Table 1 specifies the standard record format to be used for electronic *cost* reporting *(ECR)*. Each electronic cost report submission (file) has four types of records. The first group (type 1 records) contain information for identifying, processing, and resolving problems. The text used throughout the cost report for variable line labels (e.g., Worksheet A) and variable column headers *(e.g.,* Worksheet B-1) are included in the type 2 records. Refer to Table 5 for cost center coding. The data, detailed in Table 3, is identified as type 3 records. The encryption coding at the end of the *ECR* file, records 1, 1.01, and 1.02 are type 4 records.

The medium for transferring cost reports submitted electronically to contractors is compact *discs* (CD), flash *drive or a contractor approved form such as electronic mail, or a secured website*. The file must be in IBM format and the character set must be ASCII. Providers should seek approval from their *contractor* regarding the method of submission to ensure that the method of transmission is acceptable. *An ECR and PI files sent via electronic mail or uploaded to a secured website must be a compressed or self-extracting files*.

The following are requirements for all records:

- 1. All alpha characters must be in upper case.
- 2. For micro systems, the end of record indicator must be a carriage return and line feed, in that sequence.
- 3. No record may exceed 60 characters.

Below is an example of a set of type 1 records with a narrative description of their meaning.

Record #1:

This is a cost report file submitted by CCN 010123 for the period from May 1, 2010 (2010121) through April 30, 2011 (2011120). It is filed on the Form CMS-2552-10. It is prepared with vendor number A09's PC based system, version number 5. Position 38 changes with each new test case and/or re-approval and is an alpha character. Positions 39 and 40 will remain constant for approvals issued after the first test case. This file is prepared by the hospital on September 15, 2011 (2011258). The electronic cost report specifications, dated May 1, 2010 (2010121), *are* used to prepare this file.

#### FILE NAMING CONVENTION

Name each cost report ECR file in the following manner:

### ECNNNNNN.YYLC, where

- 1. EC (Electronic Cost Report) is constant;
- 2. NNNNNN is the 6 digit CMS Certification Number;
- 3. YY is the year in which the provider's cost reporting period ends; and
- 4. L is a character variable (A-Z) to enable separate identification of files from hospitals with two or more cost reporting periods ending in the same calendar year.
- 5. C is the number of times this original cost report is being filed.

Name each cost report PI file in the following manner:

### PINNNNNN.YYLC, where

- 1. PI (Print Image) is constant;
- 2. NNNNNN is the 6 digit CMS Certification Number;
- 3. YY is the year in which the provider's cost reporting period ends; and
- 4. L is a character variable (A-Z) to enable separate identification of files from hospitals with two or more cost reporting periods ending in the same calendar year.
- 5. C is the number of times this original cost report is being filed.

The type 2 records contain text which appears on the printed cost report. Of these, there are three groups: (1) Worksheet A cost center names (labels); (2) column headings for *step down* entries; and (3) other text appearing in various places throughout the cost report. The standard cost center labels/*descriptions* are listed below.

Worksheet A cost center labels must be furnished for every cost center with cost or charge data anywhere in the cost report. The line and subline numbers for each label must be the same as the line and subline numbers of the corresponding cost center on Worksheet A. The columns and subcolumn numbers are always set to zero.

Column headings for the General Service cost centers on Worksheets B-1, B, Parts I and II, and Worksheet J-1, Part II (lines 1-3) are supplied once, consisting of one to three records. The statistical basis shown on Worksheet B-1 is also reported. The statistical basis consists of one or two records (lines 4 and 5). Statistical basis code is supplied only to Worksheet B-1 columns and is recorded as line 5 and only for capital cost centers, columns 1-2 and subscripts as applicable. The statistical code must agree with the statistical basis indicated on lines 4 and 5, i.e., code 1 = square footage, code 2 = dollar value, and code 3 = all others. Refer to Table 2 for the special worksheet identifier to be used with column headings and statistical basis and to Table 3 for line and column references. See below for statistical basis line labels for Worksheet I-1. These line labels are required records in the file. (See 9c above for record placement.)

