, Promoting Health Equity: A Resource to Help Communities Address Social Determinants of Health, to address health care inequities. Community-based case studies are included, as well as examples for developing community initiatives to provide equitable care and access.

There are several online resources available for participants to learn more about how to equitably address social determinants of health. CDC’s National Center for Chronic Disease Prevention and Health Promotion (NCCDPHP) provides readers with innovative approaches to build healthier communities and reduce health disparities in their online resource Equitably Addressing Social Determinants of Health and Chronic Disease. Some of these health equity resources include Advancing Health Equity Through the Public Health Workforce; Health Equity in Action: Programs, Policies, and Other Interventions; and Health Equity Science.

1.2 HRSNs to be Collected

EOM participants must screen EOM beneficiaries, at a minimum, for HRSNs in the following domains:
- food insecurity
- transportation
- housing instability

EOM participants should screen each EOM beneficiary, at a minimum, once each performance period. EOM participants should consider if additional screening is necessary, based on beneficiary need. EOM participants are encouraged to screen for additional HRSNs to meet the needs of their unique population, including, but not limited to, social isolation, emotional distress,

interpersonal safety, and financial toxicity. EOM participants are encouraged to use patient-first language with their beneficiaries, for example, “financial toxicity” is a term more commonly used in academic settings, whereas “financial distress” is often used with patients. As described in the EOM Health Equity Plan (HEP) Guide33, screening for HRSNs is one source of data EOM participants can consider using to support their HEPs by using data for continuous quality improvement.

For the ePROs collection requirement, related to the HRSN screening requirement, at a minimum, EOM participants have the option to conduct a full HRSN screening at each E&M visit or to conduct a full HRSN screening once every 6 months. Should an HRSN screening only be conducted once every 6 months, the EOM participant should ask the EOM beneficiary at each E&M visit if there have been any changes from the previous visit in their needs around food, transportation, and housing. The EOM participant is encouraged to ask about additional HRSNs as is applicable to their unique beneficiary population. For more information on how this requirement functions in conjunction with the electronic patient-reported outcomes (ePROs) requirement, please see the EOM Electronic Patient-Reported Outcomes Guide.

As described in the PA in Article VII and Appendix B, EOM participants are required to screen their EOM beneficiaries and collect HRSN data on the three domains (food insecurity, transportation, and housing instability) within 90 days of the participant start date and to attest annually to CMS that they have implemented each PRA, including HRSN screening, as part of the PRA Attestation.

Should a participant be selected for a monitoring site visit, an EHR audit may be performed as part of the monitoring visit for CMS to validate that HRSN data are being collected. Participants may be asked to demonstrate which screening tool(s) they are using and how the data are being collected and documented (e.g., in an excel spreadsheet, in their EHR, etc.).

Currently, CMS is not requiring EOM participants to report beneficiary-level HRSN data to CMS. However, as additional standards are developed, CMS may require EOM participants to report HRSN data in later performance periods. Should reporting become required in the future, EOM participants will be notified in a timely manner and this guide will be updated with the technical specifications for practices to interface with the Health Data Reporting (HDR) application and accurately report the data.

Additional resources on these three domains can be found in Section 5.

1.3 HRSN Screening Tools

There are non-proprietary and established HRSN screening tools available to EOM participants at no cost. These HRSN screening tools, presented in Table 2 and listed below, are examples only and do not constitute an endorsement by CMS or CMS affiliates. EOM participants have the flexibility to use other HRSN screening tools as they see fit. For any screening tools, EOM

---

participants should check with organizations that manage each tool for rules concerning modifications and use.

- The NCCN Distress Thermometer and Problem List\(^34\) (See Appendix B)
- Accountable Health Communities (AHC) Screening Tool\(^35\) (See Appendix C)
- Protocol for Responding to and Assessing Patients’ Assets, Risks and Experiences (PRAPARE)\(^36\) (See Appendix D)

### Table 2. Established HRSN Screening Tools Available to EOM Participants

<table>

<td>A national standardized patient risk assessment protocol designed to engage patients in assessing and addressing social drivers of health and HRSNs. The PRAPARE tool is available in 25 languages.</td>
</tr>
</tbody>
</table>

If an EOM participant is using an HRSN screening tool not listed above (this may be more common for screening tools already embedded within Electronic Health Records (EHRs) or for HRSN domains outside of food, housing, transportation, interpersonal safety/intimate partner violence, and utilities), the screening tool used should:

