¹Represents beneficiaries who received covered services under fee-for-service (FFS) and for whom program payments were made. Includes a small number of Medicare beneficiaries with no cost-sharing liability.

²Includes beneficiary balance billing cost-sharing liability.

³Medicare enrollees in managed care plans are not included in the denominator used to calculate utilization rates and average payments. The numerators for the ratios of persons served per 1,000 include beneficiaries alive and enrolled in FFS at any point in the year. Essentially every FFS enrollee over 85 alive at some point during the year has used a covered reimbursed service, rates over 1,000 may be seen

⁴Excludes persons who did not have cost-sharing liability.

⁵Excludes unknown race. Because of the availability of expanded codes for race, the methodology for calculating data for other race has been revised from earlier years.

⁶Includes aged persons with end stage renal disease (ESRD).

⁷Includes disabled persons with ESRD and persons entitled to Medicare because of ESRD only.

⁸Excludes outlying areas.

NOTES: A small amount of deductible payments can not be accounted for because of missing bills and truncating of cents. CBSA is core-based statistical areas. Numbers may not add to totals because of rounding.
