Date: FEBRUARY 7, 2003

CHANGE REQUEST 2527

SUBJECT: Continuation of April 2003 Change Request (2427): Process all Medicare Part B provider enrollments in the Provider Enrollment Chain Ownership System (PECOS). Create Import/Export Functionality between the Viable Medicare System (VMS) and the Provider Enrollment Chain Ownership System (PECOS)

The following table lists the Change Requests (CR) that make up the entire PECOS/MCS/VMS/PES/PENS CR Package for the October 2003 Release: (Highlighted row indicates the current CR.)

CR #	Change Request Description
2524	Continuation of April 2003 Change Request (CR2424): Create Import/Export Functionality between the UPIN and Provider Enrollment Chain Ownership System (PECOS).
2525	Continuation of April 2003 Change Request (CR2425): Create Import/Export Functionality between Medicare Claims System (MCS) and the Provider Enrollment Chain Ownership System (PECOS).
2526	Continuation of April 2003 Change Request (CR2426): Process all Medicare Part B provider enrollments in the Provider Enrollment Chain Ownership System (PECOS). Modify MCS to incorporate all claim payment and provider correspondence functionality that is included in the Provider Enrollment System (PES) but will not be a part of PECOS.
2527	Continuation of April 2003 Change Request (CR2427): Process all Medicare Part B provider enrollments in the Provider Enrollment Chain Ownership System (PECOS). Create Import/Export Functionality between Viable Medicare System (VMS) and the Provider Enrollment Chain Ownership System (PECOS).

I. GENERAL INFORMATION

A. Background: PECOS Release 3 is scheduled to go live for carrier use in October 2003. In the October 2003 release, all Medicare carriers must enter all Provider/Supplier enrollment data into PECOS. Carrier Supplier/Provider enrollment data will no longer be entered into PES or PENS. All functions associated with provider enrollment will be handled by PECOS. PECOS will assume the responsibility for communicating with UPIN to obtain the providers' UPIN number and will work with the system maintainers of UPIN to develop import/export functions. PECOS will also assume the responsibility of communicating provider data to MCS and VMS and will work with the MCS and VMS system maintainers to develop the necessary export/import functions. This CR contains the requirements that will be used for the analysis and design phase (coding if necessary) for the July 2003 release and used for coding and testing for the October 2003 release.

B. Policy: Collection and retention of CMS 855 enrollment data has been cleared through a Paperwork Reduction Act Notice in the **Federal Register**. The authority for the various types of data to be collected is found in multiple sections of the Social Security Act and Code of Federal Regulations. Specifically in Sections 1816, 1819, 1833, 1834, 1842, 1861, 1866 and 1891 of the Act and 42 CFR Subchapter E.

II. BUSINESS REQUIREMENTS

Requirement #	Requirements	Responsibility
1	VMS must accept an extract file of provider data from PECOS. This provider data will be used to populate the VMS production provider file.	Carriers (VMS Standard System).
2	VMS must provide an extract file to PECOS. This extract file must provide the following information: <ul style="list-style-type: none"> • Confirmation of the PECOS feed into VMS. • Inactive Providers. 	Carriers (VMS Standard System)
3	Disable all PENS provider enrollment functions. Carriers will no longer enter provider data into PENS. Change users' security level in PENS to allow them view only access to the PENS data. Upon completion of the Change Request (October 2003), carriers will be responsible for entering all Medicare provider enrollment data into the PECOS system.	Carriers (VMS Standard System)
4	Disable the VMS-UPIN export/import function. PECOS will assume the responsibility of sending UPIN an extract of the provider enrollment data needed to enumerate the provider with a unique Medicare identification number. PECOS will accept a file from UPIN containing the provider's UPIN number and store this number into the PECOS file.	Carriers (VMS Standard System)

III. SUPPORTING INFORMATION AND POSSIBLE DESIGN CONSIDERATIONS

A. Other Instructions:

X-Ref Requirement #	Instructions
1	Format for PECOS extract to VMS needs to be defined and created.
2	Format for VMS extract to PECOS needs to be defined and created.

B. Design Considerations:

X-Ref Requirement #	Recommendation for Medicare System Requirements
1	When VMS receives an extract file from PECOS, VMS should create a file/report that confirms that the extract file was processed correctly.
3	Carriers will no longer enter Medicare provider enrollment data into the PENS system. As of October 2003 carriers will enter Medicare provider enrollment data into PECOS. CMS will migrate existing Medicare provider data into PECOS. Upon completion of this request, carriers will enter their Medicare provider data into the PECOS system.
4	PENS will no longer send data to the UPIN system. PENS will no longer receive and store the UPIN number. PECOS will be responsible for these functions.

