### Meaningful Use Menu Measures

#### Questionnaire

##### Instructions:

EPs must report on a total of five (5) Meaningful Use Menu Measures. At least one of the five measures must be from the public health menu measures. Should the EP be able to successfully meet only one of these public health menu measures, the EP must select and report on that measure to CMS. Having met one public health menu measure, the EP must then select any other four measures from the Meaningful Use Menu Measures. In selecting the remaining four measures, the EP may select any combination of the remaining public health menu measures or from the additional Meaningful Use Menu Measures in the list below.

If an EP meets the criteria for and can claim an exclusion for both of the public health menu measures, the EP must still select one public health menu measure and attest that the EP qualifies for the exclusion. The EP must then select any other four measures from the menu measures, which can be any combination of the remaining public health menu measures or from the additional Meaningful Use Menu Measures in the list below. CMS encourages EPs to select menu measures that are relevant to their scope of practice and to claim an exclusion for a menu measure only in cases where there are no remaining menu measures for which they qualify or if there are no remaining menu measures that are relevant to their scope of practice.

## Report a total of five menu measures

*Note: you may log out at any point during this attestation*

# Public Health Measures

You must submit at least one Meaningful Use Menu Measure from the public health list even if an Exclusion applies to both:

Objective	Measure	Select
Capability to submit electronic data to immunization registries or immunization information systems and actual submission in accordance with applicable law and practice.	Performed at least one test of certified EHR technology's capacity to submit electronic data to immunization registries and follow up submission if the test is successful (unless none of the immunization registries to which the EP submits such information have the capacity to receive the information electronically).	<input type="checkbox"/>
Capability to submit electronic syndromic surveillance data to public health agencies and actual submission in accordance with applicable law and practice.	Performed at least one test of certified EHR technology's capacity to provide electronic syndromic surveillance data to public health agencies and follow-up submission if the test is successful (unless none of the public health agencies to which an EP submits such information have the capacity to receive the information electronically).	<input type="checkbox"/>

Select up to two from the Public Health Measures

# Additional Measures

**You must submit additional menu measure objectives until a total of five Meaningful Use Menu Measure Objectives have been selected, even if an Exclusion applies to all of the menu measure objectives that are selected (total of five includes the public health menu measure objectives):**

Objective	Measure	Select
Implemented drug-formulary checks.	The EP has enabled this functionality and has access to at least one internal or external drug formulary for the entire EHR reporting period.	<input type="checkbox"/>
Incorporate clinical lab-test results into EHR as structured data.	More than 40% of all clinical lab tests results ordered by the EP during the EHR reporting period whose results are in either in a positive/negative or numerical format are incorporated in certified EHR technology as structured data.	<input type="checkbox"/>
Generate lists of patients by specific conditions to use for quality improvement, reduction of disparities, or outreach.	Generate at least one report listing patients of the EP with a specific condition.	<input type="checkbox"/>
Send reminders to patients per patient preference for preventive/follow up care.	More than 20% of all unique patients 65 years or older or 5 years old or younger were sent an appropriate reminder during the EHR reporting period.	<input type="checkbox"/>
Provide patients with timely electronic access to their health information (including lab results, problem list, medication lists and allergies) within 4 business days of the information being available to the EP.	At least 10% of all unique patients seen by the EP are provided timely (available to the patient within four business days of being updated in the certified EHR technology) electronic access to their health information subject to the EP's discretion to withhold certain information.	<input type="checkbox"/>
Use certified EHR technology to identify patient-specific education resources and provide those resources to the patient if appropriate.	More than 10% of all unique patients seen by the EP during the EHR reporting period are provided patient-specific education resources.	<input type="checkbox"/>
The EP who receives a patient from another setting of care or provider of care or believes an encounter is relevant should perform medication reconciliation.	The EP performs medication reconciliation for more than 50% of transitions of care in which the patient is transitioned into the care of the EP.	<input type="checkbox"/>
The EP who transitions their patient to another setting of care or provider of care or refers their patient to another provider of care should provide summary of care record for each transition of care or referral.