### **RECORD NAME: TYPE 4 RECORDS**

File Encryption and Date and Time Stamp

These type 4 records consist of 4 records: 1, 1.01, and 1.02. These records are created at the point in which the ECR file has been completed and saved to *a* disk, *CD* or *flash drive* to ensure the integrity of the file.

40-714 Rev. 5

This table contains the worksheet indicators that are used for electronic cost reporting. A worksheet indicator is provided only for those worksheets from which data are to be provided.

The worksheet indicator consists of seven characters in positions 2-8 of the record identifier. The first two characters of the worksheet indicator (positions 2 and 3 of the record identifier) always show the worksheet. The third character of the worksheet indicator (position 4 of the record identifier) is used in several ways. First, it may be used to identify worksheets for multiple hospital-based components, such as subprovider, or to identify various types of hospital services such as kidney, heart, lung, or liver acquisitions. Alternatively, it may be used as part of the worksheet, e.g., A81. The fourth character of the worksheet indicator (position 5 of the record identifier) represents the type of provider, by using the key below. Except for Worksheet A-6 (to handle multiple worksheets) and Worksheet I-4 (to handle multiple payment rates), the fifth and sixth characters of the worksheet indicator (positions 6 and 7 of the record identifier) identify worksheets required by a Federal program (18 = Title XVIII, 05 = Title V, or 19 = Title XIX) or worksheet required for the facility (00 = Universal). The seventh character of the worksheet indicator (position 8 of the record identifier) represents the worksheet part.

#### FOOTNOTES:

#### (a) Multiple Hospital-Based HHAs, CMHCs, and Hospices

The third digit of the worksheet indicator (position 4 of the record) is numeric from 1 to 0 to accommodate multiple hospital-based HHAs and CMHCs, and 1 through 5 for hospital-based hospices. If there is only one of the components, the default is 1. This affects the H, J, and K series worksheets including Worksheets S-4, S-6, and S-9. For CMHCs the fourth character of the worksheet indicator (position 5 of the record) is I.

### (b) Multiple Outpatient Rehabilitation Providers

The third digit of the worksheet indicator (position 4 of the record) is numeric from 1 to 0 to accommodate multiple providers. If there is only one outpatient provider type, the default is 1. The fourth character of the worksheet indicator (position 5 of the record) indicates the outpatient rehabilitation provider as listed below. These affect Worksheet S-6.

I = CMHC K = CORF L = OPT M = OOT N = OSP

### (c) Multiple Worksheets for Reclassification and Adjustments Before and After Step-down

The fifth and sixth digits of the worksheet indicator (positions 6 and 7 of the record) are numeric from 01-99 to accommodate reports with more lines on Worksheets A-8-2, and/or B-2. For reports which do not need additional worksheets, the default is 01. For reports which do need additional worksheets, the first page of each worksheet is numbered 01. The number for each additional page of each worksheet is incremented by 1.

### (d) Worksheets With Multiple Parts Using Identical Worksheet Indicator

Although this worksheet has several parts, the lines are numbered sequentially. This worksheet identifier is used with all lines from this worksheet regardless of the worksheet part. This differs from the Table 3 presentation which still identifies each worksheet and part as they appear on the printed cost report. This affects Worksheets A-8-3, D-1, D-2, D-4, G-2, H-5, and J-2.

### (e) <u>Multiple Subproviders</u>

The third digit of the worksheet indicator (position 4 of the record) is a numeric from 1 to 0 to accommodate facilities with two or more subproviders. If there is only one subprovider, the default is 1. This affects Worksheets D, Parts III-V; D-1; D-3; D-5, Part II; E, Parts A and B; E-1; E-3, Parts I-V; and L, Parts I and II.

### FOOTNOTES (Continued):

#### (f) Worksheet A-6

For Worksheet A-6, include in the worksheet identifier the reclassification code as the 5th and 6th digits (6th and 7th in the ECR file). For example, 3A6000A0 or 3A6000B0, 3A6000C0, 3A600AA0, 3A600AB0, 3A600AC0, *or* 3A600ZZ0.