- Align with Fast Healthcare Interoperability Resources (FHIR) standards and use terminology that aligns with the International Classification of Diseases, Tenth Revision (ICD-10), LOINC, and SNOMED, in order to enable HRSN data to be shared between different health IT systems, where appropriate, and in accordance with patient privacy laws; and

---

\(^{34}\) If your organization would like to use, reproduce, and/or distribute NCCN Content for any purpose, please review the applicable information [here](https://nccn.org), log in to NCCN.org, and complete the Permissions Request Form. This link includes specific directions on citing or using the NCCN Distress Thermometer.

\(^{35}\) The Centers for Medicare & Medicaid Services (CMS) secured permissions from the original authors of the screening questions in the Accountable Health Communities (AHC) Health-Related Social Needs (HRSN) Screening Tool to use, copy, modify, publish, and distribute the questions for the AHC Model and CMS use only.

\(^{36}\) PRAPARE may be licensed for use free of charge by health care providers, managed care plans, institutions, or social service organizations working directly with patients. Please see more information and the End User License Agreement [here](https://nccn.org). Non-end users, including Electronic Health Record vendors, social prescribing tracking platforms, population health analytics tool vendors, and others that wish to embed the PRAPARE screening into an electronic platform for end users, must contact the PRAPARE team to move forward with a licensing agreement.
Use screening questions that have been assessed for dimensions of validity for the screening domains.

- EOM participants can check their screening tool/screening questions against a library of screening tools compiled by the Social Interventions Research and Evaluation Network (SIREN).37
- Share the tool and/or questions selected with CMS to inform monitoring efforts.

Participants can choose to administer questions from a screening tool that are pertinent to the three domains listed. HRSN screening can and should be tailored to the screening entities and unique beneficiary needs, staffing model and other preferences. Appendix A provides some additional examples of screening instruments.

---

37 Social Needs Screening Tool Comparison Table, SIREN. Available at https://sirenetwork.ucsf.edu/tools-resources/resources/screening-tools-comparison.
Section 2: Validated Screening Questions on Food Insecurity, Housing Instability, and Transportation

Participants must utilize one or a combination of validated screening tools to collect HRSN data. This section describes the screening questions related to food insecurity, transportation, and housing instability that are included on the three HRSN screening tools described in Table 2. This list in the following sections is exhaustive to demonstrate the similarities and differences in questions asked across the preferred surveys. Participants are encouraged to use one or more screening tools to meet the domains listed. If a participant chooses to use different screening tools across domains, they only need to include questions from their chosen screening tool for that specific domain. For example, one participant may choose to use the PRAPARE® Tool screening question for food insecurity and the AHC Tool screening questions for housing instability; in this situation the participant would only include questions listed under the specific tool per respective domain.

2.1 Food Insecurity

NCCN Distress Thermometer and Problem List
1. Have you had concerns about any of the items below in the past week, including today? (Mark all that apply)
   • One option choice is “Practical Concerns: Having enough food.”

AHC Screening Tool
1. Please answer whether the statements were OFTEN, SOMETIMES, or NEVER true for you and your household in the last 12 months.

2. Within the past 12 months, you worried that your food would run out before you got money to buy more.
   • Often true
   • Sometimes true
   • Never true

3. Within the past 12 months, the food you bought just didn't last and you didn't have money to get more.
   • Often true
   • Sometimes true
   • Never true

Note: “Often true” or “Sometimes true” for EITHER question would be classified as food insecure.
PRAPARE Tool
1. In the past year, have you or any family members you live with been unable to get any of the following when it was really needed? (Check all that apply)
   - One option choice is “Food: Yes / No”

2.2 Housing Instability

NCCN Distress Thermometer and Problem List
1. Have you had concerns about any of the items below in the past week, including today? (Mark all that apply)
   - One option choice is “Practical Concerns: Housing.”

AHC Screening Tool
1. What is your living situation today?
   - I have a steady place to live
   - I have a place to live today, but I am worried about losing it in the future
   - I do not have a steady place to live (I am temporarily staying with others, in a hotel, in a shelter, living outside on the street, on a beach, in a car, abandoned building, bus or train station, or in a park)

2. Think about the place you live. Do you have problems with any of the following? Choose all that apply.
   - Pests such as bugs, ants, or mice
   - Mold
   - Lead paint or pipes
   - Lack of heat
   - Oven or stove not working
   - Smoke detectors missing or not working
   - Water leaks
   - None of the above

   Note: Responses to the second OR third option in question 1, OR any selection indicating a problem in question 2 would be classified as housing unstable.

