Introduction

The “OCM Staging and Clinical Data Element by Cancer Bundle Guidance v1.0” document provides information to Oncology Care Model (OCM) Participants regarding staging and clinical data collected on OCM Fee-For Service (FFS) Beneficiaries through the OCM Data Registry.

The primary purpose of this document is to list the staging and clinical data elements that must be reported for each OCM Cancer Bundle in order to be “staging complete” in the OCM Data Registry as indicated in the “OCM Staging and Clinical Data Specifications_PP3_v2.0”. If a data element is not required for all ICD-10 cancer diagnosis codes within the listed cancer bundle, that will be specified as well.

Practices may also reference the “OCM Staging and Clinical Data Specifications_PP3_v2.0” document which includes detailed codes for each OCM Cancer Bundle, as well as the valid values that may be reported for each data element listed.