#### (g) To be used at a later date.

### (h) Worksheet D-4

The third digit of the worksheet indicator (position 4 of the record) must be K for kidney acquisitions, an H for heart acquisitions, an L for liver acquisitions, an N for pancreas acquisitions, a P for lung acquisitions, an I for intestine, an S for islet, or O for other.

### (i) Worksheet D-5, Part I

The third digit of the worksheet indicator (position 4 of the record) must be either an H for hospital staff data or an M for medical staff data.

#### (j) Renal Dialysis

The third digit of the worksheet indicator (position 4 of the record) must contain either a D for renal dialysis department or an H for home program dialysis. This applies to Worksheets I-1, I-2, I-3, and I-4.

#### (k) Multiple Worksheet A-8-3

This worksheet is used for either physical or respiratory therapy services furnished by *outside* suppliers. The fourth digit of the worksheet indicator (position 5 of the record) is an alpha character of either P for physical therapy, R for respiratory therapy services, O for occupational therapy or S for speech pathology.

40-724 Rev. 5

FOOTNOTES (Continued):

### (1) Multiple Health Clinic Providers

The third digit of the worksheet indicator (position 4 of the record) is numeric from 1 to 0 to accommodate multiple providers. To accommodate providers 11 - 25, use alpha characters A through O. If there is only one health clinic provider type, the default is 1. The fourth character of the worksheet indicator (position 5 of the record) indicates the health clinic provider. Q indicates Federally Qualified Health Center, and R indicates Rural Health Clinic.

#### INTRODUCTION

This table identifies those data elements necessary to calculate a hospital cost report. It also identifies some figures from a completed cost report. These calculated fields (e.g., Worksheet B, column 26) are needed to verify the mathematical accuracy of the raw data elements and to isolate differences between the file submitted by the hospital complex and the report produced by the *contractor*. Where an adjustment is made, the record must be present in the electronic data file. For explanations of the adjustment(s) required, refer to the cost report instructions.

Table 3 "Usage" column *specifies* the format of each data item as follows:

- 9 Numeric, greater than or equal to zero.
- -9 Numeric, may be either greater than or less than zero.
- 9(x).9(y) Numeric, greater than zero, with x or fewer significant digits to the left of the decimal point, a decimal point, and exactly y digits to the right of the decimal point.
  - X Character.

Consistency in line numbering (and column numbering for general service cost centers) for each cost center is essential. The sequence of some cost centers does change among worksheets. The special care units are the most likely to cause errors. Table 3E provides an example with a chart of special care unit line numbers for reference. Refer to Table 4 for line and column numbering conventions for use with complexes which have more components than appear on the preprinted FORM CMS 2552-10.

Table 3 refers to the data elements needed from a standard cost report. When a standard line is subscripted, the subscripted lines must be numbered sequentially with the first subline number displayed as "01" or "1" in field locations 14-15. It is unacceptable to format in series of 10, 20, or skip subline numbers (i.e., 01, 03, except for skipping subline numbers for prior year cost center(s) deleted in the current period or initially created cost center(s) no longer in existence after cost finding). Exceptions are specified in this manual. For "Other (specify)" lines, i.e. Worksheets S-4, S-6, S-8, settlement series and any other non cost center lines, all subscripted lines should be in sequence and consecutively numbered beginning with subscripted subline "01". Automated systems should reorder these numbers where the provider skips or deletes a line number in the series.

Drop all records with zero values from the file. Any record absent from a file is treated as if it were zero.

All numeric values are presumed positive. Leading minus signs may only appear in data with values less than zero which are specified in Table 3 with a usage of "-9".

Italic script within this table denotes adjustments which are not displayed in the print image or hard copy of the cost report, but are contained in the ECR file. Examples of these type entries are Worksheets D-2, Part I; D, Part III; and D, Part IV.