PRAPARE Tool
1. What is your housing situation today?
   - I have housing
   - I do not have housing (staying with others, in a hotel, in a shelter, living outside on the street, on a beach, in a car, or in a park)
   - I choose not to answer this question
2. Are you worried about losing your housing?
   • Yes
   • No
   • I choose not to answer this question

   *Note: Responses for the second OR third option in question 1, OR responses for the first option in question 1 AND first or third option in question 2 would be classified as housing unstable.*

2.3 Transportation

NCCN Distress Thermometer
   1. Have you had concerns about any of the items below in the past week, including today? (Mark all that apply)
      • One option choice is “Practical Concerns: Transportation.”

AHC Screening Tool
   1. In the past 12 months, has lack of reliable transportation kept you from medical appointments, meetings, work or from getting things needed for daily living?
      • Yes
      • No

PRAPARE Tool
   1. Has lack of transportation kept you from medical appointments, meetings, work, or from getting things needed for daily living? Check all that apply.
      • Yes, it has kept me from medical appointments or
      • Yes, it has kept me from non-medical meetings, appointments, work, or from getting things that I need
      • No
      • I choose not to answer this question

Please see Appendices B, C and D for more detail on the tools and questions.
Section 3: HRSN Best Practices and Considerations

CMS aims to support EOM participants by sharing promising practices and key insights for universal HRSN screening. This section includes best practices for EOM participants to consider. The HRSN screening tools described in this guide provide participants with logistical considerations for administration, including examples of screening questions, locations, and staff training procedures. EOM participants are encouraged to read the documentation for each screening tool for best practices and considerations to promote effective universal screening for HRSNs.38

EOM participants are encouraged to take several best practices into consideration to optimize the beneficiary’s screening experience. Participants are encouraged to clearly explain the purpose of screening to the beneficiary, including how the HRSN data will be used and stored.39 Additional examples of implementing best practices for screening include ensuring the process is minimally disruptive in any setting, that it does not impact the beneficiary’s time with the provider, takes place in a private area, and is conducted in a culturally and linguistically appropriate manner. Both screening remotely and in person are valid processes, as the mode of screening does not appear to impact beneficiaries’ willingness to accept assistance and navigation related to their HRSNs.40

Participants are encouraged to take multiple best practices into consideration for their screening process. For example, staff performing the screening should use customized scripts that use appropriate language to foster trust and build confidence with beneficiaries (see example on p. 18 of the AHC Screening Tool Guide). Participants should consider cultivating buy-in at the leadership and staff levels and making space to address staff concerns related to screening. Participants may identify an on-site leader who can serve as a role model and source of information on screening and referral. It is important for participants to ensure a plan and protocol are in place for making responsive referrals upon positive screenings for HRSNs.

Participants can provide training for screening staff or volunteers covering:

- The importance of screening and referral protocols;
- How to respond to common questions about screening from beneficiaries;
- How to manage privacy and address safety concerns; and
- How to take the next steps to ensure an appropriate referral is made if one or more HRSN(s) are identified through screening.

---

Section 4: Addressing HRSNs: Community Referrals and Patient Navigation

If an EOM participant identifies an EOM beneficiary with an HRSN, the next step would be facilitating linkages to follow-up services and community resources, as available and appropriate. For example, this could take the form of referrals to community organizations or other third parties that provide child/elder care, transportation or financial support, as well as referrals to cancer survivor support groups. These are just a few examples of the core functions of patient navigation, which are further described in Appendix B of the PA.

When developing a plan of care with the beneficiary, several needs should be considered, including unmet housing, food, and transportation, as these needs will impact the implementation, outcomes, and success of the plan. In the case of positive screening for unmet HRSNs, EOM participants should provide patient navigation to connect beneficiaries with referral services. Examples of best practices include helping to connect the beneficiary to services and conducting regular outreach between navigators and beneficiaries to identify and resolve barriers to care. Navigation may be conducted by a clinician or other care team members and should include beneficiary input to ensure mutual understanding of the beneficiary’s priorities and opportunities available to resolve unmet needs. Though the accessibility of resources to address a particular need across communities may vary, EOM participants are encouraged to be transparent with beneficiaries about availability of resources and services at community, state, and federal levels.

