SUBJECT: Common Edits and Enhancements Modules (CEM) Code Set Update

EFFECTIVE DATE: April 1, 2013
IMPLEMENTATION DATE: April 1, 2013

I. GENERAL INFORMATION

A. Background: The Medicare Fee-for-Service program has made significant changes to the Medicare Administrative Contractor (MAC) local data center front end systems. These changes include the newly developed CEMs (Part A and Part B developed) for version 5010. In order for the CEMs to correctly and accurately edit the inbound Accredited Standards Committee (ASC) X12 version 5010 837 Institutional, 837 Professional claims, and the 276 Claim Status Inquiry, several code set updates are required. As part of this change request (CR), the shared system maintainers shall review the latest published code sets, and make the necessary updates to the tables developed under CR 7392, Transmittal 917, dated July 21, 2011. These changes shall then be included on the reference file updates the A/B MACs receive from the shared systems.

The Medicare Shared System Maintainers of the CEM software shall obtain the most recent external code sets, and use them to update the necessary tables and/or reference files as part of the CEM software utilized by the A/B MACs. This change became recurring with updates to Pub. 100-04, Chapter 24, Section 50.3

B. Policy: Health Insurance Reform: Modifications to the Health Insurance Portability and Accountability Act (HIPAA): Final Rules published in the Federal Register on January 16, 2009, by the DHHS at 45 CFR Part 162.