<sup>\*</sup> In each column using accumulated costs as the statistical basis for allocating costs, identify each cost center which is to receive no allocation with a negative 1 (-1) placed in the accumulated cost column. Providers may elect to indicate total accumulated cost as a negative amount in the reconciliation column. However, there should never be entries in both the reconciliation column and accumulated column simultaneously on the same line. For those cost centers which are to receive partial allocation of costs, provide only the cost to be excluded from the statistic as a negative amount on the appropriate line in the reconciliation column. If line 5 is fragmented, line 5 must be deleted and subscripts of line 5 must be used.

### ELECTRONIC REPORTING SPECIFICATIONS FOR FORM CMS 2552-10 TABLE 3E - LINE NUMBERING FOR SPECIAL CARE UNITS

Cost center integrity for variable worksheets (listed below) must be maintained throughout the cost report. If you use a line designated as "(specify)" or subscript a line, the relative position must flow throughout the cost report.

EXAMPLE: If you add a special care unit after the surgical intensive care unit on line 11 of Worksheet S-3, Part I, it must also be on the first additional special care unit line of Worksheet A (line 35), Worksheet D-1, Part II (line 47), Worksheet D-2, Part I (line 7), etc.

### ELECTRONIC REPORTING SPECIFICATIONS FOR FORM CMS 2552-10 TABLE 4 - NUMBERING CONVENTION FOR MULTIPLE COMPONENTS

This table provides line and column numbering conventions for health care complexes with more than one hospital-based component of the same kind. Table 4 is necessary to insure that data associated with each component is consistently identified throughout the cost report. This table provides for four additional components. Component II is subline .01, component III is .02, component IV is .03, and component V is .04. The only deviation from this subline numbering is to *the* CMHC component(*s*) on Worksheets S-2 and S-3 as listed below. Providers should continue this numbering convention for multiple components in excess of five (5) components.

### **TABLE 5 - COST CENTER CODING**INSTRUCTIONS FOR PROGRAMMERS

Cost center coding is required because there are thousands of unique cost center names in use by providers. Many of these names are peculiar to the reporting provider and give no hint as to the actual function being reported. By using codes to standardize meanings, practical data analysis becomes possible. The methodology to accomplish this must be rigidly controlled to enhance accuracy.

For any added cost center names (the preprinted cost center labels must be precoded), the preparer must be presented with the allowable choices for that line or range of lines from the lists of standard and nonstandard descriptions. They will then select a description that best matches their added label. The code associated with the matching description, including increments due to choosing the same description more than once, will then be appended to the user's label by the software.

#### Additional guidelines are:

- o Any pre-existing codes for the line must not be allowed to carry over.
- O All "Other . . ." lines must not be precoded.
- o The order of choice is standard first, followed by specific nonstandard, and, lastly, the nonstandard "Other..." cost centers.
- o When the nonstandard "Other . . ." is chosen, the preparer must be prompted with "Is this the most appropriate choice?" and offered a chance to answer yes or to select another description.
- o The cost center coding process must be able to be invoked again for purposes of making corrections.
- A separate list showing the preparer's added cost center names on the left with the chosen standard or nonstandard description and code on the right must be printed for review.

40-804 Rev. 5

### ELECTRONIC REPORTING SPECIFICATIONS FOR FORM CMS 2552-10 TABLE 5 - COST CENTER CODING

- o The number of times a description can be selected on a given report must be displayed on the screen next to the description and this number must decrease with each usage to show the remaining numbers available. The numbers are shown on the standard and nonstandard cost center tables.
- o Standard cost center lines, descriptions, and codes are not to be changed. The acceptable format for these are displayed in the STANDARD COST CENTER DESCRIPTIONS AND CODES listed on pages 40-807 and 40-810. The proper line number is the first two digits of the cost center code. The only exceptions to the descriptions are: "Paramedical Education Program-(specify)" for which the parenthesis and specify are to be replaced by the program name, i.e., Radiology, Cytotechnology; and "Other Organ Acquisition (specify)" should be changed to specify the acquisition as listed on lines 105-111. All "Other" nonstandard lines should be changed to the appropriate cost center name and "Subprovider (specify)" type should be indicated.