We encourage EOM participants to follow key guidelines to ensure successful implementation of community referrals and expanded navigation, including:

- Ensuring referrals are relevant to the beneficiary by using language that is easy to understand and culturally appropriate;
- Ensuring that a beneficiary is not excluded from eligibility for a resource due to age, gender, socioeconomic status, or other sociodemographic factors;
- Creating or enabling access to community referral inventories and regularly reviewing and updating, including primary points of contact at each community service, to confirm that all resources and contact information are up to date; and
- Communicating to the entire oncology care team any beneficiary’s positive screens and active referrals if a beneficiary has an identified unmet social need.

CMS has published case studies and lessons learned on the benefits of addressing HRSNs through community referrals, including the business case for addressing HRSNs within the healthcare system, expanding and scaling efforts to identify HRSNs, building strong community

---

41 Facilitating linkages to follow-up services and community resources is a core function of patient navigation, one of the required PRAs, described in the PA Appendix B.
partnerships to address HRSNs, and promising strategies for sustaining partnerships that address social needs.⁴²

EOM participants are asked to consider creating and maintaining a community resource referral platform to support HRSN screening and referrals or to join an existing platform. In the case of HRSN positive screens, CMS does not require EOM participants to document the specific referral actions taken but encourages EOM participants to follow up to close referral loops, when possible. CMS asks EOM participants to develop a care plan for the unmet needs of their EOM beneficiaries as part of their Institute of Medicine (IOM) care plan (e.g., “A plan for addressing a patient’s psychosocial health needs...”) and consider potential needed interventions within their HEPs.

## Section 5: HRSN Resources

### Housing Instability

**Emergency Rental Assistance Program (ERA)**
Treasury’s Emergency Rental Assistance (ERA) program has provided communities over $46 billion to support housing stability throughout the COVID-19 pandemic. ERA funds are provided directly to states, U.S. territories, local governments, and, in the case of ERA1, Indian Tribes or their Tribally Designated Housing Entities.

**FindHelp – Search and Connect to Social Care**
This is a free housing and transportation resource where viewers can enter their zip code and existing community resources are flagged.

**Hope Lodge**
American Cancer Society Hope Lodge® communities offer a home away from home for people facing cancer and their caregivers when cancer treatment is far away.

**Hospital-owned lodging**
Certain hospitals offer programs to provide free or reduced-cost lodging to patients during treatment.

**Hosts for Humanity (Baltimore, MD)**
Hosts for Humanity connects families and friends of patients traveling to receive medical care with volunteer hosts offering accommodations in their homes.

**211 | United Way**
The 211 network in the United States responds to requests for help meeting basic needs like housing, food, transportation, and health care.

### Transportation

**FindHelp – Search and Connect to Social Care**
This is a free housing and transportation resource where viewers can enter their zip code and existing community resources are flagged.

**Medicare Advantage Supplemental benefits (Medicare Part C)**
Medicare Advantage enrollees also have access to transportation benefits if their plan adopts transportation as a supplemental benefit.

**Non-emergency medical transportation (NEMT) platforms**
There are several private corporations focused on NEMT coordination platforms that partner with health-care organizations, health plans, and transportation providers to schedule on-demand patient transportation. Examples include, but are not limited to: Kaizen Health, ModivCare (formerly LogistiCare), MTM, Ride Health, Roundtrip, SafeRide Health, and Southeastrans.

**PROgram for Non-emergency TranspOrtation (PRONTO)**
PRONTO is a partnership between the University of Illinois Health and Kaizen Health (a local health-access start-up) that provides...
| (Chicago, IL) | free rides to patients being transitioned home from inpatient and ambulatory clinics. |
| Repetitive Scheduled Non-Emergency Ambulance Transport Medicare Benefit: Operational Guide | This small and specialized Medicare benefit program involves ambulance transportation for those needing at least 1 round trip per week for at least 3 weeks. |
| Road to Recovery Program | American Cancer Society’s Road to Recovery Program uses volunteer drivers who donate their time and personal automobiles to assist patients with cancer who need a ride to or from a clinical encounter. This program operates in all 50 states. |
| Veterans Transportation Program (VTP) | VA’s Veterans Transportation Program (VTP) offers Veterans many travel solutions to and from their VA health care facilities. This program offers these services at little or no costs to eligible Veterans through the following services: Beneficiary Travel (BT), Veterans Transportation Service (VTS), Highly Rural Transportation Grants (HRTG) |
| 211 | United Way | The 211 network in the United States responds to requests for people looking for help meeting basic needs like housing, food, transportation, and health care. |

