

CROSSWALK CHANGES TO CMS-10611 MOON

Change #	<u>Form</u>	<u>Change</u>	<u>Current Location</u>	<u>Reason</u>
1	CMS-10611	Updated form so that it adheres to CMS' current forms formatting by adding the Department of Health and Human Services logo and changing font.	All over	CMS Office of Communication prefers all forms to have a similar appearance so that the form is easily recognized as a CMS form
2	CMS-10611	Create space at top of form for fill areas for patient name, patient number, hospital name and hospital address	Top of page 1	Previous version required hospitals to insert the hospital name and any other hospital information at the top of the page but there was no indicator line identifying what that information was. The revision has the patient and hospital names identified and located together for easy reference.
3	CMS-10611	Created a header flagged as "Important!" This briefly explains the purpose of the notice which helps the patient identify what it's for immediately.	Page 1	Add header flagged as "Important!" to highlight the purpose of the notice and make the statement brief.
4	CMS-10611	Revised all bullets on page 1 to shorten and consolidate the information. Working from standards used across the agency, the Office of Communications helped MEAG to revise the information and phrase it in plain language. The notice retains only the information that the patient will be able to use immediately.	Page 1	Consolidate and clarify information that is relevant. Removed information that might not apply or could cause confusion.
5	CMS-10611	Move the hospital-fillable section from the top of the page to appear after the informational bullets.	Page 1	Move the space for the hospital to insert free text explaining "You aren't an inpatient because:" After the notice lists some basic information on the difference between inpatient and outpatient receiving observation services, the hospital can insert relevant details specific to the patient's circumstances in this free text field.
