#### I. GENERAL INFORMATION

**A. Background:** As part of its efforts to comply with the administrative simplification provisions of HIPAA and its implementing regulations, the Centers for Medicare & Medicaid Services (CMS) instructs its shared systems maintainers and local Medicare contractors to maintain common front-end HIPAA validation edits through a quarterly release CR. These edits pertain to the current standards adopted under HIPAA.

The CMS determines the edits which are to be administered at the front end and documents these edits in a spreadsheet which are attached to the quarterly CR. The spreadsheets document all of the edits to date as well as those edits which are changed, deleted, or added. The spreadsheets change log directs the contractors as to those changes they must make for the quarter. The change log worksheet tab contains only the changes made for this version.

Contractors and shared systems maintainers shall use the attached edits spreadsheets as replacements for the previously issued edits spreadsheets. Contractors are not required to replicate work already done, but are only expected to use the updates to the spreadsheets to build upon their previous core deliverables.
