1.1	Purpose and Scope	3
2	2015 TO 2016 CHANGE SUMMARY	3
2.1	Additions and Deletions to the 2016 File Specifications	3

1 Specification Updates

1.1 Purpose and Scope

This document illustrates the differences between the HEDIS^{®1} 2015 Patient-Level file specifications (2014 Measurement Year) and the HEDIS[®] 2016 Patient-Level file specifications (2015 Measurement Year) documents. Again this year, we will collect two documents: File 1 consists of all measures, except the Plan All-Cause Readmissions (PCR) measure, which is contained in File 2.

2 2015 to 2016 Change Summary

2.1 Additions and Deletions to the 2016 File Specifications

There are **8 additions** to the HEDIS Medicare measures for HEDIS 2016, for which reporting is required:

- Statin Therapy for Patients With Cardiovascular Disease (SPC)
- Statin Therapy for Patients With Diabetes (SPD)
- Inpatient Hospital Utilization (IHU)
- Emergency Department Utilization (EDU)
- Hospitalization for Potentially Preventable Complications (HPC)
- Asthma Medication Ratio (AMR)
- Medication Management for People with Asthma (MMA)
- Medication Reconciliation Post-Discharge (MRP)

No *Medicare* measures were retired from the 2015 collection year for the 2016 PLD file.

It is important to note that several measures were revised for 2016, and although specific revision details can be found in the *Summary of Changes* or *Appendix 1* of the **HEDIS 2016 Technical Specifications for Health Plans Volume 2**, updated file layouts can be found in the specification documents noted below:

- “HEDIS 2016 Patient-Level Data File Specifications File 1 of 2”
- “HEDIS 2016 PCR Patient-Level Data File Specifications File 2 of 2”

A crosswalk for each file follows.