#### INSTRUCTIONS FOR PREPARERS

#### Coding of Cost Center Labels

Cost center coding is a methodology for standardizing the meaning of cost center labels as used by hospitals on the Medicare cost report. The use of this coding methodology allows providers to continue to use their labels for cost centers that have meaning within the individual institution.

The five digit codes that are required to be associated with each label provide standardized meaning for data analysis. Normally, it is only necessary to code any added labels because the preprinted STANDARD labels are automatically coded by CMS approved cost report software.

Additional cost center descriptions have been identified through analysis of provider labels. The meanings of these additional descriptions were sufficiently different when compared to the Standard labels to warrant their use. These additional descriptions are hereafter referred to as the NONSTANDARD labels. Included with the nonstandard descriptions are "Other . . ." designations to provide for situations where no match in meaning can be found. Refer to Worksheet A, lines 18, 35, 76, 93, 98, 117, and 194. Both the standard and nonstandard cost center descriptions along with their cost center codes are shown on Table 5. The "USE" column on that table indicates the number of times that a given code can be used on one cost report. You are required to compare your added label to the descriptions shown on the standard and nonstandard table for purposes of selecting a code. CMS approved software provides an automated process to present you with the allowable choices for the line/column being coded and automatically associates the code for the selected matching description with your label.

#### Additional Guidelines

#### Categories

You must make your selection from the proper category such as general service descriptions for general service *cost center* lines, ancillary descriptions for ancillary cost center lines, etc.

Rev. 5

### ELECTRONIC REPORTING SPECIFICATIONS FOR FORM CMS 2552-10 TABLE 5 - COST CENTER CODING

#### Additional Hospital-Based Components

The Form CMS 2552-10 provides a preprinted label for one subprovider on line 42. However, this designation should be changed to coincide with the specific provider name. Where the preparer has the need to report more subproviders, line 42 must be subscripted as needed. After the provider's label for the first subprovider is entered, the standard description for subprovider (code 04200) is selected. The preparer then enters the provider's label for the second subprovider on subscripted line 42.01. The appropriate description "subprovider" is again selected as the correct match. The standard code 04200, incremented by one (04201), is applied to the second subprovider. Additional subproviders are handled in the same manner. *These* same procedures *apply* to all multiple components. (See Table 4) Lines 99 and 112 require specific designations from the nonstandard cost center listing.

#### **Intensive Care Cost Centers**

When an intensive care type of cost center label is added and it does not closely match the standard or nonstandard cost center descriptions, then a subscript of the intensive care description (code 03100) should be used or a nonstandard code, i.e., 03101-03119 and/or one of the nonstandard inpatient routine service cost center codes. There is no "Other Intensive Care" description available.

#### Use of Cost Center Coding Description More Than Once

Often a description from the standard or nonstandard tables applies to more than one of the labels being added by the preparer. In the past, it was necessary to determine which code was to be used and then increment the code number upwards by one for each subsequent use. This was done to provide a unique code for each cost center label. Now, most approved software associates the proper code, including increments as required, once a matching description is selected. Remember to use your label. You are matching to CMS's description only for coding purposes.

#### Cost Center Coding and Line Restrictions

Cost center codes may only be used in designated lines in accordance with the classification of the cost center(s), i.e., lines 1 through 23 may only contain cost center codes within the general service cost center category of both standard and nonstandard coding. For example, in the general service cost center category for Operation of Plant cost, line 7 and subscripts thereof should only contain cost center codes of 00700-00719 and nonstandard cost center codes. This logic must hold true for all other cost center categories, i.e., ancillary, inpatient routine, outpatient, other reimbursable, special purpose, and non-reimbursable cost centers. There are exceptions, which are contained in Table 6 edits. An example of an exception is A&G cost. Line 5 and subscripts thereof may only contain cost center codes 00500, 00510-00569, 01080-01099, and 01140-01179 (standard and nonstandard cost center codes). Other cost center lines contain exceptions that only the standard cost center codes and subscripts (usage) of that code may be used on that line and subscripts of that line. These exceptions are also contained in Table 6.