Note: Although the resources in this table are not endorsed by CMS, they serve as examples that EOM participants can utilize or model after to connect their beneficiaries to needed services. There are many more resources available online than are listed here, some of which may be more accessible based on local or state resources. In addition to the sources above, CMS encourages EOM participants to develop community partnerships to help identify and address HRSNs. Practices are encouraged to share any resources not included in the above table with CMS so that they may be included in future updates.

Appendix B:
The NCCN Distress Thermometer and Problem List
Appendix C: Accountable Health Communities (AHC) Screening Tool

The Accountable Health Communities Health-Related Social Needs Screening Tool

What's the Accountable Health Communities (AHC) Health-Related Social Needs (HRSN) Screening Tool?

We at the Centers for Medicare & Medicaid Services (CMS) Center for Medicare and Medicaid Innovation (CMMI) made the Accountable Health Communities (AHC) Health-Related Social Needs (HRSN) Screening Tool to use in the AHC Model. We’re testing to see if systematically finding and dealing with the health-related social needs of Medicare and Medicaid beneficiaries has any effect on their total health care costs and makes their health outcomes better.

Why is the AHC HRSN Screening Tool important?

Growing evidence shows that if we deal with unmet HRSNs like homelessness, hunger, and exposure to violence, we can help undo their harm to health. Just like with clinical assessment tools, providers can use the results from the HRSN Screening Tool to inform patients’ treatment plans and make referrals to community services.

What does the AHC HRSN Screening Tool mean for me?

Screening for HRSNs isn’t standard clinical practice yet. We’re making the AHC HRSN Screening Tool a standard screening across all the communities in the AHC Model. We’re sharing the AHC HRSN Screening Tool for awareness.

What’s in the AHC HRSN Screening Tool?

In a National Academy of Medicine discussion paper, we shared the 10-item HRSN Screening Tool. The Tool can help providers find out patients’ needs in these 5 core domains that community services can help with:

- Housing instability
- Food insecurity
- Transportation problems
- Utility help needs

---

Center for Medicare and Medicaid Innovation
Interpersonal safety

In the final version below, we made small revisions to the original 10 questions based on cognitive testing we did since we shared the first version. In the final version we also included questions in 8 supplemental domains that we haven’t shared before:

- Financial strain
- Employment
- Family and community support
- Education
- Physical activity
- Substance use
- Mental health
- Disabilities

Who should use the AHC HRSN Screening Tool?

The questions in the AHC HRSN Screening Tool are meant to be used for individual respondents who answer the questions themselves. A parent or caregiver can answer for an individual, too, if that makes more sense. Clinicians and their staff can easily use this short tool as part of their busy clinical workflows with people of all different ages, backgrounds, and settings.

In the next 5 years, hundreds of participating clinical delivery sites across the 32 AHCs will screen over 7 million Medicare and Medicaid beneficiaries using the 10 core domain questions. The AHCs can also choose to add any of the supplemental domain questions into their standard screening processes.

Who made the AHC HRSN Screening Tool?

We made this tool with a panel of experts from around the country including:

- Tool developers
- Public health and clinical researchers
- Clinicians
- Population health and health systems executives
- Community-based organization leaders
- Federal partners

We got permission from the original authors of the questions to use, copy, modify, publish, and distribute the questions for the AHC Model and our use only. Based on feedback from the original question authors, CMS has created this table to specify the citation and notification process for each screening question in the AHC HRSN Screening Tool if the questions are used outside of CMS and the AHC Model.
AHC HRSN Screening Tool Core Questions

If someone chooses the underlined answers, they might have an unmet health-related social need.