A. Interfaces:

PECOS will send provider data extracts to the VMS system. PECOS will accept a file from VMS confirming that the PECOS extract to VMS was processed successfully. PECOS will accept a file from VMS containing inactive providers.

B. Contractor Financial Reporting /Workload Impact:

There will be no affect on providers or contractors.

E. Dependencies:

F. Testing Considerations:

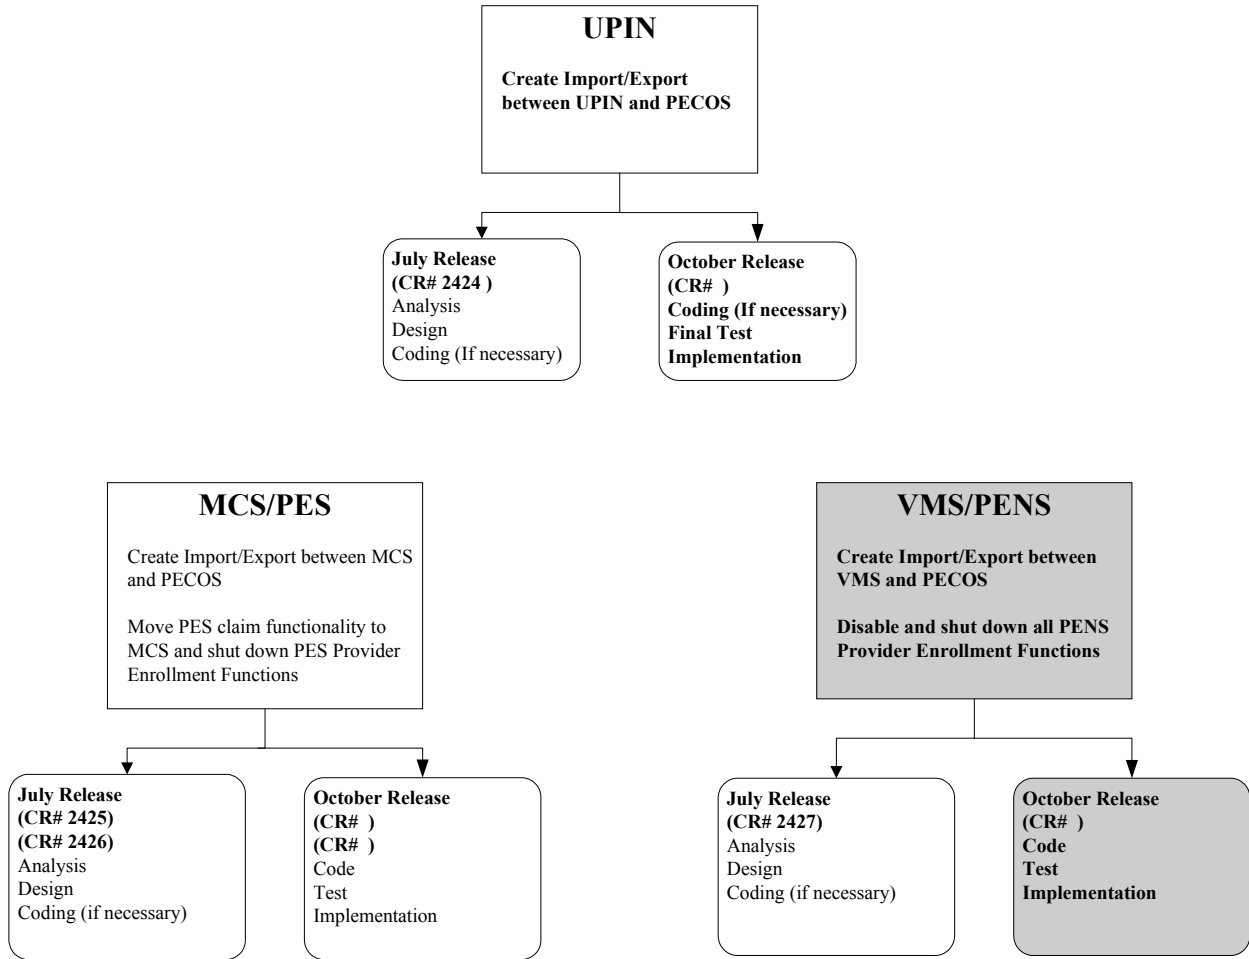

- Testing should validate that VMS and PECOS can create and process extract files from each other.
- PECOS should export data to a VMS test region and validate that the data was exported to VMS successfully
- VMS should export data to a PECOS test region and validate that the data was exported to PECOS successfully