Medicare cost reports submitted electronically must meet a variety of edits. These include mathematical accuracy edits, certain minimum file requirements, and other data edits. Any vendor software which produces an electronic cost report file for Medicare hospitals must automate all of these edits. Failure to properly implement these edits may result in the suspension of a vendor's system certification until corrective action is taken. The vendor's software should provide meaningful error messages to notify the hospital of the cause of every exception. The edit message generated by the vendor systems must contain the related 5 digit and 1 alpha character, where indicated, reject/edit code specified below. Any file submitted by a provider containing a level I edit will be rejected by the contractors. Notification must be made to CMS for any exceptions.

The edits are applied at two levels. Level I edits (10000 series reject codes) are those which test the format of the data to identify for correction of those error conditions which will result in a cost report rejection. These edits also test for the presence of some critical data elements specified in Table 3. Level II edits (20000 series edit codes) identify potential inconsistencies and/or missing data items. These items should be resolved at the provider site and appropriate worksheets and/or data submitted with the cost report. Failure to submit the appropriate data with your cost report may result in payments being withheld pending resolution of the issue(s).

The vendor requirements (above) and the edits (below) reduce both contractors processing time and unnecessary rejections. Vendors should develop their programs to prevent their client hospitals from generating an electronic cost report file where Level I *edit* conditions exist. Ample warnings should be given the provider where Level II edit conditions are violated.

The Level I edit conditions are to be applied against *Ti*tle XVIII services only. However, any inconsistencies and/or omission which would cause a Level I condition for non *T*itle XVIII services should be resolved prior to acceptance of the cost report. [05/01/2010b]

Note: *The* dates in brackets [] at *the* end of *each* edit indicate effective date of that edit for cost reporting periods ending on or after that date. Dates followed by a "b" are for cost reporting periods beginning on or after and *dates* followed by an "s" are for services rendered on or after the specified date. [05/01/2010b]

### I. Level I Edits (Minimum File Requirements)

# Edit Condition The first digit of every record must be either 1, 2, 3, or 4 (encryption code only). [05/01/2010b] No record may exceed 60 characters. [05/01/2010b] All alpha characters must be in upper case. This is exclusive of the vendor information, type 1 record, record number 3 and the encryption code, type 4 record, record numbers 1, 1.01, and 1.02. [05/01/2010b]

Rev. 5

<b>Edit</b>	Condition		
10150	For micro systems, the end of record indicator must be a carriage return and line feed, in that sequence. [05/01/2010b]		
10200	The hospital provider number (record #1, positions 17-22) must be valid and numeric. [05/01/2010b]		
10250	All calendar format dates must be edited for 10 character format, e.g., 01/01/2010 (MM/DD/YYYY). [05/01/2010b]		
10300	All dates (record #1, positions 23-29, 30-36, 45-51, and 52-58) must be in Julian format and a possible date. [05/01/2010b]		
10350	The fiscal year beginning date (record #1, positions 23-29) must be less than the fiscal year ending date (record #1, positions 30-36). [05/01/2010b]		
10400	The vendor code (record #1, positions 38-40) must be a valid code. [05/01/2010b]		
10450	The type 1 record #1 must be correct and the first record in the file. [05/01/2010b]		
10500	All record identifiers (positions 1-20) must be unique. [05/01/2010b]		
NOTE: Contractor's attempt to correct if all record identifiers are not unique in their working copy and continue processing the cost report. If the condition is correctable, notify the provider's vendor and send a copy of the ECR and PI files to the vendor and CMS Central Office. CMS Central Office requires a vendor software update to resolve <i>the</i> condition. [05/01/2010b]			
10550	Only a Y or N is valid for fields which require a yes/no response. [05/01/2010b]		
10600	Variable columns (Worksheet B, Parts I <i>and</i> II, and Worksheet B-1) must have a corresponding type 2 record (Worksheet A label) with a matching line number. [05/01/2010b]		

