

MAIN STUDY - ROUND 16
COMMUNITY COMPONENT
CT. INTERRUPT

Disable Interrupt entirely for exiting SPs where previous interview was not skipped. Otherwise:

Display entire Interrupt menu. Options 2 through 99 should be accessible for all interview types except Type 3. Options 6, 7, 8, 9, 10 and 11 should not be accessible for Type 3 cases (New Sample). If these options attempted for Type 3 interview, display message, "THIS OPTION NOT AVAILABLE FOR INTERVIEW."

This menu should be accessible to the interviewer except during sections UPD, IR, ST, NS, or CPS. If access is attempted while the interviewer is in ST, NS, or CPS, display the error message: "CTRL/I ALLOWED AFTER THE COMPLETION OF THE CHARGE SERIES." If access is attempted while interviewer is in UPD or IR, display general message indicating Interrupt disabled.

Do not allow Option 11 to be selected before CPS. If access is attempted, display message, "COMPLETE SECTION CPS BEFORE ADDING A REIMBURSEMENT/REFUND." on the Interrupt menu.

Note: If an event goes to NS from Interrupt and this is SP's exit interview, follow skip patterns to CPS questions before returning to Interrupt menu.

If 1 entered, go to ST3. When statements have been entered, return to Interrupt Menu.

If 2 entered, go to Interrupt Menu.

SOME ADDITIONAL COMMENTS
ON
INTERRUPT - OPTION 10

1. **Complexities of adding new statements at any point during the interview.** Since there are a number of problems around the presentation and treatment of adding a statement any time prior to the end of the Charge/Payment Summary, interviewers will not be allowed to add a statement any time they want (or for that matter, use CTRL/I during section ST, NS or CPS). New statements/charge bundles cannot be added during the Statement series (the initial time through), the No Statement series, or the Charge/Payment Summary. Through Interrupt Option 10, the interviewer will be allowed to enter a statement after completing the Charge/Payment Summary. In addition, we have added a code option to NS1 that will allow the interviewer to enter a statement if one is produced as a result of the event prompt. Specifically, the new codes and skips for interviewer selection at NS1 are:

YES	1 (NSINTRO1/NSEND)
NO	2 (NS2)
EVENT ENTERED IN ERROR.....	3 (NSINTRO1/NSEND)
HAVE STATEMENT FOR EVENT	4 (ST3)
REFUSED	-7 (NS2)
DON'T KNOW	-8 (NS2)

2. **Linking a No Statement event to a statement charge bundle.** By adding the code "HAVE STATEMENT FOR EVENT" to NS1, we will now be able to handle this situation. If, during the event prompt the interviewer realizes that an event should have been part of a Statement charge bundle, s/he should enter 4 at NS1. At ST3, the interviewer will go through the Statement series for this claim number again, this time correcting the events within the charge bundle.
3. **Discovering an entry error in amounts.** The interviewer will not be able to change a specific amount associated with a charge bundle by using Interrupt. Instead, the interviewer will use the following procedures to make corrections to amounts. If an error in amount entered is discovered:
 - during the Statement series while still in that particular charge bundle, s/he should back up to the appropriate screen and make the correction.
 - during the Statement series, but not while still in that particular charge bundle, s/he should enter the statement again (keep in mind that the bundling of events will be handled as a review for this scenario).
 - after the No Statement series has been completed, s/he should enter 1 at NSEND.
 - during the No Statement series, but not while still in that particular charge bundle or after the No Statement series has been completed, s/he will record the information in Comments. Since this type of error is not likely to occur (currently there is no documentation or review to prompt the interviewer's change), it is not worth the effort of incorporating the ability to change an incorrect amount into the Interrupt function.
