¹Represents total expenditures aggregated on an incurred basis. Because of differences in methodology, definition, and completeness, the PHCE for Medicare hospital services are somewhat higher than the corresponding Medicare program payments for all hospital services shown elsewhere in this publication. PHCE excludes health expenditures for construction, program administration, government public health activities, and research.

²This index compares the relative aggregate expenditures for this category in each given year relative to the aggregate expenditures for this category in 1970.

Expenditures are in current dollars.

NOTES: Numbers may not add to totals due to rounding. Refer to "CMS Data and Statistics," for National Health Expenditures data files and category definitions <www.cms.hhs.gov/statistics/nhe>.