40-812 Rev. 5

#### **Edit** Condition

All line, subline, column, and subcolumn numbers (positions 11-13, 14-15, 16-18, and 19-20, respectively) must be numeric, except as noted below for reconciliation columns. [05/01/2010b]

NOTE: If the administrative and general (A&G) cost center (Worksheet A, line 5) is fragmented into two or more cost centers, then line 5 must be deleted. Fragmented A&G lines must be in sequential order. Any cost center with accumulated costs as its statistic must have its Worksheet B-1 reconciliation column numbered the same as its Worksheet A line number followed by an "A" as part of the line number followed by the subline number.

For example, the following cost centers appear on Worksheet A, lines 5.01 to 5.06.

5.01 Nonpatient telephones	00540
5.02 Data processing	00550
5.03 Purchasing, receiving, and stores	00560
5.04 Admitting	00570
5.05 Cashiering/accounts receivable	00580
5.06 Other administrative and general	00590

If line 5.06, other administrative and general, is allocated based on accumulated cost, then the reconciliation column must be numbered 5A.06. This edit does not require consecutive numbering, only sequential. Line numbers may be skipped but must be in sequential order, e.g., 5.01, 5.02, 5.04, 5A.06. [05/01/2010b]

The cost center code (positions 21-25) (type 2 records) must be a code from Table 5, Cost Center Coding, and each cost center code must be unique. [05/01/2010b]

## **Edit** Condition

The following standard cost centers listed below must be reported on the lines as indicated and the corresponding cost center codes may only appear on the lines as indicated. #### **Edit** Condition

10750 Cost center integrity for variable worksheets must be maintained throughout the cost report. For subscripted lines, the relative position must be consistent throughout the cost report. (See Table 3E) [05/01/2010b]

EXAMPLE: If you add a neonatal intensive care unit on line 12 of Worksheet S-3, Part I, it must also be on the first other special care unit line of Worksheet A (line 35), Worksheet D-1, Part II (line 47), Worksheet D-2, Part I (line 7), etc.

- For every line used on Worksheets A; B, Part I; C, Part I; D, Parts I-V; and D-2, D-3, D-4 and G-2 there must be a corresponding type 2 record. [05/01/2010b]
- Fields requiring numeric data (days, charges, discharges, costs, FTEs, etc.) may not contain any alpha character. [05/01/2010b]
- 10900 A numeric field cannot exceed more than 11 positions. Apply to all cost reports. [05/01/2010b]
- In all cases where the file includes both a total and the parts which comprise that total, each total must equal the sum of its parts. [05/01/2010b]

EXAMPLE: The inpatient departmental charges on Worksheet C, Part I, column 6, sum of lines 30-117, must equal total departmental charges as reported on Worksheet C, Part I, column 6, line 200.

- All dates must be possible, e.g., no "00", no "30" or "31" of February, and the date cannot be greater than the current date. [05/01/2010b]
- 10000S The hospital address, city, state, and Zip code (Worksheet S-2, Part I, lines 1 and 2, columns 1, 2, and 3 respectively) must be present and valid. [05/01/2010b]
- 10025S The provider's CBSA (Worksheet S-2, Part I, column 3, lines 3 through 19) must be a 5 position *a*lphanumeric field. [10-01-2012b]
- 10050S The cost report beginning date (Worksheet S-2, Part I, column 1, line 20) must be on or after 05/01/2010.[05/01/2010b]
- 10100S The type of control (Worksheet S-2, Part I, column 1, line 21) must be present and a valid code of 1 thru 13. [05/01/2010b]
- 10150S All provider and component numbers displayed on Worksheet S-2, Part I, column 2, lines 3-10, 12-19 and line 140, column 2 must contain six (6) alphanumeric characters. [05/01/2010b]
- 10200S The cost report period beginning date (Worksheet S-2, Part I, column 1, line 20) must precede the cost report ending date (Worksheet S-2, column 2, line 20). [05/01/2010b]