Living Situation

1. What is your living situation today?³
   - [ ] I have a steady place to live
   - [ ] I have a place to live today, but I am worried about losing it in the future
   - [ ] I do not have a steady place to live (I am temporarily staying with others, in a hotel, in a shelter, living outside on the street, on a beach, in a car, abandoned building, bus or train station, or in a park)

2. Think about the place you live. Do you have problems with any of the following?⁴
   - [ ] Choose all that apply
   - [ ] Pests such as bugs, ants, or mice
   - [ ] Mold
   - [ ] Lead paint or pipes
   - [ ] Lack of heat
   - [ ] Oven or stove not working
   - [ ] Smoke detectors missing or not working
   - [ ] Water leaks
   - [ ] None of the above

Food

Some people have made the following statements about their food situation. Please answer whether the statements were OFTEN, SOMETIMES, or NEVER true for you and your household in the last 12 months.⁵

3. Within the past 12 months, you worried that your food would run out before you got money to buy more.
   - [ ] Often true
   - [ ] Sometimes true
   - [ ] Never true

---

Center for Medicare and Medicaid Innovation
4. Within the past 12 months, the food you bought just didn't last and you didn't have money to get more.
   - Often true
   - Sometimes true
   - Never true

Transportation
5. In the past 12 months, has lack of reliable transportation kept you from medical appointments, meetings, work or from getting things needed for daily living?
   - Yes
   - No

Utilities
6. In the past 12 months has the electric, gas, oil, or water company threatened to shut off services in your home?
   - Yes
   - No
   - Already shut off

Safety
Because violence and abuse happens to a lot of people and affects their health we are asking the following questions.

7. How often does anyone, including family and friends, physically hurt you?
   - Never (1)
   - Rarely (2)
   - Sometimes (3)
   - Fairly often (4)
   - Frequently (5)

---

Center for Medicare and Medicaid Innovation
8. How often does anyone, including family and friends, insult or talk down to you?
   - Never (1)
   - Rarely (2)
   - Sometimes (3)
   - Fairly often (4)
   - Frequently (5)

9. How often does anyone, including family and friends, threaten you with harm?
   - Never (1)
   - Rarely (2)
   - Sometimes (3)
   - Fairly often (4)
   - Frequently (5)

10. How often does anyone, including family and friends, scream or curse at you?
    - Never (1)
    - Rarely (2)
    - Sometimes (3)
    - Fairly often (4)
    - Frequently (5)

A score of 11 or more when the numerical values for answers to questions 7-10 are added shows that the person might not be safe.
AHC HRSN Screening Tool Supplemental Questions

Financial Strain
11. How hard is it for you to pay for the very basics like food, housing, medical care, and heating? Would you say it is: 9
   - Very hard
   - Somewhat hard
   - Not hard at all

Employment
12. Do you want help finding or keeping work or a job? 10
   - Yes, help finding work
   - Yes, help keeping work
   - I do not need or want help

Family and Community Support
13. If for any reason you need help with day-to-day activities such as bathing, preparing meals, shopping, managing finances, etc., do you get the help you need? 11
   - I don’t need any help
   - I get all the help I need
   - I could use a little more help
   - I need a lot more help

14. How often do you feel lonely or isolated from those around you? 12
   - Never
   - Rarely
   - Sometimes
   - Often
   - Always

---

Center for Medicare and Medicaid Innovation
Education
15. Do you speak a language other than English at home?¹⁹
☐ Yes
☐ No

16. Do you want help with school or training? For example, starting or completing job training or getting a high school diploma, GED or equivalent.²⁰
☐ Yes
☐ No

Physical Activity
17. In the last 30 days, other than the activities you did for work, on average, how many days per week did you engage in moderate exercise (like walking fast, running, jogging, dancing, swimming, biking, or other similar activities)?²¹
☐ 0
☐ 1
☐ 2
☐ 3
☐ 4
☐ 5
☐ 6
☐ 7

18. On average, how many minutes did you usually spend exercising at this level on one of those days?²²
☐ 0
☐ 10
☐ 20
☐ 30
☐ 40
☐ 50
☐ 60

²² Ibid
Follow these 2 steps to decide if the person has a physical activity need:

1. Calculate [number of days” selected] x [number of minutes” selected] = [number of minutes of exercise per week]
2. Apply the right age threshold:
   - Under 6 years old: You can’t find the physical activity need for people under 6.
   - Age 6 to 17: Less than an average of 60 minutes a day shows an HRSN.
   - Age 18 or older: Less than 150 minutes a week shows an HRSN.

### Substance Use

The next questions relate to your experience with alcohol, cigarettes, and other drugs. Some of the substances are prescribed by a doctor (like pain medications), but only count those if you have taken them for reasons or in doses other than prescribed. One question is about illicit or illegal drug use, but we only ask in order to identify community services that may be available to help you.  

19. How many times in the past 12 months have you had 5 or more drinks in a day (males) or 4 or more drinks in a day (females)? One drink is 12 ounces of beer, 5 ounces of wine, or 1.5 ounces of 80-proof spirits.
   - Never
   - Once or Twice
   - Monthly
   - Weekly
   - Daily or Almost Daily

20. How many times in the past 12 months have you used tobacco products (like cigarettes, cigars, snuff, chew, electronic cigarettes)?
   - Never
   - Once or Twice
   - Monthly
   - Weekly
   - Daily or Almost Daily

---

Center for Medicare and Medicaid Innovation
21. How many times in the past year have you used prescription drugs for non-medical reasons?
   - Never
   - Once or Twice
   - Monthly
   - Weekly
   - Daily or Almost Daily

22. How many times in the past year have you used illegal drugs?
   - Never
   - Once or Twice
   - Monthly
   - Weekly
   - Daily or Almost Daily

Mental Health
23. Over the past 2 weeks, how often have you been bothered by any of the following problems?\textsuperscript{19}
   a. Little interest or pleasure in doing things?
      - Not at all (0)
      - Several days (1)
      - More than half the days (2)
      - Nearly every day (3)
   b. Feeling down, depressed, or hopeless?
      - Not at all (0)
      - Several days (1)
      - More than half the days (2)
      - Nearly every day (3)

If you get 3 or more when you add the answers to questions 23a and 23b the person may have a mental health need.

\textsuperscript{19} Kroenke, K., Spitzer, R. L., & Williams, J. B. (2003). The Patient Health Questionnaire-2: validity of a two-item depression screener. Medical Care, 41(11), 1284-1292.
24. Stress means a situation in which a person feels tense, restless, nervous, or anxious, or is unable to sleep at night because his or her mind is troubled all the time. Do you feel this kind of stress these days?¹⁹  
☐ Not at all  
☐ A little bit  
☐ Somewhat  
☐ Quite a bit  
☐ Very much

Disabilities

25. Because of a physical, mental, or emotional condition, do you have serious difficulty concentrating, remembering, or making decisions?²⁰ (5 years old or older)  
☐ Yes  
☐ No

26. Because of a physical, mental, or emotional condition, do you have difficulty doing errands alone such as visiting a doctor’s office or shopping?²¹ (15 years old or older)  
☐ Yes  
☐ No

---

## Appendix D: Protocol for Responding to and Assessing Patients’ Assets, Risks and Experiences (PRAPARE)

### PRAPARE: Protocol for Responding to and Assessing Patients’ Assets, Risks and Experiences

Paper Version of PRAPARE® for Implementation as of September 2, 2016

#### Personal Characteristics

1. Are you Hispanic or Latino?
   - Yes
   - No
   - I choose not to answer this question

2. Which race(s) are you? Check all that apply.
   - Asian
   - Pacific Islander
   - African American
   - White
   - American Indian/Alaskan Native
   - Other (please write):
   - I choose not to answer this question

3. At any point in the past 2 years, has seasonal or migrant farm work been your or your family’s main source of income?
   - Yes
   - No
   - I choose not to answer this question

4. Have you been discharged from the armed forces of the United States?
   - Yes
   - No
   - I choose not to answer this question

5. Are you worried about losing your housing?
   - Yes
   - No
   - I choose not to answer this question

6. What address do you live at?
   - Street:
   - City, State, zip code:

7. What is your current work situation?
   - Unemployed
   - Part-time work
   - Full-time work
   - Otherwise unemployed but not seeking work (e.g., student, retired, disabled, unpaid primary care giver)
   - Please write:
   - I choose not to answer this question

8. What is your main insurance?
   - None/uninsured
   - Medicaid
   - CHIP
   - Medicare
   - Other public insurance (not CHIP)
   - Other Public Insurance (CHIP)
   - Private Insurance

9. During the past year, what was the total combined income for you and the family members you live with? This information will help us determine if you are eligible for any benefits?
   - I choose not to answer this question
